We by all means advise you to buy the Ben Franklin Washing Machine because it is the latest and most up to date machine made and will do the work better than any of the $75.00 to $100.00 machines sold by others. **You cannot get a better machine.** This we know because we have investigated the power washing machine proposition very thoroughly and are offering the best machines we can find at our usual factory to user price. If you don't care to invest as much as $59.95 (our bargain price) for the Ben Franklin Washing and Wringing Machine, then we advise you to buy our Wizard Washer at $39.95, which we will guarantee to do the work as well and be equal to any $60.00 to $75.00 machine you can buy elsewhere.

We will gladly ship on thirty days' trial. Send us the catalog price, stating whether you have alternating or direct current, also tell us what the cycle and phase of your current is and we will ship you a machine at once. You may use it thirty days, washing every day if you so desire, and if at the expiration of thirty days you decide that you do not want to keep the machine, return it to us and we will send back your money, together with the freight charges you paid.

Don't buy an electric washing machine anywhere else unless you order one of these machines at the same time and compare both of them side by side. We know that our machines will outwash any other electric machine on the market, even the highest priced machines, and for this reason make the above liberal terms.

GUARANTEE. **We fully guarantee either the Wizard or Ben Franklin Electric Washers** to be perfect in material and workmanship and to give perfect satisfaction. We agree to replace any part or parts giving out by reason of defect in material or workmanship free of charge to the purchaser.

COST OF OPERATION. **Either of these machines will consume about 2 cents worth of electricity per hour,** so an ordinary washing can be done at a cost of 5 cents for electric power.

HOW TO ORDER. **In order that we may send you the proper motor,** it is necessary for you to answer the questions asked below. This information you can obtain from your electric light company. **Have you alternating or direct current? What is the voltage? What cycle is it? What phase is it?** Your electric light company will readily give you this information, and in ordering give us the catalog number of the machine you want and enclose our price. The machine will be shipped at once with the clear understanding that you are to have thirty days' trial and may return the machine without any expense whatever to you if you are not satisfied.

THE WIZARD ELECTRIC WASHER.

Our High Speed Wizard Hand Power Washer has proved so successful and we have had so many calls for a low priced, reliable, electric washing machine, we have rebuilt our High Speed Wizard Washer, adapting it for electrical operation; and base our price as usual on actual factory cost. We have carefully tested it under extra heavy loads, subjecting all parts to a much greater strain than any ordinary use, and we guarantee it to be the simplest, best, lowest priced electric washing machine offered by anyone.

CONSTRUCTION. **Tub, selected cedar, mounted on substantial stand as illustrated;** bottom and sides fully corrugated; tub finished in natural wood, oiled and varnished. Wringer box provided so an ordinary wringer can be clamped to the machine.

TRANSMISSION. **Gearing, the very best gray iron castings,** designed extra heavy to withstand the extra wear to which a power machine is subjected. Gearing is direct and simple; main drive wheel securely mounted to heavy bracket on side of tub; remainder of gearing attached in such a way that it automatically disengages with drive wheel when lid of machine is raised, making it unnecessary to remove belt each time you open lid.

ELECTRIC MOTOR **is fully guaranteed and will develop more than sufficient power to operate machine.** Switch conveniently attached to washtub so operating mechanism can be stopped instantly. A good length of approved electric cord provided, fitted with plug that can be screwed into any convenient electric light socket same as a light.

TRY IT AT OUR RISK FOR THIRTY DAYS. **Send us your order as illustrated below and we will ship the washing machine complete.** Try it out thoroughly for thirty days and if you are not perfectly satisfied, you may send the machine back at our expense and we will at once return the price you paid and all freight charges. Shipped from factory in Chicago.

No. 11F7522 Wizard Washing Machine. Price..... **$39.95**

DON'T FORGET. **When sending your order be sure not to forget to give us information regarding your electric current.** Find out from your electric light company: First, **the voltage;** second, **whether alternating or direct current.** If alternating current, tell **us number of cycles and phase.** Shipping weight, 140 pounds.

THE BEN FRANKLIN ELECTRIC WASHE

Water Power Washing Machines

While we recommend an electric washing machine and wringer to those who have electric power, we offer our line of water power washing machines to those who have no electric power or do not care to invest in an electric machine and to those who have sufficient water pressure to operate the machine. Either style of our water power washing machines can be operated successfully on a pressure of 20 pounds to the square inch at the faucet and a water flow of not less than 3 to 4 gallons per minute.

The most disagreeable feature of the weekly washing is the rubbing of the clothes and by using one of our Water Witch Washing Machines this disagreeable labor can be done away with. Simply put soap, water and clothes in the tub, connect the hose on the motor with the faucet, turn on the water and you can sit down and watch the machine work. There is no need to slave over a washboard or tire yourself by using the old style hard running hand machines.

TRIAL AT OUR RISK. **You can do several washings on one of our Water Witch Washing Machines** and if you are willing to part with it after giving it a thorough trial, you may send it back and we will return the price you paid for it, together with freight charges you paid. We know what these machines will do or we would not offer you one on such liberal terms.

CONSTRUCTION. **The tub used on these machines is made of the best selected cypress throughout** and mounted on detachable legs cross braced at the bottom. The inside of tub and bottom are fully corrugated. The tub is handsomely finished in the natural wood. The motor and other parts are the very best we can procure.

YOUR CHOICE **of two styles of motors;** one gearless and the other geared, as shown in the illustrations and as described below. If you want to do away with the hard work of washing your clothes, be sure to order one of these machines and at least give it a trial. We know that you will not part with it for twice the price, if you could not get another one. We recommend the gearless machine No. 11F7518.

GEARED WATER WITCH WASHING MACHINE.

The tub of this machine is made of selected cypress, handsomely finished in the natural wood and is mounted on detachable legs and cross braced at the bottom. Wringer box is provided so that wringer can be conveniently attached to the tub.

MOTOR. **The motor used on this machine is the very best plunger type motor we can get.** All parts of the motor which come in contact with the water are of brass, the gears being of best quality gray iron castings. This motor is of the plunger type and will give perfect satisfaction on any pressure from 20 pounds up, and will do the work quickly, easily and quietly. The patent gear transmission is made so that no cogs are exposed, making it perfectly safe even though children are about. Dolly or agitator inside the tub rotates back and forth drawing the clothes through the hot suds which cleans the clothes rapidly and easily. The corrugations on the bottom and sides of tub gently rub the clothes, assisting in the cleansing operation.

DON'T TAKE OUR WORD FOR IT. **Send us your order, enclosing our price, and we will ship one of these machines to you immediately.** Try the machine thoroughly and if you are willing to part with it after thirty days' use, you may send it back at our expense and we will return your money, together with the freight charges you paid, so you won't be out one penny. **Order by number.** Shipping weight, 90 pounds. Shipped from factory in New York.

No. 11F7514 Geared Water Witch Water Power Washing Machine. Price..... **$12.40**

GEARLESS WATER WITCH WASHING MACHINE.

The gearless motor used on this machine is without exception, the most powerful and simplest motor manufactured.

MOTOR. **The motor on this machine is the simplest, most powerful and easiest motor made,** and is constructed of brass throughout. There are no to wear or get out of order. On 20 pounds water pressure and a flow of 3 gallo will do perfect work. Being directly connected to the dolly or agitator there is no l motion. The agitator draws the clothes back and forth through the hot suds and this in the gentle rubbing given by the corrugated sides and bottom of tub cleans the clothes of this machine is made of the best quality cypress, handsomely finished in the natu mounted on detachable legs, braced at the bottom, making a very substantial outfit

LET THE WATER DO YOUR WORK. **There is no more need for you to of steaming suds or to wear your** the old fashioned hand machines when for the low price of $12.40, you can procure operates at practically no expense and does the work better than you can do it by hand

WE TAKE THE RISK. **Send us your order today for one of these machines** perfectly satisfied with it after using it for thirty days it back and we will return the price you paid, together with the transportation charges not be out one penny. Better send your order at once and do your next washing the half the time it now takes to do it. **Order by number.** Shipping weight, 90 pounds factory in New York.

VACUUM CLEANERS

THE ONLY METHOD OF CLEANING CARPETS, RUGS, CURTAINS, ETC., THAT IS SANITARY AND NOT INJURIOUS TO THE HEALTH.

"EVERYBODY'S" VACUUM CLEANER $12.50

THIS EXACT SAME IDENTICAL MACHINE IS REGULARLY SOLD FOR $25.00.

We Cut the Price in Half

AT OUR PRICE THIS IS THE BEST VALUE EVER OFFERED IN A HAND POWER MACHINE.

Everybody's Vacuum Cleaner is a high grade, excellent working machine at a price within the reach of all. The machine you have been waiting for. **There is no better hand power machine made. This exact same identical machine is sold for $25.00. We cut the price in half.** Suitable for either city or country use, light in weight and easy to operate. Made strong and durable, will last a long time with ordinary care.

SPECIAL PRICE $12.50

Everybody's Vacuum Cleaner has bellows or diaphragm action, a which is used in most high priced electric cleaners. The suction ed by two circular bellows, one at each end of cylinder, and close at each stroke of the lever. While one bellows air the other is taking it in, giving a continuous even enough volume for thorough cleaning. As the air enters the it is strained through a closely woven cloth bag, leaving dust, etc., in the bag.

machine and lever handle are made of selected hardwood, to chill oak. Cylinder is 9 inches in diameter and made of steel, ribbed to add strength, and is painted on the out- aluminum bronze paint. It rests on two wood supports securely.

are made of the best tough flexible leather, is made of closely woven cloth, and is easily taken out for and emptying.

with this cleaner 9 feet of spring steel wire inserted rubber hose of good quality, which will not collapse nor kink handle is polished brass, length 4 feet, and floor tool is heavily nickel plated, with 6⅝x¼-inch opening. Hose and fitted together measure over 13 feet, long enough to part of an ordinary room without moving machine.

occupies a floor space of only 12x26 inches and handle for storage in small space. Machine alone weighs only 20 about 24 pounds complete with hose and nozzle. Shipping securely packed, about 30 pounds.

is operate than any other hand vacuum cleaner made.

Everybody's Vacuum Cleaner. Price, com- illustrated and described..... **$12.50**

"QUICK AND EASY" VACUUM CLEANER

Our "Quick and Easy" Vacuum Cleaner is an American made and improved reproduction of the expensive French type vacuum cleaners that sell for $15.00 and up. It is light in weight, handsome in appearance and thoroughly practical in use, also easy to operate and does better work than any other vacuum cleaner of this type made.

Our Special Price, $4.15

It Cleans Carpets, Rugs and mattings without removing them from the floor; cleans them thoroughly, gets the dust, dirt and germs. Does the work quicker and better than brushes, brooms and sweepers. Requires only one person to operate, which makes it especially useful where the housewife has no one to help her, or where one servant cleans house alone. It works easily, makes no noise and stirs up no dust. Machine is antique copper plated finish, has hardwood handles and weighs about 5 pounds. Full directions for using furnished with each machine.

No. 9F293 "Quick and Easy" Vacuum Cleaner.

Our Special Price..... **$4.15**

OUR DUST KILLER VACUUM CLEANER $16.50

Our Dust Killer Vacuum Cleaner is a cylinder or pump machine. It has a valve and piston and works on the well known principle of a water pump. The movement of the lever handle backward and forward pumps the air up through the hose and nozzle, bringing with it all the loose dirt, dust, insects, etc. The air is strained through a double cloth bag, leaving the dust and dirt in the bag. It has a 12-inch stroke of lever, gives practically a continuous suction of great volume and of sufficient strength for thorough cleaning. It works easier than other machines of equal capacity that sell for even twice our price. It is a strong, well braced machine, and the thousands in satisfactory use all over the country are its best recommendation.

Strongly made of brass, iron and steel, with wood base and lever handle. Frame is made of iron securely braced and is very

$16.50

rigid. Hose is 12 feet long, made of best rubber and interlined with spring steel wire, which prevents collapsing and kinking. Hose is 1 inch inside diameter, extra large size, permitting a great volume of air to pass through. Nozzle, 3½ feet long, made of polished brass tubing. Nozzle or mouthpiece is of aluminum and has an opening measuring 5¾x¼ inches. Hose and handle fitted together are over 15 feet in length, long enough to reach the farthest corner of any ordinary room without moving the cleaner. The machine is handsomely finished in aluminum bronze paint; base and handle are neatly stained; nozzle and nozzle handle are full polished. It occupies a floor space 15x38 inches and its handles can be taken apart for storage in a small space. Weight of machine complete, about 40 pounds; light enough to be carried about. The only directions necessary for operating our Dust Killer Vacuum Cleaner are to keep it cleaned and oiled and empty the dust reservoir occasionally. Full and simple instructions with each machine tell how to do this.

You can buy a Dust Killer Vacuum Cleaner only from us. We sell them under our usual guarantee of satisfaction. We have tested the Dust Killer Vacuum Cleaner and know it will do what we claim for it. **All that we ask is that you give it the chance to prove this to you in your own home.** After ten day's use we feel sure that you would not do without it for $50.00 cash. Shipping weight, securely packed, about 50 pounds.

FIVE WINNERS THAT BEAT ALL OTHERS IN THE PRICES WE QUOTE.

Improved Mrs. Potts Asbestos Lined Sadirons.

$1.42 Top and Handle Always Cool. Note the Asbestos Lining.

No. 9F22049 This set of asbestos lined sadirons is the best of all in appearance, finish and quality. They are extra well polished and then heavily nickel plated. A heavy asbestos lining under the cap holds the heat in the base and keeps the top always cool. This asbestos lining is fully protected from wear and will last as long as the irons. Patent air chambers on the ends of handle prevent charring the wood and heating the handle. No set of irons at any price will prove as satisfactory in use as this set. They are the very best made. Set consists of one 4 pound rounded end polishing iron, two general purpose irons, 5⅛ and 5⅝ pounds, one detachable patent cold handle and one improved sheet steel stand.
Price, complete set.....$1.42

IRONING BOARDS.

Usual Price Elsewhere, $1.25 — OUR PRICE, 67c

No. 9F28414 Selected seasoned top smoothly finished; hardwood legs. Superior in every way to boards usually offered at $1.25. When not in use folds into small space. Size board, 4 feet 8 inches long; 12 inches wide. Weight, about 15 pounds.
Price, 67c

SOLID COPPER WASH BOILERS.

Do you need a wash boiler? Wash boilers made of solid copper are the best for you to buy because they will outwear half a dozen tin boilers and will never rust or discolor the clothes. Do not let the fact that our prices are from $1.00 to $1.50 lower than those of other dealers give you the impression that our solid copper wash boilers are inferior or not fully up to standard. We sell more boilers than any other dealer in the country and our full guarantee goes with every boiler. For satisfactory service they cannot be excelled. These solid copper wash boilers are made of best quality heavy, polished sheet copper, tinned on the inside and have heavy tin covers. They have flat copper bottoms and drop handles; are well riveted, wired around the top and double seamed to prevent leaking. We guarantee every solid copper wash boiler to be perfect in material and workmanship, full size and weight, and not to leak.

No. 9F25007 No. 8. Size, 10⅜x20⅞ in. Price, $2.33 | No. 9F25008 No. 9. Size, 11½x22½ in. Price, $2.48

TRAVELERS' COMPANION.

No. 9F2436 Pure Aluminum. Useful on a train, a boat or elsewhere to heat liquids. Stand and burner fit inside vessel; handles fold close to sides, making a compact stove that can easily be packed in grip or suit case. Burns alcohol, heats quickly. Capacity, 1 pint.
Price.....90c

A SET. NICKEL PLATED SENSIBLE SADIRONS.

96c

A handsome, durable and convenient outfit, consisting of three highly nickel plated sadirons, ground by perfect machinery, which makes every iron true. Faces shaped to make ironing easy. These irons hold heat longer than the ordinary Mrs. Potts irons. Handle does not shake, fits the hand perfectly and cannot become accidentally detached. Irons are double pointed. One each size, 5, 6 and 7. Just the right weights for family use.
No. 9F22056 Price, per set of three irons, detachable handle and stand.....96c
No. 9F22057 Extra handle.....10c

WASHBOARDS.

No. 9F28085 Best washboard made at any price. Outlasts five or six of the kind usually offered. Rubbing surface made of hardened sheet brass; will not corrode, crack nor get out of shape. Has latest improved corrugated cable crimp and will do the washing with one-half the labor required on ordinary boards. Not necessary to rub so hard, as this improved board makes washing easy. Has protector top and open back braced with truss rods so that rubbing surface can never sag. Price.....32c
32c

No. 9F28090 Old Reliable Banner Globe Double Washboard. Standard family size; double zinc surface; globe crimp on one side, plain crimp on other; hardwood frame and protector top; strong and well made. Price, 27c

No. 9F28096 Our Leader Washboard. Single zinc rubbing surface with globe crimp. Protector top. A strong and durable board at a small price. Price.....18c

Sadiron Heater.

No. 9F22085 For gas, gasoline or oil stoves.
Price.....19c

78c A SET. GENUINE MRS. POTTS SADIRONS.

No. 9F22048 Genuine double pointed, cold handle Mrs. Potts Sadirons, as originally made by the Enterprise Mfg. Co. and usually sold elsewhere for $1.00 per set. Handle is hardwood, with wrought iron cross piece and steel spring. Irons are smoothly polished, with faces slightly convexed, which makes ironing easy. Set consists of one 4-pound rounded end polishing iron, two general purpose irons, weighs 5⅛ and 5⅜ pounds, one detachable handle and one improved iron stand.
Price, complete set.....78c

FOLDING DUCK CLOTHES BASKET.

No. 9F22044 Made of strong white duck, fastened to a substantial hardwood frame. Holds as much as an ordinary wicker basket. When open is 24x19x13 inches.
Price, 85c

$2.65 ELECTRIC SADIRON.

No. 9F22050 Not excelled for service by higher priced irons. Irons are more elaborately finished. Heating coil is in direct contact with base and end, thereby heating entire base very quickly. Asbestos sheet in base and top holds heat in the base, and keeps top cool. All parts are interchangeable and can be replaced, but with ordinary care iron will last many years. It is adapted for 110 volts, and holds heat so long that it can be used successfully with current turned off half the time. Heater cord is 2 yards long, connected with iron and a separable porcelain plug is supplied for connecting with lamp socket. The long cord allows free movement. Iron weighs 6 pounds and is suitable for all household and laundry work.
Price, complete with stand.....$2.65

56c A SET. MRS. POTTS PATTERN IRONS.

THE BIG BARGAIN SET.

No. 9F22045 Considered a bargain elsewhere at 85c per set; at our price of 56 cents they are an unmatchable value. Set consists of one polishing iron, weight 4 pounds, two regular irons, weight 5⅛ and 5⅜ pounds, one handle that fits all three irons and one improved pattern iron stand. Irons are nicely polished, with aluminum bronze finished tops. Handle is hardwood, is nicely finished and fits the hand perfectly. Good quality irons and far more convenient than the old style flatirons.
Price, complete set.....56c

32c Nickel Plated Sleeve Iron.

No. 9F22059 Detachable handle. Wt., 4 lbs., 8 in. long. Price, 32c

Price.....8c

TRAVELERS' COMPANION.

No. 9F22062 An electric iron, stove and curling iron heater all in one. When away from home, rooming or traveling, you can do your own ironing, or iron can be converted into an excellent small stove by using stand, and you can do your own light cooking, make tea or heat water as required. Iron is also fitted with holes in back to heat two curling irons at the same time. Every article is made of the best materials. Set consists of one 3-pound electric iron highly finished and nickeled, one folding ebony handle curling iron, one stand for converting iron into stove, one 1½-pint aluminum cup with cover and folding handles, and one sheet steel nickel finished asbestos lined stove, all neatly packed together in a handsome durable black case, size 6x6x6 inches, nickel trimming and is lined with royal blue. Flat strap handle on case makes it easier to carry. Shipping weight, 7 pounds. Price.....$5.50

NICKEL PLATED COFFEE PERCOLATORS.

This coffee percolator cannot be excelled by any percolator made for its delightful and healthful coffee making and money saving qualities.

The illustration shows how percolator is made. Heating drives the water up through tube, against the glass top, and as it filters back through the ground coffee it gathers the full strength of the coffee, producing a perfectly clear beverage and requiring no egg to settle it. Can be used on any kind of stove.

The body is made of **high grade solid copper,** metal mountings are of attractive design, **heavily nickel plated** on the outside, **tinned, nickel and silver plated** on the inside. Working parts are **pure aluminum,** making a durable and sanitary percolator.

$1.40 TWO-COAT GRAY ENAMELED ROASTER $1.40

EXTRA HIGH GRADE.

Other Self Basting Enameled Roasters, Not as Durable or as Good, Sell for $1.85 to $2.00

Body and cover are seamless, stamped from one sheet of heavy steel, covered inside and out with two coats of our high grade gray enamel. It has rounded edges, making it easy to keep clean and prevent rust. Cover fits closely in grooved base, thereby retaining all the juices and flavors. Handles are welded on by electricity and cannot come off. This roaster will pay for itself in time and money saved, as you will have less shrinkage and use less fuel. Continual self basting prevents scorching, makes food tender and more appetizing. Size, 12x8¾x19¾ inches (over handles). It will take a large turkey or roast, and will fit any medium size stove. Shipping weight, about 8½ pounds.

No. 9F170 Two-Coat Gray Enameled Roaster. Our price.....$1.40

14-PIECE OUTFIT OF TWO-COAT GRAY ENAMELED WARE, $3.07

Just the thing to begin housekeeping with, all the pieces necessary about a kitchen. The best gray enameled ware made. Selected from our regular stock and every piece guaranteed. Compare our prices with others. Each outfit contains twenty-four pieces most convenient for general kitchen use. All vessels have flat bottoms.

THE MODERN METHOD OF COOKING

THE FIRELESS COOKER

NONE LIKE OR AS

REDUCES HOUSEWORK ABOUT HALF, MAKES COOKING A PLEASURE INSTEAD OF A DRUD

THE PRINCIPLE of fireless cooking is very simple. Any kind of food, if kept hot enough, no matter whether it be kept over a fire or not, will cook. **The Fireless Cooker simply retains the heat generated over a fire,** and causes food which has been brought to the boiling point to continue to cook from its own heat. This process of cooking will continue for as long as twelve to fifteen hours.

CONSTRUCTION. Tops, bottoms and frames are made of selected seasoned basswood. Outer walls are made of galvanized iron, securely put together. Inner walls made of bright easily cleaned tin, seamed and soldered. The insulation, which keeps the air from circulating and the heat from escaping, is tightly packed around the food compartments and into the pads. Pads are made of strong, durable cloth. They are porous and sanitary, all that is necessary to keep them sweet and fresh being an occasional airing. Kettles are made of pure aluminum drawn seamless from one piece; have no joints, seams or solder to leak or give way; are light in weight, will not rust, easy to clean and will outlast any other cooking utensils made. Covers also made of aluminum, fit close, and can be locked on tight. Tops and frames stained and varnished, finished to resemble quarter sawed oak.

Quickly pays for itself in the saving of fuel alone, to say nothing of the trouble and worry it takes off the shoulders of the busy housewife. It keeps the kitchen cool and comfortable, prevents disagreeable odors rising from the food and makes cooking so easy and pleasant many housekeepers are able to dispense with hired kitchen help entirely. **All cookers furnished with easy running casters.**

OUR TEN DAYS' TRIAL OFFER. Order a Fireless Cooker, use it ten days; if it is not satisfactory return it to us and get your money back.

SAVES 75 PER CENT of cooking expense on all in the Fireless Cooker. Your item, and the Fireless Cooker saves the greater part of this the time required **over the fire** to properly cook these different

Boiled Ham—Regular way, four hours; **fireless way,** Hours
Oatmeal—Regular way, four hours; **fireless way, two** minutes
Corned Beef—Regular way, six hours; **fireless way,** thirty

SAVES TIME, WORRY AND TROUBLE. Co **entertain, while you do your other work.** Bring your food to cook stove, place it in the Fireless Cooker and forget it until you will find it thoroughly cooked, steaming hot and ready to no attention, no watching, no worry. No danger of overcooking

SAVES FOOD AND MAKES IT BETTER. T **the escape of all steam,** retains the natural flavors and ju food better, more healthful and more palatable. Cheaper meats be uneatable if cooked in the old way, become tender and juicy cooked in the Fireless Cooker.

$3.65

Cooks Anything That is Steamed, Stewed or Boiled. Cooks it better than it could possibly be cooked on a stove; cooks while you rest, while you work, while you sleep; requires no attention, no watching, no worry.

$7.65

Recipe and Instruction Book Sent FREE with each Fireless Cooker. **Contains full directions for operating the cooker, and tells how to prepare and cook many kinds of cereals, soups, meats, vegetables, fruits, etc., very economically and with but little trouble.**

$5.65

No. 9F2011 One-Compartment Fireless Cooker. **Light, convenient and practical.** Has one 8-quart seamless aluminum kettle with locking aluminum cover, recipe book, etc. Size of cooker, 15½ inches long, 15¾ inches wide and 13¼ inches high. Shipping weight about 20 pounds.
Price, complete..... **$3.65**

No. 9F2013 Three-Compartment Fireless Cooker. **Adapted to the use of any family, large or small.** Has two 4-quart and one 8-quart seamless aluminum kettles with locking aluminum covers, recipe book, etc. Size of cooker, 37 inches long, 15 inches wide and 13¼ inches high. Shipping weight, about 80 pounds. Price, complete..... **$7.65**
We always recommend the purchase of this Three-Compartment Cooker, as it is often desirable to cook several different kinds of food at one time. The Three-Compartment Cooker will take care of three at once. The difference in price is so slight and the saving in time, fuel and labor is so great that it is really poor economy to buy a cooker that might ever be too small.

No. 9F2012 Two-Compartment Cooker. An excellent size for small families. Has one each 4-quart and 8-quart seamless aluminum kettles with locking aluminum covers, recipe book, etc. Size of cooker, 15¾ inches long, 26 inches high. Shipping weight, about pounds. Price, complete.....

CAST ALUMINUM COOKING UTENSILS

SEAMLESS, ONE PIECE; NO JOINTS OR SOLDER TO LEAK OR GIVE WAY.

MODERN HYGIENIC KITCHENWARE, the kind that saves time, fuel, money. The first cost is more than enameled ware or tinware, but once bought it will last under usual conditions, and give perfect satisfaction every day it is used. ALUMINUM WARE has a smooth, easily cleaned surface and when polished looks like silver. LIGHT IN WEIGHT. Our aluminum utensils are made of solid metal, the same all the way through, so nothing to flake or wear off. HEATS EVENLY ALL OVER—top, bottom and sides. Not necessary to use as much fuel as with the same amount of work. Soon saves fuel enough to pay for itself.

WILL NOT BURN FOOD as readily as other vessels and will not scorch food under any conditions. If food happens to stick in an aluminum kettle the balance of the food is not spoiled. The burnt taste will not go through the balance of the food. Even if food were allowed to burn to a crisp, it could easily be soaked out and the kettle or pan would not be injured. IS PERFECTLY PURE AND SAFE. Fruit acids or food alkalis will not affect it in any way. Fruit or other food may be cooked and left in an aluminum kettle for any reasonable length of time without fear of spoiling either food or kettle. GRIDDLES BAKE CAKES WITHOUT GREASING. This gives you better cakes with no smoke or smell of grease, and makes the cakes more palatable and easier to digest.

ALL ALUMINUM UTENSILS SOLD BY US ARE FULL SIZE AND HOLD WHAT WE SAY THEY DO.

ECONOMY COMBINATION COOKING SET.

REGULAR $2.50 VALUE. OUR PRICE, $1.65

No. 9F2331 A roaster, double boiler, steam cooker, egg poacher, etc., all in one. Made of heavy sheet aluminum. The two outside pans, measuring 10 inches in diameter by 2½ inches deep, fit snugly and form an excellent self basting roaster. If put over a slow and steady fire it will make a delicious roast and even the toughest piece of meat will become tender. It retains all the juices and flavor of the meat, requires no attention whatever and prevents shrinkage of meat. The inside pan measures 8 inches in diameter by 2½ inches deep and is used in connection with the outside pans for cooking cereals. In addition to this the set contains an egg poacher which also serves as shelf for the roaster and cereal cooker. The outside and inside pans have a capacity of 6¼ pints and 4¼ pints respectively and may be used separately as pudding pans, baking pans, etc. This set will be appreciated by every practical housewife and at our price is a splendid bargain.
Price $1.65

ALUMINUM RICE AND CEREAL COOKER.

ECONOMICAL STEAM COOKER $4.96

Food cooked in the Economical Cooker is more palatable, easier to digest and more nourishing than food cooked by old methods. It lets off no odor and does not cause one article of food to smell or taste like another, though a number of different kinds of food may be cooked at the same time.

IT SAVES FUEL.

Requires only one burner to do the cooking usually done on three or four. Works equally well on wood, coal, oil, gas or gasoline stoves. **Other work can be done while food is cooking.** Steam whistle begins to blow fifteen minutes before tank boils dry, allowing ample time to refill it.

IT SAVES LABOR.

Easy to keep clean. No scouring of heavy pots and kettles. Once started, requires no further attention. **Nothing lost by evaporation, juices of meats retained.** Burning or overcooking is impossible. **It is made of heavy XX (best grade) charcoal tin and has solid copper water tank.** It measures 11¼ inches square, 22 inches high and weighs, crated, about 20 pounds. It will hold at one time twelve 1-quart Mason fruit jars, and cook the fruit perfectly. **Guaranteed satisfactory or money returned.**

No. 9F23843 Economical Steam Cooker. Price, complete, with two heavy seamless cooking pans and instruction book containing 200 tested recipes..... **$4.96**

$1.68 White House Bread Mixer and Kne

YOU MAKE GOOD BREAD

every time with the White House Bread Mixer and Kneader, for it kneads the dough so it is smooth and evenly mixed. The heavy tin pail holds 12 quarts and will knead any quantity of dough to make from one to eight loaves. The White House Mixer is easy to turn, and it only requires three minutes instead of thirty, as is necessary in the old way.

THE WHITE HOUSE BREAD MIXER

is built on the latest and most improved principles. The dasher or kneader remains stationary, the entire receptacle revolves, thus forcing the dough against the mixer, causing compression as well as thorough mixing. The bucket and cover are finest XX (best grade) tin plate. Mixer or kneader is made of steel, heavily plated with pure block tin. The White House Kneader is simple, sanitary, easy to clean, and the most convenient device of its kind ever invented. Try this bread mixer in your own kitchen, and if you do not find it entirely satisfactory, send it back at our expense and we will promptly return your money.

"Never-Burn" Waterless Cookers

No. 9F1244 A utensil in which meats and vegetables can be thoroughly cooked, practically without water and positively without burning or scorching, as the fire does not come in direct contact with the cooking vessel. The food is cooked in its own steam, retains its natural flavor and nutriment, and shrinkage is avoided as no steam can escape. Requires no attention, does better work than any other utensil. The removable bottom is made of heavy steel covered with tough black enamel. It is raised, allows a free circulation of hot air and causes the heat to concentrate uniformly under the utensil. A heavy asbestos mat is placed between the removable bottom and the cooking vessel and prevents the burning or scorching of food. The cooking utensil is seamless, drawn from one piece of extra heavy steel, covered inside and out with four coats of enamel, solid turquoise blue outside and white enamel inside.

Wardrobe or Closet Suit Hanger Sets.

Hold six whole suits, men's or women's; take up less space than one suit now requires.

Keep clothing in shape, save pressing, tailors' and dressmakers' bills. No springs to mar the tailored shape or metal parts to rust mark the garments. Suits easily put on these hangers; pants or skirts folded and hung on bar; coats or jackets hung on outside. The suit you want can be instantly removed. Hangers natural finished hardwood. Brackets nickel plated.

ODORLESS COMMODE AND SLOP BUCKET.

A CONVENIENT AND SANITARY DEVICE THAT SHOULD BE IN EVERY HOME.

Impossible for the foul air to escape as there is inside the lid a receptacle that holds a deodorizer which kills all the bad gases. The disinfectant (two tablespoonfuls of chloride of lime) needs only to be renewed once in two weeks, at a small cost. Does not have to be emptied until it is filled, no matter how long it stands.

Indispensable in the sick room, especially in cases of contagious diseases and fevers. Illustration, with part of commode cut away, shows construction.

Made of heavy galvanized iron, nicely painted. Inside bucket, seat, etc., are removable for easy cleaning. Holds 9 quarts.

No. 9F26162 Price, complete, as illustrated and described.....$1.17

62c For Our Superior R.F.D. Mail Box

APPROVED BY THE POSTMASTER GENERAL.

An extra large size high quality mail box in the strongest and most popular pattern made. Same style box is regularly sold elsewhere for $1.25. We save you over half. Now that rural free delivery is firmly established, you know you will require a box for years to come and should buy one that will last. Our Superior R. F. D. Mail Box is the one for you to buy. Made throughout of heavily galvanized steel, thicker even than the Postoffice Department requires, and painted with weatherproof aluminum paint. It has turned edges, riveted joints, a rounded roof and cover fits absolutely rainproof; handsome in appearance, operates perfectly and will not freeze up. Flag slides up and down, fastens the box instantly and can be used as a handle to pull the door open. Extra large, size 7½x6¾x18½ inches, inside measurement, larger than the Postoffice Department requires and will take long newspapers and periodicals.

Shipping weight, about 12 pounds. Locks not included at our price.

ECONOMY CANNING OUTFITS

$6.50 FOR THIS OUTFIT

No. 9F29561 Our No. 2 Economy Canning Outfit holds twenty No. 2 or twelve No. 3 tin cans. Can be used on a cook or gasoline stove, or a furnace can be made out of brick for use out of doors. It is so arranged that you may can in either tin cans or glass jars. With this outfit we furnish tray for cans, fire pot for heating soldering copper, one pair can tongs, one soldering copper, soldering flux, acid brush, quantity of wire solder, fruit funnel for filling cans and full directions for canning different fruits and vegetables. Outside tank 15 inches wide, 18 inches long and 8 inches deep. Inside tray 14 inches wide, 17 inches long and 5 inches deep. Shipping weight, 24 pounds. Price, complete..... $6.50

No. 9F29560 Our No. 1 Economy Canning Outfit is the same as our No. 2 quoted above, except that it is a smaller size. Especially adapted for those who want to do canning on a small scale. Holds six No. 3 or nine No. 2 tin cans to each filling, and glass jars can be used if preferred. Outside tank 10 inches wide, 15 inches long and 8 inches deep. Inside tray 9 inches wide, 14 inches long and 5 inches deep. Shipping weight, 16 pounds.
Price, complete..... $4.20

Do your fruit and vegetable canning at home and make money. Canning at home becomes ure and is profitable when you use one of our Economy Canning Outfits. All the undesirable connected with the old fashioned methods of preserving are eliminated and your canning is success with an Economy Outfit in your home. Whether you intend to preserve only for your quirements or for the market, the Economy Outfit will save you time, labor and money. How preserves are much more healthful and better than the best preserves you can buy at the store. No experience is necessary to operate the Economy Canning Outfits successfully. Canning outfits are money makers. Why not start the young folks in this business at home? We furnish you everything to make a complete canning factory on the farm. Canning outfits are made in three sizes, No. 1 and No. 2 for family use and No. 3 for canning on a large scale.

Construction—All of our Economy Outfits are made of best materials. They consist of a tank made of the heaviest galvanized iron that can be worked. Into this tank is suspended a tray, also made of heavy galvanized iron and perforated on the sides and bottom to allow a free circulation of the boiling water. This can is lowered or raised for processing and exhausting. **Our canning outfits are money makers. Home made preserves bring high prices.** Directions are furnished with each outfit.

$19

No. 9F29562 Our Economy Canning Outfit No. 3 holds 48 No. 2 or 30 No. 3 tin cans to each filling, and is fitted with the latest improved furnace, having double bottom and sides which will supply great heating capacity. Hearth, doors, front and back casting and grate are made of cast iron. Sides and linings are heavy sheet steel. Burns cobs, wood or soft coal. Size of furnace, 19½x20 inches. The bottoms of trays are so perforated that boiling water will be in circulation at all times. The tank and trays are made of the best galvanized sheet steel. The seams are hemmed, no rivets or solder being used, and they are fitted with shown in illustration. Each outfit is furnished complete, including furnace, pipe with damper, elbow for furnace, trays of cans, tomato scalder, two trays for cans, fire pot for heating soldering coppers, two soldering coppers, one pair can tongs, soldering flux, acid brush, wire for tipping, fruit funnel for filling cans, and special directions for canning fruits and vegetables. Outside tank 22 inches wide, 29 inches long and 8 inches deep. Large inside tray 21 inches long, 11 inches wide and 7½ inches deep. Small inside tray 21 inches long, 11 inches wide and 5 inches deep. Shipping weight, 110 pounds. Shipped only from factory near Chicago.
Price, complete..... $19

CAPPING STEELS.

No. 9F29563 Used in placing caps on tin cans. Should be used when canning large quantities as it saves much time and labor. Simple in operation. After iron is hot, place it on solder hemmed cap, turn iron once around and cap is sealed. Pays for itself in a few hours.

ENTERPRISE TINNED FOOD AND MEAT CHOPPERS

These well known machines have been on the market for many years. We guarantee every one we send out to give satisfaction. Only the best material goes into them. They are made of smooth cast iron, heavily tinned and will not rust. Enterprise Choppers have warranted steel knives, which cut like a pair of scissors; they grind or squeeze the meats; impossible for any strings, sinews or gristle to pass through without being chopped. Quickly taken apart and easily cleaned. Knives interchangeable and can be replaced at small cost. AT THE PRICES QUOTED BELOW, QUALITY CONSIDERED, THESE GENUINE ENTERPRISE CHOPPERS ARE UNMATCHABLE VALUES.

69c OUR IMPROVED PURITAN FOOD CHOPPER WITH FOUR CUTTERS AND COOK BOOK FREE

WE HAVE SPENT TIME AND MONEY testing all makes of food choppers to make sure we had the best of the lot.

Today our Improved Puritan Food Chopper is faultless for family use. Over 90,000 people bought them last year and were pleased. If you buy the Puritan Chopper from us now we guarantee it to please you, and our big sales make it possible for us to sell you one for 69 cents.

Better Value Than You Can Get Elsewhere For $1.25.

The second size chopper, the one at 87 cents (size usually sold for $1.40) is the one we recommend for use in average size families.

THE IMPROVED PURITAN FOOD CHOPPER has a heavy one-piece barrel straight ribbed inside and true to size. Has a cylinder which fits snugly against the straight ribs and with a scissors like action cuts the food into small pieces before it reaches the knives. Has self sharpening knives of refined crucible steel, milled and ground true, not stamped out of sheet steel. Has an extra long and extra strong handle which makes turning easy. Has a one-piece body without joints which makes cleaning easy. Has all exposed parts heavily coated with pure tin to prevent rust.

The Improved Puritan Food Chopper will cut any article of food intended for table use, meat, vegetable or fruit. Each machine has four knives or cutters; three knives, coarse, medium and fine, for regular articles of food and a nut butter cutter for pulverizing. The Puritan Food Chopper will pay for itself in the saving of food in thirty days and will last for many years afterward.

FREE With each Puritan Food Chopper we furnish absolutely free a copy of our Puritan Food Chopper Cook Book containing over 200 tested recipes. The use of this cook book will save time and money in the preparation of food.

$4.50 DOUBLE WALL FIRE-PROOF CASH BOX.

A perfectly safe receptacle for money, jewelry, deeds, contracts, mortgages, insurance policies and valuables of every description and at a price within reach of everyone. If you have money, jewelry or important papers of any kind, you ought to have one of these cash boxes. The cost is but a trifle compared with the satisfaction of knowing that your valuables are protected in case of fire. To test these boxes we had one filled with papers and placed in a 500-horse power forced draft furnace at a temperature of over 2,000 degrees. It remained not only until it reached a white heat but the cast iron handles on ends of box were melted off and part of the outside wall was burned through. When opened the contents were in perfect condition. (See above illustration.) No fire in a residence or store could ever subject a box to the intense heat we gave it in this test. Made with thick double walls filled between with chemically prepared cement. Dimensions outside, 13x9x7 inches; inside, 10x6½x4 inches. Weight, about 50 pounds.

No. 9F26094 Price, complete with padlock and two keys.....$4.50

UNION PLATFORM COUNTER SCALES

One of the most popular, convenient and substantial patterns on the market. Especially adapted for use in stores, commissaries, barns or anywhere that first class reliable scales are required. Sensitive enough to weigh half an ounce of butter color, and strong enough to weigh a barrel of flour. With one of these scales on your premises you need no longer guess. Just throw the goods on your scale, and immediately you know exactly what it weighs and, what's more, you know the weight is correct.

BEAMS are solid brass marked 44 pounds by ½ ounces.

PLATFORMS smoothly finished, heavy and durable and measure 10x13 inches.

SCOOPS are well made, of heavy tin and measure 10x19 inches.

CAPACITY, 1n scoop 30 pounds by ½ ounces, on platform 240 pounds by ¼ pounds.

Higher prices elsewhere don't mean greater value. There is no better Union Scale made than this one.

BABCOCK STANDARD HIGH SPEED MILK TESTING OUTFITS.

$3.40

It costs no more to feed a good cow than a poor one. To make dairying pay and to know the profit derived from each cow, it is necessary to test their milk. Our Babcock Milk Testers tell the exact quality of each cow's milk. A tester is absolutely necessary when buying cows, as the quantity of milk a cow gives is not always an index to the value of the cow. Our Babcock Tester has cut spiral gear wheel, steel spindle with worm thread enclosed in heavy case; is fitted with swinging pockets, malleable heads and can be attached to any table. Price includes bottle of acid, test bottles, brush, acid measure, pipette and full and simple directions for making tests. Weight, boxed, about 15 pounds.

SILVER STEEL ELGIN PATTERN R. R. MILK CANS

The best and most popular pattern milk cans on the market.

SILVER STEEL MILK CANS are built of heavy steel plate, seamed and riveted, tinned and retinned then heavily loaded with best half and half solder by experts. Body and bottom rest on heavy flanged bottom hoop, and are solidly riveted together. Illustration to right with part of side cut away shows construction. Note heavy half oval steel breast hoop, flanged steel bottom hoop and seamless sanitary covers. Silver Steel Cans will not leak nor rust, are strong and will stand hard usage. They are rigid and stiff, will not dent nor cave in easily and you will never be troubled about repairs. Silver Steel Cans are sanitary, have no seams or crevices to collect milk and dirt. Breasts and bottoms are full rounded, which makes cleaning easy.

SILVER STEEL CANS are cheapest in the end. Better than cans others sell for $3.00. Better than any other cans made. Compare the weights of Silver Steel Cans with the weights of others; think of the time saved in washing and the saving in repair bills.

Wisconsin Pattern Riveted Milk Cans

Extra good cans for the price and fully equal to cans sold elsewhere for $2.25 to $2.50 each. We recommend these cans for wagon use and for hauling milk or cream to creameries, but for shipping purposes we recommend our Silver Steel Cans shown above. Made of smooth wrought steel, double seamed and riveted throughout. Neck and bowl drawn in one piece. Breast is joined to body in such a manner as to form a very strong and rigid edge, which is further protected by a heavy steel hoop shrunk on over the outside. Body rests on heavy steel bottom hoop to which it is riveted, and which greatly adds to the life of the can. They are carefully tinned and retinned and inside seams are soldered, but not loaded as in our Silver Steel Elgin Pattern Cans. Our Wisconsin Pattern Cans have full rounded breast and bottom and are easy to clean.

"FRE-ZEE-ZEE" ICE CREAM FREEZERS.

Easy to Operate. Easy to Clean. Freeze Quickly, Make Smooth, Delicious Cream and Use Less Ice Than Any Other Freezer of This Pattern on the Market.

THE "FRE-ZEE-ZEE" FREEZER is manufactured to our order only, and we positively guarantee it to be the best freezer made regardless of price. Tubs are clear kiln dried Northern pine, treated with a paraffin and oil preparation which makes them waterproof. Hoops are heavy galvanized steel and positively will not come loose. Cans are extra heavy charcoal tin plate with retinned iron tops and bottoms and will outlast any other freezer cans made. Gearing is heavily galvanized and will not rust.

THE "FRE-ZEE-ZEE" FREEZER makes superior cream. As the can revolves the freezing mixture is removed from the sides by the dasher and thrown to the center, where it is beaten and aerated until frozen into the smoothest and most delicious cream. The ice guard prevents ice or salt getting into the can and the covered gear protects the fingers of the operator. Our prices are about one third less than others ask for freezers not as good. Guaranteed satisfactory or money returned.

SAVES HEAT $1.28

COMBINATION FLOOR AND CEILING REGISTER AND VENTILATOR.

No. 9F23316 Makes one stove do the work of two. Keeps that cold room upstairs warm and comfortable with the heat that is ordinarily wasted near the ceiling of the room below. Consists of a black floor register with valves, a white ceiling plate and an adjustable sheet metal box connecting the two. Easily and quickly put into position; just cut the holes in floor and ceiling, place the register and ceiling plate in position and hook the two coil springs that hold them together. **Adjustable to fit any floor or ceiling from 7 to 12 inches apart.**

Size opening	8x10	10x12	12x15
Price, each	$1.28	$1.64	$2.86

STEEL JOIST HANGERS OR STIRRUPS.

14c

Require no boring, cutting, mortising or tenoning. Make a job stronger than any other known construction. Save their cost in labor alone, as compared with other methods of hanging joists and sleepers. Invaluable for use around stairways, elevator shafts and fireplaces. Made of very best tough wrought steel, painted with first quality rustproof paint. These steel joist hangers are absolutely safe, as they will stand more strain than any size joist that can be used with them.

No. 9F48772 Steel Joist Hangers

State size joists hangers are to be used with.

Takes Joists, in.	Size Steel, in.	Safe strain each hanger, lbs.	Wt. doz., about	Price each	Per dozen

Unbreakable Wrought Steel REGISTERS, BORDERS AND FACES

For Use in Floors or Walls on Hot Air Pipes, Furnaces, Ventilators, Etc.

Black Japanned Registers, 6x8-inch size, for 6-inch pipe. **42c**

Our Prices Save You Money.

Black Japanned Borders. 6x8-inch size for 6-inch pipe. **29c**

Why Pay More Elsewhere?

White Japanned Faces. 6x8-inch size, for 6-inch pipe. **34c**

Our Wrought Cold Rolled Steel Unbreakable Registers, Borders and Faces are in every way superior to the brittle cast iron goods usually offered. Size register required is governed by the size hot air pipe leading to it.

Registers, black japanned. Can be used in floor or side wall. Fit borders of the same dimensions. Borders not included in price of registers.

Borders, black japanned. Match registers described above. Measurements are inside.

Register Faces, white japanned. Used in ceilings and side walls as ventilators.

FINE SELVAGE FLY SCREEN CLOTH

Window and Door Frames. Keeps out flies, mosquitoes and other insects which are not annoying but positively dangerous, as they spread disease germs and filth. All our wire cloth is highest grade, with true square mesh and double selvage. Our painted and galvanized wire cloth runs 12 wires to the inch each way, which is the ordinary size mesh and illustrated. Our bronze wire cloth is made with a finer mesh, running 14 wires to the inch each way. All our screen wire cloth is put up in rolls of 50 and 100 running or lineal feet. Bronze wire cloth weighs slightly heavier than below. Below we give approximate weight of painted and galvanized wire cloth per roll of 100 feet in length.

ADJUSTABLE DOOR AND WINDOW FRAMES

Anyone who can saw off a stick can put them together. When completed, they cannot be excelled in appearance and durability. At the low prices we quote for these frames it is impossible for carpenters and others to get out the ordinary hand made frame. Bead molding to tack over the edges of the wire cloth furnished with every set. Wire cloth not included in prices.

ADJUSTABLE WINDOW SCREEN FRAME.

No. 9F48477 These Frames save you money, for it doesn't require an experienced man to put them together, like the ordinary hand made frame, and it cannot be surpassed in appearance and durability. Anyone who can saw off a stick can put them together. They can easily be fitted to the window by sliding the sticks along each other to the required size, fastening by nail or screw and sawing off projecting ends.

It is unnecessary to remove screen from the window during the season as, by the use of guides, either the sash or screen may be raised or lowered without disturbing the other. Furnished in rich black walnut stain. The sectional view here shows how screen frame is made. Bead molding to tack over the edges of the wire cloth, and full instructions furnished with each set. Wire cloth not included in price. **For wire cloth see opposite side of this page.**

Size	Price per dozen sets
Adjustable up to 36x36 inches	$3.20
Adjustable up to 42x42 inches	3.60
Adjustable up to 48x48 inches	4.20

ADJUSTABLE DOOR SCREEN FRAME.

No. 9F48478 These Frames can be put together in less time than it takes to cut the regular made up door down to fit the opening. Just saw the sticks the proper length and attach the corner irons and knob and it is complete. It is not necessary to hire an experienced man to put these frames together, like the ordinary hand made frame, and at the prices we quote it means an exceptionally big saving to you.

It is impossible for these frames to sag or settle as the corner irons are provided with parallel tongues which enter firmly in corresponding grooves in the wood as shown in illustration, insuring a perfectly square corner. They are very attractive in appearance and cannot be excelled for their durability. The frame is stained a rich black walnut; the corners are Milan bronzed. Bead molding to tack over the edges of wire cloth furnished with each set. Wire cloth not included in price. **For wire cloth see opposite side of this page.**

CRYSTALLINE METAL FARM BELLS

$1.04

Illustration of Sizes Nos. 1,2,3 and 8

EVERY FARM, NO MATTER HOW SMALL, SHOULD HAVE A GOOD BELL.

Think of the convenience and protection it offers; think of the thousands of steps it saves; think of the time lost by your help stopping work a few minutes before, and starting a few minutes after the right time; think how quickly assistance could be summoned in case of fire or other danger! Can you really afford to do without one?

$2.64

Illustration of Size No. 4.

OUR CRYSTALLINE METAL FARM BELLS are well made of the best materials, properly proportioned and the price is low enough to be in reach of everyone. **They are the sweetest toned, clearest ringing, loudest sounding farm bells in the world.**

You Can Buy Crystalline Metal Bells Only From Us.

WE TAKE THE OUTPUT OF THE FACTORY MAKING THESE SUPERIOR BELLS, see always that they are made of the right material to produce a clear, sweet tone, and at the same time so proportioned that they will stand any reasonable amount of hard service. **You take no risk whatever in sending us your order for a Crystalline Metal Bell, as we** agree to take back at our expense any farm bell that you may buy of us, within thirty days after you receive same, if you do not find it the best bell you ever saw at anything like our price, or if for any reason you are not entirely satisfied with your purchase.

OUR "CORN KING" SEED CORN GRADER.

89c

Grades seed corn as thoroughly as if done by hand. Sorts out the irregular shaped, undersize kernels; leaves only the perfect grains for planting. Seed corn sorted with a "Corn King" Grader makes an increase of from one to three bushels per acre in the yield. Has two perforated sorting plates, upper for holding back thick and irregular shaped grains, lower for sifting out small imperfect grains, allowing only perfect, regular shaped grains to pass out the forward end. Does the work quickly. Strongly made galvanized sorting plates. Shipping weight, about 10 pounds.

No. 9F72220 "Corn King" Seed Corn Grader. Price..... 89c

ACME ADJUSTABLE HAND GRIST MILLS.

DOES WORK equal to machines sold by others at one-third to one-half more than our prices, and for ordinary farm or family use it cannot be beaten. Constructed throughout of iron, except the shaft, which is steel, and the burrs, which are steel alloy. These burrs will outlast three sets of ordinary gray iron burrs, and are easily and cheaply renewed. Especially adapted to grinding corn, coffee, small grains, roots, bark, salt, dried bones, dried shells, etc., also for making table meal. It will not cut or grind green bones or shells.

THESE ACME MILLS run steadier, turn easier and grind more per hour than any other ...on the market. All sizes adjustable to ...medium or fine. We recommend the ...for general use. Shipped from Chicago.

OUR HUSTLER CORN SHELLER.

48c

You can no longer afford to do without a corn sheller. Our Hustler is the regular $1.00 kind elsewhere. It is made of good quality material, has hardened teeth, adjustable spring tension regulated by thumbscrew and will take any size ear. Shells clean from butt to tip and does not crack the grains. Fitted with attachment for shelling popcorn. Quickly attached to any box or board. Japanned. Weight, 15 pounds.

No. 9F72227 Price, 48c

OUR HUSTLER HAND GRIST MILL.

$1.93

A first class mill at a medium price. Others ask $2.50 to $3.00 for a similar machine. This Hustler Grist Mill is well made, has removable iron burrs and for rough, coarse grinding cannot be equaled. Will grind salt, peas, corn, wheat, rye and other grains and is specially recommended for grinding chicken feed, hominy, etc. No chicken raiser should be without a grist mill. Grinding grain causes it to digest quicker and makes fowls fatten faster. Heavy fly wheel makes it easy running. Grinding capacity equals mills at twice our price. Shipped from Chicago. Weight, 27 pounds.

No. 9F72100 Price....$1.93

No. 9F72101 Extra Burrs. Weight, 1½ lbs. Price, per pair 39c

FULTON ADJUSTABLE CORN SHELLER.

$1.28

No sheller ever sold at anything like our price will do as good work. Better than shellers that sell elsewhere as high as $2.50 to $3.00 each. The Fulton is a big improvement over similar shellers sold by other concerns, having all their good points and some very important features not possessed by any other machine. Will shell all sizes of field corn easily and rapidly. Made largely of malleable iron, all bearings chilled. Has adjustable spring tension, positive lock adjustment, cob guide and picker wheel guard. Sheller can be instantly clamped to any box or plank (no holes to bore). Guaranteed satisfactory. Weight, 20 pounds.

No. 9F72229 Price..... $1.28

No. 9F72230 Improved Fulton Adjustable Corn Sheller, same as above, but with malleable butting and tipping attachment. Especially recommended for seed corn. Shells imperfect grains off ends of ears and drops them into a separate box. Price, complete with attachment..... $1.49

KENWOOD DOUBLE SWIVEL HAY CARRIERS.

For ¾, ⅞ or 1-inch manila rope.

$2.98 $3.02

They reverse by swiveling, work either way and at either end of barn without changing rope or any part of carrier. Easily swiveled when desired. The wood track carrier will work on ordinary dressed 4x4-inch track. The steel track carrier is to run on our double angle steel track only. Price includes stop and fork pulley. If carrier is to be used with wagon slings, a sling pulley will be required. Sling pulleys not included at prices below.

No. 9F71200 Wood Track Hay Carrier. Weight, 33 pounds. Price $2.98

No. 9F71201 Steel Track Hay Carrier. Weight, 30 pounds. Price $3.02

KENWOOD DOUBLE SWIVEL SLING CARRIERS.

$5.88

Guaranteed the best sling carriers made. No special sling pulleys are required, as the carriers have sling pulleys of their own. Reverse by swiveling and will work either way and at either end of barn without changing rope or any part of carrier. Swivel is so perfectly constructed that it holds in line with track, but is easily swiveled when desired.

$5.92

They draw the hay or grain up direct as the load stands without twisting the rope or cramping the pulleys. Wood track carriers run on ordinary dressed 4x4-inch track. Steel track carriers run on our double angle steel track only. Slings can be locked and dumped at any height. Can be used with any kind of forks and either one or two forks at once.

All our hay carriers and pulleys work with ¾, ⅞ or 1-inch manila rope.

No. 9F71210 Wood Track Sling Carrier. Weight, 72 pounds. Price $5.88

No. 9F71211 Steel Track Sling Carrier. Weight, 65 pounds. Price $5.92

KENWOOD SELF LOCKING SLING PULLEY.

No. 9F71235 For use with our hay carriers only. Not required with sling carriers. Will lock at any place, no matter whether the sliding load be great or small. Cannot be used with sling carriers or with hay carriers of other makes. Weight, 10 lbs. Price.... $1.46

$1.46

No. 9F71237 Snatch Pulley Block. To shorten travel of horse without reducing power. Rope can be thrown off instantly. Has iron sheave. Price 42c

No. 9F71241 Iron Yoke, Common Frame Pulley, with large loose hollow pin and 5½-inch maple sheave. Price 16c

Kenwood Standard Complete Hay Carrier Outfits

Carefully made up from our regular stock of such items as experience has taught us make the most desirable and satisfactory outfits. Only the highest quality haying tools are put into these outfits and the very best manila rope is used. Our prices are one-third to one-half less than outfits of equal quality are usually sold for. Please remember that a first class hay outfit will soon pay for itself in time and labor saved over the old method of handling hay. We cannot change the makeup of these outfits except to furnish at an extra price ⅞ or 1-inch manila carrier rope instead of ¾-inch. If you wish an outfit longer or in any way different from those listed below, make up your order from the separate items described by us on this page. The amount of rope which we furnish with our complete outfits is ample for unloading at center of barn, or for unloading at one end with horse hitched at other; but if you wish to unload at end of barn and hitch horse at same end, you will need additional carrier rope equal in feet to length of barn, and additional check rope equal in feet to one-half the length of barn. Wire rope cannot be used. **Only the highest quality pure manila rope furnished with these outfits.**

A complete outfit for a 30-foot barn consists of one hay carrier, one short tine double harpoon hay fork, twelve rafter brackets, twelve hanging hooks, four floor hooks, three steel yoke knot passing pulleys, 90 feet ¾-inch manila carrier rope, which is abundantly strong, and 35 feet ⅜-inch manila check rope. For each 5 feet additional length of barn we add two rafter brackets, two hanging hooks, 10 feet of carrier rope and 5 feet of check rope. Double angle steel track furnished with all steel track outfits; but as any farmer can make his own wood track from ordinary 4x4-inch timber, we do not include track with wood track outfits. Manila rope larger than 1 inch cannot be used.

COMPLETE OUTFITS FOR WOOD TRACK.

Prices do not include wood track.

Malleable Iron Hay and Stock Rack Brackets

$5.60

SET OF SIX COMPLETE.

Illustration of rack complete for hauling hay. Illustration of two brackets and chain. Illustration of rack reversed for hauling hogs.

Convert an ordinary farm wagon box into a special rack for hauling hay, grain, boxes, crates, etc., or if reversed, make a covered stock rack for hauling hogs, sheep or poultry. May be used with wagon boxes of any desired length, **also to make a 12-foot rack to fit the ordinary 10-foot wagon box.** Unexcelled for hauling loose hay, alfalfa, etc. Sold only in sets of six, three for each side of wagon box. Can be put on or taken off as easily as a pair of side boards. Our price is for three pairs of brackets, complete with all bolts for attaching, spreader chains for front and rear brackets and two clips for holding line standard, but **does not include boards.** Brackets made of best annealed malleable iron, ribbed and braced to add strength. Chains and line standard clips made of steel. Painted red with good metal paint. These brackets have been tested with over 4,000 pounds of strain per set. Anti-spreader chains relieve wagon box of strain. Weight, per set, complete, without boards, about 60 pounds. Usually sold at $8.00 per set. Our price saves you money.

No. 9F71350 Our price, per set, Irons complete, without boards $5.60

ACME BALL BEARING LAWN MOWERS.

The best mower ever offered for less than $9.00, and an unmatchable value at our price. A mower we have been selling for years and it always gives satisfaction. Because of its high quality and low price, one of these Acme Ball Bearing Lawn Mowers often sells five or six others in the same community. Our Acme Ball Bearing Mower is almost noiseless in operation, runs easily and will accomplish the greatest amount of work with the least amount of labor. Adjustable throughout, so that any wear may be taken up, thus keeping it in perfect condition season after season. It is a heavy, well constructed mower, every part strong enough to stand severe service and will outlast three or four of the ordinary kind. The **ball bearings** in this mower are made of finest die steel. **Cones and cups** are turned from tool steel, then case hardened. The cups, cones and balls are fitted dustproof and the bearings are as accurate as those in a bicycle. **Self sharpening bed knife,** made of highly tempered steel, can be raised or lowered to cut grass different heights. **Spiral blades,** of which there are four, are made of best refined steel, highly tempered and accurately set. **Cutter** is 6 inches in diameter and blades are so arranged that they give a continuous cut. **Drive wheels** are 9¼ inches in diameter, have a one-inch open space inside the tread, enclosed dustproof working parts and are easily oiled and cleaned. **Roller and handle** made of selected hardwood. Mower is handsomely painted and decorated. Price includes two wrenches and full directions. Weight, boxed, about 55 pounds.

Our Acme Special Ball Bearing Lawn Mowers.

$6.95

A big, powerful, easy running lawn mower that will do more work with less labor than any other machine made. The very best lawn mower that skilled mechanics and a first class factory can produce. The equal of mowers that usually sell for $12.00 and up. Has **extra high wheels and extra heavy connecting bar.** Made strong and substantial. This is the very mower for large lawns, public squares, parks, suburban and country homes, and heavy work generally, but is equally as well adapted for ordinary home use. It is **adjustable throughout** to take up wear and can be set to cut grass different heights. It has **ball bearings** of best die steel ground true and perfect. **Cones and cups** turned from solid tool steel and case hardened. **Five crucible steel revolving knives** instead of three or four as most mowers have. **Self sharpening crucible steel bed knife,** hardened and tempered. **Drive wheels, 11 inches in diameter,** the largest used on any mower, give great power and make machine very easy running. **Hardwood roller of large size** leaves lawn in best possible condition and gives exact adjustment as to height of cut. Beautifully painted. Furnished with hardwood handle, wrench and full directions for adjusting. Shipping weight, boxed, about 60 pounds.

ACME BRONZE BEARING LAWN MOWERS.

$3.67

An excellent, substantial, high grade mower, with all the latest improvements. Runs smoother, lasts longer, makes less noise and requires less labor to operate than mowers sold by others at $6.00 to $7.00. Drive wheels on Acme Mowers have an open space of about one inch just inside the tread, so that the grit, dust, etc., cannot work in. All working parts are completely enclosed. Has **phosphor bronze bearings** and hardened steel axles. Reel knife shaft is a bar of tempered steel; four spiral blades are spring steel; bed knife is best cast steel, all highly tempered. Our Acme Lawn Mower has self sharpening bed knife and our patent micrometer adjustment, which enables you to take up all wear. **Diameter of wheels, 9¼ inches; diameter of reel, 6 inches.** Price includes hardwood handle, two wrenches and full directions for operating and adjusting. Weight, boxed, about 50 pounds.

Twin Metal Auto Seat Top Buggy. Fastest Seller Ever Built. There's a Reason

Best Quality Goods—PLOW AND IMPLEMENT REPAIRS—Lowest Possible Prices

Best quality, dependable repairs at prices from one-third to one-half less than manufacturers, dealers and others ask. We guarantee these repairs to fit the plows or implements for which they are intended wherever the original parts made by the manufacturer will fit. It sometimes happens that a plow or implement has been so badly wrenched or strained by severe use that neither parts made by the manufacturer nor our duplicate repairs will fit without adjustment by a good blacksmith.

ED CULTIVATOR SHOVELS, bull tongues and eagle

fit the leading makes of cultivators. Complete with bolts and washers, ready to attach. Made of first quality high carbon center steel and are equal in every way to those made by the manufacturer of the cultivator. Our prices about one-half what others ask. When ordering give our catalog number and name and make of your cultivator if possible. We will not sell less than a full set and cannot furnish sizes, or backs not listed below.

For round standards. No. 2 fits 1 to 1½-inch. No. 12 fits ⅞ to 1-inch.

Back No. 2 or No. 12. For round standards.

Back No. 3 or No. 13. Fits slotted standard with convex front.

Back No. 4. Fits on wood standards only.

TONGUE BLADES, size 2½x10½ inches. In sets consisting of two blades (both with backs fitted ready to attach to cultivator, about 4½ pounds per set.

Price of complete assortment 40c

Kenwood Combined Sickle and Tool Grinder.

Fitted With Alundum Grinding Wheels. Positively Will Not Draw the Temper.

$2.48

As a Tool Grinder.

Our Kenwood Combination Grinder is the best sickle and tool grinder made. We have sold it for a number of years and it is giving perfect satisfaction in use. It does the work of two different machines at less than is usually asked for only one. Our Kenwood grinder holds the sickle knife in a vertical position and provides for the grinding of four sections at one setting. This machine is fitted with patent alundum grinding wheels, which cut very fast, do not draw the temper, have proven very satisfactory in use and are not excelled by any wheels made. Illustration to the right shows the machine fitted for grinding sickles and with wheel clamp on the bottom attached to a mower wheel, but wheel clamp can be removed and grinder can be bolted to a bench. The sickle grinder is entirely automatic in its grinding movements. The bevel stone moves up and down against the sections and does not grind at any point long enough to heat or draw the temper. It can be adjusted to grind from point to heel or to grind only down to the knife head. When used as a tool grinder, as shown in illustration to the left, the arm which holds the arbor is raised to a horizontal position where it is held firmly and the bolt rest enables you to do perfect grinding. Price includes one bevel alundum sickle stone, one alundum tool stone, one tool rest, one wheel clamp and one wrench. Arbor for tool stone can be used on any stone not over 4¼ inches diameter or 1¼-inch face, with ⅝-inch hole.

$2.48

As a Sickle Grinder.

No. 9F71136 Weight, about 28 pounds. One price, complete, as above $2.48

PURE MANILA ROPE

MADE OF LONG MANILA FIBER, unmixed with sisal, jute or inferior material of any kind. It is full weight, full size, fresh, new stock and will stand 25 to 50 per cent more strain than the ordinary rope sold by most dealers. We guarantee every foot of rope we send out to be the finest grade, made of pure manila fiber and to be satisfactory in every way.

HAY CARRIERS require the very best rope made. When ordering rope for hay carriers, order ⅜-inch for the check rope, and either ½-inch, ⅝-inch or 1-inch for the carrier rope. See General Catalog for full line of Hay Carriers and Supplies.

Manila Rope is never measured exact diameter, one-third of the circumference being considered the diameter. Can furnish in one piece any length up to 1,200 feet. **State size wanted.**

"NEVER SLIP" BAG HOLDER AND HANDY TRUCK, $1.94

Farmers, Commission Men, and Others: Our "Never Slip" Bag Holder and Handy Truck is the very combination you have been needing.

THE BAG HOLDER is 16 inches wide and is 5 inches high at back. Bags are held securely by pulling down small clamps on each side of the bag holder and instantly released by raising the clamps. Bag holder can be raised or lowered to suit different length bags, or lifted off entirely, giving you a handy truck for moving filled bags, boxes, barrels, etc.

THE TRUCK is strong enough to carry 500 pounds. The standard is made of 4x1½-inch planed hardwood, neatly varnished. Wheels are 8 inches in diameter. Truck is 41 inches high. Nose or chisel at bottom is made of heavy boiler plate, 12 inches wide, and is firmly bolted to standard. Weight of truck, complete, crated, about 25 pounds.

KENWOOD COMBINED SICKLE AND TOOL GRINDER

Fitted With Alundum Grinding Wheels. Positively Will Not Draw the Temper.

$4.97

No. 9F58764 A practical grinder for blacksmiths', shoers' or farm use. Built for all kinds of grinding, and posts heavy channel iron. Has double sprocket positive motion, no belts to slip. Tool rest adjusts as to height or bevel. Stones, ½ inch, ½ inch face. Takes wheels of 6x1½ inches. First corundum wheel 5x1¼ inches, furnished with each machine. Weight, boxed, about 125 pounds. Complete $4.97

$2.48

As a Tool Grinder.

Our Kenwood Combination Grinder is the best sickle and tool grinder made. We have sold it for a number of years and it is giving perfect satisfaction in use. It does the work of two different machines at less than is usually asked for only one. Our Kenwood grinder holds the sickle knife in a vertical position and provides for the grinding of four sections at one setting. This machine is fitted with patent alundum grinding wheels, which cut very fast, do not draw the temper, have proven very satisfactory in use and are not excelled by any wheels made. Illustration to the right shows the machine fitted for grinding sickles and with wheel clamp on the bottom attached to a mower wheel, but wheel clamp can be removed and grinder can be bolted to a bench. The sickle grinder is entirely automatic in its grinding movements. The bevel stone moves up and down against the sections and does not grind at any point long enough to heat or draw the temper. It can be adjusted to grind from point to heel or to grind only down to the knife head. When used as a tool grinder, as shown in illustration to the left, the arm which holds the arbor is raised to a horizontal position where it is held firmly and the tool rest enables you to do perfect grinding. Price includes one bevel alundum sickle stone, one tool rest, one wheel clamp and one wrench. Arbor for tool stone can be used on any tool stone, one tool rest, one wheel clamp and one wrench. Arbor for tool stone can be used on any stone not over 4¼ inches diameter or 1¼-inch face, with ⅝-inch hole. Weight, about 28 pounds.

No. 9F71136 Price, complete as above.....$2.48

$2.48

As a Sickle Grinder.

OUR "QUICK AND EASY" EMERY GRINDER.

$1.58

No. 9F58782 A strong, substantial grinder and a favorite with those who prefer an emery wheel. Will sharpen any small edge tool and is invaluable about the kitchen, farm or shop. Has special attachment for holding knives at proper angle and an adjustable rest for other tools. Has steel axles and babbitted bearings. A speed of 1,500 revolutions per minute can easily be maintained. Complete with a 6x1¼-inch high grade emery wheel. Weight, complete, about 4 pounds.

Price.....$1.58

IMPROVED RAPID BALL BEARING GRINDSTONE.

No. 9F58764 An extra heavy first quality grindstone that cuts fast, turns easily and is properly mounted. The best grindstone on the market for blackmiths, machinists, carpenters, farmers and general use. Stone being extra heavy, it acts as a fly wheel and makes turning easy; being extra large, it will do your work for years before it wears out and being a selected first quality Berea stone, the grit is sharp. It will cut fast and never wear glassy. Our Improved Rapid Grindstones have first quality tempered steel ball bearings, cold rolled steel axles, braced steel legs and hardwood cross pieces and treadle. Machine has crank on one side and foot treadle on other and can be operated by either. Stones are large size, and are furnished with drip cup. Weight, crated for shipment, about 150 pounds. Price $3.10

IMPROVED QUICK CUT BALL BEARING STEEL FRAME GRINDSTONE.

$3.15

No. 9F58760 The biggest and best value in a mounted grindstone on the market, and fully equal to the $4.00 to $5.00 kind sold by others. Every farmer, mechanic or blacksmith, every workman in any line who uses edge tools, should have one of these mounted grindstones. Runs so light the strength of a small boy will easily operate it and grind perfectly the hardest tools. Frame is made of angle steel, firmly braced, is strong and rigid; axle is cold rolled steel, perfectly true and runs on steel ball bearings.

OUR IMPROVED QUICK CUT GRINDSTONE HAS FOUR BALL BEARINGS; OTHER MAKES HAVE ONLY TWO.

The balls used are finest die steel, properly tempered, and run in hardened steel races. It has an adjustable steel seat, double pedals, water cup and guard to protect the operator. The stone is the best Berea grit, 20 to 22 inches diameter and 2 to 2½ inches thick. Just the right size, true and perfect. Shipped knocked down with face of stone protected, and we guarantee safe delivery. Weight of stone about 60 pounds. Shipping weight, about 85 pounds.

Price.....$3.15

GENUINE BEREA UNMOUNTED GRINDSTONES.

No. 9F58770 The quickest cutting, best finished grindstones on the market. Positively will not glaze. No tool more useful than a grindstone. The best costs but a trifle more than the inferior grades. State size wanted.

HOWARD CORUNDUM WHEELS.

Corundum is the hardest and sharpest substance known except the diamond. It is not only extremely hard, but very tough and breaks with sharp jagged edges, making it especially suited for fast grinding. Howard grinding wheels are made of pure corundum of the very best grade, unadulterated with flint, garnet, emery or other inferior substances. One Howard Corundum Wheel will do as much work as two emery wheels and do it faster and better. Howard Corundum Wheels are made of different sizes of grain and degrees of hardness to suit all classes of grinding. Tell us in your order the kind of work you want done, whether for iron or steel, surface or edge work and if for wet or dry grinding and we will send a wheel to suit your particular work.

TABLE showing number of revolutions per minute at which Howard Corundum Wheels give best results.

Diam. Wheel, in.	2	3	4	5	6	8	10	12	14	16	18

Rubber Garden Hose.

Illustration below shows construction of our 5-ply Defiance Hose.

No. 9F38983

9½c PER FOOT.

We offer you the very best garden hose that can be procured for the prices we quote. When lower prices are made you can be assured that the quality is lower than ours. No inferior grades of material are allowed to enter into the construction of our hose. We list several grades, from the best that can be produced, to our "Competition," which is the cheapest that is practical. We recommend the purchase of our Flexo, Dandy or Hercules, as a high grade heavy hose will outlast several pieces of lighter hose. We receive fresh stocks direct from the factory every month. Note our complete outfits of hose, reel and nozzle; it is a well known fact that a reel prolongs the life of hose as it drains it thoroughly after using. Nozzles are not included with hose, except in outfits. **Quality considered** we save you money on every grade.

FLEXO SEAMLESS BRAIDED HOSE.

18 PER F in 50-foot

The strongest hose made. Guaranteed to withstand a pressure of 1 to the square inch. A hose in which the fabric is seamless, circular woven has long been recognized as the strongest and most durable form of construction seamless circular braiding makes impossible the unwrapping or separating of Over a pure seamless rubber tube is braided a ply of seamless fabric, which oughly coated with rubber, making a perfect hose, much stronger than an garden hose. To insure extra strength and durability another ply of seamless braided over this, and a pure rubber covering applied, making a strong, seam ible hose, which will not readily kink, and one that will last until actually w

BUCK HOUSE BUCK HOUSE BUCK HOUSE

GUARANTEED RUBBER BELTING.

Made throughout of the very best materials, both cotton and rubber being carefully selected. Our rubber belting stretches less than any on the market, which prevents slipping and makes the belt deliver full power. We do not recommend rubber belts for use on threshers as canvas belting is superior for such use. Be careful in making orders for belt, for if sent as ordered it cannot be taken back or exchanged. If belts are wanted made endless allow the price of 3 feet of belt for lap and labor of splicing.

2-PLY BANNER BRAND RUBBER BELTING.

Has rubber outer coatings, as shown in illustration, and two cotton duck plies. Banner Belting is the best two-ply belting sold by anyone. Recommended for light work, hand power machines, farm machinery, etc. Equal to belting offered by others at 25 to 50 per cent more than our prices.

No. 9F38902 Banner 2-Ply Rubber Belting.

Width, inches...	1	1¼	1½	2	2½	3
Price, per foot...	4c	5c	6c	7c	8c	9c

3-PLY AND 4-PLY LEADER RUBBER BELTING.

Our Leader Belting is a most excellent grade, fully equal to the very best belting usually sold. The 4-ply is made just like illustration. We recommend it as best for all general purposes and guarantee it to give satisfaction.

No. 9F38903 Leader 3-Ply Rubber Belting.

4-PLY DEFIANCE BRAND RUBBER BELTING.

Made with rubber outer coatings and four heavy cotton duck plies, as shown in illustration. Defiance Rubber Belting is the best made, strong enough and heavy enough to pull any load. Used extensively in saw mills, stone quarries and places where the strain is hard. Firm and tough, guaranteed to run true and not to separate between the plies.

No. 9F38904 Defiance 4-Ply Rubber Belting.

Width, inches	3	4	5	6	7	8	10	12
Price, per ft..	18c	24c	31c	38c	45c	52c	64c	76c

GUARANTEED LEATHER BELTING.

Made from carefully selected hides, the different grades being according to weight, length of lap and part of hide leather is taken from. Stretched just enough to take out the "give," but not enough to take out the life. Leather belting is not suitable for outdoor use or where it will get wet. Double thick or two-ply leather belting furnished at twice the price of single ply.

AGRICULTURAL STANDARD LEATHER BELTING.

Made up to 3 inches wide of light oak tanned leather, suitable for hand power machines, farm machinery or any light service. Not recommended for regular factory use or heavy work.

No. 9F38910 Agricultural Standard Belting.

Width, inches..	1	1¼	1½	1¾	2	2¼	2½	2¾	3
Price, per foot.	6c	8c	10c	12c	13c	14c	15c	17c	19c

EXTRA FACTORY STANDARD LEATHER BELTING.

Made up to 6 inches in width of short lap oak tanned stock. Suitable for regular mill and factory use. The best general purpose belting made. Will give good service and stand any but the heaviest loads. Fully equal to the best grades offered by other concerns at higher prices.

No. 9F38911 Extra Factory Standard Belting.

HIGH SPEED SPECIAL LEATHER BELTING.

Made of heavy selected oak tanned leather, strictly short lap; cut from the solid part of the hide, thoroughly stretched, and guaranteed the most perfect belt made. Our high speed special belting is especially suitable for extra high speed machinery, small pulleys, heavy loads, main drives and severe service generally. It is a belting that can be depended on to deliver the greatest amount of power, to stand up under the hardest work and to outlast any other belt on the market.

No. 9F38912 High Speed Special Belting.

Canvas Belting.

Made of heavy long fiber cotton duck or canvas, woven very hard and with rows of stitching so close together that it cannot separate. Thoroughly soaked in oil to keep it flexible and waterproof and then painted red with a special composition paint which gives it an excellent friction. Not affected by oil and is flexible under all conditions. Stretched before leaving the factory. Recommended for threshers, saw mills, brickyards, wood working plants, etc.

No. 9F38938 4-Ply Stitched Canvas

If any wanted made endless, allow the price of 3 feet of belt for lap and labor of splicing.

ENDLESS CANVAS BELTS.

Made of our regular stitched canvas belting, spliced in such a manner that they are no thicker and are just as strong and flexible at point of splicing as at any other part of belt. Made of new strong duck or canvas, closely stitched, evenly stretched and filled with a special oil which keeps them flexible and waterproof. They are then painted with a first quality red paint which causes them to take hold of the pulley and prevents slipping. They do not become stiff in cold weather and are the most satisfactory belts made for threshing outfits, quarries, brick machines, saw mills or anywhere a good, strong serviceable belt is required. **We carry in stock the belts listed below and can ship any size promptly.** Actual lengths of endless belts are 3 feet less than stated, as it requires the price of 3 feet for lap and labor of making belts endless.

Solid Woven Canvas Belting.

Made of best hard twisted long fiber cotton, woven solid in one piece. Threads go through and through as well as crosswise and lengthwise. Illustration shows a piece of this belt which was trimmed off on one edge and opened up at the end. With ordinary canvas belting, if the stitching wears out the plies come apart; with this solid woven canvas belting there are no stitches to wear out nor plies to come apart. After weaving, this belt is thoroughly stretched and then treated with a special compound which preserves and strengthens the fiber. No paint is used. It is not affected by heat or cold, is always flexible, thoroughly waterproof and for extra hard service is the belt to buy. For the purpose of comparison, we call this belt 4-ply and 6-ply, which means that it is about the same thickness and weight as ordinary 4-ply and 6-ply canvas belting. We cannot furnish these solid woven belts made endless.

46c

OUR FULTON SPECIAL BUCK SAW.

Cuts fast and easy, runs a long time without filing and setting and is equal in every way to saws sold by others for $1.00 and up. Blade is extra thin and narrow, offers but little resistance to the wood and cuts well without bearing down on frame, making our Fulton Special a great favorite with professional wood sawyers, but it is equally as well suited for farm and home use. Anyone who wants a strictly high grade buck saw will do well to order our Fulton Special. Frame is made of carefully selected hardwood, with double riveted brace, is smoothly sandpapered all over, then varnished two coats. Has loop pattern rod, heavily tinned, with japanned turnbuckle. Blade is best clock spring steel, tempered and hardened, and fully warranted. Teeth are V shaped, five points to the inch, full bevel, hand filed and hand set. Blade is 1½ inches wide, blued finish and handsomely etched. Handsomest buck saw made and the one we recommend for general use.

No. 9F59120 Fulton Special Buck Saw, complete. Price.....64c

No. 9F59124 Extra Fulton Special Blades. Price, each.....35c

OUR CARDINAL BUCK SAW.

32c

A good saw for a little money, the regular 50 to 60-cent kind elsewhere. Hardwood frame, with double brace painted red; loop pattern rod and a 1½-inch V tooth, polished tempered steel blade. This saw is set and filed, all ready for use when it reaches you. Best buck saw made at such a low price.

No. 9F59130 Price, complete.....32c

No. 9F59134 Extra Blades. Price, each.....20c

OUR FULTON BUCK SAW.

48c

A fast cutting, warranted buck saw, at a popular price. Blade is 2¼ inches wide, made of spring steel, hardened and tempered. Teeth are coarse and V shaped, half bevel, filed and set by hand. FULTON "CLIPPER" EXTRA FANCY HANDLED AXES.

FIRE BLUED AX. MAHOGANY COLOR HANDLE.

A fine ax for experienced woodchoppers. Made in the best equipped ax factory, of the best ax steel and by the best ax makers in the business. Fulton "Clipper" Axes are the highest grade axes possible to produce and they are finished to equal their extra quality. Fulton "Clipper" Axes are made especially for good woodchoppers, men who really know what fine axes are, who want the best to be had and who will use no other kind. Fulton "Clipper" Axes are made Michigan pattern only, from extra tough body steel with double refined, specially tempered **crucible steel** cutting bits. They are full hollow bevel, ground perfectly smooth, deeply etched and then fire blued. Handles are selected second growth, octagon shaped white hickory, properly put in and wedged. Handles are finished mahogany color, which, in connection with the fire blued ax, makes the handsomest tool ever placed in the hands of a lumberman. Fulton "Clipper" Axes are carefully wrapped and packed one in a box. **State weight wanted.**

Fulton Circular Saws

MADE OF BEST CRUCIBLE SAW STEEL OF THE CORRECT GAUGE THICKNESS FOR THE SIZE AND KIND OF SAW AND WITH THE NUMBER OF TEETH AS LISTED BELOW. All Fulton Saws are tempered by the most improved process and are free from hard or soft spots. They are ground on special machinery which makes them absolutely gauge and wonderful savers of power. Fulton Circular Saws are balanced and are tested at full speed at the factory to see that they are in proper tension and hammered as they should be. Every Fulton Circular Saw is hand smithed, blocked, hand filed and hand set, made just the very best a skilled workman can make it and sent out sharp and ready for use the moment it reaches you. Our prices on Circular Saws average from one-fourth to one-third less than other standard makes and we guarantee the quality of the Fulton saw superior to any other.

Fulton Circular Cut-Off Saws.

40c

High speed extra quality saws, for use in factories, mills and general wood working plants. Experience has shown us that saws of the specifications listed below are best for general use. Fulton Circular Saws are highest grade, made of best crucible steel, properly tempered, accurately ground, hand filed, hand set and are sent out sharp and ready for use. We carry these saws in stock, as listed, and can ship promptly from Chicago upon receipt of order.

Fulton Circular Cordwood Saws.

These Cordwood Saws can only be furnished as listed below. If you must have a saw in any way different write for special price, giving full specifications

We will not furnish saws larger than 26 inches in diameter with arbor holes smaller than 1⅛ inches, as it is not safe to run larger saws on smaller mandrels.

Low speed first quality saws for use on cordwood and pole sawing machines. Easily kept in proper condition and the special tooth with deep round gullet gives plenty of room to chamber the sawdust and prevents cracking the saw. Not adapted for use at high speed or for smooth cutting. Made of best saw steel, hand filed, hand set and sent out sharp, ready for use. **Saws as listed below carried in stock in Chicago.**

Saws 28 to 36 inches not furnished with holes smaller than 1⅛ inches, as they are not safe when run on smaller mandrels.

Note All Cut-Off, Cordwood and Rip Saws quoted above are carried in stock in Chicago in the sizes and specifications as listed and shipped immediately with other goods if desired upon receipt of your order. If saws are wanted in any way different from the above make them to order quicker than any other firm. Give us full specifications of saws wanted and we will quote low prices at once.

SOLID TOOTH 40 TO 60 INCHES. FULTON CIRCULAR MILL SAWS INSERTED TOOTH 40 TO 60 INCHES.

All saws 40 inches and larger, both with solid teeth and inserted teeth, are made to order only, and in ordering be sure to give us all specifications as below so we can make the saw to suit you without the delay that must occur if we have to write you for additional information. We carry plates 40 to 60 inches in diameter in stock at factory in Southeastern Michigan ready to finish on receipt of order and we make shipment of large saws more promptly than any other firm. All saws 40 inches and larger should have 2-inch mandrel holes, with two ⅝-inch pin holes, spaced 3 inches center to center. In ordering be sure to give all specifications as follows: **Number of teeth wanted in saw, gauge at rim, gauge at center, whether spring or swage set, temper, speed, feed, whether to cut hard or soft wood, right or left hand, size of mandrel hole, size and distance center to center of pin holes.**

No. 9F59406 Fulton Solid Tooth Mill Saws have a reputation for quality second to none and we absolutely guarantee them equal to any saw made regardless of price.

HIGH GRADE BABBITT METAL.

Made from new high grade anti-friction metals, thoroughly refined and properly mixed to give the best results. All of it is entirely dependable and will give good service if used for the purposes for which we recommend it.

7c PER POUND No. 4 BABBITT METAL.
No. 9F36450
Standard quality, the usual 10 cents per pound kind. A fair grade metal, better than usually offered under the No. 4 brand. Suitable for use on low speed machinery.
Price, per pound, 7c

10c PER POUND No. 2 BABBITT METAL.
No. 9F36451
A good general purpose metal. The grade that usually sells for 15 cents per pound. Gives good service on all ordinary machinery running at average speed. Excellent value at our price.
Price, per pound, 10c

13c PER POUND No. 1 BABBITT METAL.
No. 9F36454
A high quality metal, the regular 18 to 20-cent kind elsewhere. Fully equal to the best grades generally offered by others. Suitable for high speeds and heavy loads.
Price, per pound, 13c

16c PER POUND LUBRICATING GRADE BABBITT METAL.
No. 9F36456
An extra high quality copper mixed metal, a better grade than is usually carried by supply houses. Regularly sold at 22 to 25 cents per pound. Will stand more and outlast any metal on the market at less than 22 cents. Our price, per pound.....16c

49c PER BAR. OLD HICKORY BABBITT METAL IN 2½-POUND BARS.
No. 9F36461 A well known metal of extra high grade that usually sells for 25 cents per pound. Old Hickory is preferred by many high class mill men, and it always gives good service. Especially recommended for engines and fine high speed machinery. Made in round bars about 2½ pounds each, one side cone shaped to fit bottom of melting ladle. We do not sell less than a 2½-pound bar. Price, per bar.....49c

...uine Mixter's Champion Saw Gummer.

Genuine Mixter's Saw Gummers have been on the market for years. They have been thoroughly tested and tried out by continuous hard service, and the really experienced mill man will have no other kind. We formerly sold these gummers at a higher price, and they are still sold by others at $20.00 to $25.00. We are now able to sell them at the very low price of $15.00. Imitations of this gummer are sometimes offered at about our price, but they are poorly made, of inferior material, and would be dear at any price. Nowhere else can you get the genuine Mixter's saw tools at our low prices.

Self acting, throwing itself out of gear when teeth are cut to ...making them of uniform length. The line of the ...cut at any angle desired. Cuts very rapidly and ...of bending, breaking or case hardening saw. Full ...with each machine. Price includes three cutters, ...inch grinder and wrench.

JENNINGS' SPECIAL HACK SAW OUTFIT.

$1.85

Gives you a saw suitable for every purpose for which a hack saw is ever needed, and of higher quality than you could possibly get elsewhere. Frame is extra heavy steel, full nickel plated, and is adjustable to hold 10, 12 or 14-inch blades. Frame is well finished, strong and durable. Faces blades to four different angles and is instantly adjustable to hold different length blades. Blades are highest quality, made of best spring steel, tempered very hard, so hard they cannot be filed, but last four times as long without filing as an ordinary blade with one filing. Outfit consists of frame and six blades as follows: one 10-inch coarse (14-tooth), one 10-inch fine (24-tooth), one 12-inch coarse (14-tooth), one 12-inch fine (24-tooth), and two 14-inch coarse (14-tooth). At our low price, this is a genuine bargain.

No. 9F5245 Outfit, complete as above....**$1.85**

No. 9F55618 Extra Blades for above scraper. Price, each.....18c

OUR ECONOMY FLOOR SCRAPER, $11.50

Does the work of three men with hand scrapers; saves time and labor; leaves the floor smooth and level; does away with the hard back breaking job of scraping floors by hand. As operator draws scraper toward him, the blade works upon the floor similar to the action of a hand scraper, the weight of the machine giving force to the pull, preventing jumping or leaving a wavy effect. This Economy scraper does as fine work as any similar tool on the market, no matter what price may be asked for it. It works close up to the wall. Is easy to operate and soon pays for itself in time saved. Blades are 6 inches wide, made of best refined crucible steel, tempered very tough and hard. Wheels are rubber tired to prevent scarring floor. Entire tool is neatly finished. Shipping wt., about 125 lbs. Our price includes one extra blade.

No. 9F55639 Price, complete.....$11.50

No. 9F55640 Extra Blades, each..25c

No. 9F58558 Useful in every household, also handy for shoe and harness makers, jewelers, etc. Made of cast iron; face, sides and horn polished and nickel plated; base painted red. Size face, 5¼x1¼ inches; length over all, 8 inches; weight, about 7 pounds. Price.....53c

STEEL WOOL AND SHAVINGS

No. 30F2670 Steel Wool is a mass of fine fibers of steel, resembling curled hair, which, while sharp, does not scratch, but will cut as smoothly as the finest sandpaper, emery or pumice stone. For many purposes it is superior to sandpaper, pumice stone, etc. Used for rubbing down fillers and varnishes. Steel shavings are a coarse grade and are used for removing rust from iron preparatory to painting, also for cleaning floors or any surface of old varnish.

STRAIGHT SHANK TWIST DRILLS.

Cannot be used in the ordinary bit brace. Must be used in a chuck made for round shank drills. The shank and twist are the same size. Hot forged from the finest steel, accurately ground and will outlast the ordinary milled drills offered by others, two to one. We guarantee the quality equal to any made. We recommend the purchase of a complete set with stand, as it is the handiest way to keep these drills. Stand has a hole for every size, with size marked near it.

HOT FORGED BIT STOCK DRILLS.

No. 9F56720 These drills fit any bit brace and will drill steel, iron or other metals. Will bore any kind of wood without splitting and are not injured by contact with screws or nails. Our drills are hot forged and are tougher and stronger than milled drills as the best part of the steel is not cut away. All drills are accurately ground to micrometer gauge and sizes are exact. All our drills 3-32 and larger have solid forged steel shanks, therefore giving increased strength. Points of drills should be kept well oiled when drilling metal.

"Pyramid" Set of Boring Bits.

Picked out of our whole line of boring tools by an experienced mechanic, who said this lot of bits would answer for making all the holes he ever had to bore. Set contains:

1 Large Size Steers' Expansive Bit with two cutters. Bores from ⅞ to 3 inches. 6 Fulton Solid Center Extension Lip Auger Bits. Sizes, ¼, ⅜, ½, ⅝, ¾ and 1 inch. 2 Extra quality Gimlet Bits, ⅛ and 3-16 inch. 4 Bit Stock Twist Drills, for metal. Sizes, ¼, 5-16, ⅜ and ½ inch. 1 Extra Quality Square Reamer Bit. 1 Fulton High Grade Screwdriver Bit, Medium size. 2 Extra Quality Countersink Bits; one snail head for wood and one rose head for metal.

Seventeen tools in all, each the best of its kind and each one fully warranted. Mounted on an antique copper finished iron pyramid base with a hole to fit each tool, making them easy to get at. Our price for the whole outfit is less than the bits alone would cost you elsewhere.

No. 9F56770 Price, complete..$4.50

Ball Bearing Chain Drills.

Will put holes into iron, brass or other hard metals with less effort than a brace and bit does in wood. Very easy to operate on account of ball bearings. Fit any bit brace. Furnished with 3 feet of chain.

HERCULES DOUBLE BALL BEARING RATCHET BIT BRACES. $1.77

Most ball bearing braces have ball bearings in head only, but our Hercules has steel ball bearings in both head and chuck. Ball bearings in head make this brace run with almost no friction, while ball bearings in chuck enable jaws to be clamped on to a bit or drill with a never-slip grip. Our Hercules brace has heavy cold rolled steel sweep and polished cocobolo head and handle. Metal parts nickel plated, chuck knurled full length. Has forged steel, alligator jaws, holds either round or square shank bits or drills.

No. 9F56042 Sweep,	10 in.	12 in.	14 in.
Price, each	$1.77	$1.88	$1.99

The Improved Fulton Special Ratchet Bit Braces

$1.30 AND UP.

FRICTIONLESS ROLLER BEARINGS

Heavily nickel plated and nicely finished throughout. For beauty, strength and workmanship there are no superior braces made.

GUARANTEE—Order one of these braces, give it a fair trial. If you are not satisfied in every way, return it to us and your money will be returned to you.

SWEEP—Special high grade steel, 15-32 inch in diameter. Will not bend or give way under heaviest pressure.

HEAD—Polished cocobolo, nicely finished and steel clad to protect it from being split or bruised. It is attached to the sweep by means of a steel quill that revolves on roller bearings. The rollers revolve between hardened steel washers which prevents any friction or wear.

HANDLE—Cocobolo, with brass bushings inserted in the ends to prevent it from splitting. It revolves on patent adjustable tapered steel collars and bearings. By means of set screws, any looseness from wear may be instantly taken up. The ends of the handles bear on the tapered shoulders of these adjustable collars and not on the sweep. This is the latest improved and finest working handle made.

Sectional view of head, showing roller bearings.

Sectional view of handle, showing adjustable collar and bearings.

10-Inch, $1.45 EQUALS ANY $2.50 BRACE

RATCHET — Simple in construction, easily operated, strong and durable. The ratchet teeth are cut on the end of the steel body that revolves in the socket attached to the sweep and are concealed and protected by this socket. The ratchet pawls are solid blocks of steel fitting squarely into the teeth of the ratchet. (The hook pawl opener is shown in illustration.)

CHUCK—Has forged steel jaws, which open automatically to receive the shank of the bit. Takes regular square shank bits, and round shank bits up to ⅜ inch in diameter. Will take a large size expansive bit.

FINISH—All metal parts are highly polished and nickel plated. Head and handle are natural finish, nicely polished.

SLEEVE—Made of malleable iron, octagonal pattern. Nickel plated and highly polished. Handsome in appearance.

ECHANICS' USE. FULTON HIGHEST QUALITY AUGER BITS GUARANTEED BY US.

WILL CUT FASTER, LAST LONGER AND DO BETTER WORK THAN ANY OTHER AUGER BITS MADE.

Bits are hand forged by skilled workmen from high grade double refined crucible steel. Every head is carefully fitted up by hand and then filed by hand. All Fulton and true to size and by a special process are tempered the full length of the twist. Because of their superior workmanship, carefully fitted heads, perfectly threaded screws, de cutters and high quality in general, Fulton Auger Bits will lead with almost no pressure into wood that other bits will not bore into at all, no matter how much Fulton Auger Bits in all sizes are finished natural temper color in the twist with polished edges and shanks and are the handsomest auger bits made. The hollow y cleaned out, and the angle is just right so the bits will clear themselves and not choke up. We guarantee every Fulton Auger Bit we sell.

FULTON JENNINGS PATTERN EXTENSION LIP AUGER BITS.

specially for mechanics' use and are, without exception, the best auger bits of this pattern made. For work, boring in soft or hard wood, these bits cannot be excelled. Fulton Extension Lip Auger Bits are hand and filed and hand filed straight and true to size, tempered full length of twist, will not choke up, will bore faster, and positively are better in every way than other well known brands that sell at one-third to one-half more Remember, that for quality of bit, finish, capacity and smooth boring, we guarantee our Fulton Extension Auger any bit of this pattern made.

FULTON SPECIAL EXPANSIVE BITS.

has all the good points of the well known Clark pattern expansive the tendency of the cutter to creep under heavy pressure, which has been with the Clark pattern bit. Has two opposing set screws, the larger acting aller on top of the cutter, which holds it absolutely rigid, not allowing it to an inch. As it adjusts to a thirty-second of an inch, it takes the place of a ny sizes of auger bits that are rarely used, but sometimes needed. Bores hard wood, cuts fast, will not clog up, and is easily adjusted. Stem is of drop forged tool steel. Cutters are made of best tool steel, properly and fit snugly in a hole bored through the solid stem of the tool. These ndsomely finished in natural temper color with polished shanks and edges.

Double set screws positively prevent cutters from creeping or working loose.

Note extra set screw. Cutter cannot creep.

Order this Fulton Special Tape, guaranteed satisfactory. Graduated in feet, inches and eighths of inches.

To measure, feet	25	50	75	100
Price	$2.43	$2.87	$3.90	$4.95

CARPENTERS' STEEL SQUARES

WELL MADE, nicely finished, accurate and true, have the proper "hang" and give satisfaction. Every steel square we send out is guaranteed as to quality and finish and warranted true. All our steel squares are made both body and tongue tapered, the ends being thinner. This gives strength where it is needed, at the same time making the square lighter and easier to handle.

$1.44 ROYAL COPPER FINISH SQUARE

Factory No. 100, R. C. R. An extra fine square for high class mechanics. The very best in quality and the handsomest finished steel square made. Heavily copper plated and is as nearly rustproof as a steel square can be made. Has deep, clear figures and graduations filled with white enamel, which makes them easy to read. Body, 24x2 inches; 16-inch tongue. Marked on face 1-16, ⅛ and ¼-inch spaces; on back, 1-32, 1-12 and 1-10-inch spaces. In addition it has brace measure, eight square and patent rafter table, as shown in illustration, which gives the measure of rafter for any one of seven pitches of roof. The usual price of this square elsewhere is $2.25.
No. 9F57324 Our price, including full directions for using $1.44

For the Only Really Successful **TAKE-DOWN SQUARE** Made, See Page 1087

RAFTER SQUARE.

79c BLUED FINISH RAFTER SCALE STEEL SQUARE. Factory No. 3 B. R. A mechanics' square, in a durable finish that always looks well. Marks are deep and plain, figures stand out clear and distinct. Body 24x2 inches, tongue 16 inches long. Face marked 1/16 and ¼-inch spaces, back 1/32 and ¼-inch spaces, and in addition has brace measure and rafter scale as shown in upper illustration with feet and inches in full. A usual $1.25 value.
No. 9F57344
Our price 79c

SPECIAL SIZE SQUARES

69c A NEW SIZE in high grade steel squares. Body, 18x1½ inches; tongue, 12x1 inch. Blued finish, marked deep and plain. Large enough for all ordinary work. The lightest and most convenient square on the market for tool boxes, shoulder chests, etc. Marked on face 1-16, ⅛ and ¼-inch spaces; on back 1-12 and ¼-inch spaces. Usual price, $1.00.
No. 9F57322
Our price only 69c

51c NICKEL PLATED STEEL SQUARE. Body, 12x1½ inches; tongue, 8x1 inch. A convenient size for small tool chests, shoulder boxes, home use, etc. Marked on face in 1-16, ⅛ and ¼-inch spaces; on back in 1-100, 1-12 and ¼-inch spaces. Warranted accurate. The usual price of this square is 75 cents.
No. 9F57374
Our price 51c

64c POLISHED FINISH STEEL SQUARE. Factory No. 100. A first quality square in a plain polished finish, absolutely accurate, a regular mechanics' tool. Size body, 24x2 inches. Face marked 1-16 and ⅛-inch spaces. Back marked 1-100, 1-32, 1-12 and ¼-inch spaces. Also has brace measure, eight square and Essex board measure. This square considered a bargain in regular stores at $1.00.

Length of tongue	16 inches	18 inches
No. 9F57338 Price	64c	65c

86c BLUED FINISH STEEL SQUARE. Factory No. 100 B. An extra quality steel square in a pleasing durable finish, the kind of square that good mechanics use. Markings are deep and plain. Figures stand out clear and distinct. Exactly the same as our No. 9F57338 above, except blued instead of polished. Regular price elsewhere, $1.25 to $1.50.

Length of tongue	16 inches	18 inches
No. 9F57334 Price	86c	87c

46c POLISHED FINISH STEEL SQUARE. Factory No. 3. A first quality steel square, with plain simple markings. Preferred by many carpenters, and the very square for use about the home or farm. Body, 24x2 inches. Tongue, 16 inches long. Face marked 1-16 and ⅛-inch spaces. Back 1-12 and ¼-inch spaces. Markings are deep and plain and absolutely accurate.
No. 9F57354 Price 46c

39c POLISHED FINISH STEEL SQUARE. Factory No. 7. One of our most popular sellers on account of its low price and good quality. Absolutely accurate, and the very square for use on wet timber, in dirty places or where a finer finished higher priced square might be rusted or soiled. Tempered steel, excellent value. Body, 24x2 inches; 16-inch tongue. Face marked ⅛, ¼ and 1-inch spaces. Back, ¼ and 1-inch spaces. Has Essex board measure.
No. 9F57364 Price 39c

24c POLISHED IRON SQUARE. Factory No. 24. Size body, 24x2 inches; tongue, 12x1½ inches. Marked in ⅛-inch spaces on both sides. The best square made to sell at such a low price. We do not warrant it, however, and always recommend the purchase of a steel square.
No. 9F57388 Price 24c

Machinists' Steel Squares and Rules on page 1078.

The Steel Square and Its Uses,

Including Roof Framing, Pitches, Hoppers and Stair Building, With Complete Questions and Answers. In Two Volumes, Just Published.

A complete, thoroughly up to date Encyclopedia on the practical uses of the Steel Square. Treats of all subjects to which the steel square can be applied. Every subject covered in the original Fred T. Hodgson "Steel Square" books is to be found in this work, but these subjects have been greatly enlarged and thoroughly revised. Special chapters are devoted to Roof Framing and Stair Building. There are complete questions and answers covering every use to which the steel square can be put.

The set (2 volumes; size, 6x9 inches) contains over 600 pages, being the largest books on the steel square published. Bound in cloth.
No. 3F9110 Price, per set (two volumes) $1.33
If mail shipment, postage extra, per set, 30c.

PAGE OF C. E. JENNINGS & CO.'S ARROW HEAD TRADE MARK FINE MECHANICS' TOOLS

An old established well known line of mechanics' tools that has been on the market for years. The name Jennings on an auger bit is all the guarantee of quality anyone need want; on a chisel, saw or square it means just the same: that there's no better tool made. You may feel perfectly safe in ordering any article on this page; they are all made by C. E. Jennings & Co., and we guarantee them to give satisfaction.

JENNINGS ARROW HEAD BRAND SAWS

All Jennings saws are made in the good old way, by hand. They are made by skilled mechanics whose years of experience have taught them the proper way to make and finish a saw in order to get the best results when put to the test of daily use. All Jennings saws are hand smithed, hand blocked, hand tempered, hand polished, hand filed, hand set and hand etched. The very best work is put on them that a skilled saw maker is capable of doing.

JENNINGS SPECIAL HACK SAW OUTFIT.

Gives you a saw suitable for every purpose for which a hack saw is ever needed, and of higher quality than you could possibly get elsewhere. Frame is extra heavy steel, full nickel plated, and is adjustable to hold 10, 12 or 14-inch blades. Frame is well finished, strong and durable. Faces blades to four different angles and is instantly adjustable to hold different length blades. Blades are highest quality, made of best spring steel, tempered very hard, so hard they cannot be filed, but last four times as long without filing as an ordinary blade with one filing. Outfit consists of frame and six blades as follows: one 10-inch coarse (14-tooth), one 10-inch fine (24-tooth), one 12-inch coarse (14-tooth), one 12-inch fine (24-tooth), and two 14-inch coarse (14-tooth).

No. 9F5245 Outfit, complete as above.....$1.85

JENNINGS No. A7½ NARROW BLADE HAND SAWS.

Patent ground and tempered, full polished. Runs as easy and smooth as a fine saw worn narrow by use. The 26-inch size is 6 in. wide at butt and tapers to 1½ in. at point (other sizes in proportion). Made of extra refined spring steel, ground thin on back, **hand made throughout,** has carved handle, improved screws and is fully warranted.

JENNINGS TAKE DOWN STEEL SQUARES.

The greatest improvement ever made in steel squares. Easy to take apart and put together, absolutely accurate. Spring takes up wear and keeps square tight and rigid as when new. Goes into space 4x24 inches, has canvas bag to protect square from rust and damage. Unlike other folding and take down squares, there are no screws or bolts to get loose and there is absolutely no play, the solid shoulder insuring accuracy. This is the very latest and most improved tool of its kind made. Guaranteed satisfactory or money returned. Has 16-inch tongue and 24-inch body. Spaced on front in 1-16 and ¼-inch spaces; on back in 1-12 and ¼-inch spaces. In addition it has brace measure and Essex board measure tables, both of which are very convenient to the user. Marks are deep and plain, figures clear and distinct. Full directions with each square.

JENNINGS SOCKET FIRMER CHISELS IN SETS.

No. 9F5280 One of the best and handsomest sets of chisels ever offered. Blades are made of best double refined crucible tool steel, properly tempered, highly polished, ground sharp and hand honed. Edges are beveled, sockets perfectly formed. Each chisel tested in hardwood before leaving factory. Handles are selected white hickory, tipped with four layers of solid sole leather and held on with three hardwood dowel pins. Case is made of selected wood, has locked corners, spring to hold each chisel and is handsomely finished. Sold only in full sets of twelve chisels. One each size, ⅛ to 2 inches.
Price, per set, complete.....$5.50

JENNINGS NO. 1½ SINGLE TWIST EXTENSION LIP AUGER BITS.

For all kinds of boring, in hard or soft wood, but especially adapted for hardwood and end boring. Having but one lip and one spur they offer but little resistance in working. Will lead into end of hard wood without being forced and, being open in the twist, clear easily. They cut with the grain or across the grain, bore a smooth hole and will not split even thin seasoned panels. Full polished finish. Sold only in full sets of thirteen bits.

At prices we quote, these high quality bit sets are unmatchable values.

No. 9F5260 Set of Thirteen Bits. One each, ¼ to 1 inch, in heavy canton flannel lined canvas roll. Rolls up into space 11x3 inches. A handy outfit of the finest auger bits made. Our price..$5.50

Starrett's LEVELING INSTRUMENT

$9.63 OUR PRICE Others ask $12.50 for this same level.

Designed for the use of architects, contractors, builders, farmers, landowners or others who find it necessary to run lines or get land levels.

INVALUABLE FOR LEVELING FOUNDATIONS and walls, setting machinery, floor timbers and sills, running lines, ditches and drains, grading roads or hillsides and will more than save its cost on one job. It is just the thing for getting building levels correctly. Instrument, complete, consists of upper plate with graduated arc divided by degrees, tripod, tripod head, plumb bob and line. Tripod is made of iron, japanned, improved extension legs are separate from tripod. The upper parts are hollow to receive within them the lower parts. With this improvement over the old style you can make the height from 2 feet 6 inches to 4 feet 6 inches. Sight tube, 12 inches long, is brass, nickel plated, with small eye opening at one end and usual cross wires at other. Level case and graduated arc are also nickel plated and the other parts are nicely japanned. No magnetic needle nor complicated mechanism about this instrument and, with the complete directions we furnish with each one, anyone can use it and get perfect results.

No. 9F57224 Price, complete, in nicely finished wood box.....$9.63

FOR OTHER LEVELING INSTRUMENTS SEE PAGE 752.

BORING MACHINES AND AUGERS

66C Fulton Special Nail Hammers

Solid tool steel, full nickel plated, black enameled handles; the best and handsomest hammers possible to produce. Fulton Special Hammers are forged from best refined crucible cast steel. Faces and claws are tempered just right, heads are so proportioned as to give them the proper hang. Claws are split to such a fine point they will draw the smallest brad as well as the largest nail; handles are made of selected second growth white hickory (split, not sawed); put in with iron wedges, so they will not become loose. We could not sell you a better hammer if we asked twice our price; a better hammer cannot be made at any price.

FULTON SPECIAL HATCHETS FOR MECHANICS' USE

No better hatchets made for actual service than this Fulton special line. Fully equal to the hatchets usually sold for $1.00 and up and are only surpassed in finish by our Fulton Clipper Hatchets described above. Fulton Special Hatchets are hand forged from solid steel with double refined crucible steel cutting bits and extra tempered heads. Handles are selected second growth white hickory (split, not sawed), and securely put in with steel wedges. Our Fulton Special Hatchets, except as noted, are gunmetal finish, a serviceable black finish that will not easily rust. Weights given are weights of hatchets before handles are put in.

JENNINGS' TAKE DOWN STEEL SQUARES. $1.90

The first really successful "take down" square ever brought out and the greatest improvement ever made in steel squares. Easy to take apart and put together, absolutely accurate. Spring takes up wear and keeps square tight and rigid at all times. It is just as accurate as the one-piece steel square, but takes up less room, making it more convenient to carry. Goes into space 4 x 24 in., has canvas bag to protect square from rust and damage. Unlike other folding and take down squares, there are no screws or bolts to get loose and there is absolutely no play, the solid shoulder insuring accuracy. Guaranteed satisfactory or money returned. Has 16-inch tongue and 24-inch body. Spaced on front in 1-16 and ¼-inch spaces; on back in 1-12 and ¼-inch spaces. In addition it has brace measure and Essex board measure tables, both of which are very convenient to the user. Marks are deep and plain, figures clear and distinct. Full directions with each square.

FULTON SPECIAL HAND HONED, LEATHER TIPPED, BEVEL EDGE SOCKET FIRMER CHISELS.

QUALITY THE BEST

FINISH UNSURPASSED

THE HIGHEST GRADE, MOST CAREFULLY FINISHED CHISELS ON THE MARKET.

Blades are crucible cast steel, tempered by a superior process, ground and honed by hand, and will cut faster and hold an edge longer than any other chisel made. Sockets are long, well made and not split. Handles are made of extra selected white hickory, tipped with four layers of solid leather. Fulton Special Chisels are superior to any on the market and we guarantee them to give satisfactory. Note the complete sets of Fulton Special Chisels in hardwood boxes shown below.

JENNINGS' TAKE DOWN STEEL SQUARES. $1.90

The first really successful "take down" square ever brought out and the greatest improvement ever made in steel squares. Easy to take apart and put together, absolutely accurate. Spring takes up wear and keeps square tight and rigid at all times. It is just as accurate as the one-piece steel square, but takes up less room, making it more convenient to carry. Goes into space 4x24 in., has canvas bag to protect square from rust and damage. Unlike other folding and take down squares, there are no screws or bolts to get loose and there is absolutely no play, the solid shoulder insuring accuracy. Guaranteed satisfactory or money returned. Has 16-inch tongue and 24-inch body. Spaced on front in 1-16 and ¼-inch spaces; on back in 1-12 and ¼-inch spaces. In addition it has brace measure and Essex board measure tables, both of which are very convenient to the user. Marks are deep and plain, figures clear and distinct. Full directions with each square.

ulton Hand Made Hand Saws

uaranteed the Best Saws in the World for General Carpenters' Use.

TER THAN OTHER WELL KNOWN MAKES: Because we manufacture Fulton Saws in our own y, we control the quality absolutely, allow none but the best material to d in their construction and carefully inspect every saw before sending out. The blade of every Fulton Hand Saw is the best crucible saw steel, extra thin on the back, four gauges thinner than the toothed edge. hin back makes the Fulton saw run freely with very little set.

TON SAWS ARE HAND MADE. Every Fulton saw is hand smithed, hand blocked, hand filed and hand set; made just best that an experienced saw maker knows how. Very few saws ay are hand smithed and hand blocked, as these are expensive ess which do not show while the saw is new. Because the smithing ing is done as it should be, Fulton saws will give perfect ugh the blade is actually worn away. The teeth on Hand Saws are full beveled, hand filed and hand set. tempered to cut and hold an edge, and a Fulton do more work without filing and sharpening r other hand saw made. The blade is highly and given a finish that is not surpassed ther saw. The handle is a plain pat- the right shape that just fits the makes the saw balance right and proper "feel."

NOTE The Fulton Special Saw

$1.27 FOR A **26-INCH FULTON HAND SAW**

GUARANTEED BETTER THAN ANY OTHER SAW AT $2.00 TO $2.25 EACH.

FULTON SPECIAL HAND SAWS.

An extra thin back, high grade finely finished hand saw. Made especially for fine cabinet work, sawing miters, or wherever absolute accuracy and rapid smooth cutting are required. In the hands of a mechanic who understands the proper use and care of an extra high grade saw, our Fulton Special will give entire satisfaction and prove equal to any $2.50, $3.00 or $4.00 hand saw on the market. Fulton Special Saws are made with wide straight backs, from the best double refined crucible saw steel, are ground extra thin on back and tempered to cut and hold an edge. Fulton Special Saws are hand made, hand filed and hand set. Handles are selected applewood, fancy carved, nicely varnished and put on with improved brass screws; the 26, 28 and 30-inch saws with five screws, smaller sizes with four. Blades are perfectly ground and highly polished, making these the best finished as well as the best working hand saws made. Fully warranted to give satisfaction in use.

$1.43

wood, nails, sheet metal, wire, gas pipe, etc., quickly and without injury to the saw. Like our other Fulton saws, these Fulton Nail Cutting Saws are made of the very best crucible saw steel, hand made, hand filed and tempered by a special process which makes them exceedingly hard but very tough. Not brittle as of the metal cutting saws offered elsewhere. Fulton Nail Cutting Saws can be filed when they become dull, but require setting, being taper concave ground. Made in one only, with 18-inch blade.

F59036 Price $1.43

SPRINGFIELD HAND SAWS.

The regular $1.50 grade sold by others. Manufactured by us of a good grade of crucible saw steel, ground nearly three gauges thinner on back, and carefully smithed and blocked. Has varnished hardwood handle, four improved brass screws and hollow back.

97c 26-inch

It is full bevel, hand filed, hand set and fully warranted. Don't pay $1.40 to $1.65 at retail for a 26-inch hand saw when you can buy our Springfield Saw for 97 cents, which is equally as good.

FULTON DROP FORGED SQUARE SHANK SCREWDRIVER.

OUR PRICE, 14c USUAL 25-CENT VALUE.

No. 9F55806 A strong substantial screwdriver of highest possible quality, made for machinists, carpenters, electricians and others whose work requires the very best tools. Is stronger constructed and will outlast any other screwdriver made. Shank is square, for use with a wrench on heavy work. The blade, shank and head are forged from one solid piece of steel. Shank extends entirely through handle, is flattened on top and it cannot turn and handle cannot come off. Shanks are made of refined crucible steel, carefully forged, properly tempered and well finished. Handles are hardwood, finished in black. Ferrules are polished steel, immovably shrunk on.

Samson Strong Solid Bench Vises

$2.59

Strong, durable and substantial, built for heavy everyday shop use. We do not fit extra wide jaws on small size vises in order to quote a lower price. Our 3½-inch vise weighs as much as 4-inch vises offered by other concerns; and so with every size. This extra weight is distributed at points of greatest strain, making our Samson the strongest vises on the market. Samson Bench Vises have cold rolled steel screws and handles, tempered tool steel jaws and every one is warranted perfect. Dull black finish. Polished jaws, knobs and handles.

EVERY FARMER SHOULD HAVE THIS

Combination Tool Outfit

Vise, Anvil, Forge, WITH BLOWER, AND DRILL ATTACHMENTS ALL IN ONE.

OUR SPECIAL PRICE, $12.50

Complete With Attachments.

STRONG, DURABLE AND CONVENIENT; A PRACTICAL OUTFIT THAT WILL DO THE WORK.

A combination of four tools in one. Always ready for use. Drill attachments can be put on in an instant. This Combination Tool Outfit is made especially for **farmers, repairmen, small shops, etc.** It does the work satisfactorily of four separate tools; vise, anvil, forge and drill. **It is simple in construction, there are no complicated parts to get out of order and the changing from one attachment to another can be done in an instant.** No time lost by moving from one tool to another, as you have all the tools necessary to do the work, combined in this outfit. It is an ideal outfit for shops where every foot of floor space counts. **Every farmer should have one of these Combination Tool Outfits,** for at the low price we quote you cannot well afford to be without one, as it will pay for itself in a short time in the repair work alone. Combination Tool Outfit is strong and durable and nicely finished. It is practical and constructed on scientific principles. **The foot power mechanism** is so constructed that enough power for forge is obtained with very little exertion.

ILLUSTRATIONS BELOW SHOW ATTACHMENTS.

Showing Drill Attachment Adjusted. Drill Table Attachment

Height over all is 41 inches. The vise has crucible tool steel jaws 3½ inches wide and opens 11 inches. Vise screw is cold rolled steel. Anvil is 12 inches long over all and is made of semi-steel, which is tough and durable. Hardie is included as illustrated. Forge pan is 12x15 inches and has a strong blower and tuyere. Fly wheel is 11 inches in diameter and has a 1-inch leather belt. Outfit weighs about 160 pounds. Shipping weight, about 180 pounds.

ACME AMERICAN WROUGHT ANVILS.

SUPERIOR IN DESIGN, MATERIAL AND FINISH to any other anvils on the market. Made especially for us and sold only by us under our own guarantee. At our prices, not governed by any combination, our Acme anvils as quoted below represent more real value than you can possibly secure elsewhere.

OUR ACME ANVILS are made in the good old fashioned way of two pieces of tough wrought iron welded at waist. The face is made of a single piece of tool steel securely welded to the body and warranted not to come loose. The face, trued by a special machine so there are no hollow or uneven places, is perfectly tempered, making it hard without being brittle, and tough without being soft. Has long, perfectly shaped horn and heel and the base has sufficient spread to insure stability and prevent tipping.

TO PROVE THAT OUR ACME IS THE BEST ANVIL ever offered we sell it under our guarantee to take any one of them back at our expense within thirty days after you receive same if it is not equal to or better than any anvil you ever used. If it is not all we claim for it, return it to us and we will immediately return the full price paid. Could we afford to make this offer if our anvils were not first class?

ONLY 8½c A POUND

Price elsewhere, 12c A Pound.

Our Acme Wrought Anvils are the very best anvils that money can buy. We could not give you better value even if you paid us three times our price.

STEEL FACE CAST ANVILS.

The face of this anvil is one solid piece of tool steel, welded to the body by a patent process, then accurately ground and tempered. Horn is covered with steel and the point is made of tough untempered steel. Body is made of superior pig iron. Face and horn are securely welded to the body and warranted not to separate. Well shaped, has true hardie hole.

No. 9F3975

INVINCIBLE FORGE.

A neat, compact light running agricultural forge. Strongly built, all parts well fitted. Castings are heavy and gears well cut.

Dimensions: Forge stands 30 inches high, has 18-inch fire pan, 8-inch fan case. Weight, crated, about 83 lbs.

No. 9F31006
Price, with shield as illustrated $3.98

No. 9F31013
Same as above, except has full enclosed hood, as shown in small illustration, made of heavy sheet steel and with two sliding doors. Weight, crated, about 90 pounds.
Price $6.47

$3.98

TIGER STEEL FORGE.

Best for contractors, boiler makers, iron bridge and ship builders. A powerful blast forge, light enough to be moved about easily, yet strong enough for every purpose. Quickly taken apart and set up.

Dimensions: Has 18-inch hearth, 9-inch fan case and is 30 inches high. Weight, crated, about 107 pounds. Shipped from factory near Chicago.

No. 9F31021
Price $13.76

A SPLENDID FORGE FOR THE MONEY.

$13.76

OUR WHIRLWIND FORGE.

$5.13

Not to be compared with the cheap, light weight forges of similar design offered by others. No other forge at this price or near it will equal it for durability, quality and capacity.

WORKING PARTS. Made of highest grade material, and fully warranted. Has self acting steel ratchet (no springs to get out of order) which is adjustable to take up wear. Handle made of varnished hardwood, belt of oak tanned leather.

HEARTH. Made of heavy cast iron, 21 inches in diameter and fitted with first class tuyere.

LEGS. Mounted on three 1¼-inch U shaped steel legs, firmly braced, making it convenient to use on uneven foundations. These legs are very stiff and rigid and have spread enough to prevent tipping.

DIMENSIONS: Height, 30 inches; hearth, 21 inches in diameter; fan case, 8½ inches in diameter. Weight, crated, about 94 pounds.

No. 9F31008
Price $5.13

Generates more blast with less labor and is the largest, heaviest and best constructed forge ever sold at anything like our price.

Order a Whirlwind Forge and do your own light repairing. Pays for itself on any farm in a short time.

DIRECT BLAST FORGE.

Made of high grade material. Has very heavy side and center blast ball, extra large fire U shaped steel legs, braced.

DIMENSIONS: Height, 30 inches; diameter of hearth, 21 inches; diameter of fan case, 9½ inches. Weight, crated, about 110 pounds.

No. 9F31011
with half hood, as illustrated, ...

No. 9F31010
with shield .....

$8.37

The best lever forge made. Recommended for general blacksmith and repair shop. Equipped with our improved anti-clinker tuyere and best ratchet gear.

DIMENSIONS: Hearth measures 45½x31½ inches, has a sloping bottom coal box, 14½-inch fan case, and stands 30 inches high. Weight, crated, about 325 lbs. Shipped from the factory near Chicago.

No. 9F31020
Price, with coal box, as shown ... $16.52

No. 9F31023
Price, with both coal box and water tank $18.59

COAL SAV FORGE.

$10.47 IMPROVED VULCAN FORGE

HEAVY, STRONG AND DURABLE; BUILT FOR EVERYDAY SHOP USE.

Especially recommended for blacksmiths, machinists, miners, contractors and others who require a good, strong, dependable fire.

OUR VULCAN FORGES HAVE

BLACKSMITHS' HOOPED BELLOWS.

$3.98

The leather on most bellows is nailed to the wood, with nothing between the nail heads and the leather. Our bellows are all hooped, then nailed, which prevents the nail heads from pulling through the leather. In making our bellows we use only the best specially prepared cowhide leather and thoroughly seasoned whitewood, basswood and pine. There are no better bellows made at any price.

OUR TIGER BLOWER.

$10.92

For the up to date blacksmith who builds his own forge of brick, clay or stone. For those who require a strong, steady, even blast there is no better blower made at anything like our price. It will easily take care of any work that comes to the ordinary blacksmith shop.

OUR TIGER BLOWER has flat, straight cut gears, steel shafts and composition bearings, properly assembled and geared up so that a strong, powerful blast is furnished with but little labor and almost no noise. Gear case is oiltight and dust-proof, permitting gears to run in continuous bath of oil. Blower case adjustable to any angle. Crank turns forward or backward.

DIMENSIONS: Height, 45 inches; fan case, 12 inches in diameter; fan, 9¾ inches in diameter. Weight, crated, about 115 pounds.

No. 9F3926 Price, complete with piping and heavy anti-clinker tuyere, as shown $10.92

NIAGARA SPIRAL GEARED BALL BEARING BLOWER.

$14.98

The best hand blower made. Runs easier, develops more speed and is better in every way than the blower which was heretofore thought the best. Constructed on exactly the same principle as other spiral geared blowers, but there is a more liberal use of phosphor bronze and Swiss steel than in other makes. Has cut spur and spiral gearing and gears are so arranged that bronze comes in contact with steel, which makes them last longer and run smoother than steel against steel. Shafts, ball bearings and gears run in a continuous bath of oil, which prevents heating and greatly adds to the life of the blower. Fan case can be raised, lowered or turned in any direction, and the crank can be turned forward or backward as best suits the operator.

Our Price, $14.98
Price Lowered, Quality Improved.

DIMENSIONS: Tuyere is extra large, size 13¾x11¼x4 in. (inside measurement). Blower has 13-inch fan case and is 46 inches high. Weight, crated, about 137 pounds.

No. 9F3935 Price, complete with piping and tuyere, as shown $14.98

Used

89c

A first cla tuyere at a very low price. Bla turning large rod; cinders and by pulling small rod. Levers be changed to either side for use. Weight, about 25 pounds.
No. 9F31104 Price .....

Acme Ball Bearing Self Feed Third Gear Blacksmiths' Post Drill.

Drills Faster, Runs Easier, is Better Constructed, of Higher Grade Material and Has More Good Features Than Any Drill Ever Offered for Less Than $10.00.

BUILT AFTER OUR OWN DESIGN, made extra strong at points of greatest strain and combines all the good features of the different drills of this pattern now being sold, together with our improved third gear and other points which no other drills possess. Adapted to all kinds of work and especially recommended for general blacksmith and repair shops.

THE BALL BEARINGS, which are made of the best die steel, are placed between the chuck and headpiece of spindle, receive all the pressure and reduce the friction to almost nothing. The running of the drill is made a great deal easier and its life is more than doubled by these ball bearings.

THE SELF FEED ATTACHMENT can be set to a fast or slow speed as the nature of the work requires, or the dog can be thrown back and the drill fed by hand. Gives almost a continuous feed, thus preventing the drill bit from jamming into the work.

OUR IMPROVED THIRD GEAR enables the operator to change from fast to slow speed by simply changing the crank from one shaft to another on the same side of the machine. There is no left handed turning. The third gear also steadies the drill, an advantage when accurate work is to be done.

DRILL TABLE IS EXTRA HEAVY, can be raised or lowered, swung around out of the way or removed entirely so that fork can be used as a wheel holder. Has a strong steel crank, adjustable to long or short turn. Shaft and spindle are made of high grade steel. Spindle turns one and one-half times to each turn of crank on high speed; crank turns one and one-half times to each turn of spindle on low speed. Drills up to 1¼-inch holes and to center of 15-inch circle. Has up and down run of 3½ inches and is bored for ½-inch round shank drills. Wt., crated, about 112 lbs.

No. 9F3812 Price..... **$7.17**

$7.17

TWO-SPEED SELF FEED POST DRILL.

At $5.16 this drill represents more real value, will do more work with less labor and last longer, than any drill you can buy elsewhere for less than $7.50. This is a strictly high grade self feed drill at a lower price than is usually charged for a hand feed drill. It is made of the best material, is strong, substantial and durable, and fully capable of meeting the requirements of the average blacksmith. Has steel upright column, shaft and feed screws. Bearings are all bored true to size and not babbitted, which makes the drill much more serviceable. Self feed attachment can be set to fast or slow speed or thrown out entirely. Has steel extension crank, which can be adjusted to long or short turn. Drill table can be raised, turned out of the way or removed when drill is to be used for large tire bolts. Drills ¾-inch in center of 12-inch circle. Spindle 3½ inches and is bored for ½-inch round shank drills. Weight, crated, about 81 lbs.

No. 9F3807 Price..... **$5.16**

BLACKSMITHS' HAND FEED POST DRILL.

A good, well made substantial drill at a price so low as to be within reach of everyone. If this drill saved you but one cent each day, it would pay for itself in less than one year. If you have even a small amount of drilling to do and have been using a brace or a bench drill it will save you far more than its cost in a short time. It is the same grade usually sold for $5.00 to $6.00 at retail. Upright column and feed screw are made of steel. Has long bearings, which insure easy running and prevent springing. Crank is adjustable to long or short turn as desired. Drill table can be raised or removed, swung around out of the way, or removed so that fork can be used as a wheel holder. Drills holes up to ¾ inch and to center of 12-inch circle. Drill spindle is made of 1-inch steel, bored for ½-inch round shank drill bits and has up and down run of 3 inches. Wt., crated, about 58 lbs.

No. 9F3806 Price... **$3.63**

ROUND SHANK DRILL BITS.

WITH ½-INCH SHANKS. FIT ANY OF OUR BLACKSMITHS' DRILLS.

No. 9F3860 Hot forged from finest steel by a new process. The best part of the steel is not cut out and thrown away. They are tougher, stronger and better than the ordinary milled drills and will outlast them two to one. All our drills are accurately ground to a micrometer gauge, and sizes are exact. Every bit is carefully inspected and fully guaranteed.

SET OF 8 Round Shank Drills. Best assortment for the average blacksmith. Contains the sizes you use most. Our price saves you money on every size. Set contains one each ⅛, 3-16, ¼, 5-16, ⅜, ½, ⅝, ¾ inch.

No. 9F3862 Price..... **$1.93**

ACME SPECIAL SELF FEED BLACKSMITHS' POST DRILL.

The largest, heaviest, strongest, highest class drill ever offered at anything like our price. Has steel upright column, drill spindle and feed screw, four long and perfectly straight bearings that cannot spring or get out of line, automatic self feeding device located behind the spindle and out of the way of the operator. Self feed can be set fast or slow, or thrown out entirely and drill changed to hand feed. Steel crank, adjustable to long or short turn as desired. Fast or slow speed instantly obtained by changing crank from one shaft to another on same side of drill. Table can be raised, lowered, turned aside or taken off entirely and fork used as a wheel holder. Spindle has run of 3 inches and is bored to take ½-inch round shank drills. Drills up to 1¼-inch holes and to center of 15-inch circle. Wt., crated, about 120 pounds.

No. 9F3816 Price..... **$6.42**

$6.42

ACME SPECIAL DRILL.

The same as our No. 9F3816 Acme Special Self Feed Post Drill described above, but with tight and loose pulleys 8x2½ inches. An ideal tool for all kinds of work in shops provided with power. Has fly wheel and crank and can be run by hand as well as power, as it is often found convenient to use the crank when only a few holes are to be drilled and the machinery is not running. Pulleys help, rather than hinder, the running of the drill by hand. Has 3-inch run of spindle, and drills up to 1¼-inch holes and to center of 15-inch circle. Takes ½-inch round shank drills. Weight, crated, about 132 pounds.

No. 9F3821 Price..... **$8.54**

No. 9F3820 Same as above, but without fly wheel. For power use only. Weight, crated, about 112 pounds. Price..... **$7.98**

$8.54

$1.74

ACME CUT GEAR SINGLE BALL BEARING DRILL.

Highest Quality Blacksmiths' drill made, and especially suited for large, high class shops. A regular $25.00 machine. Our price saves you nearly half. Has machine-cut gears, fast and slow speeds and is self-feeding. Single ball bearing at top of drill, spindle receives pressure and reduces friction. Safety chuck holds drills securely without set screw or wrench. Takes ½-inch round shank bits. Drills to center of 19-inch circle and up to 1½-inch holes. Up and down run of spindle, 4 inches; of table, 11¾ inches.

No. 9F3830 For hand only. Wt., about 180 lbs. Price, **$14.15**

No. 9F3831 For hand and belt power, with tight and loose pulleys. Size, 8x2½ in. Wt., about 190 lbs. **$16.25**

"SURE-FOOT" HORSESHOE SCREW CALKS.

SAVE YOUR ANIMALS, SAVE YOUR MONEY.

"Sure-Foot" Calks prevent horses from slipping and falling on the ice and sleet and enable them to pull heavier loads with less effort. They have a hardened crucible tool steel center with a tough soft steel outside. The crucible steel center is welded in, runs the entire length of the calk and cannot come out. (See illustration to the right.) "Sure-Foot" Calks are uniform in size, shape and finish and have deep well cut threads which will fit any standard calk tap. "Sure-Foot" Calks have square shanks, can be screwed in and taken out with an ordinary wrench or pliers. We guarantee these calks to be equal in quality to any of the standard brands sold for much higher prices than we quote. We do not sell less than fifty calks of a size.

Protect Barns and Other Buildings With Seroco Guaranteed Mineral Barn Paint

33c STRAP END WAGON SINGLETREE.

The best and most popular wood singletree on the market. The kind of singletree all the best wagons are fitted with.

Made of selected seasoned hickory, good heavy stock, nicely finished and fitted with durable wrought irons. Straps protect wood from wearing against wheel, prevent splitting and add strength. These singletrees are full regular size, 36 inches by 2½ inches diameter. Round part of clip measures 9-16 inch, rings ½ inch, irons ½ inch and hooks ⅜ inch. Finished in oil.

No. 9F33822 Regular 50-cent quality; our price.....33c

OUR CARDINAL PAINTED WAGON SET.

Set consists of doubletree, two singletrees and neckyoke, completely ironed, as illustrated.

OUR PRICE, $1.78 COMPLETE

Made of selected seasoned hickory, painted (two coats) a bright red color.

The wood used is full size; doubletree, 2x4x48 inches; singletrees, 2⅝x36 inches; neckyoke, 2½x40 inches.

No. 9F33830 Set, complete. Weight, about 34 pounds. Price.....$1.78

Steel clevises, hooks, rings and ferrules are used; all full size, full strength and well put on.

STEEL SINGLE-TREES AND DOUBLETREES.

The Regular $2.50 Kind Elsewhere.

ONE PIECE U SHAPED STEEL — STRONG — TOUGH AND RIGID

Lightest, strongest and lowest priced steel trees on the market. Made of single piece of tough steel, formed in the shape of a U bar, strong enough to stand any load that a team can pull, and will last and outlast half a dozen average wooden sets.

No. 9F33802 U Shaped Steel Singletrees only. Usual price elsewhere. Length, 26 inches. Price.....29c
28 inches. Price.....32c

No. 9F33803 U Shaped Steel Doubletree Set, complete. Two 28-inch doubletree and two 28-inch singletrees. Per set.....$1.18

No. 9F33804 U Shaped Steel Doubletrees, only (without singletrees). Length, 38 inches. Usually sells for 75 cents.....57c

IRONED HICKORY SELECTED STOCK. DOUBLETREE SET. HEAVY IRONS.

83c

No. 9F33800 Outfit for plowing, harrowing, etc. Made of good quality seasoned hickory, finished in oil. Davis safety hooks on ends of doubletree and singletrees; no danger of becoming unhitched. 36-inch evener, 30-inch singletrees. Per set....83c

ACME THREE-HORSE HICKORY EVENER.

$1.69

No. 9F33894 Strong and durable. Quickly changed for two horses; made of well seasoned hickory, with ends of eveners riveted. Size of main evener, 1¾x3½x40 inches; small eveners, 1¾x2½x28 inches; singletrees, 26 inches. Price, per set..$1.69

IRONED HICKORY PLOW SET.

84c

Usual $1.25 Value.

No. 9F33833 A first quality set for general farm use. Made of seasoned selected hickory, ironed complete. Flat doubletree, 1¾x3½x42 inches; singletrees, 2¼x28 inches. Weight, about 17 pounds. Price, per set.....84c

EUREKA THREE-HORSE EQUALIZER.

$4.10

No. 9F33836 For hitching three horses to any vehicle or implement that has a tongue. Two horses work on one side of tongue, one on the other, the equalizer preventing side draft. Made entirely of steel, except singletrees. Quickly changed to a two-horse evener. Directions with each set. Weight, about 60 pounds. Usual $5.50 to $6.00 value. Our price, per set..$4.10

Steel Three-Horse Evener.

Others Ask $4.00 For One Not as Good.

No. 9F33838 For hitching four horses abreast on either sulky or gang plow, with one horse in the furrow and three on the unplowed ground. It enables all four horses to pull equal, and positively overcomes all side draft. Only one clevis is used, allowing the equalizer to be coupled very short. The shorter the hitch, the easier the draft. Clevis is reversible and works perfectly on any plow. Weight, complete, about 65 pounds. Price, per set.....$4.65

No. 9F33806 For Walking or Sulky Plows. The best set for rough or where something more substantial than wood is needed; bar one piece of tough steel, formed in the shape of a U and hooks are extra strong. Per set, complete.....$2.58

PERFECT FOUR-HORSE EQUALIZER.

MALLEABLE IRON FIFTH WHEELS.

No. 9F33350 Buggy size. 10-inch round head block, 1-inch axle, ¾-inch plain axles only. Cannot be used on single perch gears, swaged or forged. Usual $1.00 value. Price.68c

No. 9F33353 Surrey size. 12-inch round head block, 1⅛-inch axle, ¾-inch plain axles. Price.....98c

IRONED HICKORY WAGON NECKYOKES.

45c

Usual 75-Cent Value.

Made of selected seasoned hickory with heavy rings and ferrules. Finished in oil.

No. 9F33785 Length, 38 inches. Price.....45c

No. 9F33788 Length, 42 inches. Price.....54c

IRONED HICKORY WAGON DOUBLETREE.

No. 9F33792 Size of wood, 2x4x48 inches; wrought iron plate and malleable screw pin clevises; oil finished. Usual 75-cent value. Our price.....59c

IRONED HICKORY PLOW SINGLETREES.

Excellent value for the price. Others ask 25 to 30 cents for similar goods. Welded steel clips and hooks. Seasoned hickory, oil finished.

No. 9F33810 26 inches. Price...13c
No. 9F33812 30 inches. Price...16c

OIL FINISHED IRONED HICKORY PLOW DOUBLETREE.

All our shafts and poles have inch eyes with 7-16-inch measure 44 inches from outside of eyes.

Our Double Lock Braced Heel Shafts.

$2.13 Per pair for the strongest and best buggy shafts made.

Better than the $4.00 kind other Supply and Hardware Dealers.

Heel Brace Lock. Center Brace. Heel Brace Lock.

Stand twice the strain and abuse of shafts not equipped with our improved heel braces. Lugs at ends of braces fit into slots, absolutely preventing braces coming loose even if nuts should be lost or bolts removed. Our Double Lock Brace cannot work loose. If the nuts come off, it makes no difference; and as the brace follows the bend of the heel and is rounded both top and bottom, it is neat and workmanlike in appearance.

Shafts are made of selected hickory; forgings are best drop forged steel; T plates and double corner braces are pressed steel, made in one solid piece. There are no welds or malleable parts on these shafts to break or come loose. Braces are made of ⅝-inch oval iron, secured at each end with lugs and bolts, and further by steel tube and bolt in center. All our shafts have 1-inch eyes with 7-16-inch holes 44 inches outside to outside of eyes. Standard Grade

Hickory Wheels

STANDARD GRADE WHEELS IN THE WHITE, WITH TIRES.
Carried in the following heights: 38 inches, 40 inches, 42 inches, 44 inches, 46 inches and 48 inches. Be sure to state heights wanted.

Catalog No.	Size of Spoke at Hub Inches	Length of Hub where box goes in Inches	Width of Rim Inches	Thickness of Tire Inch	Weight, per Set of Four Wheels Pounds	Price, per Set of Four Wheels, Standard Grade
9F316	1 1-16	6½	⅞	3-16	90	$ 6.98
9F318	1⅛	6½	1	¼	100	7.86
9F320	1¼	7	1⅛	5-16	125	9.73
9F322	1⅜	7½	1¼	⅜	160	10.86
9F324	1½	8	1½	½	240	18.72

The price of one wheel is one-fourth, and the price of two wheels is one-half the above prices.

WE GUARANTEE OUR WHEELS

to stand up under any ordinary conditions, to be well made of standard material and to give good, honest service. Every set is sold with the understanding that if after a careful examination you do not consider them better value for your money than can possibly be had elsewhere, you may return them to us and money will be returned. The low prices we name and the quality of the goods we furnish have built for us the largest wheel business in existence.

HOW TO ORDER WHEELS.

Always Give Us Catalog Number and Height of Wheels.

If wheels are wanted for a regular buggy or runabout, there should be 4 inches difference between the two front wheels and the two rear wheels. If you fail to specify height of wheels wanted, we will send 40 inches front and 44 in. rear wheels, which are the popular heights. We cannot paint wheels, furnish or set boxes. Prices quoted are for wheels in the white covered with one coat of boiled oil, with tires fitted and hubs ready to be bored for the boxes. Special care should be used in selecting wheels that are best suited for the axles on your job. On ⅞x6½-inch, 15-16x6½-inch or 1x6½-inch axles, use No. 9F316 or No. 9F318 wheels; on 1⅛x7-inch or 1¼x7-inch axles, use No. 9F320 wheels; on 1¼x7½-inch axles, use No. 9F322 wheels; on 1½x8-inch axles, use No. 9F324 wheels. Steel axles must be used; thimble skeins will not fit Sarven's patent wheels.

WIDE TREAD METAL WAGON WHEELS

SAVE TIME, LABOR AND MONEY. EASY TO PULL, NEVER NEED REPAIRING, AND OUTLAST SEVERAL SETS OF WOODEN WHEELS.

TO LOAD because the wagon is nearer the ground and the load does not have to be lifted so high. Easier to pull because tires do not sink into the earth, which makes wide tread metal wheels especially desirable for farm use, on plowed ground, swamp land, etc. Twenty-five to fifty per cent more load can be pulled by any team with our Wide Tread Metal Wheels than with ordinary narrow tread wooden wheels. Order a set of metal wheels for farm use, using wooden wheels for going to market, etc.

Wide Tread Metal Wheel.

DIRECTIONS FOR ORDERING.

Be sure to give our catalog number and height of wheels wanted.

Also measure your axle or skein as per diagram, giving us length of spindle A to B; diameter of collar C to D; diameter of spindle (next to collar) B to E; diameter of spindle (next to nut) F to G; diameter of nut A to H.

To fill your order we must have the diameter of the axle or skein, not the distance around it. Use a pair of calipers or cut slots in a piece of cardboard as shown in small illustration, to fit snugly over the different points, then measure across the slots. Measure axle or skein from side to side, not from top to bottom. Give exact measurements; do not allow for play as we will make this allowance. Measure both a front and hind skein as they are not always the same size.

If you have any doubt as to giving us the correct measurements from the sketch on this page write for our SPECIAL METAL WHEEL ORDER BLANK, which shows a larger sketch and makes it easier to order.

OUR METAL WHEELS,

both regular and extra strong, have cast iron hubs, oval wrought steel spokes and wrought steel tires. Spokes are securely fastened in both hub and tire, and vary in number according to size of wheel. We do not handle wheels smaller than 24 inches high as they pull hard and are not practical for ordinary use. Our metal wheels are warranted against defects in workmanship or material and with proper care should last for years. Made to order only, and we require about fifteen days to make shipment. We cannot take back wheels that have been sent as ordered, so be very careful in measuring. Shipped direct from factory in Central Illinois.

REGULAR WIDE TREAD METAL WAGON WHEELS

made to fit any size axle or skein. Guaranteed to carry 4,000 pounds per set. Amply strong ordinary farm use. Price quoted is for one wheel. Don't fail to give full ...ss. See sketch above.

BUGGY TOPS

Our tops are all well built of good material, have extra heavy japanned steel bow sockets, best grade second growth bows, wrought forged joints, Thomas top props and black enameled trimmings. We can furnish any of our tops in three or four-bow style as desired, but we always send four-bow unless three-bow is specified. Our tops weigh, crated for shipment, about 55 pounds. For instructions for taking measurements and list of extras, see bottom of page.

$5.98 Competition Enamel Drill Top

The best enamel drill top it is possible to make. Enamel drill is easily affected by heat and cold, which causes it to crack, for which reason we do not recommend its use for tops and advise by all means the purchase of a **full rubber or leather quarter top.** Quarters, roof, curtains and stays of our Competition Top are made of enamel drill; roof lined with dark green head lining. Side and back curtains, green back enamel drill; stays stiffened with buckram and lined to match curtains.

No. 9F32499 Price, complete, with side and back curtains, but not including shifting rail, $5.98 With shifting rail.....$6.34

Our Reliable Full Rubber Drill Top

$6.84

This Reliable Full Rubber Drill Top at $6.84 represents more real value, affords more protection against sun and rain, stands more wear and tear, holds its shape and looks better for a longer time than tops sold by others for $9.00 to $10.00. Roof, quarters and stays made of best grade waterproof rubber drill; side and back curtains, green back rubber drill; roof lined with dark green wool faced head lining; stays stiffened with double buckram and lined to match side and back curtains. This top has extra heavy japanned bow sockets, first quality bows, wrought joints and back trimmings. Has raised front valance, is well padded, nicely shaped and strongly built throughout.

No. 9F32503 Price, complete, with side and back curtains, but not including shifting rail.....$6.84 With shifting rail.....$7.19

Extra Heavy Rubber Drill Top $7.98

The top for long service; the best top to buy. Built to wear well as well as look well; the strongest, neatest and most substantial rubber drill top on the market at a price about half what others ask for tops of equal grade. Roof, quarters, stays and back curtains made of best **24-ounce waterproof rubber drill;** side curtains heavy green back rubber drill. Roof, stays and back curtain lined with heavy dark green wool faced head lining; stays and quarters stiffened with double buckram and reinforced.

No. 9F32505 Price, complete, with side and back curtains but not including shifting rail, $7.98 With shifting rail..$8.34

$9.96 Genuine Leather Quarter Top

Strong, serviceable, stylish, will hold its shape, last a long time and look well as long as it lasts. If you want a good top, something better than is usually offered, order this one and get the best. Quarters made of genuine black enameled leather, nicely padded and shaped; stays made of same material, reinforced and stiffened. Roof and back curtain made of **28-ounce waterproof rubber drill;** side curtains green back rubber drill. Roof, stays and back curtain lined with heavy dark green wool faced head lining.

No. 9F32506 Price, complete, with side and back curtains, but not including shifting rail.....$ 9.96
With shifting rail.....10.32

DIRECTIONS FOR ORDERING TOPS, CUSHIONS AND BACKS.

Illustration shows the irons on a buggy seat. The ends of these irons are fitted with holes to receive the projections on the shifting rail of a buggy top.

FOR TOPS, it is necessary to give us the distance from hole A to hole F. FOR CUSHIONS, give us the measurements on inside bottom of seat from I to J and G to H; also mention whether you want round or square corners. FOR BACKS, give us measurement from A to F and C to D, also height of back.

EVERY BLACKSMITH NEEDS OUR BLACKSMITHS' SUPPLY CATALOG.

A GUIDE TO ECONOMY

Careful buyers welcome it, for it quotes money saving prices on every tool or supply used in your shop. This Special Blacksmiths' Tool and Supply Catalog was gotten up for blacksmiths, wheelwrights, horseshoers, repairmen, buggy and wagon builders, carriage trimmers and others who use similar lines of goods. It quotes prices on tools and supplies in this line that mean a big saving to you, even if you use only a small quantity of goods each year. It describes fully, shows large illustrations and quotes rock bottom prices on round, square and flat iron; rims, hubs, spokes and other wood stock; wagon and buggy hardware; horseshoes, nails, pads and horseshoers' supplies, axles, skeins, springs and a full line of repairs of all kinds, as well as forges, blowers, drills, anvils and other tools. It shows a great many items not illustrated in this Big Catalog. If you ever need blacksmiths' tools and supplies of any kind you ought to have this special catalog. Write us a postal card or letter, asking us to send our Blacksmiths' Tool and Supply Catalog. It's free. Write for it today.

DAVID BRADLEY —FARM— IMPLEMENT FACTORY

The name David Bradley has stood for quality in farm implements for nearly eighty years. It identifies quality, it guarantees ality. Back of David Bradley implements is an organization of seventy-nine years' experience. Such experience, such intimate owledge of farm tools cannot be duplicated. Money cannot buy it. Even though another factory as complete and perfect in uipment as the David Bradley might be built, there would still be lacking the seventy-nine years of knowing how. If you could this great plant, see the specialists who work on David Bradley implements and take note of the wonderful equipment very department you would then realize why David Bradley quality has for seventy-nine years been standard and is still ay beyond reach of other farm implement manufacturers.

E BIG DAVID BRADLEY FACTORY is the oldest plow and implement factory in the d. It was founded by David Bradley, America's pioneer plow r, seventy-nine years ago, and in all this time its product has been ed entirely to farm tools of the very highest class. This big plant rs nearly forty acres of ground and there is not a more perfectly ped factory of its kind in existence. Our purchase included not the grounds and buildings shown in the illustration, but all hinery, dies, patterns, etc., designed especially for producing David ley goods, together with the many valuable patents which cover and prevent their manufacture by others. We also retained in employ the complete organization of expert plow makers and other ianics most of whom have worked a life in this big plant. Every one of these knows the high standard of quality de- d in David Bradley goods and with their nt co-operation we will not only con- to make David Bradley plows and ments just as good as David Bradley ever them, but we will strive to better them ever such a thing is possible.

O WILL GET DAVID BRADLEY ALITY in the David Bradley plow or implement you buy from us, the ame quality which for seventy-nine years aracterized David Bradley goods, and them known the world over as the most y built and highly perfected farm tools We will make David Bradley goods in ame factory, in the same manner, of the materials, and on the same patterns. will make no changes whatever, unless view to improvement. We will never the high standard of David Bradley y no matter how low the price we make.

VID BRADLEY QUALITY has been su- preme for y-nine years and we mean to keep it so. All materials used in Bradley goods are the best that money can buy, and those which y-nine years' experience in implement building has proven best for urpose. Each tool as completed is thoroughly inspected to insure e perfection. The superintendent of this department has been ed in the big David Bradley factory for the past thirty years. ows David Bradley goods from A to Z. He knows the high rd of David Bradley quality, and any tool to pass his inspection be absolutely perfect in every respect.

THESE TESTS we safeguard David Bradley quality and the interests of our customers. We also maintain perimental ground covering eighteen acres. Here we thoroughly t and perfect David Bradley implements. No improvement is d, no change made, and no new tool is offered our customers it is thoroughly tried out, not only in our own experimental but in different sections of the country, so that we know it all soil conditions and the purpose for which it is intended. Bradley never experimented at the expense of his customers, do we. When you buy a David Bradley tool from us, you can sured that it has been thoroughly tested and tried out, not the factory for quality of materials, construction, etc., but in the working and wearing qualities and proven absolutely perfect.

OUR PURCHASE of the big David Bradley factory marks a new era for users of farm implements. It means a saving to them of millions of dollars every year. The profits of the jobber and dealer no longer stand between you and David Bradley goods, **the standard farm tools of America.** You can now buy them direct from us, the manufacturers, and where you previously paid three profits, one to the manufacturer, one to the jobber, and one to the dealer, you now buy them at actual cost to make, with but our one small manufacturing profit added. We save you easily from one-fourth to one-half on every David Bradley plow or other implement you buy and give you the most highly perfected tool of its class. The David Bradley factory is located fifty-four miles south of Chicago and freight rates from there are the same as from Chicago. This central location is favorable to everyone. It not only means a low rate of freight to all our customers, but it means a low rate of freight to us on all raw materials, which assists us greatly in economical manufacture. This you get the full benefit of in our low prices.

TRY ANY DAVID BRADLEY PLOW OR IMPLEMENT AT OUR RISK.

WE ACCEPT YOUR ORDER with the understanding that you are to take any David Bradley plow or other implement purchased from us and try it out thoroughly in your own field and under any conditions that one could impose upon a tool of its kind. Try it out alongside of any similar tool of other make. Give it every test you can possibly think of, and if the David Bradley tool does not satisfy you absolutely and convince you beyond all doubt that it is in every way the superior tool we claim, and as good a tool as you can possibly buy elsewhere at any price, we expect you to send it back to us at our expense and we will return to you the full price you paid for it and freight charges.

OUR GUARANTEE AFFORDS YOU GREATER PROTECTION than that of any other manufacturer or dealer. Most makers agree to replace defective material within a year; so do we. And, moreover, we **pay the transportation charges on parts** sent to replace any proving defective in material or workmanship. But we guarantee more than this. We guarantee to **fill your order correctly** and hold ourselves responsible for all mistakes. So carefully do our implement men supervise the orders that it is almost impossible for a shipment to go out wrong even should our customer make a mistake. We guarantee to **fill your order promptly,** because the big David Bradley factory carries tremendous stocks of everything made there. We guarantee every implement shipped you to be new and bright, fresh from factory. We guarantee that the shipment **will reach you promptly and in perfect order without loss or damage.** If by any chance your shipment should go wrong or any part of it be damaged, we will replace it free of all charge to you. Such protection is worth a great deal to you and is something to consider when buying implements. You run absolutely no risk when buying implements from us. We assume the full responsibility for making every transaction with you a satisfactory one. No farmer acting in his own interests can afford to place a dollar's worth of his implement business elsewhere.

YOU ARE ALWAYS SURE OF REPAIRS when you use David Bradley Implements and you are sure of getting them **quickly.** We have patterns for every David Bradley implement ever made and can **always** supply **any** repair, no matter when the tool was made or where you bought it. No David Bradley user need ever worry about repairs. We sell repairs for about half what a dealer charges, so you save money on extra parts just as you do on complete David Bradley implements. Our factory always has a complete stock of repairs so we can serve you quicker than a local dealer, who seldom, if ever, has the particular part you need. You need not waste time writing for repair prices; if you do not know our price for the part wanted just write and tell us the name of the implement, give name or description of part and all numbers, letters or other marks appearing on the old part and enclose an amount of money which you think will cover the cost. We will immediately ship the part to you and return any difference in your favor. If you are in urgent need of repairs you may **telegraph us,** being careful to state names and numbers just as completely as you would in a letter. We will make immediate shipment C. O. D. Address all such orders and correspondence to

DAVID BRADLEY,
America's Pioneer Plow Maker.

DAVID BRADLEY
GARDEN CITY CLIPPER PLOWS
FOR 79 YEARS THE STANDARD PLOW OF AMERICA

The David Bradley Trade
The Honor Mark of G

Direct From Factory to User and at Lower Prices Than Dealers Paid

An Opportunity Without Parallel in the History of Farm Implements.

Wherever plows are used, David Bradley's Garden City Clipper is acknowledged the best. David Bradley engaged in the manufacture of plows in 1832. His entire life was devoted to their perfection and to him belongs the honor of having brought the modern type of plow up to its present standard. His knowledge of plow making was gained through experiments in the different soils throughout the country in an endeavor to produce a line of plows which would meet the requirements of every farmer. To do this it was necessary for him to investigate soil conditions and to experiment with materials, shapes of moldboards and shares, and different degrees of hardening of wearing surfaces, after years of tireless effort he succeeded in perfecting his Garden Clipper Plows which have proved themselves to be the lightest easiest scouring, and most perfect working plows made. No matter section of the country you live in, no matter how difficult your what kind of plow you need, you will find it in our line of Bradley Garden City Clipper Plows, which is described on this other pages. **We guarantee a David Bradley Garden City Clipper to satisfy you better than any other plow you can buy at any price.**

THE MOST POPULAR WALKING PLOWS IN AMERICA ARE SHOWN ON THIS PAGE

Bottom Construction.

They are the original David Bradley Garden City Clipper Stubble, and Stubble and Sod Shapes. They meet the demands of farmers in all sections of the country better than any other walking plow made, and for nearly eighty years farmers have bought them in preference to all others, regardless of the high prices dealers asked, for the simple reason that they knew them to be the best. Aside from the shapes of the moldboards and shares, the construction of these two plows is identical.

Moldboards, shares and landsides are made of the very best soft center steel. Shares are 5-16 inch thick, and have reinforced points, insuring long wear.

Moldboards are double shinned, that is, an extra thickness of steel is welded on top of the front of the moldboard, the point where the wear is greatest. This insures double the wearing qualities obtained by placing the shin underneath, as most makers do.

Landsides are medium high, as shown in illustration, and are of double thickness at the heel, where the wear is greatest. They are bolted to an inner steel landside bar, which is securely welded to the steel frog underneath the moldboard and share.

Moldboard, share and landside are all uniformly hard tempered by the David Bradley secret process, insuring the best wearing and easiest scouring qualities. They are carefully ground and highly polished, the grinding of the plow bottom being done in the same direction as the land or furrow slice follows the mold. That is one reason why David Bradley plows scour quicker and better than others. The entire bottom is strongly braced, as shown in illustration.

Landside View.

Beams are made of the very best double beaded high carbon unlike other makers we do not use old rail stock. They are heavy enough to insure ample strength and are formed with high arch so as to in trashy land. Clevises are malleable iron, broad and justable in all directions.

Handles are first quality steam bent oak, securely attached braced to the beam with flat steel braces. The plows are finished in the standard David Bradley colors of red, yellow and black. Not only the highest grade, but the best finished and most attractive in appearance of any plows made.

Stubble Plow.

Double Shin.

Steel Beam. Right Hand Only.

David Bradley Garden City Clipper All Steel Stubble Plow. Right Hand Only. $8.23

This is an old ground or stubble plow. It can't be beat for turning under all kinds of stubble and doing perfect work in clay soil. It is an excellent pulverizer and leaves the ground in the finest possible shape. It scours where others fail. A complete description of the construction of this plow is given above. The moldboard is bluff or abrupt in shape, and is the shape designed by David Bradley for use in old ground. It is not intended for use in sod. Cast or chilled shares can be used with this plow as the heavy steel frog affords ample bearing surface. Price is for the plow complete and with very best soft center steel moldboard, landside and share. Shipped from the big David Bradley factory at Bradley, Ill.

PRICES OF DAVID BRADLEY GARDEN CITY CLIPPER STUBBLE PLOWS.

Our Catalog No.	Bradley's No.	Size, inches	Weight, pounds	Price	Extra Shares. Price, each: Soft Center Steel	Crucible Steel	Chilled
32F101	L533	12	99	$ 8.23	$1.80	$1.40	53c
32F102	L545	14	112	9.48	2.00	1.60	60c
32F103	L570	16	117	10.73	2.20	1.80	67c

$8.73 David Bradley Garden City Clipper All Steel Stubble and Plows. Made Right and Left Hand.

SOFT CENTER STEEL MOLDBOARD, LANDSIDE AND SHARE with hard temper are regularly furnished with the plows shown on this page, also on all David Bradley riding plows having Stubble or Stubble and Sod bottoms. In stony ground crucible steel shares are sometimes preferred, as they have mild or natural temper and, while they will not wear so long as the hard tempered soft center steel shares, they are not so likely to break should the plow strike a large stone. We furnish extra crucible steel shares for these plows at the extra prices quoted.

This shape of plow is also known as the turf and stubble or general purpose It differs from the stubble plow described above by having a longer sweep moldboard, otherwise the construction is the same. This plow does the very work in tame sod and for old ground plowing will give as good satisfaction any stubble shape plow made. It has the widest possible range of usefulness, the furrow slice clear over and plows under clover, alfalfa and heavy stubble. Pulverizes and is unexcelled for deep plowing. Cast or shares can be used on this plow, as the heavy frog affords ample bearing surface. Price is plow complete with very best soft center steel board, landside and share. Shipped from David Bradley factory at Bradley, Ill.

Stubble and Sod Plow.

Double Shin.

We also furnish this style with wood beam. For prices lowing page.

Without Wheel and Jointer

The David Bradley Chilled Plow is favorably known in all sections where chilled plows are used. It is noted for its perfect shape and scouring qualities, which contribute to light draft. Extreme hardness of wearing parts is assured by the special process employed in their manufacture. The share and shin (sometimes called cutter shares) are in one piece, so in renewing one you renew the other. Materials used in the bottoms are such metals as when properly mixed permit chilling to extreme hardness, and yet insure great strength or toughness. That is why David Bradley chilled plows will stand double the wear of others. Beam is first quality oak, thoroughly seasoned and bolted to slotted braces on the handles, making it adjustable for more or less land. Handles are thoroughly seasoned oak, braced by heavy rounds and a steel stay rod. A jointer should be used with No. D19 and larger plows when plowing trashy ground. Nos. D10, D19, D20 and D40 are made with either wood or steel beam; other sizes wood beam only. Price is for plow with one extra share, wrench and adjustable malleable clevis. Jointer and gauge wheel are extra. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Prairie Breaking Plows.

$10.38

COMPLETE WITH COULTER, GAUGE WHEEL AND ONE EXTRA SHARE

This plow is well known throughout all prairie states, where thousands of them are giving the best of satisfaction. It is of exceedingly light draft, having a long tapering moldboard and slanting share which lies nearly flat and turns a smooth furrow. Intended for breaking original prairie land at a depth of 2 or 3 inches, but does good work in old sod. Moldboard, share and long bar landside are crucible steel, uniformly tempered; share is left soft enough to sharpen with a file. Standard and standard cap are steel and the entire bottom well braced throughout. A special feature is the flat bar steel brace running from beam to standard and bolted to the inside handle. This insures great rigidity and makes the David Bradley the most strongly braced prairie breaker made. Beam is extra heavy seasoned oak with convenient adjustment to make plow cut more or less land. Handles are selected seasoned oak, well braced and bolted to bottom and beam. Price is for the plow complete with rolling coulter, gauge wheel and one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Northwest Breaker.

$12.45

COMPLETE

An exceptionally strong and well braced plow, designed for a heavier class of work than the standard type of prairie breaker. A splendid plow for heavy prairie sod and brush work, also extensively used for road making and grading purposes. Beam is extra heavy and made of selected oak. Standard is extra heavy steel, solidly braced. Moldboard, share and long bar landside are of crucible steel, uniformly tempered by the David Bradley process. The heavy steel coulter is made with a shoe at the point, into which the point of the share is inserted, making it absolutely solid. Gauge wheel, is adjustable up and down and back and forth on the beam. Handles are steam bent selected oak, extra heavy, strongly braced. Price is for the plow complete with wheel and coulter. Shipped from the David Bradley factory at Bradley, Ill.

David Bradley Garden City Southern Clipper Black Land Plows

STEEL BEAM. RIGHT HAND ONLY.

$7.23

David Bradley designed this plow especially for use in the black lands of Texas and other states of similar soil conditions. The moldboard has a rather abrupt turn, raising the dirt quicker and carrying it higher and further over than the sandy land plow. Moldboard is of hard tempered soft center plow steel. Landside and share are crucible steel with natural temper, all carefully ground and highly polished. Beam is highly arched double beaded forged steel. Handles are steam bent selected oak, securely braced to beam. Clevis is malleable iron. Price is for the plow complete with one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Steel Beam Middle Breaker

$8.53

These plows have the celebrated Garden City Clipper Middle Breaker Bottom, acknowledged to be the most perfectly shaped bottom of its class. Thousands used throughout the cotton country; everyone considers them the best. Used for breaking or bursting cotton ridges, also for opening furrows in which to plant corn, potatoes, etc. Moldboards are hard tempered, soft center plow steel and share is crucible steel, uniformly tempered by the David Bradley process, carefully ground and highly polished. Beam is highly arched double beaded forged steel, bent to follow the moldboard nearly to the heel, to which a steel frog is attached and moldboard bolted thereto, the most rigid construction possible. A curved steel rudder back of the moldboard steadies the plow and makes it run straight. This is adjustable up and down and regulates depth. Handles are flat steel, with malleable hand pieces and securely braced to the beam. Price is for the plow complete with steel rudder and malleable clevis. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley New Ground Plow

$7.42

COMPLETE WITH JUMPING COULTER.

Designed for use in new ground or stumpy ground; does splendid work in rooty ground. Jumping coulter either severs the root or carries the plow over it, after which the plow immediately enters the ground. Moldboard and share are in one piece and are mild or crucible steel, uniformly tempered by the David Bradley process. Carefully ground and highly polished. The moldboard is welded to a narrow steel landside which is bolted to the beam, the lower end of which curves to conform to the shape of the moldboard. Beam is heavy forged steel, highly arched. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F168 9-Inch New Ground Plow. Wt., 100 lbs. Price.....$7.42

New Bradley Riding Attachment for Walking Plows

$8.95

Price Does Not Include Plow.

This attachment will make a first class frameless sulky plow out of any wood beam, steel beam right hand or left hand plow, or middle breaker you may have. It will make your plow run steadily and without side draft, provide a comfortable seat for you and without making the work a bit harder on your team. It will turn square corners either way with plow in the ground, and can be set for any depth of furrow. Levers are within easy reach of driver and operate easily. Can be readily attached to any ordinary wood or steel beam plow without fitting, and if your plow should have an extra large wood beam, it will only be necessary to bore one or two holes to match the bolt holes in the beam clamp. It can be quickly changed from one plow to another. The attachment is made entirely of malleable iron and steel. There is no wear out to it. Wheels are the regular type of riding plow wheels with wide oval tires and dustproof hubs. No farmer having a walking plow can afford to do without this valuable attachment. Price is for the complete attachment consisting of frame, two levers and ratchets, two wheels and axles, seat post and seat; everything shown in the illustration, excepting the plow. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F192 New Bradley Riding Attachment. Wt., 154 lbs. Price.....$8.95

David Bradley Rod Breaker

$5.98

COMPLETE WITH GAUGE SHOE, FIN CUTTER AND ONE EXTRA SHARE.

The best plow of this class made. For use in original prairie sod, tough enough to hold together while turning. Works best where there are no stones or roots. Curved spring steel rods take the place of a moldboard and contribute to light draft. Share and landside are crucible steel, uniformly tempered by the David Bradley process. Beam is heavy double beaded forged steel, solidly braced. Handles are oak, steam bent. Price is for the plow complete with fin cutter, gauge shoe, malleable clevis and one extra share. AVID BRADLEY DISC PLOWS

9.85 D UP

WONDERS IN HARD GROUND.

r disc plows are known the David Bradley ranks first. They are absolutely high ry way and should not be confused with any of the light weight, cheaply made f other makes. The frames are extra heavy bar steel throughout, having practically s excepting the heavy cast wheels and their attachments. The steel beam to which attaches is a wide steel plate which yields vertically when the discs meet with stance. Wheel weights can be attached to wheels for plowing extra hard ground. s of finely tempered steel, 24 inches in diameter, and the disc journals turn in bones. The ball races or grooves are chilled and are practically wearproof. Our handles nicely with three horses, the No. 10 with four and the No. 11 with six plows make short turns either way and there is absolutely no side draft, either abreast or tandem hitch.

ows are more specially adapted for use in wet soils or where the ground becomes ard that it is impossible for a moldboard plow to enter the ground. The discs of Disc Plow are set farther s ordinary disc plows, which clean better in heavy weeds The width of the furrow de- s depth at which the plow is 2½ to 3 inches deep, the No. will cut a furrow about 10 to ches, the No. 10 from 20 to 24 and the No. 11 from 30 to ches. Prices are for the plow s equalizers. Shipped from ll Bradley factory, Bradley.

DAVID BRADLEY PERFECTION SULKY PLOWS

$22.95

HAND LIFT.

This is the best frameless Sulky Plow you can buy. It cannot be excelled for a light, medium high lift plow, and possesses more good features than can be found on other plows of its kind. All parts subject to strain are made of steel or malleable iron, relieving any possibility of breakage. The beam is of heavy first quality high carbon steel with high arch and ample clearance. Bottoms are the famous Garden City Clipper shapes, the same as used on our other David Bradley sulky plows. Levers are within convenient reach of the operator and have such leverage that they can be easily operated by a boy. Rear wheel is connected to beam by two heavy steel plates, securely bolted and extremely strong. The rear wheel casters and locks in line with the plow after turning corners. Rear wheel lock casting is adjusted by two set screws, enabling operator to set plow to carry the landside away from the land, relieving friction and insuring light draft. The hand lever on top of front furrow axle is for adjusting the front furrow wheel and the plow can be successfully guided for more or less land. The operator can do this from the seat while plow is in motion; a convenience not found on any other frameless plow. Wheels have staggered spokes and are very strong. Land wheel is 30 inches in diameter, rear and front furrow wheels are 20 inches in diameter. Wheel boxings are dustproof with 7¼-inch wearing surface and so constructed that it is only necessary to occasionally fill the cups with hard oil to insure proper lubrication. The rolling coulter permits of any adjustment desired. The blade is of high carbon steel that will hold an edge. It turns on a chilled cone dustproof bearing. Clevis is made of steel and malleable iron, of simple and strong design. By loosening one bolt it can be quickly changed for two, three or four horses. The nine-hole drop clevis permits any adjustment that may be required. The plow is furnished with three-horse evener, coulter, wrench and weed hook, but without a pole, although you can easily attach one if wanted. Shipped from the big David Bradley factory at Bradley, Ill.

$27.85

YOU CAN ALWAYS GET REPAIRS AND EXTRAS FOR DAVID BRADLEY PLOWS FROM US AND AT A BIG SAVING. ORDER EXTRA SHARES WITH PLOWS AND MAKE A SAVING ALSO IN FREIGHT CHARGES.

r preferring a beam hitch sulky plow, we recommend this as the best plow of its type e buy. It is an old time favorite in many sections of the country, and while it ss some of the desirable features of the X-Rays No. 2 Sulky Plow, it will be found ay and superior in many ways to any of the standard riding plows of other Frame is exceedingly strong, being formed from one solid bar of heavy steel. It to become loose. It will not sag, and insures proper working position of the ches. The beam is unusually heavy and is suspended from the frame by two which hold the plow rigidly in place. The adjustable foot lift lever responds slightest tread and plow can be raised or lowered with ease. The beam can be bottom is held firmly in the ground, no chance for it to jump out. Tension on rod can be relieved and the plow left to float in stony ground. All levers are located near the seat. The depth regulating lever is at the right and keeps the at any depth plowed. The cushion spring on the land lever insures a smooth s rough ground. A connecting rod governs rear wheel. It is connected with and in such a manner that plow can be turned or backed up in the shortest Operator can adjust pole plate to shift tongue to any desired position while Wheels are steel with wide oval tires. Land wheel is 34 inches in diameter, to 22 inches from bottom of plow, affording high clearance for trashy wheel is 28 inches in diameter. Furrow wheel is 24 inches in diameter, steel with heavy oval tires and staggered spokes, and all hubs have the slight dustproof bearings, the best on earth. Price is for the plow pole, three-horse evener, neckyoke, weed hook, wrench and rolling coulter, with four-horse hitch instead and attachment which permits one horse to and three on unplowed ground for $1.15 extra. This hitch is desirable for breaker bottoms and for use in listed ground. Shipped from the big David Bradley, Ill.

DAVID BRADLEY No. 6 GANG PLOWS.

BEAM HITCH. FOOT LIFT.

$45.25

EXCELLED ONLY BY THE DAVID BRADLEY XX-RAYS No. 2. SEE PAGE 1115.

All that we have said of the David Bradley No. 7 Beam Hitch Sulky Plow applies to this plow, which is of practically the same construction, excepting that it has two plow bottoms and the frame is necessarily wider, and other points of construction slightly different. We recommend the purchase of the XX-Rays No. 2 Gang Plow because it contains many superior features found in no other plow, but if the beam hitch plow is preferred, you can buy the David Bradley No. 6 Gang Plow with every assurance that it contains every desirable feature to be found in any of the standard riding plows of other makes and will prove to be as good a gang plow as you can buy elsewhere at any price. Dimensions and construction of wheels are the same as on the David Bradley No. 7 Sulky Plow. The forward plow bottoms have short landside, and rear bottoms have medium landside, as shown in illustration of the XX-Rays No. 2 Gang Plow. Bottoms are of David Bradley celebrated Garden City Clipper shape, acknowledged by all to be the most perfectly formed and satisfactory working plow bottoms made. See illustration of bottoms at the foot of following page. Price is for the plow complete, with pole, four-horse evener, neckyoke, two rolling coulters, two weed hooks and wrench. We will furnish four-horse string out hitch at the same price or a five-horse string out hitch instead for $1.50 extra. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY X-RAYS No. 2 FRAME HITCH SULKY PLOW $29

THE HIGHEST LIFT, LIGHTEST DRAFT AND THE MOST EASILY HANDLED RIDING PLOW IN THE WORLD.

IT IS BEYOND QUESTION the most highly riding plow ever of farmer. There is no riding plow made which can with it, and wherever it has been introduced it is us exclusion of all others. This plow is a fitting ex the high degree of perfection attained in David plows. It contains every good feature a riding pl possibly have and many distinctive Bradley feature ered by United States patents which prevent their u other plow. Year by year this plow has been perfe in its present form there seems to be absolutely for improvement.

THE FRAME is wide with plenty of room for co is made of extra heavy high cart ⅝-inch thick, securely bolted and rigidly braced. W high, giving a clearance to the frame of 23 inches bottom of the plow and point of plow lifts 7 inches ground. This plow differs from all others inasmu beam is contained entirely within the frame, the hi made from a forward point on the frame directl with the point of the plow beam, thus affording an tage which could possibly be found in a beam hi but at the same time relieving the plow bottom of th of heavy eveners. Just so much less weight for the lift, one reason why this plow can be easily raised ground by the slight foot pressure of a small boy

AS AN ILLUSTRATION of the ease with which th foot lever operates, we a 200-pound man stand on the wing of the moldbo the plow was in the ground and, with but a slight on the foot lever, the driver easily lifted plow, ma with horses at a standstill. We defy any other pl in the world to produce a foot lift plow which wi plish this.

WHEN THE PLOW BOTTOM IS LOWERED into the ground the point of the beam rests against a patent stop inside the frame which plow in the ground. There is absolutely no side motion to the beam, it being held firmly by a heavy ball with wide bearings and is unaffected by position of the hitch. The frame and wheels carry the entire load; the plow nothing to do but plow, which it does with lighter draft than any other plow made, and turns a smooth even furrow at all times. Th accomplished easily with team either at a standstill or in motion, and when plow is lifted while in motion it can be returned to the grou but a few inches of travel, making it one of the greatest stone dodgers on earth. The land wheel is 34 inches in diameter; the front furro 24 inches; and the rear furrow wheel, 20 inches in diameter. Wheels are all steel, with oval tires and heavy round steel staggered spoke welded into the Bradley patent long distance grease retaining dustproof hubs; absolutely the best and most lasting hubs made. The bearin inches long. When they are properly oiled, one oiling is sufficient to plow a 40-acre field. Boxes are removable and easily and cheaply rep

THE PLOW ENTERS THE GROUND point first, and raises in immediate response to the slightest pressure on the foot lever, this bein plished by the heavy coiled lifting spring and compound arrangement of levers, constituting the

LEVERS ARE CONVENIENTLY LOCATED so as to operate easily from the seat. The land lever controls the position of the plow bottom and keeps it running level. The front furrow lever regulates the depth. The lifting lever locks the plow in the ground and if desired can be used in connection with the foot lift. A noteworthy feature of this plow is the shortness of hitch. This couples plow and team up close, does away with side draft, and makes the handling of the X-Rays No. 2 an easy matter for man and team even under the most unfavorable conditions. A pole plate adjuster enables the driver to adjust pole from the seat with team in motion.

DAVID BRADLEY'S CELEBRATED PATENT SPRING CLEVIS is furnished free with these plows, with three-horse evener. This is a very desirable feature. It often prevents breakage of shares, lightens the jar in event of plow striking obstructions, makes work easy on your horses' shoulders, and it is also a good indicator of draft. If this clevis is wanted with other styles of David Bradley riding plows, it will be furnished for 75 cents extra.

PLOW BOTTOMS FURNISHED with David Bradley riding plows are all of the celebrated Garden City Clipper shape, the most perfectly formed plow shapes known. They meet the various conditions of soils throughout the entire country, and from the bottoms shown below you can select the exact shape of bottom you require. Prices are for the plows complete with three-horse hitch, spring clevis, pole, neckyoke, rolling coulter, weed hook and wrench. We will furnish instead with four-horse hitch an attachment which permits one horse to walk in the furrow and three on unplowed ground. for $1.15 extra. This hitch is desirable for plows with breaker bottoms and for work in listed ground. When four-horse evener is furnished we do not supply the spring clevis. Many purchase a stubble or stubble and sod plow and in addition order a prairie breaker bottom. This gives them practically two complete plows by merely switching bottoms and for a very small outlay. For the convenience of those wishing such a combination we list extra breaker bottoms below. An extra share free with all prairie breaker bottoms. Shipped from the big David Bradley factory at Bradley, Ill.

SPRING CLEVIS, 75 CENTS EXTRA.

DAVID BRADLEY COMBINED LISTER AND DRILL.

Adjustable for Deep or Shallow Planting —Does Not Break Seed; Can't Clog—

$16.95 COMPLETE

Shipped from the big David Bradley factory at Bradley, Ill.

A combination of three complete and practical tools in one. Can be used without the drill attachment and subsoiler for hilling up potatoes and similar work and is splendid for such purposes. Also used as a combined lister and drill, as shown in illustration, and as such constitutes the most perfect and efficient tool of its kind. By detaching drill parts from lister and attaching extra pair of wood handles and front gauge wheel parts you have a first class one-horse corn drill. Frequently the lister plow alone is used and followed with the corn drill. Ten or more acres per day have been planted in this manner, using three horses and two men. Price is for the complete combined lister, and drill consists of a steel beam single lister plow with 14-inch Garden City Clipper steel lister bottom. A drill attachment, the main shaft of which is propelled by flat steel drive wheels with notched edges. A subsoiler attachment forms part of the equipment, and a pair of perfect working shovel coverers serve to replace earth after corn is dropped, also wooden handles and front gauge wheel attachment for separable one-horse corn drill. Three plates are furnished to drop one kernel 12, 14 or 19 inches apart; also a blank plate which can be drilled to suit small seeds. Lister plow handles are steel with malleable hand pieces.

No. 32F415 Combination Lister and Drill. Weight, 188 pounds. Price.....**$16.95**
Extra share for above (Bradley's No. 14-6). Price..... **2.48**

DAVID BRADLEY COTTON AND CORN STALK CUTTERS.

$18.95

The highest grade stalk cutter made. Does perfect work under all conditions, and on account of its stanch construction will give long and satisfactory service. In fact, it will outlast two ordinary cutters. The diameter of the cylinder heads is larger than usually found in other cutters and as no center shaft runs through the cylinder, the clearing space is great, and clogging next to impossible, even in heaviest work. The cylinder revolves easily and the blow which cuts the stalks is accelerated by two spiral springs which can be compressed or adjusted to suit the work. A lever operates the crank. When pushed back it forces down the rods around which the springs are coiled. This compresses the springs and gives a heavy or light stroke as required. When lever is thrown forward, frame and cylinder are raised from the ground. A ratchet holds lever in position to give downward pressure to cylinder, or to hold it from the ground when going to and from the field. Drag hooks raise automatically with the cylinder. They can also be raised by hand. Wheels are steel, 36 inches high, strongly built, with 2-inch tires. Price includes pole, but not neckyoke or evener. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY U-BAR LEVER HARROWS.

THE BRADLEY ADJUSTABLE TOOTH CLIP.

RUNNER TEETH AT EACH CORNER.

$3.98 AND UP PER SECTION.

RUNNER TEETH AT EACH CORNER.

The strongest and best U-Bar Lever Harrow made. Frames are heavy steel diagonally braced with steel braces. Each section has five heavy steel tooth bars. Teeth are attached by steel clips with set screws and lock nuts. No holes in the bars to weaken them. Tooth clips are movable to any place on the bars so you can use as many teeth as you want to on each bar. The levers set the teeth at any desired angle. The Bradley tooth clip is the most satisfactory ever devised; when the teeth are properly set it is impossible for them to become loose. The teeth are square, 8 inches long, headed, and can be easily adjusted for depth. Made in sections of either 25 or 30 teeth, each section cutting about 5 feet wide. Each section has runner teeth at corners which the harrow can be tilted to run on. The teeth can be reversed to renew the cutting edge. Illustration shows the 50-tooth two-section harrow. Wood drawbar and irons furnished with two, three and four-section harrows. Draw irons only furnished with one-section harrows. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY GUARDED END STEEL LEVER HARROWS.

⅝-INCH TRI-ANGULAR TEETH.

FLEXIBLE TOOTH BARS. RUNNER TEETH AT EACH CORNER.

Popular in timber countries and for use in new or stumpy ground. The sides end of the harrow are protected by a heavy steel I beam which forms the frame. tooth bars are fastened to this frame at each end, making a very rigid construc outer frame serves to prevent the harrow from catching on trees, stumps, stones obstructions. It prevents breakage of the harrow itself and also damage to harness often occurs with ordinary harrows. The spring lever connection makes the teeth so that they will pass over obstructions without damage. This also eliminates strain harrow frame. The teeth are triangular in shape. They are 8 inches long and to the bars with the celebrated Bradley steel tooth clip, the same as used on the U-bar harrow. This clip enables one to place the teeth as far apart as desired, as many teeth on a bar as wanted. Made in sections, having either 25 or 30 teeth section has five tooth bars and a runner tooth at each corner. Illustration shows a two section harrow. Levers are conveniently located and provide for all needed adjustment teeth. Wood drawbar and irons furnished with two, three and four-section harrows irons only furnished with one-section harrows. DAVID BRADLEY BOSS HARROWS.

$5.19 AND UP

SEASONED OAK FRAMES, RIVETED AT EACH TOOTH

Positively the strongest and best finished wood frame harrows made. Frames are made of the best quality seasoned oak, strongly riveted at each tooth and firmly braced. All wood parts are well painted with a first quality oil paint, which serves as a great protection against action of the weather and increases the life of the harrow. Others offer harrows made of cheap grades of hardwood, painted with low grade mineral paint, and in many other ways inferior. Do not be misled; insist upon getting a harrow of quality equal to the Bradley; one made of the best quality of oak timber. Teeth are ½ inch square. Sections are independently connected to drawbar with drop link clevises, allowing flexibility. The 60-tooth harrow cuts 10½ feet, has one center and one side section and a two-horse drawbar; the 78-tooth harrow cuts 13 feet, has one center and two narrow side sections, and a two-horse drawbar; the 102-tooth harrow cuts 16½ feet, has one center and two wide side sections, and a three-horse drawbar; the 150-tooth harrow cuts 26 feet, has one center, two wide and two narrow side sections, and a four-horse drawbar which is fitted with a sheave pulley and roller chain draft equalizer. If you purchase a 150-tooth harrow, you can use it as a 78-tooth or as a 102-tooth harrow by separating the sections and using a shorter drawbar. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY ALL STEEL HARROW CART.

Here is another Bradley labor saver. Can be attached to any style of drag harrow, and will save many a hard day's tramp. The Bradley is the only harrow cart made with axle pivoted to the frame. It is strongly built and simple in construction, no wear out to it. The driver is always in line with and facing his team. The seat is mounted on a steel seat spring which is attached to the frame and axle. As the axle is pivoted to the frame, there is no cramping or straining in turning. By tripping a foot lever when turning, the axle pivots, to allow the cart to follow around after the harrow, and when straightened it automatically locks itself. The cart rides steadily and does not drift on side hill work. Furnished with either 24-inch wheels with 3-inch oval tires or with 48-inch wheels with 2½-inch flat tires. The 48-inch wheels are preferred by many as they bring the rider well up out of the dust. The shafts or connecting bars are heavy angle iron attaching to the harrow evener by means of steel clasps. Shipped from the big David Bradley factory at Bradley, Ill.

KENWOOD STEEL LAND ROLL

$17

OIL SOAKED HARDWOOD BOXES.

Roller with Steel Heads. Shipped from

The strongest and best rollers made. Drums are 24 inches in diameter, made of 12-gauge high carbon steel. Frame is made of heavy steel angles and arranged so that a bottom can be placed inside and the roller weighted as desired. Frame ends are heavy castings with lugs into which the steel hangers are securely bolted. Steel hangers are as stiff and rigid as any cast hanger, and are far stronger and also unbreakable. Drums turn independently on heavy steel shaft and shaft turns in the wooden boxes. Boxes are oil soaked hardwood and will outwear any cast or steel box. Draft is light, the hitch being under the tongue. Seat post is strongly braced. We furnish these rollers with cast spider drum heads, or with pressed steel heads like a steam boiler. We recommend the pressed steel heads as they are stronger and less liable to break than cast heads, and besides are lighter, thus saving you freight charges. You can weight the roller as desired by loading into the platform frame. Shipped from Western Ohio.

ected result of seventy-nine years' experience in designing and building farm implements. They known improvement in disc harrow construction, many of which are found in no other harrow. y the David Bradley Ideal you have the very best tool of its class on the market. **The frame is made of heavy steel throughout.** It is rigidly braced in all directions. The gangs are operated by independent levers, either can be set at any angle without interfering with the work of the other. Levers are conveniently placed in front of the seat within easy reach of the driver. The steel bars connecting the levers with the disc sections are placed under a heavy steel yoke, which is adjustable up and down on the frame. This holds the discs level, keeping them from buckling up at the middle and makes them cut a uniform depth. **Hitch is low,** relieving horses of neck weight, and the pull is direct from the gang bearings. The harrow is of **perfect balance,** which insures unusually satisfactory work. Weight boxes are pressed from a single sheet of heavy steel. Discs are the very best steel, carefully tempered and highly polished. Spools are solid iron. **Bearings run in oil soaked maple boxes,** and are provided with oil tubes extending up through the weight boxes. These tubes are closed at the top by a spring cotter. Bearings are absolutely dustproof. Axles are steel, ⅞ inch square. The **oscillating spring steel scrapers** are operated by slight foot pressure on a foot lever at each side of seat post. They are also provided with a **throw-off lever** at the rest, so that the operator can free the scrapers from the discs at any time. This feature not only saves wear on scrapers and discs, but lightens the use of the scrapers is not required. **The spring seat post** is fully covered by cloth. It can be used on no other disc harrow. This feature, together with the seat, makes the David Bradley Ideal the easiest riding disc harrow made. The harrow complete as illustrated, including tongue and weight boxes, a two-with harrows having eight or ten discs; a three-horse evener with set over pole with harrows having twelve discs, and a four-horse evener with harrows having sixteen discs. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY TONGUELESS DISC HARROWS

These harrows are of the same construction throughout as the Ideal harrows with tongue described above, excepting that they have no forward pole or tongue, but have a David Bradley adjustable oscillating tongue truck, secured to the stub tongue. The advantages of a tongueless disc harrow are so readily appreciated by farmers that it is coming into almost universal use.

We recommend that you purchase this harrow by all means. You will then have the most satisfactory and up to date disc harrow made, a machine which does the most uniform work, relieves your horses of worry and neck weight, and makes it possible for you to work clear out to the edge of plowed ground, close to fences, and to turn corners easily. The tongue truck can be easily detached and used on numerous other implements. A light forward pole can be used on the truck if desired. This will add no neck weight, merely serve to better control the team. If you intend to use a forward pole, you should order extra either our No. 32F348 Pole Plate, or No. 32F349 Offset Pole Attachment, listed below with the David Bradley tongue truck. Prices are for the disc harrows complete with tongue truck. We furnish a two-horse hitch with harrows having eight and ten discs, a three-horse hitch with harrows having twelve discs, and a four-horse hitch with harrows having fourteen or sixteen discs. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY ADJUSTABLE OSCILLATING TONGUE TRUCK.

FOR USE WITH DISC HARROWS, MOWERS, GRAIN AND CORN BINDERS, SEEDERS, LAND ROLLERS, ETC.

This is the same truck furnished with the David Bradley Tongueless Disc Harrow. Can be used to advantage on almost every farm implement. It relieves the team of neck weight, and does away with the constant worry caused by an unwieldy tongue. The truck is simple in construction, nothing about it to break or get out of order, and it contains many features superior to any other tongue truck made. Wheels are 16 inches in diameter with dustproof, oil retaining hubs. Furnished with steel wheels with 2¼-inch half oval tires, as shown in illustration, or with cast wheels with flanged tires for use with binders or other machines with side draft. The high arch steel axle allows the wheels to pass clear under the tongue, permitting short turns either way. The casting which attaches to the stub pole is adjustable up or down on the standard, so as to accommodate all heights of hitches and insure direct draft. The construction of this casting is such as to permit the wheels to oscillate and adjust themselves to uneven ground. Each wheel carries its own load and either can be run over an obstruction several inches high without disturbing the position of the tongue or hitch. This insures uniform work and relieves the team of side draft. We furnish at extra prices quoted, a pole plate, which can be used with two or four-horse hitches, whenever it is desired to use a forward pole with the truck. In such case the forward pole would carry no weight, merely serve to control the team and prevent them from backing on to the machine. We also furnish at extra price an offset pole attachment, which enables you to use a forward pole with three or five-horse hitch. The truck is easily attached to any implement. It is only necessary to saw off all but about 4 feet of the tongue and bolt the truck to the stub with bolts we furnish. Shipped from the David Bradley factory at Bradley, Ill.

Also made with cast wheels for use with binders.

LFA CULTIVATOR OR RENOVATOR

ed Especially for Work in Hard, Baked Soil.

This is a splendid tool to use in the alfalfa field after cutting your crop. Without cutting the roots like a disc, its many sharp teeth cultivate them thoroughly without injury. It will stir up the hard soil as nothing else seems to do. Discs merely cut the hard earth but the spiked teeth break up every foot of soil thoroughly. This renovator will rid your fields of weeds; it will quickly kill out crab grass and exterminate gophers. It is constructed on the lines of a disc harrow, the only difference being the spiked wheels. They are heavy castings, each having eighteen teeth, ⅝ inch square, cast solid in the wheels and extending 4½ inches out from the wheel. Gangs are independently operated by two levers conveniently located in front, always in easy reach of the driver. One gang may be shifted without any effect on the work of the other. Gangs and levers are connected by steel bars under a heavy adjustable yoke. This construction holds wheels in alignment and insures uniform depth of cut. Low hitch, no neck weight, draft direct on four bearings running in hard maple boiled in oil, and dust-cup on each bearing. Solid iron spools separate the wheels. Weight boxes made from single sheets. Nicely striped and finished. Prices include four-neckyoke. Shipped from factory in Western Missouri.

DAVID BRADLEY REVERSIBLE DISC HARROW.

$13.85

One of the handiest implements on the farm and is becoming more popular every year. Designed for gardeners and small farmers, but it is useful on even very large farms. It serves the purpose of a disc harrow or a disc cultivator. The discs can be set at any angle desired and can be reversed to throw the dirt in or out. Can be set close together for harrowing or separated so as to straddle the row. Distance between gangs adjustable up to 18 inches. When discs are close together the six-disc machine cuts about 2½, and the eight-disc machine about 3½ feet. Discs are 16 inches in diameter, made of the very best steel and finely tempered and polished. Aside from cultivating grain, hilling potatoes, cultivating tobacco, etc., this tool can be used to run between rows of berries, grapes, etc., for which work the ordinary disc harrow is too wide. Discs can be tilted at either end to run on an incline, so as to hill or trench. They have oil soaked maple bearings and scrapers. Neckyoke and two-horse hitch furnished. Shipped from the big David Bradley factory, Bradley, Ill.

David Bradley No. 15 Edge Drop Force Drop Corn Plant

VARIABLE DROP. PLANTS EITHER TWO, THREE OR FOUR KERNELS TO THE HILL.

$25.75 WITHOUT CHECK ROWER.

NO STOPPING TO CHANGE PLATES.

PATENTS PENDING.

This is the most steadily accurate and reliable planter ever produced by any and to the farmer who will exercise care in selecting his seed, using nothing of a uniform size and which has been well graded, we recommend it in prefer the flat drop planter. No edge drop planter will do good work with other than fully graded seed. Butts and tips or large and small kernels cannot be handled and unless you intend to use nothing but carefully sorted and graded seed, we mend that you buy our David Bradley No. 1 Flat Drop Planter No. 32F463 or No.

The greatest advantage of the No. 15 planter over all others is its absolute One kernel of corn at a time is arranged edgewise into the plate cells in the rim plate and is carried forward to the cut-off, which with the assistance of a spring passes one kernel at a time to the valves in the boots which hold them until is made at each second, third or fourth kernel, according to the wishes of the then the plungers force the lower valves open and the entire accumulation is into the hill without scattering. Mud cannot clog up the boots. Hopper tilts for changing or examining plates and is very large around, so as to take large which give more time for the corn to work down into the cells, assuring a perfe

VARIABLE DROP. **The strength of the soil varies in the different every field, and seed should be dropped accordingly** variable drop feature of the No. 15 planter enables the operator to change the of kernels to the hill while the planter is in motion, by shifting a lever which the number of kernels dropped to two, three or four kernels to the hill and changing plates. This method of up to date planting should increase your corn sufficiently the first year to pay for the planter.

THE FRONT FRAME **is flexible and permits the self adjustment of** **uneven ground,** placing the corn always at a depth. The adjustable tongue keeps planter running level, no matter what team may be. The three-piece clutch has a positive lock which holds the drop after it has made a revolution, until corn is again dropped by the check clutch is then thrown out of gear. No tools are needed to change from check drill, simply fasten open both valves in each boot and throw out the clutch the small lever on under side of shaft.

THE AUTOMATIC REEL **is operated by friction.** To wind or unwind the check wire, the reel is lowered by an easily reached foot lever, so that the friction wheel fits outer rim of planter wheel, which revolves it. An anchor stake is placed through the eye on seat bracket. The check wire is placed in the hook on end of anchor stake and the stake shifted back and forth, which insures even winding of wire.

TOP VIEW

PLATES. **Regularly furnished with each check rower planter are a pair for small kernels, a pair for medium and a pair for large size kernels.** Plates regularly furnished with each **drill only** planter are a pair to drill 9, 14, 19 and 24 inches apart. In order to get good results the plates must fit the corn you are to plant. Should none of these plates fill your particular need, we can furnish, upon receipt of a sample of your corn, plates that will drop it accurately. Can furnish the following special plates for kaffir corn, shoe peg, yellow dent, popcorn and special plates for Maryland, Kentucky, and Tennessee corn.

WHEELS **regularly furnished 30 inches high with concave tires, as shown in illustration,** but we will furnish open tire wheels for 75 cents extra. If other than regular style wheels are wanted, be sure to so order. Wheels and runners are adjustable for rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. Can furnish check rower wire with buttons 3 feet, 3 feet 4 inches, 3 feet 6 inches, 3 feet 8 inches, 3 feet 10 inches, or 4 feet apart. **When ordering state distance at which you wish the planter set and the distance between buttons on check rower wire.**

FERTILIZER ATTACHMENT **is furnished with this planter only when ordered extra.** It is a profitable attachment to own and we recommend its use to every farmer. This attachment drops the fertilizer 2 inches to the rear of the hill, the most successful way. **Hand drop is furnished only as an extra,** as the foot drop shipped regularly is most generally used. Illustration shows the No. 32F471 Check Rower Planter.

Prices are for the complete planter including pole, marker and marker arch. Neckyoke and evener are not furnished. Shipped from the big David Bradley factory at Bradley, Ill.

TILTING SEED BOXES

David Bradley Planters are the Only Force Drop Planters Made.

The plates deposit the corn into the boots where it is held by valves until the check is made, then the plunger forces the lower valves open and deposits the corn in the furrow without scattering.

A SURE NO SCATT

An absolutely reliable two-horse flat drop corn planter which we recommend to the farmer who does practice of carefully sorting and grading his seed corn. For use with all kinds and sizes of seed it cannot be Thoroughly tried out and perfected through years of severest tests. You cannot buy a better planter at any is of strong and rigid construction, yet light enough to be easily handled by any ordinary team. Simplicity mechanism, ease of adjustment and uniformity of drop are its striking features. The frame is made of heavy iron pipe; all connections are steel or malleable iron, a positive guarantee against breakage. The runners and stronger than found in ordinary planters. They are strongly connected and their depth can lated independently. **Seed boxes are hinged and tilt forward,** making it an easy matter to change Wheels are steel of strong construction. The planter is regularly furnished with 30-inch wheels concave tires, as shown in illustration. Will furnish with open wheels for 75 cents extra. 38-inch wheels for $1.75 extra. If other than regular style of wheel is wanted, be sure to so **automatic axle clutch shifter** stops the planting device when the front frame is raised, and when is again lowered the sprocket wheel is automatically thrown in and the planting mechanism again **The planter fitted for drilling only** does not have check rower and its attachments. It is furnished four plates, to drill one kernel of corn 12, 14, 17 or 28 inches apart, and one blank plate. **Rower Planter** is complete with 80 rods of wire, automatic reel, which distributes the wire evenly it never catches in unwinding, anchor stakes, and seven plates, to drill one kernel of corn 12, 28 inches apart, and to drop two, three and four small or medium kernels; and one blank plate can be drilled as desired. Special plates can be furnished if you will send samples of your corn description of No. 15 planter.)

Adjustable for rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. Can furnish rower wire with buttons 3 feet, 3 feet 4 inches, 3 feet 6 inches, 3 feet 8 inches, 3 feet 10 inches apart. **When ordering state distance at which you wish the planter set and the distance between on check rower wire.**

At extra price quoted we furnish a steel fertilizer attachment which attaches to the rear frame seed boxes and wheels. This attachment drops the fertilizer 2 inches to the rear of the hill approved method.

DAVID BRADLEY Nos. 2 AND 3 PRESSER WHEEL ONE-HORSE CORN DRILLS.

No. 2 **$7.85**

No. 3 **$10.15**

The most complete and satisfactory corn drill made. A high grade machine in every respect. Meets all requirements. This machine has the celebrated Bradley rotary force feed dropping device, which is controlled by sprockets made to drop one kernel of corn 10, 15, 20 or 26 inches apart. We furnish four sprockets, two plates, suitable for dropping large or small corn and a blank plate which can be drilled to plant peas, beans, sorghum or other seed. An opening in the boot enables the operator to see the corn at all times as it leaves the hopper. By means of a slip clutch the drill can be backed without throwing out of gear. The wide presser wheel is provided with a steel scraper. It properly covers every hill. No. 2 drill is shown in left hand illustration. The No. 3 drill is the same, excepting that it is provided with a fertilizer attachment. It sows any quantity of fertilizer desired. Machine is strongly made of the very best iron and steel. Handles are wood. Prices are for the machines complete as illustrated.

DAVID BRADLEY No. 1 CORN DRILL.

For simple and substantial construction this drill cannot be excelled. It is made entirely of the very best iron and steel and possesses more convenient features than any other drill of its class. It has the popular Bradley force feed drop, which insures positive work. It is furnished with three plates, dropping one kernel of corn 12, 14 or 16 inches apart, and a blank plate which may be drilled to plant cane seed, peas, beans, or other seed. Holes in the plate are larger at the bottom than at the top. This prevents the corn lodging when being carried to the opening of the boot. A brush and metal cut-off are provided in the steel hopper; either can be used when wanted, change being made by the lever while machine is in motion; the same lever also throws the drill in and out of gear. Handles are flat steel with malleable hand pieces. Shipped from the big David Bradley factory, Bradley, Ill.

$23.75 DAVID BRADLEY No. 12 RIDING COTTON AND CORN PLANTER.

This is a two-horse single row riding planter which furrows, plants and covers at one operation. It will plant cotton or corn in bedded or surface soil. It has Bradley's celebrated Champion force feed which is positive, cannot clog, and will not crack the seed. Distributes seed evenly in drills directly back of the opening shovels and it is at once covered with moist soil. Drop is at all times in view of the operator. A slide in bottom of seed box regulates the amount of seed dropped. Plants cotton just as it comes from the gin. No preparation necessary. For corn planting we furnish two plates, to plant one kernel 17 or 26 inches apart. Also one sorghum plate. The Bradley rotary force feed, the same as used in the Bradley No. 1 Corn Drill, is used. The hand lever raises or lowers the middle breaker bottom. Also throws the machine in and out of gear. The foot lever raises the covering shovels. Wheels are steel, 36 inches in diameter, and are adjustable on heavy axles. Standard and frame are steel; hopper is steel and very large; middle breaker bottom is crucible steel with high natural temper, ground and polished. Quickly changed from a cotton to a corn planter by following directions which accompany the machine. Is the planter complete with tongue, but does not include eveners and neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F480 No. 12 Riding Cotton and Corn Planter. Wt., 390 lbs. Price...**$23.75**

DAVID BRADLEY No. 1 CHAMPION FORCE FEED COTTON PLANTER. $4.97

This machine has always been a great favorite throughout the Cotton States. It has the celebrated Bradley Champion force feed which is positive, cannot clog, and does not injure the seed as it comes from the gin without previous preparation and distributes it in the drill, no bunching whatever. Regulated to plant from 1 peck to 2 bushels of cotton per acre, and no plates to change. One man with one horse will plant 8 acres a day and finish the work as fast as he can drive. Seed is dropped directly back of opening shovels and immediately covered with moist soil. We also furnish this machine with planting attachment, enabling one to plant either cotton or corn with the same machine. Buy the machine with corn planting attachment and you will have the machine in one for less than you usually pay for a cotton planter. Shipped from the big David Bradley factory at Bradley, Ill.

ENUINE SCHOFIELD POTATO PLANTERS AND DIGGERS.

$10.00 1911 MODEL

The Schofield is the most reliable and satisfactory combination Potato Planter and Digger on the market. These are the very latest models. They contain every modern improvement and are stronger, better and more perfect working than ever. The dropper is fed by hand, is automatic and insures more perfect work than can be done with a self drop planter. Axle is tubular and spindles can be set so the wheels will run any distance apart from 30 to 42 inches. Distance between the wheels determines the distance between rows, as one horse follows the last wheel track. The driver walks and consequently is better able to keep the horses on the wheel track. Will plant 13, 16 or 19 inches apart at any depth from 3 to 6 inches. When used as a digger the driver rides and has perfect control over both team and machine. The digger can be set to run any desired depth and will not run too deep or too shallow. The separator bars are of tempered steel, set edgewise. These machines are well known and are used in every section of the

They have earned the reputation of the only successful combined potato digger made. We recommend buying the combined machine, for two perfect machines in one for usually paid for one, and it seems that if you have use for machines you will have use for both. The machine is constructed of steel and iron (except pole), essential, cannot easily get out of order with fair usage will last for years. Shipped from factory in Northern

DAVID BRADLEY POTATO HILLER AND DIGGER.

$5.67

A practical hiller and digger and wing shovel plow combined. A splendid combination tool and one that every farmer or gardener should own. The variety of uses to which it can be put makes it one of the most useful and profitable implements you can buy. Has heavy oak beam and standard. Handles are well formed and braced. Equipped with adjustable gauge wheel and rear depth shoe. The adjustable wing shovel blade leaves the soil loose and destroys the weeds, providing perfect cultivation. The digger works perfectly, leaving the potatoes in excellent condition on top of the soil and runs as steadily as a plow. Either blade can be attached or detached easily. One of the very best on the market. Shipped from the big David Bradley factory at Bradley, Ill.

$27.95 DAVID BRADLEY No. 6 TWO-ROW CHAMPION COTTON AND CORN PLANTER.

For many years this machine has been a great favorite among Southern planters. It is a two-row combination cotton and corn planter of the same general construction as the David Bradley No. 1 Corn Planter. Wheels are 38 inches in diameter, with 6-inch open tires. Seed boxes are steel. The corn plate carrier and cotton planting mechanism are contained in the same box. Four plates are furnished to drop one kernel of corn 14, 17, 21 or 28 inches apart. Also one sorghum plate and one blank plate which can be drilled to plant other seeds as wanted. Frame is adjustable to plant rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. It is a positive force feed, cannot clog or injure the seed. Plants cotton just as it comes from the gin, and distributes it evenly in the hill. A slide in bottom of box regulates the amount of cotton seed dropped. To change from a corn planter to a cotton planter, the corn plate carrier is thrown out of gear and the cotton planting mechanism connected with a sprocket wheel on the drive shaft. This is a drill planter only, never furnished with checkrow. Price is for the machine complete with pole but does not include eveners or neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY No. 3 CHAMPION COMBINED COTTON AND CORN PLANTER.

$7.46

STEEL FRAME.

The only absolutely satisfactory combination cotton and corn planter made. It has the celebrated Bradley Champion force feed which has made David Bradley cotton planters the most successful of all. A slide in the bottom of cotton box regulates the amount of cotton seed dropped. Machine can be regulated to plant from 1 peck to 2 bushels of cotton seed to the acre. Cannot clog, does not injure or bunch the seed, and plants it as it comes from the gin, without any previous preparation. For planting corn, the same seed box is used and we furnish plates for drilling one kernel of corn 17 or 25 inches apart, and a blank plate which you can drill for small seed or grain to suit. The change from a cotton to a corn planter is quickly made. Shovel shanks have a friction break, and a depth gauge runner is at the rear of each shovel. The machine is made of the very best iron and steel, excepting handles which are oak, well formed and securely attached to the frame. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY SHAKER POTATO DIGGER.

$8.96 WITHOUT TRUCK

The most satisfactory walking potato digger made. It brings potatoes out clean and whole on top of the ground. The rolling weed fender parts the weeds and vines, leaving the way clear for the blade. Blade is solid hardened polished steel and will scour in any soil. It is flat in shape, 17 inches wide and 15 inches long. The rod platform which hinges to the blade is operated by a trip shaker wheel underneath, which travels on the ground and gives an up and down shaking motion which shakes the dirt from the potatoes, cleaning them as they are dug. The rods on the shaker platform are malleable, 20 inches long and will not break. Beam is of heavy steel, high arched and will not clog. Clevis is adjustable. Handles are first quality oak with adjustable braces. We furnish this digger with an adjustable double gauge wheel truck as shown in illustration. The truck straddles the row and holds the digger at a uniform depth at all times. It is very desirable for use in hard ground. Positively the best walking potato digger made and we urge its purchase in preference to cheaper diggers. We also recommend that you buy the digger complete with truck. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F437 Shaker Potato Digger. Wt., 130 lbs. Price....**$ 8.96**
No. 32F438 Shaker Potato Digger, complete with truck.
Wt., 160 lbs. Price..... **10.55**

DAVID BRADLEY STEEL BEAM POTATO DIGGER.

$4.73

A very popular type of digger and the best of its kind. No one can afford to dig potatoes by hand when you can secure this first class, perfect working, labor saving implement for such an astonishingly low price. It needs but a comparison of our price with what others will ask you for diggers which cannot compare with this to convince you of the splendid value we offer in this tool. It has a high arched heavy forged steel beam which permits its use in weedy or trashy patches. Has adjustable handles, adjustable clevis and an adjustable guide or gauge wheel at rear which keeps the digger in line and gauges the depth perfectly. The blade is steel hardened, ground and polished. Rods are steel, perfectly set. Works with light draft and throws potatoes out of the ground without cutting them, leaving the ground in good shape. In hard ground a front gauge wheel should be used. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F429 Potato Digger. Wt., 85 lbs. Price.....**$4.73**
No. 32F430 Front Gauge Wheel. Wt., 9 lbs. Price..... **.58**

A RECORD FOR THE DAVID BRADLEY PLANTER.

Twenty-One Years' Continuous Service.

Sears, Roebuck and Co., Chicago, Ill. Route No. 2, Whitesboro, Texas.

Gentlemen: I am truly glad that you have bought the David Bradley implement factory. Bradley tools are the best tools I have. My father bought a David Bradley cotton planter twenty-five years ago and used it for twenty-one years with greatest success. Our blacksmiths say that Bradley plow points are made of better material than any others on the market. I will buy my implements from you hereafter.

Yours truly, N. E. WEST.

THE GENUINE DITTO FORCE FEED ENDGATE SEEDER.

$8.95

Another example of the extremely high quality of our entire line of farm implements. This seeder is known everywhere as the **highest grade and most perfect working endgate seeder made.** Sows the correct measurement per acre of any kind of seed and sows it evenly, no matter whether team is driven fast or slow or over rough or smooth ground. Feed can be regulated to sow almost any desired quantity per acre from 15 to 40 feet width, depending upon kind of seed. Can be successfully used in much stronger winds than others, as the distributer is at the bottom of the endgate, distributing the cast near the ground, where the wind is the least liable to affect it. Can be set so that the seed will be delivered on only one side of the distributer, either right or left, enabling you to sow full or half width. No other seeder possesses this advantage. Furnished either with or without grass seed attachment, but **recommend that seeder with grass seed attachment be ordered.** Hopper is made of heavy galvanized sheet steel, unlike the flimsy, light weight hoppers on other seeders. Workmanship is of the highest class and every machine is tested before shipping. Price includes endgate, chain, sprocket wheel and clips for attaching to wagon wheel. **State whether wanted for wide track or narrow track wagon.** Shipped from factory in Northern Illinois.

No. 32F1155 Ditto Seeder. Wt., 115 lbs. Price.....$8.95

No. 32F1156 Ditto Seeder, with grass seed attachment. Wt., 120 lbs. Price.$9.75

KENWOOD GRAIN AND FERTILIZER DRILL.

$10.45

This machine is indispensable for drilling small grain between corn rows or for drilling grain with one horse. It has five hoes and can be adjusted while in operation from 31 to 40 inches in width. Has wood frame, force feed, rear lift, and can be thrown in or out of gear while in motion. Handles have fenders to protect the knuckles from rubbing against corn stalks. Drills wheat, flax, barley, beets and other small seeds, but not suitable for oats or corn. The machine, with fertilizer attachment, will sow all kinds of dry fertilizer at from 20 to 300 pounds per acre and will drill grain and fertilizer together. Shipped from factory in Central Indiana.

No. 32F1125 Grain Drill. Wt., 150 lbs. Price.....$10.45
No. 32F1126 Grain Drill with Fertilizer Attachment. Wt., 200 lbs. Price.. 17.85

GENUINE MANWEIGHT GARDEN TOOL.

A COMBINED SEEDER AND CULTIVATOR.

$9.38

BEWARE OF IMITATIONS

Patented

This is the celebrated Manweight Garden Tool, the genuine article, worth double the price of any imitation. It will drop seed in hills from 3 to 48 inches apart or will sow continuously in drills. Has agitator force feed. Will sow any desired quantity accurately at any depth from ¼ to 4 inches. Sows and covers the seed, presses the ground and marks the next row all at one operation. Is fitted with one pair of 2-inch cultivator teeth, one pair of small plows, one pair of 8-inch single end hoes, one pair of 4-inch double end hoes and one pair of 7-inch rakes. Wheels are 18 inches high and 13 inches apart. Can also be used either as a double or single wheel hoe or cultivator. Arch is high enough to pass over crops 30 inches high. Propelled by weight of the body against the push bar. Hands are free to guide the tool. Price for Cultivator only includes everything shown in illustration excepting the seeder mechanism and the marker. Shipped from factory in Central Indiana.

KENWOOD WHEELBARROW GRASS SEEDER.

$4.88

FAVORITES IN ALFALFA COUNTRY.

For sowing small seeds broadcast. Made with hoppers 12, 14 or 16 feet long. Runs easily and sows evenly, even in windy weather. The wheel governs the feed, and the index plate and the speed of operator govern the quantity sown. Have iron wheel and force feed which can be accurately adjusted. Instantly thrown out of gear by lifting a rod from the index plate. Does not injure or bunch the seed. The single hopper seeder is for sowing smooth seeds only, such as clover, timothy, alfalfa, millet, flax, etc. The double hopper seeder will sow all kinds of smooth seeds and also light or chaffy seeds, such as red top, orchard grass, blue grass, etc. Weight, from 45 to 65 lbs., according to size. Shipped from factory in Southern Michigan.

THE NEW BRADLEY WALKING CULTIVATOR.

Big Value for Little Money.

$11.87

Of more simple and less expensive construction than the Highball Cultivator. Designed to meet the demand for a medium weight cultivator to be used with the lighter styles of gangs. It has many splendid features and gives the best of satisfaction.

The arch is continuous and of solid steel, its ends forming the axles. It is fastened and braced to the pole, making a very strong and substantial frame. Tension can be quickly increased or decreased at the top of the lifting springs, while at the bottom the leverage can be graded to suit the gang in use. Action of these springs is perfect, no jerking as with an overstretched spiral spring, but an easy continuous lift that makes its use easy for even a boy.

Depth of cultivation can be conveniently regulated by adjustment of the spring, by raising or lowering the front ends of the beams on the coupling sleeve and by setting the shovels.

Wheels are of steel 30 inches high. Straight spokes and 1¼-inch flat tires. Price is for the cultivator complete with shovels, fenders, pole, handles, hang up hooks, whiffletrees and neckyoke. Illustration shows cultivator with No. 8½ four-shovel gangs. Shipped direct from the big David Bradley factory at Bradley, Ill.

For illustration of gangs see following page.

DAVID BRADLEY COMMON SENSE TONGUELESS CULTIVATOR.

$9.93

ANOLD TIME FAVORITE

To those who prefer a tongueless cultivator we recommend the Common Sense as the best that money can buy.

This cultivator has double wrought steel arch, and is made in two styles, one with wood beams and twisted steel shovels, the standards of which can be adjusted to pitch the shovels to suit your work, the other with steel beams having two straight and two twisted shovels, the same as shown in illustration of New Bradley cultivator.

Adjustable drag bars keep the arch in proper position when the gangs are hung up for going to or from the field, but these bars can be fastened up out of the way when not in use.

Gangs are in direct line of draft all the time, being hinged to the frame or arch. The draw arms to which the axles and wheels attach are pivoted to the frame, making the wheels also in absolutely correct line of draft, even though one horse should travel ahead of the other. On a hillside, where a cultivator naturally inclines to drift or work downhill somewhat, the draft of the team inclines the wheels to run uphill enough to overcome the downward tendency. **Each horse does his share with this cultivator.** It is easy to handle and the draft surprisingly light. Transposing shovels from one gang to the other will enable one to throw the dirt away from the plant when desired. Depth of cultivation can be varied by inverting the coupling head, also by changing the pitch of the shovels. Shovels are 5¼ inches wide and 11 inches long and have wooden safety break pins. **Wheels are steel,** 26 inches high with 2-inch tires; straight spokes and open end hubs. Price is for the cultivator complete with shovels, fenders, whiffletrees and handles. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY HIGHBALL BALANCE FRAME WALKING CULTIVATOR.

The King of All Walking Cultivators

$12.98 AND UP

ADJUSTABLE ARCH.

The strongest and best walking cultivator made. On account of its large [illegible] springs it works as well with heavy as with light weight gangs and it stands up [illegible] most difficult kind of work. It is strictly a balance frame cultivator. This is [illegible] by giving the axle a sufficient rearward bend to set the wheels well to the [illegible] bringing them underneath the central balancing point.

The steel arch is in two sections, the top ends fitting a sleeve casting [illegible] pole, permitting adjustment of distance between wheels of from 31 to 46 inches [illegible] sections are amply strong and will not become loose or get out of position, and [illegible] danger of lifting spring raising gang from the ground, the method of attaching [illegible] this difficulty. **Wheels are of steel,** 30 inches high with 2-inch flat tires, stagger [illegible] dustproof oiltight hubs. The evener is a wood bar with pendant steel bars. [illegible] cultivator complete with shovels, fenders, pole, handles, hang up hooks, whiffletrees [illegible] neckyoke. Illustration shows cultivator with No. 124 6-shovel gangs. Shipped [illegible] David Bradley factory at Bradley, Ill.

21.95 AND UP — DAVID BRADLEY LITTLE JAP RIDING CULTIVATOR

IT MAKES HARD WORK A PLEASURE

T BAR DODGING LEVER. BALANCE FRAME. OT AXLES. A WONDER AT HILLSIDE WORK. N CROOKED ROWS IT BEATS THEM ALL.

PATENTED.

ILLUSTRATION SHOWS CULTIVATOR
No. 32F666

CAN'T BUY ITS EQUAL **is the verdict of every farmer who sees the Little Jap work. It accom-** many **things impossible with other cultivators;** cultivates crooked easily as straight ones, having the easiest dodge, the quickest and farthest dodge of all. It saves nearly every out of line hill; no effort required of the driver and is so simple that any boy or enough to drive can easily handle it. It does the best of work or in any kind of work and sends operator and team home fresh **There is no other cultivator made like it** and it is just as to other cultivators as it is different. It has created a sensation Farmers are enthusiastic over it and other manufacturers their best to copy it, but without success, because the easy quick dodging features of the Little Jap are fully covered by tates patents and will be found in the Little Jap alone.

VITE EVERY FARMER TO TRY THE LITTLE JAP AT ASK, **to take it into the field and try it out under all conditions,** favorable or unfavorable. Try it out alongside of any other made and if the Little Jap does not prove to your entire satis- it is the strongest, simplest and best cultivator on earth, and can't buy its equal at any price, return it to us at our expense, will return to you every cent you paid for it, and freight charges.

EAT BAR DODGING LEVER **is a feature which places the Little Jap in a class by itself.** are pivoted, working in malleable sockets which are part of the They are connected with and operated by the seat bar, which is and swings laterally. To the front end of the seat bar is the arch, to which the gangs are attached by means of a This coupling permits them to rise or lower at their rear they are held squarely in line of draft and kept at right angles frame, which position causes the shovels to cut wider and do the **TO OPERATE,** the rider places his foot either on the stirrups gangs; and to follow crooked rows, or to dodge an out of line **gently pushes with his foot against either gang.** This slight push, with his weight, shifts the seat bar to the right or left and causes both gangs and wheels to move at the same time in opposite directions, this without affecting position of the cultivator or changing the course of the team. After the out of line hill is cultivated, another slight push against the opposite gang swings the gangs back into line with the straight row; all done while the team is in motion, no time lost. The ease with which this is accomplished and the immediate response of the machine to the operator's slightest effort are remarkable.

ON HILLSIDE WORK **the tendency of the cultivator is naturally downward,** but the seat bar lever causes the weight of the operator to gravitate toward the lower side and inclines the wheels to run up hill, holds them steadily to their work, prevents drifting, and keeps gangs in proper position with shovels, cutting an even depth. Foot stirrups on gangs are adjustable so that machine can be used either by a small boy or man. Seat is also adjustable up and down or in and out, to suit all heights of operators.

THE BALANCING LEVER **is a great convenience.** At the end of a row it raises both gangs; to return them to the exact depth again, you merely raise this lever again. No calculation necessary, no trying to remember notches, just throw up the balance lever and shovels are back to the exact same depth. It works either as a combined balancing gang raising lever or as a balancing lever only, leaving the other levers to raise and lower the gangs independently. When the gangs are lifted by the balancing lever the frame is balanced, pole does not rise up under horses' necks, and the arch is automatically locked so gangs cannot swing. **All levers are conveniently reached from the seat** and operate easily.

THE HITCH **is the shortest in use on any cultivator and is always in direct line of draft,** making the Little Jap not only easy on the rider but also on the team. The draft of the team helps lift the gangs and the draft springs hold them in the ground, but the gangs are guided independently of the horses.

THE GANGS **illustrated on this page show the many combinations in which the Little Jap can be furnished.** There is no cultivator made upon which it is possible to use such a great variety of gangs. On the following page we show the Little Jap as a disc cultivator, as a surface cultivator, and as a spring tooth cultivator. If you order a Little Jap Cultivator from this page, and in addition order a pair or more of the extra gangs listed with the Little Jap Cultivators on the following page, you can provide yourself with one cultivator which can be used for several different classes of work. Aside from the gangs, the Little Jap Cultivators on the following page are of the same construction as those here described.

THE BEST OF MATERIALS **are used in the Little Jap Cultivator.** All parts, except tongue and hitches, are steel and malleable iron. Every part designed for convenience, strength and service, and guaranteed to do absolutely satisfactory work in all conditions of soil and in all classes of cultivating. Every detail of the machine has been thoroughly tested out and its construction proven absolutely perfect. **Wheels** are made entirely of steel, 42 inches high, with 2½-inch tires and heavy staggered spokes. Hubs have long bearing fitted with dustproof caps and are oiltight. Distance between wheels is adjustable from 41 to 52 inches. **Tires regularly furnished** are concave, as shown in illustration, but when so ordered, we will furnish flat tires with half oval back. Shovels are finely tempered, soft center steel, carefully ground and polished. The Little Jap is finished in the standard David Bradley colors, bright red, yellow and black. Complete directions for putting together and operating accompany each cultivator. These are hardly necessary, because the simplicity of the Little Jap is one of its striking features. It is prepared for shipment in such a manner as to make it an easy matter to put together, and its operation can be learned in half the time it would take to become familiar with the ordinary type of riding cultivator. Illustration shows cultivator with No. 124 6-shovel gangs. **Prices are for the cultivators complete with pole, neckyoke, whiffletrees, gangs, shovels and fenders.** Shipped from the big David Bradley factory at Bradley, Ill.

SIDE VIEW OF LITTLE JAP.

"THE LITTLE JAP IS FAR AHEAD OF ALL OTHERS."
R. F. D. No. 6, Box 2, Milford, Ill.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—My Little Jap Cultivator purchased from you is far ahead of any other cultivator I have ever seen. The seat bar guiding motion is the best thing out, and the advantage of being able to raise and lower the gangs with the balancing lever after having set them to exact depth with the raising levers makes it superior to all other makes. That is saying a good deal, but it's true. The good features of the Little Jap make me feel like striking out with it and working in fields along the road, so as to convince people of the superiority of the Little Jap over all other makes of cultivators. Yours truly, CHARLES TANSEL.

$27.50 DAVID BRADLEY LITTLE JAP DISC CULTIVATORS

NONE AS GOOD AT ANY PRICE.

PIVOT AXLES. SEAT BAR DODGING LEVER. BALANCE FRAME.

COMPLETE WITH SCRAPERS, FENDERS, WHIFFLETREES — AND NECKYOKE —

Fully Covered by United States Patents.

A CLEAR VIEW OF THE ROW ALL THE WHILE.

Aside from the gangs, this cultivator is of exactly the same construction as the Little Jap Shovel Cultivators described on previous page. It is the most easily handled and best working disc cultivator made and the only cultivator upon which it is possible to successfully use either disc or shovel gangs. **It has a flexible arch, as shown in illustration, which permits either gang to work high places or to pass over obstructions without affecting the work of the other.** Gangs are adjustable sideways to many angles and swivel in either direction so as to throw the dirt in or out. We furnish, at extra prices quoted, blade, rake and rotary levelers to attach to the rear of the gangs. These level the soil after it is disced. We also furnish a barring off attachment for use in young corn and which also converts the cultivator into a perfect working disc harrow. Another desirable attachment is the No. 150 spring tooth which can be used in place of the disc gangs, constituting a perfect tooth cultivator. If you wish a Little Jap Cultivator with both and disc gangs, select a shovel cultivator from the previous page, order in addition a pair of the extra disc gangs listed below. Price the cultivator complete with pole, neckyoke, whiffletrees, gangs, and fenders. Made with either 14 or 16-inch discs but 14-inch disc most generally preferred. DAVID BRADLEY LITTLE JAP SPRING TOOTH CULTIVATORS

$23.75

Identical with the Little Jap Cultivators described on previous page, the only difference being in the gangs and shovels. This type of cultivator is used in nearly all sections. It is especially desirable in stumpy ground, as the spring teeth afford sufficient elasticity for the shovels to slide over low stumps or roots without damage. Very effective in destroying weeds and gives splendid results in shallow cultivation. The gangs each have five spring steel teeth or shanks, to each of which is attached a 2x8½-inch double pointed steel shovel. If you order any other style of Little Jap Cultivator and a pair of the extra spring tooth gangs listed below, you can make one cultivator do the work of two or more machines by merely changing gangs. Price is for the cultivator complete with pole, whiffletrees, neckyoke, shovels and fenders. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F685 Little Jap Cultivator with No. 96 10-shovel spring tooth gangs. Weight, 447 pounds. Price.....$23.75

THE MOST PERFECT CULTIVATOR HE EVER USED.

R. F. D. No. 2, Dexter, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I have tried the Little Jap Surface Cultivator purchased from you and find it the most perfect I ever used. It is the easiest to handle, both for man and team, and is equaled by none. Wishing you success, I remain, Yours truly, HARVEY LOWE.

DAVID BRADLEY LITTLE JAP SURFACE CULTIVATOR.

Of exactly the same construction as the Little Jap Shovel Cultivators described on previous page, excepting that it is furnished with gopher or surface blade gangs and with the flexible arch described above in connection with the Little Jap Disc Cultivator. Illustration shows gangs fitted with flat blades, but we can also furnish with concave blades. Blades are of very best steel, 3 inches wide and 20 inches long. We furnish at extra price quoted a pair of blade levelers to attach to rear of gangs. These level the soil after it is worked. If you select one of the Little Jap Shovel Cultivators from previous page or one of the Little Jap Disc Cultivators described above, and an extra pair of No. 69 gangs, as listed below, you can make one machine serve the purpose of two by merely changing gangs. Price is for the cultivator complete with pole, whiffletrees, neckyoke, gangs and fenders. Flat blade levelers and rake levelers listed above with Little Jap Cultivators can be used with these cultivators. Shipped from the David Bradley factory at Bradley, Ill.

DAVID BRADLEY SENTINEL BALANCE FRAME COMBINED RIDING AND WALKING CULTIVATOR

To those who prefer a combined riding and walking cultivator, we cannot too strongly recommend David Bradley Sentinel. It is a rigid axle balance frame cultivator which excels all other cultivators of this type in strength, convenience and ease of handling. It will stand up under the severest strain and never fails to satisfy where this style of cultivator is the choice of the user. Wheels are steel with dustproof, oil-tight hubs; spokes; they are 42 inches high with 2½-inch concave tires and are fitted with dustproof, oil-tight hubs. Adjustable to a distance of 40 to 54 inches between the wheels. The open seat and frame allow a clear view of the row all the while. Seat is adjustable in and out and up and down, to suit operators of different heights, and when the operator wishes to walk, seat can be folded forward without obstructing the row. Always well balanced whether operator is heavy or light weight. Every lever is effective and well balanced. Illustration shows the Sentinel fitted with No. 123 4-shovel gangs. Prices are for the cultivator complete including whiffletrees, pole, neckyoke, handles, hobble or spreaders, and fenders. Shipped from the David Bradley factory at Bradley, Ill.

41.00 David Bradley Tu-Ro Riding Cultivator

The Only Successful TWO-ROW Cultivator Made. Cultivates Two Rows at the Same Time. Crooked Rows as Easily as Straight Ones.

A Great Economizer of Horse Flesh, Time and Labor.

Pivot Axles—Seat Bar Dodger—Expanding Lever.

HIS LETTER PROVES OUR CLAIMS. READ IT.

R. F. D. No. 4, Box 82, Blissfield, Mich.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I want to say that the David Bradley Tu-Ro Cultivator I bought of you is the best put up and satisfactory cultivator I ever owned. No more single cultivators for me. I hitched three horses to the Tu-Ro, see an unbroken colt, and started in to work. The colt had its operation learned in no time, and the way he did with the machine was an eye opener to my boys. At least twenty-five farmers have been over to see my Tu-Ro work and I think nearly every one of them will get one, too. If anyone wants to know how is a machine your Tu-Ro is, tell them to write to me.

Yours truly,
A. J. SELL.

The Tu-Ro is just as far ahead of all other two-row cultivators as the Little Jap is ahead of all other single row cultivators. Its equal cannot be bought at any price and to the farmer whose crop is large enough to require the services of two single row cultivators we recommend the purchase of a Tu-Ro.

With one David Bradley Tu-Ro, one man or boy and three horses can do the work of four single row cultivators, two drivers and four horses.

The David Bradley Tu-Ro Cultivator is the simplest and most practical of all, and when any man or boy becomes familiar with handling a two-row cultivator, he will find it easier to operate than any other two-row cultivator made, and easier than many single row cultivators for that matter. We have yet to see the purchaser of a David Bradley Tu-Ro who would exchange it for any other single or double row cultivator made. Its popularity is evidenced by the fact that last spring we sold every one of these machines we could possibly make. Our stock ran out before the season half over and we had to refuse hundreds of orders. This year we have built more than double our last year's stock, and we will find ready for every machine. Get your order in early. We don't want to disappoint a single customer if we can help it.

THE SEAT BAR DODGING FEATURE **and pivotal axle feature of the David Bradley Little Jap and Tu-Ro Cultivators are practically the same,** in fact, both cultivators operate on the same principle. The Tu-Ro is simply the Little Jap in an enlarged form. With his feet on the gangs, in the loops or out, as he may prefer, the operator gives a slight push, just enough to start the side motion of the seat bar with the weight of his body, and the seat bar, being pivoted at its center and connected by means of steel rods with the malleable sockets which connect the pivot axles to the frame, also connected at the front end with the two arches, instantly shifts the gangs sideways to pass the out of line hill. This moves the wheels slightly out of their regular course, as well as changes the position of the cultivator, but does not affect the travel of the team either as to gait or direction. When the out of line hill has been passed the operator straightens up and the seat bar is instantly swung again into line with the pole, the time consumed being scarcely noticeable. The Tu-Ro works as well on hillside cultivation as on level ground, no drifting, as the operator's weight gravitates to the lowest side of the cultivator and makes the wheels run uphill at the proper angle to keep the machine working right. No other two-row cultivator will do as good work on hillside. The gangs are parallel at whatever position the cultivator works, and shovels always cut a uniform depth.

THE EXPANDING LEVER **regulates the distance between gangs for rows of varying distances.** It is located directly in front of the driver, easily reached, and by moving it back and forth the distance between gangs can be increased or decreased, as desired. This is a splendid feature, and one you will not find on other two-row cultivators.

HITCH **Unless otherwise ordered we furnish the Tu-Ro with three-horse hitch,** as shown in illustration. In light soils three horses handle the machine with ease, but in difficult soils and particularly on large Western farms, four or five horses are generally used. The size of hitch you order depends upon the nature of your soil. **The five-horse hitch** is accomplished by adding a long draw bar with singletrees on each end. This fastens underneath the double tongue and brings another horse on each side of the three-horse hitch shown in illustration. **The four-horse hitch** is the same as the five-horse hitch, excepting that the center singletree of the three-horse hitch is not used.

THE TU-RO IS THE STRONGEST **and best built of all cultivators.** It is made to stand up under the hardest kind of work and we guarantee every part of it to give the best of service. It is made throughout of the very best steel and malleable iron. We couldn't make it any better if we got double the price. Wheels are of steel, strongly made, 42 inches high with staggered spokes and have 3-inch concave tires. They have dustproof, oiltight, long distance bearings which will work through a season with but occasional lubrication. Illustration shows the cultivator fitted with No. 123 8-shovel gangs. Prices are for the machine complete with shovels, fenders, double tongue, three-horse hitch and neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

SEE PAGES 1121 AND 1122 FOR ILLUSTRATIONS AND PRICES OF EXTRA GANGS. **If you wish to purchase extra gangs for David Bradley Tu-Ro Cultivators we will furnish them at double the price we quote per pair for gangs with Little Jap Cultivators.**

DAVID BRADLEY CRICKET LISTED CORN CULTIVATOR.

9.58

For years this tool has been a great favorite throughout the listed corn country where thousands are in use. The discs are adjustable in or out on the arch to vary the distance from the corn. Inner discs are 10 inches; center discs, 11 inches, and outer discs, 12 inches in diameter; made of finely tempered polished steel. They are securely mounted on the axles and have chilled bearings of extreme hardness, insure splendid wearing qualities. The discs are controlled by a lever by which they can be easily raised to clear trash and at the end of rows. The shields automatically with the discs. The arches are high enough to permit the use of corn of good height. This cultivator is strongly built of the best of steel and light draft. Runners are wood, 3½ feet long and shod with heavy steel. This is positively the best tool of its class made. Shipped from the David Bradley factory at Bradley, Ill.

32F600 **Cricket Listed Corn Cultivator.** Wt., 197 lbs. Price..**$9.58**

David Bradley Steel Frame Weeder and Surface Cultivator.

$6.27

Adjustable Handles and Shafts. Cuts 7½ Feet.

Flat Spring Steel Teeth With Round Points.

A wonderful improvement over the old style square or round tooth weeders, and a tool that is growing in popularity every year. The flat oval spring steel teeth possess greater elasticity than any other form; create a finer mulch and do not injure crops. The frame is made of heavy angle steel and is strongly braced. Weeder has 39 teeth, firmly fastened with individual clips. Teeth can be removed as desired to straddle rows. Adapted for use in any soil. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F595 Steel Frame Weeder. Weight, 85 pounds. Price.....**$6.27**

CULTIVATOR AND WING SHOVEL PLOW.

$4.99

A one-horse tool for cultivating corn, potatoes and other heavy work. Teeth can all be set to act as cultivator teeth or the rear teeth can be adjusted to act as hoes. You can easily remove the cultivator parts and put on the adjustable wing shovel blade in place of the rear center tooth, making one of the best wing shovel plows on the market. Frame is made of selected oak and adjustable from 8 to 40 inches in width. A splendid tool and one needed on every farm. Shipped from factory near Chicago.

No. 32F1045 Wood Frame Cultivator. Weight, 75 pounds. Price.....**$4.99**

David Bradley Manure Spread

$42.50

Without Truck

OUR GUARANTEE.

We guarantee the David Bradley Spreader to please you in every way. Try it out in your own field, taking your own time and spreading as many loads as you wish. Put it in competition with other spreaders —your neighbor's or any agent's spreader if you can persuade him to make the test. Then if in your own opinion the David Bradley has not proved to be the strongest built, best spreading, nicest handling, easiest draft of all spreaders, regardless of price, you may send it back to us at our expense, and we will return your money and also whatever freight charges you paid. Every David Bradley Spreader is guaranteed to cost nothing for repairs if properly used. Any part which breaks or wears out through defect in material or workmanship, we will replace free of charge.

SEARS, ROEBUCK AND CO.

$69

Complete With

In the David Bradley Spreader we offer what we know and what every farmer owning one knows to be the strongest, simplest, lightest draft and most easily handled spreader made. Every part of it is made in the big seventy-nine-year old David Bradley factory. It is the product of the most experienced designers and makers of farm machinery and is a wonderful example of mechanical perfection. It is built from the ground up of materials which seventy-nine years of experience in implement building have proven best for the purpose. Not a single feature of the David Bradley Spreader has been slighted or is in any way experimental; from beginning to end it is a demonstrated success and guaranteed by us to give absolute satisfaction.

BEFORE YOU BUY A SPREADER ASK THESE QUESTIONS

When you go to buy a spreader, the dealer or manufacturer will likely try to do most of the talking. He will tell you a dozen or more reasons why you should buy his particular machine, but if there is any reason why you should not, you may rest assured he will remain silent. Now, suppose that you do some of the talking. Read our description of the David Bradley Spreader on the following page, then put to him these questions and make him answer them to your satisfaction, otherwise he has no right to expect your order.

ASK HIM if his spreader is the heavy, cumbersome, complicated kind, expensive to buy and expensive to own, the kind that needs three or four horses to handle and a full grown man to operate; or is it the handy, economical kind that a light team can handle on any kind of ground, in all sorts of weather, the kind that a ten-year old boy can operate and do as good work as a man, **like the David Bradley.**

ASK HIM if his spreader is the kind that does a good job only on certain kinds of manure and on level ground, or is it the kind that spreads any kind of manure, wet, dry, light or heavy, on hillside or level ground and can be regulated to spread any thickness with team on the go and without danger of breakage or choking the beater, **like the David Bradley.**

ASK HIM if his spreader box is made of any old kind of lumber, without regard to grade or seasoning, or is it made of first quality smooth dressed yellow pine, carefully selected and seasoned for months before using, **like the David Bradley.**

ASK HIM how his box is made, if it is just an assortment of boards nailed on top of cross girts, and sides held to these girts by flimsy posts, or does it have a water-tight bottom of carefully matched tongued and grooved lumber securely fastened to the body, which consists of two heavy hard pine sills with four heavy girts mortised through them, and sides securely bolted to these sills by four hardwood posts, and these sides made bulge proof by heavy iron side braces, **like the David Bradley.**

ASK HIM if the top edges of his box are left bare to be jammed, split and splintered by knock of fork and shovel, or are they protected by a heavy strip of iron, **like the David Bradley.**

ASK HIM if his box is the same width, front and back, so as to keep the friction of the load against the sides, making it necessary to resort to force feeds and other devices to force the load backward, or is it 2 inches narrower in front, and tapering wider toward the rear, so that the minute the load is started friction is released and the load travels free without assistance, **like the David Bradley.**

ASK HIM if the working parts of his spreader are cheap cast iron, brittle and easy to break, or are they made of tough, unbreakable high grade malleable iron, which costs about twice as much and lasts many times as long, **like the David Bradley.**

ASK HIM if his drive is but from one side and consists of a mulitude of cogs or gears, chains which engage but three or four of the top teeth of the sprockets, continually jumping off and developing but half the power possible, or is it the positive, double chain drive with chains engaging seven sprocket teeth and securely held on the sprockets by positive locks on each adjustable idler arm so they can never jump, **like the David Bradley.**

ASK HIM if his feed mechanism is of the complicated, easy to break and get out of order kind, a collection of worm gears, cone gears, rollers, cams, etc., or has it a silent, easy working accurate eccentric feed, which never gets out of order, which has no lost motion, is self lubricating and spreads at your will, from the finest dressing to a heavy coat, **like the David Bradley.**

ASK HIM if his apron is of **the old fashioned heavy, easy rutting kind,** always getting out of order, the kind that you have to stop and rewind or repair as you load, the kind that bags at the knees and hangs down underneath the beater on anything that happens along, or is it the endless steel variety, always ready for business, easily adjusted and self cleaning, running in two angle steel protectors fastened inside the body sills, **like the David Bradley.**

ASK HIM if his feed ratchet is worked by a single pawl, which pulls the apron and keep the apron from slipping back between pulls, or has it a double pawl, one to pull and one to hold, **like the David Bradley.**

ASK HIM if his levers are but thin flimsy pieces of strap iron, without bearings working in cheaply made stamped racks, and operating light, easy bending levers, or are they **genuine** levers, strong, heavy and well formed, with a comfortable and positive latch, and working in strong malleable iron racks and operating dependable connecting rods, **like the David Bradley.**

ASK HIM if his seat is the stationary kind always in the way where it is continually becoming covered with manure, or is it a comfortable roomy seat on a well formed spring standard and made to fold out of the way when loading, and clean to sit on, **like the David Bradley.**

ASK HIM if his spreader is made in an ordinary factory, slapped together by day laborers, who merely assemble parts bought here and there, or is it made in a high class perfectly equipped factory of seventy-nine years' experience in farm implement and machinery building, a factory whose product is known the world over as best that can be made, a factory where none but the most skilled and experienced mechanics are employed, men who know how to make a manure spreader and make it BEST, **like the David Bradley.**

Left View of Spreader With Wood Wheel Truck.

ASK HIM to go over these questions with you. Ask him to read our description of the David Bradley Spreader and let you where his spreader can be made as good. To be honest he must that no one can possibly employ better construction than we; then ask him, can expect you to buy his spreader pay from 40 to 60 per cent more than ask **for the David Bradley.**

ASK HIM if he will consider ordering a David Bradley Spreader and will put his machine at work in field alongside of it with the understanding that you will keep the spreader that you best. We will gladly welcome test and if you do not decide in the David Bradley, we want you back to us at our expense and return you every cent you paid machine, together with the freight paid for freight charges. Will this?

IPTION OF THE DAVID BRADLEY SPREADER

ading, Easy Handling, Long Wear Guaranteed. No Better Spreader At Any Price.

tic Feed Spreading Mechanism.

In reading the following description of the David Bradley Spreader note the exceptionally high quality of material used throughout, its simplicity, the absolute freedom from complication, which practically does away with all danger of breakage, and last, but not least by any means, note the extra strong construction.

We have endeavored to make the David Bradley Spreader an everlasting machine, which will stand up to your absolute satisfaction and safely carry the unlimited guarantee we place upon it.

BODY. The stanchest construction to stand hard use. The bottom is built on two heavy hard pine sills running full length of box, held together by four hard pine girts **mortised into** them. In addition two s run the entire length of sills for reinforcement. The frame is at hardly any collision could affect it. The box is 10 feet long her at the front than rear, which helps the feed and greatly aft. Sides are carefully graded smooth lumber and reach 17 e upper surface of box bottom. They are bolted firmly to box posts, which are bolted to the sides. **Extra strength** is given heavy iron brace bolted to middle of each side and the extended ter girt. It positively prevents bulging. The box is 2 inches the beater end than at the front. This taper permits load to k freely without binding. **Top edges of sides are iron bound** to e knocks of fork or shovel.

st approved type of steel implement seat, roomy and com- mounted on a spring standard which folds down forward when The front board is reinforced to sustain the driver's weight. The are amply strong for any weight, supported by double irons.

OX. This is made of matched flooring for three reasons: It ery strong, it forms a smooth surface not susceptible to wear ing, and it makes a **watertight box.** It is a great advantage the liquid part of the load and get it on the field.

We furnish the complete spreader with either wood wheel or l truck. The steel wheel truck is very strong and compact, per- handling of the team, short turning, and is low enough for easy The top of box sides is only 50 inches from the ground. The are 3½x4½-inch oak; the gear is hardwood and wrought iron t except the malleable iron stakes; axles are hickory; reach, d bolsters are oak. Entire truck well ironed and braced. **Reach rengthened out** in case you wish to use truck for some other pur- ring long wheel base. Wheels are practically unbreakable; hes and rear 40 inches diameter. Tires ⅝ inch thick and 4 de. **Permanent mud lugs** or traction cleats are riveted to rear ring positive traction. The bearings are 11 inches long, hubs ry cast, and the wide oval spokes are let into and upset in and rear wheels track; don't make unnecessary tracks in The wood wheel truck is substantially the same as the steel k, excepting that it has 30-inch front and 42-inch rear wood d mud lugs are clamped on instead of riveted.

TEEL APRON. An endless apron of steel; not a piece of wood follower board," no "force feed," nothing to set or adjust to because it is correct in principle. It is made of two endless ains connected at short intervals by steel angle cross pieces oad toward the beater evenly. When beater has gone through the last of the load the box bottom is cleared of all manure. Holding apron snugly on bottom are front and rear steel shafts with four sprockets over which chains travel. **Chains are protected** when running under box bottom by steel angles. Apron is easily adjusted by turning bolts in the heavy corner castings at front of box. Consult illustration for this feature. Note the big solid casting bolted to front post and distributing pull of apron; on other spreaders this strain is usually permitted to fall on one sawed out spot in box side. Note also the steel angles, heavy chain and matched, tongued and grooved box bottom boards.

Corner of Box.

ECCENTRIC FEED. This feature has put the David Bradley Spreader in a distinct class. It simply wipes out feed troubles. The beater shaft turns the heavy malleable eccentric which pulls the pawl against the large ratchet wheel, causing it to advance the apron. It gives it a barely perceptible movement or pulls it along several inches, as operator wishes. The stop pawl prevents apron "edging back" any of the distance gained. That is all there is to the feed mechanism. It is simplicity itself, and yet it distributes far more uniformly than complicated devices. It works the same up or down hill, on rough ground or smooth. It cannot feed unless beater is revolving. No cramming load against an idle beater by forgetting feed lever. Set it once and pay no further attention to it.

Positive Chain Lock.

BEATER. Here is the "business" part of a spreader. We have made it the strongest we know how. Eight oak crossbars are bolted into **heavy malleable** spiders. **Steel** teeth, ⅝ inch round and shear pointed, are set into these oak cross pieces, which are cross riveted to prevent splitting Teeth do not track, but are so arranged that every bit of manure must be torn to shreds as it passes between them. Beater revolves in high carbon bearings. Directly above is suspended a **spring trip rake,** which assists in thoroughly pulverizing manure. It automatically trips if any unyielding substance is encountered and permits it to pass without injury to beater.

DOUBLE CHAIN DRIVE. Each rear wheel carries an extremely large, heavy malleable sprocket with a 1½-inch flange to enable it to be drawn up tight to wheels without springing. Over these run No. 62 malleable drive chains, between beater sprockets and idlers. The chains engage **seven** teeth of each large sprocket; ordinary construction allows but three teeth to pull. Beater sprockets are not fast to shaft, but are held in mesh with the **equalizer clutches** which are tight on shaft. Consult illustration of this important detail. This prevents any strain when one wheel revolves faster than another, as in turning a corner. It also permits **backing** spreader in gear, as the clutches simply disengage from the sprockets. These clutches, like the idler arms, are adjustable in and out.

POSITIVE CHAIN LOCK. An exclusive David Bradley feature; its importance cannot be overestimated. It makes chain troubles **impossible.** Study the illustration and you will see why. When the control lever engages drive chains the heavy malleable idler arms are automatically followed down by wrought iron lock arms that bear down **on a dead center,** completely preventing those arms rising up. The shaft holding idler arms is steel and 1⅛ inches square, on which arms are **adjustable** in and out to insure perfect chain and sprocket alignment. The chains cannot lift the arms; no sudden jolt can move them; they are positively **locked** into position. This prevents sprockets skipping a single link of either chain; the chains cannot jump the sprockets. It takes the strain off lever, rod and rack. Contrast it with the drives in which the tightness of the chain depends upon a long springy rod. Control levers, well formed of iron, nicely finished and having grip latches on each, are conveniently located for the driver. The spreading lever, being used to **engage** the drive chains and not to **hold** them in gear, is very easily thrown in and out. The rack has several notches so that just the proper set is possible. The feed lever has four different positions in feed; the first will spread a barely noticeable coat, and from that up to a heavy 2 or 3-inch coat is possible. The idler arm levers are adjustable in different holes. This provides a simple, quick means of adjustment if chain slack needs taking up. No need of shortening chains. Either lever on a David Bradley Spreader may be thrown in or out of gear with team on the go; no delicate parts to break.

GREASE CUPS. In several places we have supplanted oil holes with large grease cups. They require but occasional filling and insure perfect lubrication, whereas an oil hole takes but a limited supply of oil and by filling up with foreign substances is often neglected.

CAPACITY. We plainly state the capacities of each David Bradley Spreader and assure the purchaser that he can load as much or more ordinary manure as stated. As a matter of fact, our 55-bushel box will hold as much as many so called 60-bushel machines of other makes and our 65-bushel box as much as many 70-bushel machines.

FINISH. The standard Bradley colors, red, yellow and black, make the David Bradley handsome in appearance. The body is red with yellow striping, gear yellow, and iron parts black. **Three coats** are used: Primer, the best wagon red, varnish and stripe.

Equalizer Clutch and Sprocket.

$42.50 BUSHEL SIZE.

DAVID BRADLEY MANURE SPREADER BOX

$47.50 65-BUSHEL SIZE.

CAN BE USED ON ANY ORDINARY FARM TRUCK.

n to purchase a spreader box for use on a truck you already have you cannot ch than the David Bradley Spreader Box. It is exactly the same as that complete spreaders. The price for the spreader box includes everything a complete David Bradley Spreader except the truck. Drive chains, and everything necessary to attach are included.

ey ordinary farm truck you may have, wide or narrow track, wood or steel no risk as to perfect fit because of its complete **adjustability.** The clamp so that sprockets may be held out the proper distance from spokes bled wheels. Idler arms are adjustable in or out on shaft, and beater shaft sprockets are similarly adjustable. Thus a **perfect** alignment is always possible; chain, idler, drive sprocket and beater sprocket all in a straight line.

We recommend purchasing complete spreader with truck, as it costs little if any more than others ask for just a box, and then you have the best spreader always ready for use. However, the David Bradley Spreader Box mounted on any truck you have on hand will make you a spreader you could scarcely equal except with a complete David Bradley. The David Bradley Manure Spreader Box is covered by the same liberal binding guarantee as our complete David Bradley Spreader. See description above.

PRICES OF DAVID BRADLEY SPREADERS

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRE

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

$135.75 AND UP

Complete with Whipping Attach and Lifting Jack.

Dealers asked $200.00 to $250.0 this Same Press.

Repairs for David Bradley Ha are seldom needed, but you ca get them from us at but a fract price dealers ask.

DAVID BRADLEY HAY PRESSES forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on pl prevents breakage when hay is unevenly fed. Powerful tension bolts on propeller side of bale chamber. They conform to compression on top and bottom and pre ing at sides. Follower boards are steel clad and last about four times as long as boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for ny length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up at any point in the circle and sa expense of a driver. The Lifting Jack is simple and powerful. With it one mn or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, tw three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the ma baling done from the windrow. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spur on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger; no lost motion. All power concentrated in pressing the bale. Bale is compressed by throw forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator's keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. Th can also be worked inside a small barn with power end flush with door sill and horse working outside. Leng over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price i complete with two follower blocks, singletree and automatic stakes. Shipped from the big David Bradley factory at B

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special Circular which we will mail free upon request. These are the presses the big shippers use. Capacity, 25 to 40 per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the Da Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Double Hub Bicycle Type Wheels, Heavy 2-inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. They are the strongest rake wheels made. Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. This is the most perfect tooth fastening known. Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay, the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

No. 32F1200 8-Foot Self Dump Rake. Wt., 380 lbs. Price.....$18.95

No. 32F1201 10-Foot Self Dump Rake. Wt., 420 lbs. Price..... 21.00

KENWOOD IDEAL HAY TEDDERS.

Guaranteed to do as good work as any tedder you can buy at any price. Contains superior features not found in any other. Frame construction is exceptionally strong and rigid. A weak point with nearly all others. The center chain drive applies power from both wheels at once. Forks are tempered spring steel and protected from breakage by a long, strong coiled spring. No two forks strike the hay at the same time. Has relief springs, under front of frame. Forks can be adjusted in height while in motion and you can back the machine without running the forks. Has levers for raising and lowering the frame and for throwing the machine in and out of gear. Main frame reacts when forks strike the ground or hard substance, thus preventing breakage. Combined pole and shafts so one or two horses can be used. Shipped from factory in Eastern Minnesota.

$28.25

KENWOOD IMPROVED HAY LOADER.

The Most Successful Loader on the Market.

Made by old and experienced manufacturers who in the have produced one of the simplest and most efficient lo Loads from the swath all kinds of hay except very hea hay or very short hay, and does good work on short hay into light windrows. Rakes a swath 8 feet wide. Operated by crank shaft driven direct from the sprockets, which are attached to the wheels. Attached to the crank shaft are or rake arms, at the lower end of which rakes, or six tines, are attached. Along the under side of the there are small carrying forks which carry the hay to the top, from which it is delivered to the rake. Levers attached to each end of the crank shaft are used to raise and lower the rake arms so that the rakes may be operated at any desired height. Frame is made of hardwood with iron hubs and have projections which assure positive action. Easy to set up and operate, and guaranteed to give satisfaction under all reasonable conditions. Shipped from factory in Southeastern Wisconsin.

COMPLETE FT. OUTFIT Peerless Automatic Carriers FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, **return it at our expense and we will return your money** together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy **16-gauge galvanized sheet steel** forms the bottom and sides. Each end is made of two **1-inch hardwood boards** cross nailed to prevent warping, and making an absolutely **watertight box.** The sides are protected by a strip of **1-inch** angle steel. **The bail** is made of heavy **2-inch** channel steel. **Sheave wheels are iron, 7-inch diameter, have roller bearings,** and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it **impossible for it to jump the track,** and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out the trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, in diameter.

Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very powerful, heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

price is for a complete 100-foot straightaway rod track outfit consisting of one plain carrier complete, one trip, 100 feet of with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. **If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45.** If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and where you want tracks to run and we will send our special price on a complete outfit to suit.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. **If your barn is** ing, we recommend that you order at least one spring track suspender. This prevents sagging and relieves strain on the tension **directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.**

ACME ONE-HORSE SWEEP POWER.

$14.25

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price.....$14.25

ACME SWEEP HORSE POWERS.

$22.65 AND UP

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. The 2-horse power is lighter and differs slightly in design. The 6-horse power is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. **Two-horse powers** have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. **Four-horse powers** have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. **Six-horse powers** have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. **Eight-horse powers** have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. **Order a horse power jack, listed on this page, when you wish to transmit power by belt.** Shipped from factory in Southeastern Minnesota.

SECURITY GALVANIZED STEEL GRAIN TANKS.

$37.95

Open. Closed.

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. **Sold only in lots of ½ dozen or more.** Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen.....$5.85

PORTABLE CORN CRIBS.

$3.86

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRES

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

$135.75 AND UP

Complete with Whipping Attach and Lifting Jack.

Dealers asked $200.00 to $250.00 this Same Press.

Repairs for David Bradley Hay are seldom needed, but you can get them from us at but a fraction price dealers ask.

DAVID BRADLEY HAY PRESSES

forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on plunger prevents breakage when hay is unevenly fed. Powerful tension bolts set perpendicular side of bale chamber. They conform to compression on top and bottom and prevent ing at sides. Follower boards are steel clad and last about four times as long as boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for any length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up at any point in the circle and expense of a driver. **The Lifting Jack is simple and powerful.** With it one may or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the mow baling done from the windrow. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spur on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger; no lost motion. All power concentrated in pressing the bale. Bale is compressed by forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator's skill keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. The can also be worked inside a small barn with power end flush with door sill and horse working outside. Length over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price is complete with two follower blocks, singletree and automatic stakes. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F925 Simplex Hay Press, with 14x18-inch bale chamber. Wt., 864 lbs. Price.....

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special Circular which we will mail free upon request. These are the presses the big shippers use. Capacity, 25 to 40 tons per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the David Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Double Hub Bicycle Type Wheels, Heavy 2-Inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. **They are the strongest rake wheels made.** Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. **This is the most perfect tooth fastening known.** Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay, the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

No. 32F1200 8-Foot Self Dump Rake. Wt., 380 lbs. Price.....**$18.95**

No. 32F1201 10-Foot Self Dump Rake. Wt., 420 lbs. Price.....**21.00**

KENWOOD IDEAL HAY TEDDERS.

Guaranteed to do as good work as any tedder you can buy at any price. Contains superior features not found in any other. Frame construction is exceptionally strong and rigid. A weak point with nearly all others. The center chain drive applies power from both wheels at once. Forks are tempered spring steel and protected from breakage by a long, strong coiled spring. No two forks strike the hay at the same time. Has relief springs, under front of frame. Forks can be adjusted in height while in motion, and you can back the machine without running the forks. Has levers for raising and lowering the frame and for throwing the machine in and out of gear. Main frame reacts when forks strike the ground or hard substance, thus preventing breakage. Combined pole and shafts so one or two horses can be used. Shipped from factory in Eastern Minnesota.

Our Complete Bathroom Outfits Are Values Every Home Should Investigate

Digitized by Google

$21.95 FOR COMPLETE 100-FT. OUTFIT — Peerless Automatic Carriers — FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, **return it at our expense and we will return your money** together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy **18-gauge galvanized sheet steel** forms the bottom and sides. Each end is made of **two 1-inch hardwood boards** cross nailed to prevent warping, and making an absolutely watertight box. The sides are protected by a strip of **1-inch** angle steel. **The bail** is made of heavy **2-inch** channel steel. **Sheave wheels are iron, 7-inch diameter, have roller bearings,** and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it **impossible for it to jump the track,** and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out and, the trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, 7/16 in diameter.

Peerless Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very powerful, the heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

$21.95 price is for a complete 100-foot straightaway rod track outfit consisting of one plain carrier complete, one trip, 100 feet of track with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. **If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45.** If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and where you want tracks to run and we will send our special quote price on a complete outfit to suit.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. **If your barn is long, we recommend that you order at least one spring track suspender.** This prevents sagging and relieves strain on the tension bolts. Complete directions for erecting accompany each outfit. **Shipped from factory in Southeastern Wisconsin.**

ACME ONE-HORSE SWEEP POWER.

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

$14.25

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price.....$14.25

ACME SWEEP HORSE POWERS.

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. The 2-horse power is lighter and differs slightly in design. The 6-horse power is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. **Two-horse powers** have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. **Four-horse powers** have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. **Six-horse powers** have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. **Eight-horse powers** have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. **Order a horse power jack, listed on this page, when you wish to transmit power by belt.** Shipped from factory in Southeastern Minnesota.

SECURITY GALVANIZED STEEL GRAIN TANKS.

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. **Sold only in lots of ½ dozen or more.** Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen.....$5.85

PORTABLE CORN CRIBS.

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRE

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

$135.75 AND UP

Complete with Whipping Attach and Lifting Jack.

Dealers asked $200.00 to $250.0 this Same Press.

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

Repairs for David Bradley Hay are seldom needed, but you can get them from us at but a fraction price dealers ask.

DAVID BRADLEY HAY PRESSES

forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on plunger prevents breakage when hay is unevenly fed. Powerful tension bolts on perpendicular side of bale chamber. They conform to compression on top and bottom and prevent ing at sides. Follower boards are steel clad and last about four times as long as wood boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for any length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up the at any point in the circle and expense of a driver. **The Lifting Jack is simple and powerful.** With it one man or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, two three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 12 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the mow baling done from the windrow. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spur on on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger; no lost motion. All power concentrated in pressing the bale. Bale is compressed by inner forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator's skill keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. Two can also be worked inside a small barn with power end flush with door sill and horse working outside. Length over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price includes complete with two follower blocks, singletree and automatic stacker. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32F925 Simplex Hay Press, with 14x18-inch bale chamber. Wt., 864 lbs. Price.....

No. 32F926 Simplex Hay Press, with 16x18-inch bale chamber. Wt., 894 lbs. Price.....

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special Hay **Circular** which we will mail free upon request. These are the presses the big shippers use. Capacity, 25 to 30 tons per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the David Bradley. Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Hand Dump, Foot Dump, Self Dump.

Double Hub Bicycle Type Wheels, Heavy 2-Inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. **They are the strongest rake wheels made.** Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. **This is the most perfect tooth fastening known.** Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay, the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

No. 32F1200 8-Foot Self Dump Rake. Wt., 380 lbs. Price.....**$18.95**

KENWOOD IDEAL HAY TEDDERS.

Guaranteed to do as good work as any tedder you can buy at any price. Contains superior features not found in any other. Frame construction is exceptionally strong and rigid. A weak point with nearly all others. The center chain drive applies power from both wheels at once. Forks are tempered spring steel and protected from breakage by a long, strong coiled spring. No two forks strike the hay at the same time. Has relief springs, under front of frame. Forks can be adjusted in height while in motion and you can back the machine without running the forks. Has levers for raising and lowering the frame and for throwing the machine in and out of gear. Main frame reacts when forks strike the ground or hard substance, thus preventing breakage. Combined pole and shafts so one or two horses can be used. Shipped from factory in Eastern Minnesota.

Our Complete Bathroom Outfits Are Values Every Home Should Investigate

Digitized by Google

FOR COMPLETE 100-FT. OUTFIT Peerless Automatic Carriers FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, **return it at our expense and we will return your money** together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy **18-gauge galvanized sheet steel** forms the bottom and sides. Each end is made of **two 1-inch hardwood boards** cross nailed to prevent warping, and making an absolutely **watertight** box. The sides are protected by a strip of **1-inch** angle steel. **The bail** is made of heavy **2-inch** channel steel. **Sheave wheels are iron, 7-inch diameter, have roller bearings,** and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it **impossible for it to jump the track,** and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out and the trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, 7 in diameter.

Peerless Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very powerful, the heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

The price is for a complete 100-foot straightaway rod track outfit consisting of one plain carrier complete, one trip, 100 feet of rod with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. **If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45.** If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and where you want tracks to run and we will send our special quote price on a complete outfit to suit.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. **If your barn is long, we recommend that you order at least one spring track suspender.** This prevents sagging and relieves strain on the tension joints. **Complete directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.**

ACME ONE-HORSE SWEEP POWER.

$14.25

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price.....$14.25

ACME SWEEP HORSE POWERS.

$22.65 AND UP

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. **The 2-horse power** is lighter and differs slightly in design. **The 6-horse power** is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. **Two-horse powers** have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. **Four-horse powers** have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. **Six-horse powers** have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. **Eight-horse powers** have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. **Order a horse power jack, listed on this page, when you wish to transmit power by belt.** Shipped from factory in Southeastern Minnesota.

SECURITY GALVANIZED STEEL GRAIN TANKS.

$37.95

Open. Closed.

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. **Sold only in lots of ½ dozen or more.** Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen.....$5.85

PORTABLE CORN CRIBS.

$3.86

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRE

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

$135.75 AND UP

Complete with Whipping Attac and Lifting Jack.

Dealers asked $200.00 to $250.0 this Same Press.

Repairs for David Bradley Ha are seldom needed, but you ca get them from us at but a fra price dealers ask.

DAVID BRADLEY HAY PRESSES forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, halt, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on the prevents breakage when hay is unevenly fed. Powerful tension bolts on each side of bale chamber. They conform to compression on top and bottom and pre ing at sides. Follower boards are steel clad and last about four times as long as boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for any length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up at any point in the circle and expense of a driver. The Lifting Jack is simple and powerful. With it one man or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the ne baling done from the windrow. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built, and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spe on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger, no lost motion. All power concentrated in pressing the bale. Bale is compressed by lum forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator's keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. P can also be worked inside a small barn with power end flush with door sill and horse working outside. Leng over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price is complete with two follower blocks, singletree and automatic stacker. Shipped from the big David Bradley factory at B

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special **Circular** which we will mail free upon request. These are the presses the big shippers use. Capacity, 35 to 4 per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the Dav Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Hand Dump, Foot Dump, Self Dump.

Double Hub Bicycle Type Wheels. Heavy 2-inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. **They are the strongest rake wheels made.** Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. **This is the most perfect tooth fastening known.** Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay, the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

FOR COMPLETE 100-FT. OUTFIT

Peerless Automatic Carriers

FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, **return it at our expense and we will return your money** together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy **18-gauge galvanized sheet steel** forms the bottom and sides. Each end is made of two **1-inch hardwood boards** cross nailed to prevent warping, and making an absolutely **watertight box.** The sides are protected by a strip of **1-inch** angle steel. **The bail** is made of heavy **2-inch** channel steel. **Sheave wheels are iron, 7-inch diameter, have roller bearings,** and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it **impossible for it to jump the track,** and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out ... the trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, ... diameter.

Peerless Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very powerful, heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

The price is for a complete 100-foot straightaway rod track outfit consisting of one plain carrier complete, one trip, 100 feet of ... with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. **If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45.** If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Automatic Lift Carrier.

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and ... where you want tracks to run and we will send our special ... price on a complete outfit to suit.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. **If your barn is ...** we recommend that you order at least one spring track suspender. This prevents sagging and relieves strain on the tension ... directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.

ACME ONE-HORSE SWEEP POWER.

$14.25

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price $14.25

ACME SWEEP HORSE POWERS.

$22.65 AND UP

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. The 2-horse power is lighter and differs slightly in design. **The 6-horse power** is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. **Two-horse powers** have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. **Four-horse powers** have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. **Six-horse powers** have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. **Eight-horse powers** have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. Order **a horse power jack, listed on this page, when you wish to transmit power by belt.** Shipped from factory in Southeastern Minnesota.

SECURITY GALVANIZED STEEL GRAIN TANKS.

$37.95

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. Sold only in lots of ½ dozen or more. Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen $5.85

PORTABLE CORN CRIBS.

$3.86

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRE

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

$135.75 AND UP

Complete with Whipping Attach and Lifting Jack.

Dealers asked $200.00 to $250.0 this Same Press.

Repairs for David Bradley Ha are seldom needed, but you ca get them from us at but a frac price dealers ask.

DAVID BRADLEY HAY PRESSES forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on prevents breakage when hay is unevenly fed. Powerful tension bolts set perpendic side of bale chamber. They conform to compression on top and bottom and pre ing at sides. Follower boards are steel clad and last about four times as long as boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for any length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up at any point in the circle and expense of a driver. The Lifting Jack is simple and powerful. With it one man or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the baling done from the windrow. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spe on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger, no lost motion. All power concentrated in pressing the bale. Bale is compressed by horse forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator; keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. can also be worked inside a small barn with power end flush with door sill and horse working outside. Length over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price complete with two follower blocks, singletree and automatic stakes. Shipped from the big David Bradley factory at

No. 32F925 Simplex Hay Press, with 14x18-inch bale chamber. Wt., 864 lbs. Price.....

No. 32F926 Simplex Hay Press, with 16x18-inch bale chamber. Wt., 894 lbs. Price.....

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special Circular which we will mail free upon request. These are the presses the big shippers use. Capacity, 25 to 35 per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the Dav Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Hand Dump, Foot Dump, Self Dump.

Double Hub Bicycle Type Wheels. Heavy 2-Inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. They are the strongest rake wheels made. Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. This is the most perfect tooth fastening known. Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay, the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

No. 32F1201 10-Foot Self Dump Rake. Wt., 420 lbs. Price..... 21.00

KENWOOD IDEAL HAY TEDDERS.

$28.25

Guaranteed to do as good work as any tedder you can buy at any price. Contains superior features not found in any other. Frame construction is exceptionally strong and rigid. A weak point with nearly all others. The center chain drive applies power from both wheels at once. Forks are tempered spring steel and protected from breakage by a long, strong coiled spring. No two forks strike the hay at the same time. Has relief springs, under front of frame. Forks can be adjusted in height while in motion and you can back the machine without running the forks. Has levers for raising and lowering the frame and for throwing the machine in and out of gear. Main frame reacts when forks strike the ground or hard substance, thus preventing breakage. Combined pole and shafts so one or two horses can be used. Shipped from factory in Eastern Minnesota.

No. 32F1210 6-Fork Hay Tedder. Wt., 590 lbs. Price.....

No. 32F1211 8-Fork Hay Tedder. Wt., 600 lbs. Price.....

FOR COMPLETE 100-FT. OUTFIT

Peerless Automatic Carriers FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, **return it at our expense and we will return your money** together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy **18-gauge galvanized sheet steel** forms the bottom and sides. Each end is made of **two 1-inch hardwood boards** cross nailed to prevent warping, and making an absolutely **watertight box.** The sides are protected by a strip of **1-inch** angle steel. **The bail** is made of heavy **2-inch** channel steel. **Sheave wheels are iron, 7-inch diameter, have roller bearings,** and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it **impossible for it to jump the track,** and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out ...e trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, ...diameter.

...Carrier **with automatic lift permits the raising or lowering of bucket for greater convenience in loading.** Lift is very powerful ...heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

...price is for a **complete 100-foot straightaway rod track outfit** consisting of one plain carrier complete, one trip, 100 feet of ...with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. **If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45.** If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Automatic Lift Carrier.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. **If your barn is ...** This prevents sagging and relieves strain on the tension ...

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and ...re you want tracks to run and we will send our special ...ate price on a complete outfit to suit.

...we recommend that you order at least one spring track suspender. ...directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.

ACME ONE-HORSE SWEEP POWER.

$14.25

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price $14.25

ACME SWEEP HORSE POWERS.

$22.65 AND UP

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. The 2-horse power is lighter and differs slightly in design. **The 6-horse power** is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. **Two-horse powers** have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. **Four-horse powers** have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. **Six-horse powers** have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. **Eight-horse powers** have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. Order **a horse power jack, listed on this page, when you wish to transmit power by belt.** Shipped from factory in Southeastern Minnesota.

SECURITY GALVANIZED STEEL GRAIN TANKS.

$37.95

Open. Closed.

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. **Sold only in lots of ½ dozen or more.** Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen $5.85

PORTABLE CORN CRIBS.

$3.86

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

DAVID BRADLEY DOUBLE CAM ALL STEEL HAY PRE

ANGLE STEEL FRAME

LARGE HOPPER

AUTOMATIC SPRING FOLDER

SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

San Antonio, N. Mex.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.

$135.75 AND UP

Complete with Whipping Attac and Lifting Jack.

Dealers asked $200.00 to $250.0 this Same Press.

Repairs for David Bradley Ha are seldom needed, but you ca get them from us at but a frac price dealers ask.

DAVID BRADLEY HAY PRESSES forcibly illustrate the big saving made farmers by our purchase of the David Bradley factory. Take for example the No. 32F930 press, which we list below at $135.75. Prior to our purchase of the factory dealers paid $167.00 for this same press and sold it to the user at from $200.00 to $250.00. This is but one example of the money we save the farmer, and we effect for him a corresponding saving throughout, not only the line of David Bradley hay presses, but the entire line of David Bradley implements. We offer them all direct to the user for less than dealers paid. There is no better line of hay presses made than the David Bradley presses and thousands of satisfied users throughout the world declare there are none so good.

GUARANTEE. Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the understanding that you are to take it into your own field and try it out in any way you see fit. Try it alongside of any other press of its type made. No matter if the other press does sell for from $100.00 to $150.00 more, and if after such trial you feel that you would rather have the other press, or if the David Bradley press does not satisfy you in every way and convince you that it is the best press for you to buy, send it back to us at our expense and we will return you the full price you paid us for it and also the money you paid for freight charges. We have sold hundreds of these presses on these liberal terms during the past season and we have yet to hear from the first dissatisfied customer.

THE EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made entirely of steel. Working parts consist of but a plunger, a double cam, and plunger draw. No chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to every round. Team travels in continuous circle. One horse can operate it and it is very easy work for two. Automatic plunger draw is operated by the cam and is positive. Plunger rebounds quickly and comes up slow, allowing plenty of time to place large feeds. Works perfectly under all conditions regardless of expansive force in material pressed and the automatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head es prevents breakage when hay is unevenly fed. Powerful tension bolts on perpendi side of bale chamber. They conform to compression on top and bottom and pre ing at sides. Follower boards are steel clad and last about four times as long as boards. It is a low down press, easily fed and convenient for tying the bale. An automatically rings as a signal for placing the follower board and can be set for an length. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up at any point in the circle and expense of a driver. The Lifting Jack is simple and powerful. With it one man or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two ordinary roads. Price is for the press complete with trucks, lifting jack, tw three follower boards, whipping attachment, evener, neckyoke, tongue, feeding wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay, and operators. Shipped from the big David Bradley factory at Bradley, Ill.

$48.25 DAVID BRADLEY SIMPLEX ONE-HORSE WINDROW HAY PR

BALES RIGHT FROM THE WINDROW. SAVES SWEEP RAKING AND STACKING A CROP.

Does as much work as many full circle balers and equally well. Bales hay, straw, alfalfa, and other forage. Can be taken right into the me baling done from the window. Mounted on sled runners and easily drawn about. Frame is heavy hardwood, compactly and solidly built and an integral part of the machine. The anti-friction plunger consists of two steel bars, bolted into and bracing the frame of plunger head. Spe on each end of these bars engage and move in steel channels secured to sides of press frame. These lie parallel ment of plunger, no lost motion. All power concentrated in pressing the bale. Bale is compressed by hom forward 8 feet, and rebound made when horse backs up the same distance. Capacity depends on operator keep hay in the large hopper, but two men under ordinary conditions should bale from 4 to 8 tons per day. Th can also be worked inside a small barn with power end flush with door sill and horse working outside. Pr over all is 10 feet. The only successful press of its kind and should find a place on every farm. Price is complete with two follower blocks, singletree and automatic stakes. Shipped from the big David Bradley factory at th

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our special Circular which we will mail free upon request. These are the presses the big shippers use. Capacity, 25 to 35 per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the Davi Send for our descriptive circular and learn all about our liberal proposition.

FULTON ALL STEEL SELF DUMP RAKES

$18.95 AND $21.00

Double Hub Bicycle Type Wheels. Heavy 2-Inch Channel Steel Tires.

FOR HAY CARRIERS AND BARN OUTFITS SEE PAGE 1064.

The strongest and most perfect working hay rakes on the market; made entirely of malleable iron and steel, not a piece of wood in them. The head, axle, cleaner head and platform are high carbon steel. Wheels are 56 inches high, have wide double flanged hubs with heavy round steel staggered spokes and heavy 2-inch channel steel tires. They are the strongest rake wheels made. Ratchets are protected by dump shields which make it impossible for the hay to catch and wind. Teeth are of the best tempered spring steel coiled at the base and are firmly fastened to the head by heavy malleable tooth holders; each holder accommodates five teeth, and is so securely fastened to the rake head that it is impossible for the teeth to work loose. This is the most perfect tooth fastening known. Cleaners are independent steel rods set in malleable sockets and extend back from the head between the teeth. Seat is mounted on a strong spring steel standard. These are positively the easiest dumping hay rakes made; all the driver is required to do is to press a small foot lever which causes the dump rod to drop the dogs into the ratchet and the forward movement of the wheels dumps the hay; the wheels themselves doing all the work. The return of the teeth to the ground is prompt, easy and without jar. Can also be used as a hand dump rake. Will rake heavy or tangled grass, alfalfa or clover and does good work in corn stalks. Made in two sizes, 8-foot with 20 teeth and 10-foot with 25 teeth; have strong iron pipe combination pole and thills so that either one or two horses may be used. Price includes iron singletree. Shipped from factory in Central Wisconsin.

KENWOOD IDEAL HAY TEDDERS.

$28.25

Guaranteed to do as good work as any tedder you can buy at any price. Contains superior features not found in any other. Frame construction is exceptionally strong and rigid. A weak point with nearly all others. The center chain drive applies power from both wheels at once. Forks are tempered spring steel and protected from breakage by a long, strong coiled spring. No two forks strike the hay at the same time. Has relief springs, under front of frame. Forks can be adjusted in height while in motion, and you can back the machine without running the forks. Has levers for raising and lowering the frame and for throwing the machine in and out of gear. Main frame reacts when forks strike the ground or hard substance, thus preventing breakage. Combined pole and shafts so one or two horses can be used. Shipped from factory in Eastern Minnesota.

No. 32F1210 6-Fork Hay Tedder. Wt., 590 lbs. Price.....

No. 32F1211 8-Fork Hay Tedder. Wt., 600 lbs. Price.....

KENWOOD IMPROVED HAY LOADER.

$44.80

The Most Successful Loader on the Market.

$19.95 FOR COMPLETE 100-FT. OUTFIT Peerless Automatic Carriers FOR LITTER, MANURE AND FEED

Install a Peerless Carrier in your barn and save time, hard work and money. It will quickly pay for itself. With it you can easily keep your barn and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns for reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for the crops. Can also be used for carrying feed from silo.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class carriers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be classed with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order a Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, most convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, return it at our expense and we will return your money together with the freight charges you paid.

Description: The manure box or bucket is 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy 18-gauge galvanized sheet steel forms the bottom and sides. Each end is made of two 1-inch hardwood boards cross nailed to prevent warping, and making an absolutely watertight box. The sides are protected by a strip of 1-inch angle steel. The bail is made of heavy 2-inch channel steel. Sheave wheels are iron, 7-inch diameter, have roller bearings, and are mounted on malleable swivel reversible brackets and will take short curves and run in either direction. Each wheel has a spring track guard which makes it impossible for it to jump the track, and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the trip on the track where you want the load dumped, give the loaded car a shove and its weight carries it out ...e trip dumps at the desired point and the car automatically returns to the barn. The track is No. 0000 polished steel rod, ... diameter.

...rriers Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very pow... heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

...price is for a complete 100-feet straightaway rod track outfit consisting of one plain carrier complete, one trip, 100 feet of ... with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. If the automatic lift carrier is wanted, order outfit No. 32F1276. Price, $29.45. If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember, when comparing prices that our $21.95 price includes end loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

Send for our special Litter Carrier Circular which shows our complete line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough plan of your barn, with measurements showing location of stalls and ...re you want tracks to run and we will send our special ...made price on a complete outfit to suit.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32F1281, and two No. 32F1283 for each line of track aside from the main track and one No. 32F1285 and one No. 32F1286 for each corner carrier will turn. If your barn is ...ng, we recommend that you order at least one spring track suspender. This prevents sagging and relieves strain on the tension ...s directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.

ACME ONE-HORSE SWEEP POWER.

$14.25

This is one of the best and most desirable one-horse powers made. Master wheel has teeth on the under side and is guided and held in mesh by brackets and rollers. Just the thing for well drilling, small feed cutters, corn shellers and other light work. Tumbling rod is 10 feet long, squared for 1-inch coupling and makes nine revolutions to one round of the horse. Furnished with lead pole, sweep, hitch and two couplings. Shipped from factory near Chicago.

No. 32F1300 One-Horse Power. Wt., 360 lbs. Price.....$14.25

ACME SWEEP HORSE POWERS.

$22.65 AND UP

The best sweep horse power made. Material, workmanship and finish are first class. You cannot buy a better made or more perfect working power at any price. They have both high and low speed and are adapted for all classes of work. Frames are heavy and strong, made of first quality timber rigidly bolted and braced. Shafts are heavy steel with babbitted boxes. High speed shafts extend from each side of the power, one running with and the other against the horses. The low speed shaft is at one end of the power. Illustration shows a 4-horse power. The 2-horse power is lighter and differs slightly in design. The 6-horse power is much the same as the 4-horse power except that it has four sweeps and no lead poles. Powers are furnished complete with sweeps, two tumbling rods (about 22 feet), one ratchet and two safety couplings, rod block, platform and a coiled spring draft hitch for each sweep. Two-horse powers have two sweeps and two lead poles. Tumbling rod is squared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. Four-horse powers have two sweeps and two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes ten and one-half revolutions to one round of the horses. Tumbling rod is squared for 1⅛-inch couplings. Six-horse powers have four sweeps but no lead poles and speed and square of tumbling rod is the same as the 4-horse power. Eight-horse powers have four sweeps, no lead poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and one-half revolutions to one round of the horses. Shafts squared for 1⅛-inch couplings. Order a horse power jack, listed on this page, when you wish to transmit power by belt. Shipped from factory in Southeastern Minnesota.

$37.95

Open. Closed.

Ratproof, rainproof, rustproof, fireproof and thieffproof. Steel grain tanks or granaries are coming more into general use every day. They cost little more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our granaries are made of No. 20-gauge heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has a 14-inch manhole with cover which can be locked. These granaries may be used in the field or in barns and are easily taken down and transported from place to place. Shipped in sections. Easily put together with bolts we furnish. As these tanks are made to order it sometimes requires from five to ten days to fill orders. Send us your order early enough to allow ample time to make the tank. Shipped from factory in Western Iowa.

ADJUSTABLE SWINGING CATTLE STANCHIONS.

The only truly adjustable stanchion ever produced. Easily and quickly adjusted to set the hardwood upright bars either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The large illustration shows two stanchions set in the stable framework. One shows closed and locked. When in this position it turns or swings freely on its pivots, allows the animal to take easy and natural positions whether standing or lying down, and is securely locked so that the animal cannot open it. When open it is held squarely so that the animal cannot turn it and has no trouble putting its head into the stanchion. The small illustration shows how the stanchion is adjustable to different widths. Stanchions are 4½ feet high. Top and bottom are made of steel and malleable iron, and the pivots are malleable. Sold only in lots of ½ dozen or more. Shipped from factory in Southeastern Wisconsin.

No. 32F2200 Cattle Stanchion. Wt., each, 16 lbs.

Price, per one-half dozen.....$5.85

PORTABLE CORN CRIBS.

$3.86

Made by machinery of the most improved type, and greater uniformity in construction and spacing prevails than in any cribs of other make. Made of heavy hardwood fence lath, 4 feet long, securely woven together with six pairs of No. 12 galvanized wires, leaving slats about 1¾ inches apart. Each crib consists of two sections, one to set on top of the other, making crib 8 feet high. Capacity is figured at 2 cubic feet to the bushel. Weights vary according to kinds of wood used. There are 74 lineal feet of cribbing in the 400-bushel crib, 88 feet in the 600-bushel crib, 108 feet in the 900-bushel crib, 124 feet in the 1,200-bushel crib, and 138 feet in the 1,500-bushel crib. Shipped from factory in Northern Illinois.

KENWOOD ONE-HOLE CORN SHELLERS.

$4.89 Without Table or Fan

Buy this sheller and you will experience the satisfaction of owning the best one-hole corn sheller in the world. It will shell rapidly and clean. So strongly made that it will give you years of splendid service. We could offer you other types of one-hole shellers at lower prices, but we do not believe them to be good value when compared with this machine at the low price we are able to name on it. It is poor economy for the sake of a few cents difference in price to purchase a low grade sheller, because such machines cannot produce a satisfactory quality or quantity of work and usually they fall to pieces after one season's use. Our machines have heavy hardwood frame, securely bolted together. **We guarantee them to be equal in every way to the highest priced one-hole sheller you can buy.** Capacity is from 10 to 15 bushels of shelled corn per hour. Illustration shows sheller with feed table and fan attached, but they are furnished either without table or fan or with table only. Shipped from factory in Southeastern Wisconsin.

No. 32F1400 One-Hole Sheller, without table or fan. Wt., 130 lbs. Price..$4.89
No. 32F1401 One-Hole Sheller, with table only. Wt., 137 lbs. Price.....$5.05

For Small Hand Corn Shellers see page 1063.

FULTON TWO-HOLE CORN SHELLER.

$15.75 WITHOUT ELEVATOR

The highest grade two-hole table feed corn sheller made. Especially adapted to be run by power and suitable for use on the farm or in grain elevators or custom mills. This sheller is made extra strong, of the very best of materials, put together in a thoroughly workmanlike manner and handsomely finished. It has steel shafts, hardwood frame, extra heavy gears and other cast parts, adjustable rag irons and springs, an excellent blast fan and a perfect wire cob rake and separator. It has a capacity of 350 to 450 bushels per day, is easy to operate, delivers the corn in a clean, marketable condition. Should be speeded at about 350 revolutions per minute. Furnished with driving pulley 12 inches in diameter with 3½-inch face, crank, feed table and fan. **Price does not include the sacking elevator nor tumbling rod attachment** shown in the illustration. These or any of the other attachments listed with our self feed sheller, No. 32F1420, can be ordered for and used with this sheller. Shipped from factory in Central Ohio.

No. 32F1415 Fulton Two-Hole Corn Sheller. Wt., 290 lbs. Price.....$15.75

IMPROVED No. 5 ACME HAND FEED CUTTER.

$6.79

Possesses superior features not found in other cutters of this kind. Does as good work as larger machines. Much better made and more handsomely finished than other machines of this size. Frame is heavy hardwood. Tool steel cutting knife is 11¼ inches long and by simple adjustment will cut from ¼-inch to 1½-inch lengths. Makes a downward shearing cut against a hardened cutting edge and three cuts to one turn of the crank. Upper roll is fluted, lower roll is smooth. Capacity, from 150 to 200 pounds of dry fodder and from 300 to 400 pounds of green fodder per hour. Counterbalanced shaft and extra heavy fly wheel make this a very easy running machine. Shipped from factory in Central Ohio.

No. 32F1505 No. 5 Acme Feed Cutter. Wt., 165 lbs. Price.....$6.79

KENWOOD TWO-HOLE CORN SHELLER.

Price Reduced to $11.38

Exceedingly well made and handsomely finished. A splendid machine of good capacity. Adapted for general farm, warehouse or custom mill use. The balance wheel is large and heavy. The feed spout is directly over the shelling wheels and the rag irons and springs which control them are adjustable, so that any size of field corn can be shelled. The cob rake separates the shelled corn from the cob, delivers the cobs at a distance from the foot of the sheller and allows the sheller to be run at a good speed and with good capacity without throwing corn out with the cobs. Furnished with fan, feed table, crank and an 8-inch diameter by 4-inch face pulley. When run by power, the pulley should make from 300 to 400 revolutions per minute. Capacity is from 25 to 35 bushels of shelled corn per hour. Shipped from factory in Southeastern Wisconsin or Central Ohio.

No. 32F1412 Two-Hole Corn Sheller. Weight, 250 lbs. Price.....$11.38

CYCLONE CYLINDER CORN SHELLER.

$21.35

A simple and efficient sheller of large capacity. Especially adapted for the purposes of large feeders. No complicated cogs, springs, etc., to get out of order. Many of these machines have been in use **for twelve years without repairs of any kind.** Shelling parts consist of a heavy cast iron cylinder with lugs, mounted on a heavy steel shaft running in **babbitted bearings,** enclosed in a steel jacket with perforated bottom which allows the shelled corn to pass through and come out of a spout at the bottom of the machine. Cobs are automatically thrown out on an oscillating screen shaker at one end of the cylinder. To be run by a 3-horse power engine or larger power; can also be used with power windmills and sweep horse powers. Should be speeded from 800 to 1,000 revolutions per minute. Cylinder is 29 inches long and 6 inches in diameter; machine is 39 inches high over all. Hopper holds about 1 bushel. When run at proper speed machine will shell 120 bushels of dry ear corn per hour. Ear corn can be shoveled or spouted into the hopper and **machine will shell as fast as you can feed it. When ordering tell us the horse power of your engine, number of revolutions per minute and size of face and diameter of your driving pulley.** We will then fit the sheller with the proper size of pulley to give the required speed. This is important, as the success of this sheller depends upon its being operated at proper speed. **Will shell either dry or soft corn.** If shelled for market, corn must be cleaned by screening. Shipped from factory near Chicago.

No. 32F1413 Cylinder Corn Sheller. Weight, 185 pounds. Price.....$21.35

$29.95 KENWOOD SELF FEED TWO-HOLE CORN SHELLER.

A high grade, well made and durable self feed two-hole corn sheller for farm and custom mill use. Guaranteed to give perfect satisfaction. Has extra heavy hardwood frame, heavy fly wheel and wire cob rake which separates the corn from the cobs perfectly. The corn is shoveled into the hopper, and link chain carrier conducts it to the shelling wheels without further attention from the operator. Sheller should be speeded at about 430 revolutions per minute, and will shell 450 to 500 bushels of corn per day with corn in fair shelling condition. **Price is for the sheller only, as shown in the large illustration.** We can furnish at prices shown below, 6-foot cob stacker, a 5-foot sacking elevator, an 8-foot wagon elevator, or a tumbling rod attachment which can be driven from either side and which is squared for 1-inch coupling. Driving pulley is 12 inches in diameter with 3½-inch face. Shipped from factory in Central Ohio.

KENWOOD ENSILAGE CUTTERS.

$27.65 WITHOUT CARRIER

The easiest and safest to operate.

Made for us by one of the best known and most successful manufacturers of ensilage cutters in the world. They are machines of large capacity, strongly built, in every way capable of doing first class and satisfactory work and are suitable for small and medium size silos. Furnished either with regular drop leaf feed table or with traveling force feed table at the prices shown below. Have four tempered tool steel knives set spirally to make a downward shearing cut against a steel cutting bar. **Cut is clean and perfect** across the entire width. No. 13 knives are 13 inches long. No. 16 knives are 16 inches long. Cut is adjustable to ¼ inch, ½ inch or ¾ inch long and if you remove two opposite knives cuts will be ½ inch, 1 inch or 1½ inches long. Main shaft is 1½-inch cold rolled steel and runs in boxes adjustable in relation to the cutting bar. Shaft is extended on both sides of the machine so that the pulley or the fly wheel can be placed on either side. **Safety fly wheel** is large and heavy and secured to the shaft by a friction block. The tool steel cutting bar is reversible with four edges; each edge may be used before grinding is necessary. Unless very dull, knives can be ground without removing from the cutting head. The cone feed gearing does away with the necessity of exchanging gears when different lengths of cut are desired. It is controlled by a safety stop lever, by which all running parts, excepting the cutting cylinder, can be instantly stopped or started. The lower feed roll is smooth; the upper roll is spiked. The upper roll is driven by expansion gearing and pressure controlled by an equalizer lever, subjected to an even tension spring pressure on machines with drop leaf feed table or to a lever with weight pressure on machines with traveling feed table. Both ends of the roll raise uniformly. **Capacity of No. 13** machine is from 1½ to 2½ tons of dry fodder or 3 to 5 tons of green fodder per hour, sufficient feed for from forty to fifty head of stock. **Capacity of the No. 16** machine is from 3 to 4 tons of dry fodder or 6 to 8 tons of green fodder per hour or sufficient for from sixty to 100 head of stock. No. 13 machine requires from three to four-horse power; No. 16, from four to six-horse power. **When ordering be sure to tell us the size, speed and kind of power with which you intend to operate the machine, and also the size of, diameter and face of your driving pulley.** We will then furnish the machine with a pulley of suitable size. Our swivel carrier will deliver at any point within a half circle and can be raised or lowered as desired. Carrier extensions may be ordered in 4-foot, 8-foot or 12-foot lengths. **Illustration shows machine with drop leaf feed table** and with swivel carrier attached. The traveling force feed table is about 8 feet long. The force feed consists of a traveling apron of hardwood slats, attached to a special chain belting. This apron is controlled by the same lever which controls the feed rolls, so that one movement of the lever stops or starts both rolls and the feed table. Shipped from factory near Chicago.

L-ALL CORN AND COB CRUSHER AND FEED GRINDER

THE STRONGEST, SIMPLEST AND BEST FEED MILL MADE FOR GENERAL FARM WORK.

Improved 1911 Model.

STEEL HOPPER.

THREE SETS OF BURRS WITH EVERY MILL.

The X-L-ALL Grinder contains more desirable features than any other feed grinder of its type. Its superiority over all the higher priced mills of this class has been proven in actual tests, and we claim for the X-L-ALL mill a more uniform product and a larger capacity with the same power than can be obtained from any other steel burr mill designed for the same range of work and power.

The cob crushers, running burr, pulley and fly wheel are mounted on a heavy high carbon steel shaft which runs in anti-friction bearings fitted with closed oil cups. Shaft has a genuine automobile pattern ball bearing end thrust. Cob crushers are made in sections so that in case of breakage only a small section need be replaced. The heavy main frame is cast in one piece, insuring rigidity and strength. The bottom is concaved with sharp ribs against which the cobs are crushed, and it is hinged on one side and held by wooden break pins on the other, so that in case a bolt or other hard substance gets into grinder the pins break and the bottom drops down, thus preventing further damage. Hopper is heavy sheet steel securely fastened by clamps and can be easily taken off to get at inside of mill.

A strong point in the X-L-ALL Grinder is that all working parts are easy to get at. Take out two bolts and the entire front of the mill can be pulled off, exposing the burrs, when they can be quickly changed or any adjustment easily made. The fineness of grinding is regulated by a hand wheel which operates against a lever; one end of this lever is carried on an adjusting bolt, and the other end is attached to main frame by a wood break pin. In case an obstruction should get into burrs this pin will break, thus allowing the burrs to spread apart and preventing damage. Burrs cannot run together when empty. Two cut-off feed regulators are provided, one at side of hopper over the burrs, the other under hopper back of spout. Spout discharges the ground feed straight down from burrs, thus relieving the burrs and preventing clogging. Top of burr case lifts off and burrs can be examined at any time. Legs are heavy unbreakable angle steel, strongly braced and arranged to fasten mill to floor.

The X-L-ALL Grinder will crush and grind corn on the cob or cob alone, also shelled corn, wheat, oats, rye, barley or any kind of small grain, either separately or mixed. It will grind kaffir corn heads if the stalk is cut off close to heads. The three sets of burrs we furnish with every mill provide for a variety of products, ranging from the rough feed with the coarse burrs to as good a quality of table meal with the fine burrs as can be produced on any steel burr mill.

These mills are made in two sizes and three styles. The No. 0 and No. 1 mills have 8-inch burrs, and have a capacity of 8 to 15 bushels of ear corn or 15 to 35 bushels of shelled corn per hour, and require 2 to 6-horse power. Pulley is 10x5 inches and should run from 200 to 600 revolutions per minute, according to power. The No. 0 mill is furnished without fly wheel, the No. 1 with fly wheel. We recommend the purchase of mill with fly wheel. The No. 2 mill has 10-inch burrs and has a capacity of 12 to 25 bushels of ear corn or 20 to 60 bushels of shelled corn or small grain per hour, and requires 6 to 12-horse power. Pulley is 12x6 inches and should run 200 to 600 revolutions per minute, according to power. A forged steel wrench fitting every nut and three sets of burrs are furnished with every mill; one set of coarse, one set of medium and one set of fine burrs.

Prices on the feed grinders do not include the sacking elevator, shown in small illustration. This is furnished only when ordered at the extra price shown below and is for use with either size mill. Shipped from factory in Southwestern Ohio.

GENUINE FRENCH BUHR MILLS.

STONES ARE PERFECTLY DRESSED GENUINE IMPORTED FRENCH BUHR STOCK.

$64.50

The leading French Buhr mills of America. They sell under the manufacturer's name for double our prices. Designed for custom mill use where quantity as well as quality of grinding is desired. Grind cool, rapidly and evenly. Spindles are extra heavy steel, accurately fitted to the runner stones and run in long anti-friction metal bearings. Housings are lathe turned and fit perfectly tight. Stones are accurately fitted and trammed and runner stone is balanced on the spindles. These mills can be run by any kind of belt power, can be belted from any direction, will not choke and can be run empty without injury. The 12-inch and 16-inch mills should be run about 1,100 revolutions, the 18-inch and 20-inch mills should be run about 1,000 revolutions per minute. Shipped from factory in Southwestern Ohio.

IMPROVED BIG GIANT FEED GRINDERS.

$16.85

Our very latest models of one of the best known and most popular grinders on the market. We have sold this type of grinder for years, and every machine has given the best of satisfaction. **The improved burrs are adjustable and flexible. You cannot injure them by running when empty.** The new style sheet steel hopper is round, of better shape and less liable to damage than the old style wooden hopper. Each mill is furnished with one set of coarse, one set of medium and one set of fine burrs. No. 6 has 6-inch right hand burrs, and is fitted with 6½x6-inch pulley. No. 8 has 8-inch right hand burrs, and is fitted with 9x6-inch pulley. No. 6 should be run from 400 to 1,000 revolutions per minute, requires from 2 to 8-horse power and will grind from 8 to 30 bushels per hour. No. 8 should be run from 600 to 1,000 revolutions per minute and requires 4 to 12-horse power and will grind from 12 to 40 bushels per hour. Capacity depends upon speed, horse power and fineness of grinding. **When ordering extra burrs state whether you want coarse, medium or fine burrs.** This mill is for grinding small grains and shelled corn only. Fine burrs will grind fine enough for table meal. Shipped from factory in Southeastern Wisconsin.

Big Wonder Grinding Mill.

$15.45

This mill is constructed on the same principles as our Little Wonder Grinding Mill, but is of greater capacity. It is of few parts, easy of adjustment and designed to eliminate breakage. Intended for use with from 3 to 6-horse power gasoline engine or other form of power. Will grind mixed feed, shelled corn or small grain in quantities from 15 to 35 bushels per hour, according to speed and fineness of grinding. Burrs are 7 inches in diameter, flexible and self aligning. Hopper is cast iron, 15x15 inches square. Mill has cut-off feed regulating device, enabling the operator to feed to the burrs any quantities desired. Pulley is 7½x5 inches and should run from 700 to 1,000 revolutions per minute. Mill is mounted on iron legs and top of hopper is 38 inches from floor. Furnished with one set of coarse and one set of fine burrs. Fine burrs grind table meal. **When ordering extra burrs state whether coarse or fine burrs are wanted.** Shipped from factory in Southeastern Wisconsin.

...OVED FULTON TRIPLE GEARED BALL BEARING SWEEP FEED MILLS.

...DOUBLE THE CAPACITY OF ORDINARY GEARED MILLS AND FROM ONE-FOURTH ...ONE-HALF GREATER CAPACITY THAN ANY OTHER SWEEP FEED MILL MADE.

No other sweep feed mill possesses so many improved features, is so simple to operate, so easy running or capable of as great capacity. Ball bearings support the internal revolving mechanism, do away with all friction, and make the Fulton the easiest running sweep feed mill on the market. **The mill is so light of draft that it usually requires but one horse for average work and two horses can handle it with ease under almost any condition.** The gearing is enclosed and protected from dirt and dust and is self oiling. The cob breaker breaks the ear corn and forces it into the grinding rings. **Guaranteed not to choke on old or new corn, either damp or dry,** but will not grind corn with the husks on. Grinding rings make three revolutions to one round of the horses and are made of a special high quality mixture of iron and steel and will require replacing. They can be with proper use will grind from 6,000 to 8,000 bushels before they will require replacing. They can be gauged to grind crushed corn and cobs to any desired fineness, suitable for ordinary feeding purposes. Average capacity based on coarse grinding of dry corn and cobs or shelled corn for feed is from 15 to 25 bushels per hour when two horses are used. Grinding rings regularly furnished with the mill are for coarse grinding of corn and cobs or shelled corn for feeding purposes. For finer grinding of shelled corn or for grinding kaffir corn, wheat, oats, rye or other small grain, fine grinding rings are required. Grinding medium or fine with fine rings reduces the capacity from one-third to one-half. The No. 1 mill is mounted on a feed box of good heavy lumber. The No. 2 mill is mounted on iron legs and is furnished with a platform. Price is for the mill complete with one pair of grinding rings only, sweep and hitch hook. **When ordering mill or extra rings, state whether you want coarse or fine grinding rings. Coarse rings will be shipped unless otherwise specified.** Shipped from factory in Southwestern Ohio.

ACME SWEEP FEED MILLS.

$14.30

This is the best single geared sweep feed mill you can buy. It does first class work and we recommend it to those who do not require a mill of as great capacity as our triple geared mills. It has cob breakers to break the ear corn and force it into the grinding rings. Warranted not to choke on new or old corn, either damp or dry, but will not grind corn with the husks on. The grinding rings are made of our standard mixture of hard iron and steel, and with proper use they will last twice as long as other makes. They can be gauged to grind crushed cobs and corn to any fineness suitable for ordinary feeding purposes. Average capacity based on coarse grinding of dry corn and cobs or shelled corn for feeding purposes is from 8 to 12 bushels per hour. The regular grinding rings furnished with these mills are coarse and are intended for coarse grinding of corn and cobs or shelled corn for feeding purposes. For finer grinding of shelled corn or for grinding kaffir corn, wheat, oats and other small grains, fine grinding rings are required. Grinding medium or fine reduces the capacity from one-third to one-half. Illustration shows a No. 10B mill. No. 10L mill has iron legs and platform instead of wood feed box. Price is for the mill complete with one pair of grinding rings only, sweep and hitch hook. When ordering mills or extra rings, always state whether you want coarse or fine rings. **Coarse rings shipped unless otherwise specified.** Shipped from factory in Southwestern Ohio.

KENWOOD TRIPLE GEARED BALL BEARING SWEEP FEED MILLS.

$21.75

This mill is excelled only by our Improved Triple Geared Mill. It is the best exposed gear mill on the market and we recommend it to those who do not require the great capacity and convenient features offered by the Fulton. No. 1 mill is mounted on a wood box. No. 2 mill is mounted on iron legs and a platform like illustration. Grinding rings make three times as many revolutions to one round of the horses and have nearly the capacity of ordinary single geared mills. Cob breaker breaks ear corn and forces it into the grinding rings. Will not choke on new or old corn, damp or dry, but will grind corn with husks on. Grinding rings are made of hard iron and steel and will outlast any rings of other makes. Gears are exposed and can be readily oiled. Grinding rings can be gauged to grind crushed corn and cobs to any desired fineness suitable for feeding purposes. The regular grinding rings furnished are coarse and are intended for coarse grinding of corn and cobs and shelled corn for feeding purposes. For finer grinding of shelled corn or for grinding kaffir corn, wheat, oats and other small grains, fine rings are required. Grinding capacity based on grinding of dry ear corn, is from 12 to 18 bushels per hour. Medium or fine grinding reduces capacity from one-third to one-half. Price is for mill complete with one pair of grinding rings only, sweep and hitch hook. **When ordering mill or extra rings state whether you want coarse or fine rings. Coarse rings shipped unless otherwise specified.** Shipped from factory in Southwestern Ohio.

Kenwood Steel Frame Barrel Cart.

$2.98

Will outlast several wood frame carts. Made entirely of steel and iron. The steel wheels are 36 inches high, with 1¼x¼-inch tires. The frame is bolted solidly to the axle castings, and these castings are made to fit the side of a barrel to which they are to be bolted. A kerosene, molasses or vinegar barrel can be used. Price includes bolts to attach to barrel and one iron bracket or rest for bottom of barrel. Shipped from Chicago.

No. 32F2225 Barrel Cart. Wt., 60 lbs. Price.....$2.98

$4.57 Bradley Hand Cart.

A strongly constructed and high grade hand cart, without springs. It is especially adapted to farm work and other rough usage, and has an extra large and deep hardwood box, a heavy axle and very strong wheels. The box is 36 inches long, 21 inches wide and 9½ inches deep inside. The axle is 1-inch round steel. The steel wheels are 36 inches high with 1¼x¼-inch tires. End boards are held in place by steel rods. Both ends and sides can be removed, leaving bottom flat. Shipped from the Bradley factory at Bradley, Ill.

No. 32F2227 Bradley Hand Cart. Wt., 100 lbs. Price.....$4.57

Perfection Three-Wheel Delivery Carts.

$5.98

The strongest, lightest and most durable delivery cart on the market; suitable for commercial as well as farm purposes. Wheels have heavy steel rod spokes, firmly riveted into broad half oval steel tires and set tangent in double flanged hubs, on the order of a bicycle wheel. Boxes are made of the first quality lumber, handsomely painted, striped and varnished, and the top edges are iron bound. Ends and sides can be removed, leaving bottom flat. Boxes are supported by strong steel leaf springs. **No. 2 cart** has two 28-inch wheels with 1-inch tires and a 14-inch third wheel. Box is 34 inches long, 18¾ inches wide and 7 inches deep inside. Will carry from 200 to 500 pounds. **No. 4 cart** has two 36-inch wheels with 1½-inch tires and a 14-inch third wheel. Box is 37 inches long, 22½ inches wide and 9 inches deep inside. Will carry from 500 to 1,000 pounds. Shipped crated from factory in Northern Ohio.

No. 32F2374 No. 2 Fruit Drier. Wt., 65 lbs. Price.....$6.00

$9.95 IMPROVED No. 2 STERLING GRAIN CLEANER AND SEPARATOR

Price Does Not Include Sacking Elevator.

Do not confuse the Sterling with ordinary fanning mills. It is a high class and superior machine of large capacity which does as good work as any $25.00 fanning mill on the market. Shoes are operated by shaker arms, giving a straight forward and backward reciprocating motion. Hopper is large, holds one bushel. The grain flows evenly on the sieves and will not crawl up to one side. Has a feed gate lever to cut off the feed instantly or open to feed as much to the sieves as desired. The grain is fed evenly over entire width of sieves. This is necessary for perfect work. Sieves are 23½ inches wide and are kept clean automatically by means of a scrubbing board or cleaner rack. Fan is in a sheet steel drum and driven by a sprocket and chain. Price is for the machine without sacking elevator shown in illustration, but includes the following outfit of sieves and screens: **One zinc wheat hurdle,** for cleaning winter wheat, spring wheat, durum wheat, rye, kaffir corn, large millet, sugar cane, sorghum, buckwheat, hemp, and other seeds of similar size. Also separates oats from barley. **One barley gang,** which can also be used for seed oats, peas and spelts. **One wire oats sieve** for throwing broken weeds, stalks, and other coarse refuse from oats. **One No. 10 fine screen** for taking out small cockle, mustard, other fine seeds, and foul stuff from wheat, rye, barley, oats, etc. **One No. 8 screen** for cleaning grain for seed, taking out small grain, cockle, and all foul stuff. Aside from the regular outfit, we can furnish extra attachments at prices shown below, adapting the machine for almost every class of work. **We ship the Sterling set up and ready to run.** Anyone who has ever set up an ordinary fanning mill will appreciate this advantage, which insures the machine being put together properly and saves the user considerable work and annoyance. Do not overlook this great advantage. The Sterling is made of high grade material throughout and handsomely finished. Posts are hardwood and securely braced. The machine is smooth and easy running, can be operated with almost no effort and is guaranteed to give perfect satisfaction. Shipped set up, ready to run, from factory in Southern Minnesota.

$8.75 STANDARD CIDER MILLS.

Junior and Medium Mill

This is positively the best line of hand cider mills on the market. Strictly high grade in every particular and guaranteed to give perfect satisfaction. The frames are heavy hardwood, strongly bolted together. The mill parts are cast iron and steel. Cross heads for press screws are extra heavy cast iron. Press screws are steel, accurately threaded and fitted. These mills will grind large as well as small apples. **The Junior mill** has a capacity of two to four barrels of cider per day. Tubs are 10 inches high by 12 inches outside diameter. **The Medium mill** has a capacity of three to six barrels of cider per day. Tubs are 12 inches high and 13½ inches outside diameter. **The Senior mill** has a capacity of six to twelve barrels of cider per day and tubs are 14 inches high by 17 inches outside diameter. Each size is back geared and has a heavy balance wheel. Hoppers are large and have force feed. The Junior and Medium mills are of the same general construction, differing only in size, and are operated by a single crank. The Senior mill is much larger, is double back geared and fitted with two cranks. Tubs are strongly made of smooth selected hardwood with heavy wrought iron hoops. You cannot buy an easier running, better finished, or stronger made hand cider mill at any price. Shipped from factory in Central Ohio.

KENWOOD CANE MILLS.

FOR SORGHUM OR SUGAR CANE.

$16.45

These are extra heavy vertical three-roll mills, possessing all the good qualities of the original Great Western pattern and all the strength of the solid gear models, but without the defects of either. They are strictly up to date cane mills of the highest quality, containing all late improvements and suitable for the heaviest work. They have a bolt at each corner of the frame and are made rigid by a panel at the end. The gears are very heavy and are separate from the rolls and connected by two clutches on each gear. Top and bottom journals run in brass boxes, are oiled from the top and constructed so that oil cannot get into juice. Shafts are steel with turned bearings. Rollers are turned with serrated surfaces. Main rollers are flanged at top and bottom which prevents the cane from passing either up or down, and the feed guide is made so that the full length of the roll can be used. The gearing is encased. **Capacity of these mills is greater than others of corresponding size, because our mills are heavier and much stronger and they press the cane dry.** It is impossible to state the exact number of gallons of juice any cane mill will make. This depends upon the richness of the cane, therefore we state capacities in tons of cane per twelve hours. **The regular sweep cap is single pitch,** as shown in the illustration, but we can furnish double pitch cap, or level top cap if so ordered. Price includes sweep cap, bolts, oil can and wrench. Shipped from factory in Southwestern Ohio.

If you want a cane mill for engine power write for prices; we can save you money.

COOK'S EVAPORATOR PANS.

FOR SORGHUM AND SUGAR CANE.

$4.29

These pans are for evaporating sorghum, sugar cane and other thick juices. They are not suitable for maple sap or thin juices of any kind. They are strongly made with wood sides, heavily bound, riveted and soldered, with no seams exposed to the fire. Pans are 3 inches deep with division bars 6 inches apart. Galvanized pans are made of No. 24-gauge sheet steel. Copper pans are made of 16-ounce cold rolled copper. Syrup is drawn off through small spout in corner of pan. Price includes two skimmers. Pans can be set on brick arch or mounted on rocker furnace. All pans are 44 inches wide. Capacity for twelve hours is about as follows: 66-inch pan, 20 to 30 gallons; 72-inch pan, 30 to 40 gallons; 90-inch pan, 40 to 50 gallons; 108-inch pan, 50 to 80 gallons; 126-inch pan, 75 to 120 gallons of syrup, depending upon richness of juice. Shipped from factory in Southwestern Ohio.

CAST IRON FURNACE FRONTS.

Consist of door, frame, anchor rods and grate complete. The No. 1 is suitable for use with 63 to 96-inch pans, has 12x12-inch door and 18x36-inch grate. The No. 2 is suitable for use with 90 to 128-inch pans, has 13x16-inch door and 20x42-inch grate. Shipped from factory in Southwestern Ohio.

No. 32F2351	No. 1 Furnace Front.	Wt., 85 lbs.	Price $3.39
No. 32F2353	No. 2 Furnace Front.	Wt., 140 lbs.	Price 6.65

Economy Boilers and Steam Food Cookers.

$22.60

The ideal boiler for the farmer, dairyman and stockman. Burns cobs, wood or coal. Generates steam in half the time and with about half the fuel required by other boilers of this type. Used for cooking food, scalding hogs, scalding milk cans, thawing out water tanks, and for all steam cooking, washing and renovating purposes. Used indoors or out of doors. Requires no experience. No flues to clog or burn out. No danger from quick firing. Made of heavy boiler plate steel with cast head, strongly riveted and joints tightly packed. Has cast iron base and dump grate. Has a cone shaped fire box extending full height of boiler inside. This fire box is surrounded entirely by water and cannot burn out. The water surface is least where the heating surface is greatest, making the boiler a quick steamer. Steam arises to the top and escapes through the steam pipes, both of which can be used at the same time. Tested to stand six times their required strength and automatic safety valve insures perfect safety. Holds 25 gallons of water, sufficient to cook from one to three barrels of food. No pump to cause trouble and expense for repairs. Fill the supply tank and the steam forces the water down into the boiler. The No. 3 boiler will run a 2 or 3-horse power engine. Complete instructions accompany each boiler. Shipped from factory in Central Iowa.

No. 32F1995 No. 2 Boiler. Height, 56 inches; diameter, 16 inches. Complete with shut off valves, safety valve, try cocks and steam pipes. Wt., 225 lbs. Price $22.60

No. 32F1996 No. 3 Boiler. Height, 60 inches; diameter, 20 inches. Complete with shut off valve, lever safety valve, steam gauge, water glass, one try cock and steam pipes. Wt., 350 lbs. Price $43.75

Caldron Kettles.

$1.93

Full Capacity.

The same kettles as are used in our Farmers' Friend Food Cookers. Made of fine grain smooth iron and can be used for cooking food, rendering lard, boiling syrup, etc. Shipped from factory in Central Ohio.

No. 32F1950	15-Gallon Kettle.	Wt., 53 lbs.	Price $1.93
No. 32F1951	22-Gallon Kettle.	Wt., 70 lbs.	Price $2.38
No. 32F1952	30-Gallon Kettle.	Wt., 90 lbs.	Price $3.27
No. 32F1953	45-Gallon Kettle.	Wt., 120 lbs.	Price $4.30
No. 32F1954	60-Gallon Kettle.	Wt., 175 lbs.	Price $5.87
No. 32F1955	75-Gallon Kettle.	Wt., 228 lbs.	Price $6.85

For Copper Kettles and Other Size Iron Kettles see Page 1050.

Buckeye Evaporator Pans

$5.65

For Maple Syrup, Sorghum or Sugar Cane.

For making maple syrup or evaporating other thin juices, but equally as good for sorghum and sugar cane. Strongly made with wood sides and heavily bound, riveted and soldered, but the sides of the pan are turned up square so that the juice does not touch the wood. Each section is made of a single sheet, without seams, and forms a pan of itself. No seams exposed to the fire. Pans are 4 inches deep with division bars 15½ inches apart. Galvanized pans are made of No. 24-gauge sheet steel. Copper pans are made of 16-ounce cold rolled copper. Syrup is drawn off through small spout in corner of pan. Price includes two skimmers. Pans can be set on brick arch or mounted on rocker furnaces. All pans are 42 inches wide. Capacity per twelve hours based on sorghum or cane is about as follows: 63-inch pan, 30 to 40 gallons; 80-inch pan, 40 to 60 gallons; 96-inch pan, 60 to 80 gallons; 112-inch pan, 80 to 100 gallons; 128-inch pan, 100 to 120 gallons of syrup, depending upon richness of juice. On maple syrup the capacity will be much less, because it takes about 40 gallons of sap to make 1 gallon of syrup, though it evaporates quicker. Shipped from factory in Southwestern Ohio.

DAVID BRADLEY SAW FRAMES.

No manufacturer can possibly produce a better line of wood and pole saw frames than these, and you cannot purchase for any price a more strongly made or better finished saw frame. They are the best made and best finished frames on the market and are worth one-fourth to one-half more than lightly constructed cheaply made saw frames put out by others. Our saw frames are made in the famous David Bradley factory and they bear the David Bradley trade mark, which is a guarantee of supreme high quality. Frames are made of heavy selected hardwood, strongly bolted together, and painted with a bright red oil paint with gloss, not the cheap mineral paint which is generally used by others. Shafts are heavy 1½-inch cold rolled steel and run in ample babbitted bearings which are connected by a heavy iron frame, insuring perfect and permanent alignment. Steel and iron parts are heavy, well finished and well painted. Frames are shipped crated, as shown in the illustration to the left, thus securing a much lower freight rate than by ordinary methods of shipping. Directions for setting up accompany each frame. **Our cut-off saw blades are especially made for use on these saw frames. They are filed and set, ready for use, and are fully guaranteed to give perfect satisfaction.** 20 or 22-inch saws should be run from 900 to 1,400 revolutions per minute and require 2 to 3-horse power; 24 or 26-inch saws should be run from 800 to 1,200 revolutions per minute and require 4-horse power; 28 or 30-inch saws should be run from 700 to 1,000 revolutions per minute and require 6-horse power. **Rip saws cannot be used on these frames** and 30-inch is the largest cut-off saw that can be used.

DAVID BRADLEY POLE SAW FRAMES.

$14.76

HEAVY FULL WEIGHT BALANCE WHEELS.

BABBITTED BOXINGS.

SELECTED HARDWOOD FRAMES, STRONGLY MORTISED AND BOLTED.

Right Hand Frame.

The Highest Possible Quality.

The strongest, best constructed and **most popular Saw Frame in the country.** Suitable for sawing cord wood and long poles of every description. The mandrel shaft is 4 feet 1 inch long with 1⅜-inch saw arbor and 5-inch arbor flanges. It has grooves in boxes to prevent end play. The mandrel shaft boxes are connected together with an iron frame which keeps them in perfect alignment. The center tightening pulley is hung on a heavy cast iron bracket with heavy steel shaft, and is so strongly made that it cannot get out of line. All pulleys are 5 inches diameter and 6-inch face. Balance wheel weighs **100 pounds.** The cast iron saw guard is adjustable to fit saws from 20 inches to 30 inches in diameter. Can furnish either right or left hand frame but **we always ship right hand frame** unless left hand frame is ordered. Shipped knocked down from the big David Bradley factory at Bradley, Illinois.

David Bradley Extension Table Wood Saw Frames.

100-Pound Balance Wheel. **$12.33**

Right Hand Frame.

For sawing poles or regular 4-foot cord wood. The table can be set at the side for sawing long poles, as shown in the illustration, or it can be set in front of the saw frame in the usual manner for sawing cord wood. The shaft is 4 feet 5 inches long with 1⅜-inch arbor and 5-inch arbor flanges. It has grooves in the boxes to prevent end play. The boxes are connected together by an iron frame which keeps them in perfect alignment. Driving pulley is 5 inches in diameter, with 6-inch face. Balance wheel weighs **100 pounds.** The cast iron saw guard is adjustable to fit saws from 20 inches to 30 inches in diameter. Can furnish right or left hand frame but **we always ship right hand frame** unless left hand frame is ordered. If machine is wanted without extension parts for table deduct 55 cents. Shipped knocked down from the big David Bradley factory at Bradley, Ill.

GALVANIZED CORRUGATED STEEL CULVERT PIPE.

The most popular form of culvert pipe on the market. Guaranteed to be made of first quality full gauge galvanized sheet steel. Workmanship is first class. Bolt holes accurately punched and every joint guaranteed to fit perfectly. Sheets are formed into a circle and side seams strongly riveted. Each section is 24 inches long. Corrugations terminate a short distance from the ends. One end telescopes into the other and they are then bolted together. Pipe, 24 inches and larger in diameter has heavy angle steel collars around every third section which bolt together, as shown above. 12, 15 and 18-inch sizes do not have these collars. Thirty-inch and smaller pipe is made of 16-gauge steel; larger sizes are 14-gauge steel. Shipped in sections of convenient length, but can be furnished only in multiples of 2 feet. Necessary connecting bolts furnished. Shipped from factory in Eastern Indiana.

HIGH QUALITY ROAD SCRAPER.

$3.69

We guarantee these scrapers to be the best and most substantial scrapers made of highest grade 40 to 45-point carbon low scraper steel. Do not confuse them with low tank steel scrapers offered by others which compete with our low prices. These are made for us by old and reliable manufacturers, acknowledged to be producers of the highest grade road scrapers in the world. You cannot possibly buy better scrapers than these, no matter price you pay. Order and compare our scrapers with any others you can buy, and if not satisfied that our scrapers are equal to, if not better than any others, and the price they are the best value you ever saw, send them back to us and we will gladly refund your money and pay all freight charges. **Bowls are pressed from a single sheet of specially hardened steel plate, making a round cornered and perfectly formed bowl which scours and cleans easily.** The nose is rounded and enters the ground freely. Have heavy swivel hitch and hardwood handles. Smooth bottom scrapers do not have runners on bottom. Double runner scrapers are the favorites and have two steel runners, each 1½ inches wide and ⅜ inch thick. Single runner scrapers have a broad single runner of a single heavy steel plate. No. 3 size holds 3½ cubic feet and weighs 80 pounds. No. 2 holds 5 cubic feet and weighs 90 pounds. No. 1 holds 7 cubic feet and weighs 100 pounds. Shipped from factory in Western Ohio.

		No. 3, Price	No. 2, Price
No. 32F2500	Smooth Bottom Scraper	$3.69	$3.97
No. 32F2503	Double Runner Scraper	3.98	4.23
No. 32F2506	Single Runner Scraper	4.50	4.80

ACME STEEL ROAD SCRAPERS. $3.23.

These scrapers are of the same form and construction as our High Quality Road Scrapers shown above, differing only in the quality and weight of the steel in the scraper bowl. Enter the ground easily and scour nicely and if you do not use a scraper extensively they will probably wear long enough to satisfy you. We guarantee these scrapers to be better than any scrapers you can buy for prices less than we ask for our **High Quality** Road Scrapers. But if you want a scraper for long wear and hard usage, we advise you to buy our **High Quality Scrapers.** No. 4 holds 3½ cubic feet and weighs about 75 pounds. No. 5 holds 5 cubic feet and weighs about 85 pounds. No. 6 holds 7 cubic feet and weighs about 95 pounds. Shipped from factory in Western Ohio.

	No. 4 Price	No. 5 Price	No. 6 Price
No. 32F2510 Smooth Bottom Scraper	$3.23	$3.42	$3.72
No. 32F2513 Double Runner Scraper	3.52	3.68	3.96

KENWOOD WHEEL SCRAPERS.

$27.55

Furnished with Automatic Endgate for $4.75 extra.

Bowls are made from a single sheet of highest grade 45 to 50-point carbon spring scraper steel 3-16 inch thick, and to give the greatest strength and capacity. Cannot sag under the most strain. Hound hooks are stationary, heavy, and carry the bowl high up from ground. Axle is high, made of best square steel. Spindles are turned and finished and protected by close fitting bands. No. 1 has 9 cubic feet capacity, 36-inch wheels, 3x¼-inch tires and 1½-inch axle. No. 2 has 13 cubic feet capacity, 40-inch wheels with 3x¼-inch tires and 1½-inch axle, and No. 3 has 17 cubic feet capacity and 44-inch wheels, with 3x¼-inch tires and 1¾-inch axles. Wheels have steel hubs. Shipped from factory in Western Ohio.

Chas. W. Gillman, Forest N. Dak., says: The Ideal Grader is one of the most useful articles I have on the farm. I would not be without it.

Monroe Jarrett, Cressman, Penn., The Ideal Grader does all you claim. Am well pleased with it.

DOAN DITCHING SCRAPER.

$4.33

An excellent Scraper for cleaning out and filling ditches, and for leveling roads and uneven places. Is well made of seasoned hardwood. Steel bit is 48 inches long, 7 inches wide and ¼ inch thick. This scraper is well ironed, has 1¾ by ¾-inch steel hounds, with ⅜-inch cable chain. Shipped from factory in Western Ohio.

No. 32F2525 Ditching Scraper. Wt., 75 lbs. Price.....$4.33

TOWNSHIP OFFICIALS should send for our free Circular of Township and Road Making Supplies.

48-INCH TONGUE SCRAPER

For cutting and cleaning out ditches and moving large quantities of earth. Draw bars and bit are made of the best quality of steel. Body, tongue, crossbar and handles are made of seasoned hardwood, well ironed and bolted. Shipped from factory in Western Ohio.

$4.63

No. 32F2520 Tongue Scraper, with 48-inch blade. Wt., 135 lbs. Price.....$4.63

IDEAL REVERSIBLE FARM AND ROAD GRADER.

Saves Time, Labor and Horse Flesh.

Does the work of a $250.00 Machine.

Tongueless. $33.75

This machine has a reversible blade which sheds the dirt and can be set to throw it to the right or left. With it one man and one team will do the work of a $250.00 horse killing grader which requires three men and three teams or more, and do it better because the machine can be worked at times and in places where a large machine could not be used. Made entirely of iron and steel. Beam with blade attached is 8 feet wide and 6 feet long. Machine is 6 feet from center of front trucks to center of rear trucks. Front wheels are 12 inches high. Rear wheels are 12 inches and swivel to reverse with the blade. The angle at which these wheels and the shoe back of the blade prevent the machine from sliding when properly set. The blade can be set to work straight ahead or reversed to either angle by merely the catch on the front arch and turning team to the right or left. Front wheels have caster and ball and socket action. Levers on the rear wheels raise, lower and tilt the blade to the desired angle. Machine is tongueless and so easy on the team that it can be worked for ten hours at a stretch. Will turn any place a team can turn. Blade has point and can be adjusted to cut as deep as can be easily worked. Of great value in grading fields and barnyards and keeping lanes and driveways in order. Call the attention of your township officials to this wonderful machine. Shipped from factory in Central Ohio.

No. 32F2542 Farm and Road Grader. Wt., 535 lbs. Price.....

No. 32F2543 Extra Blade. Price.....

ECONOMY FARM AND ROAD DRAG.

Can be used for leveling fields, roads, lanes, etc., for cleaning barnyards, and numerous other purposes. By means of lever blades can be pitched to angle desired. Hitch is adjustable so that the drag can be drawn at any angle so as to work the soil off the end. Frame is flexible and allows each blade independent freedom of movement. Drag is 7 feet wide and made entirely of iron and steel, excepting the foot plank. Extra blades $1.87 each. Shipped from factory in Central Ohio.

No. 32F2545 Economy Drag. Wt., 315 lbs. Price, without seat, $13.98; with seat.....$14.98

Our Famous Crystalline Metal Bells

For Schoolhouse, Factory and Church — Guaranteed for Five Years Against Breakage

$6.08 AND UP

Celebrated for their volume of sound and for their loud, clear, round and sweet tone. Our crystalline bell metal is a superior composition metal of high quality, and bells made from it are worth many times as much as so called alloy and cast iron bells which others offer. Our bells give almost as good satisfaction as the best copper and tin bells, which, of course, sell for much higher prices, and the same amount of money invested in one of our bells that you would invest in a copper and tin bell will secure a bell with a greater volume of sound, and a farther reaching, more satisfactory tone. Thousands of schools, churches and factories use our crystalline metal bells in preference to all others.

We allow sixty days' trial on every Crystalline Metal Bell we sell. During this period you can give it a thorough trial, compare it in tone, volume and quality with composition bells of any other make, and if you find any reason to be dissatisfied, you can return the bell to us at our expense and we will return to you every cent you paid us for it and freight charges.

We guarantee these bells for five years against breakage and should any piece or part break through defect in material or workmanship, we will furnish a new piece or part to replace the broken part, or, if necessary, we will furnish an entirely new bell free of charge. When you buy a bell from us we guarantee you absolute satisfaction, protect you against defect, save from one-fourth to one-half in price and give you greater value than you can possibly obtain elsewhere.

BEWARE OF BELLS NAMED IN IMITATION OF OUR FAMOUS CRYSTALLINE METAL BELLS

Church Bell.

Schoolhouse, factory and church bells are all of the same general design. They differ only in size and in the fact that our 44 and 48-inch bells are mounted on **indestructible roller bearings.** These bearings enable one person to ring our largest bells with as great ease and regularity as a small bell can be rung. Bells 24 inches and larger are fitted with our improved **clapper,** which insure a full stroke of the clapper without the possibility of a second stroke. Iron rope wheels are furnished with 20 to 36-inch bells and sectional wood rope with 38 to 48-inch bells. **A tolling hammer is furnished with church bells.** Weights and prices are for the bells complete with frame, wheel and wood sills.

Rev. L. Epperson, Pastor Tabernacle Baptist Church, Buxton, Iowa, says: The Crystalline Metal Bell gives perfect satisfaction and is in every respect all you claim for it.

Copper Cable Lightning Rods

Our System of Copper Cable Lightning Rods is recommended and approved by the leading scientific and government authorities, and in every respect our lightning rods and fixtures are fully up to the highest standards and most rigid requirements which have been set by insurance companies and experts on the subject. We furnish the most complete, most substantial and most attractive line of rods and fixtures on the market at prices which are less than the average lightning rod agent or peddler pays for his goods. You can provide this valuable protection for your property and the lives of your family, do the work yourself, and get a better job and better goods than you could get from any agent or peddler, and save at least one-half.

An expert is not needed for measuring up your building, nor for putting on the rods. We tell you below how to measure and how to order, and with every order we send plain and simple instructions for putting up.

The illustration above shows the actual size of our Copper Cable Lightning Rod, which is woven from thirty copper wires of the purest grade copper obtainable, not less than 98 per cent purity. It is a strong, solid cable, which will lay straight on buildings, and yet is flexible, so that it can be run around angles or corners without kinking or unraveling. Each wire lays to the surface and presents its entire surface as an electrical conductor, thus giving it the largest possible electrical carrying capacity. Price of cable includes sufficient copper clips and nails for fastening to building.

A complete lightning rod system consists only of the necessary amount of copper cable, with clips and nails for attaching to building, and complete plain or ornamental tops or points; the number of these points depending on the dimensions of your building and the style of construction.

The illustrations at the left show a complete plain top, and a complete top with ornamental vane with animal figure. Every complete lightning rod outfit should include one or more of these tops, either plain or ornamental, or both. The animal figures and vanes and glass balls are merely ornamental and do not affect the purpose of the system in any way. A complete top consists of a heavy pure copper tube upright, a pure copper point, a galvanized brace stand for supporting the upright, a copper tee for connecting the upright to the cable and a 4½-inch glass ball. The ornamental top is the same, with the addition of vane and animal figure. Animal figures are of zinc, full swell bodied, heavily gilded and will not rust. Complete tops stand 5 feet high from base to point.

You can easily make up your order from this page for a lighting rod outfit for any ordinary building, but if your building is of unusual construction, or you want more information before ordering, **send for our free special Catalog of Lightning Rods.** This special catalog gives plans and instructions for rodding all kinds of buildings; it also shows large illustrations of our complete line of ornamental fixtures, besides giving much valuable information on the subject of lightning rods in general.

While the illustration of ornamental top or point shows vane with a horse figure, we will, if so ordered, furnish instead, vane with either of the following animal figures: Cow, pig, sheep or rooster. Vanes with animal figures are 30 inches long. Glass balls can be furnished in following colors: Opal, blue, ruby, silver or gold. **Be sure to give color wanted and state figure desired.**

We also furnish ornamental tops or points with glass tail arrow vane 23 inches long in place of the animal figure. This is a very popular ornament, suitable for either residences or barns. Both animal and arrow vanes are mounted on frictionless brass swivel which permits them to turn easily with the winds.

How to measure your buildings for rods. The best way is to run a rope or cord over the building in just the same lines the rod is to run, and where the rod will make a turn or branch, drive a nail or spike to hold the cord in place. In measuring for cable allow enough so that all bends or turns over eaves or around corners will be gradual, and where cable passes close to metal cornices, water spouts, ornaments, gutters, etc., it should be connected to such objects. At least two ground connections are needed for every building, and on large buildings with more than five tops or points, three groundings. Allow 10 feet for each ground connection. That is, the cable must extend into the ground 10 feet so as to be connected with moist earth permanently. Tops or points should not be over 15 feet apart. Each cupola and tower should have a point or top, and each gable or wing extending from main structure 10 feet or more should also have a point or top. There should also be a top or point at the side of each chimney.

The plan of barn shows how the rod is run and how the tops or points are placed. The rod is grounded at opposite ends and corners. Where gables or wings make branch circuits necessary, we include free of charge brass splicers for making these connections. All cable should be ordered in one piece and cut on the ground to fit its position on the building. If the roof is of irregular construction and broken up by small gables or hips, it is sufficient to place a point or top on each of the most prominent or elevated parts of the structure.

A complete lightning rod outfit with cable and complete tops will weigh, packed for shipment, from ¾ to 1 pound to the foot. Always shipped from the factory in Western Illinois. **When ordering be sure to state color of glass ball desired and the animal figure desired with ornamental tops.**

Driscoll, N. Dak., May 30, 1910.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I find your lightning rod system first class in all respects. An agent wanted $25.00 to rod the same building, but your rods complete with freight cost me $9.00.
Yours very truly,
HENRY WEIMER.

No. 32F3700 Copper Lightning Rod Cable. Price, per foot, including copper clips and nails $0.08¾

NEW IMPROVEMENTS MAKE THEM BETTER THAN EVER.

R. E. Pierce, Holton, Kan., says: The Kenwood is the best stump puller I ever saw. I pulled apple trees 20 inches in diameter easily and hedge a foot through, in very tough soil. Some roots were 20 feet long. I pulled 20 rods of hedge in eight hours.

E. W. Annis, Twin Falls, Idaho, says: I like the Kenwood Stump Puller better than any I have seen. I could set it in five minutes' time. Have pulled stumps from 2½ to 5 feet in diameter. My machine cost me $91.25 laid down here. One of my neighbors has a machine which cost him $300.00 and he can't do the work I did. I used the machine two years and then sold it for $70.00.

KENWOOD MANGANESE STEEL STUMP PULLERS

READ WHAT OUR CUSTOMERS SAY

E. T. Underwood, Llano, Texas, says: neighbors pay me $2.00 a day to use my wood Stump Puller; they say it is more than one cent a stump. Have pulled mesquite and post oak stumps 2 feet in as many as 200 a day.

$15.75 AND UP

STRONGEST AND MOST POWERFUL STUMP PULLER MADE. EASIEST AND SAFEST TO HANDLE. WILL DO MORE WORK AND BETTER WORK THAN ANY OTHER STUMP PULLER OF EQUAL SIZE.

SOLID ONE-PIECE FRAME. NO BOLTS TO LOOSEN OR BREAK.

Will clear stump lands quicker and cheaper than by any other method. Easily handled, nothing to get out of order. **Frame is made of manganese steel, the toughest and strongest material used in any stump puller,** three times stronger than cast iron. Long low anchor hook at bottom of frame holds machine steady under all conditions and machine cannot rear up or tip over. **Improved ratchet holds every inch team can pull.** On the three larger sizes, ratchet is automatically held in place when in gear, and locked when lifted out of gear. On Nos. 1 and 2 machines ratchet is on top of drum. On all other sizes it is placed on side of drum, as illustration shows. **Grooved drum saves wear on rope and prevents flattening under strain,** and makes every strand do its share of the work. All but the No. 1 machines have hand lever for taking up or paying out cable with team at standstill, and eccentric lever for throwing machine in or out of gear under strain so team can pass over cable with loose tugs. This feature also makes it possible to operate in fence corners, or close to buildings, streams, etc., something impossible with other machines. Steel cables are highest grade. **We do not use crucible or plow steel cables** which are worthless for stump pulling purposes. Our special steel cables, furnished with Nos. 1 and 2 machines and with larger machines when not wanted for extra heavy work, are made from a special grade of steel, strong and flexible, and are better cables than any other manufacturers use on their most expensive machines. **English steel cable furnished only with our highest priced Nos. 3, 4 and 5 machines is the strongest, toughest, most flexible and durable steel cable made,** and if you order one of these sizes, we recommend that you buy the machine fitted with English steel cable. You will then have absolutely the best and most powerful stump pulling outfit money can buy. **The improved anchor loop furnished with every machine is now furnished with special coupler which does away with all clips. We can furnish our stump pullers with pulling cables 25, 75, 100, 125, 150, 175 or 200 feet longer than they are regularly listed** if extra price is allowed, but be sure to order the same size and kind of cable furnished with the machine. If extra pulling cables or anchor cable are wanted in separate pieces you should order and allow for one cable hook and as many clips as the diameter of cable requires.

If you are undecided as to size of machine or what attachments to buy, write and tell us the size and kind of stump you wish to pull, kind of soil, etc., and **we will advise you** what you should order and tell you what the freight charges will be.

OUR GUARANTEE. We will replace free of charge any cast part of a Kenwood Stump Puller or attachment which may break within one year from date of purchase. We will also replace free any of our cable which breaks during that time, **provided it is not broken by misuse.** Broken cables must be returned to us for inspection before any claim for defect can be allowed. Stump pullers and attachments are shipped from factory in Eastern Iowa.

No. 32F2601 No. 1 Stump Puller, suitable for use by hand or for one horse on an 8-foot sweep. Furnished with a 6-foot anchor loop and 50 feet of ⅝-inch Special steel pulling cable. Guaranteed to stand a strain of 45,000 pounds when a double power pulley is used. Wt., 350 lbs. Price.....**$15.75**

No. 32F2602 No. 2 Stump Puller, suitable for use with one horse on a 10-foot sweep. Furnished with an 8-foot anchor loop and 50 feet of ¾-inch Special steel pulling cable. Guaranteed to stand a strain of 70,000 pounds when a double power pulley is used. Wt., 450 lbs. Price.....**$21.95**

No. 32F2603 No. 3 Stump Puller, suitable for use with two horses on a 12-foot sweep. Furnished with a 10-foot anchor loop and 50 feet of ¾-inch highest grade English steel pulling cable, which is guaranteed to stand a strain of 100,000 pounds when a double power pulley is used. Wt., 650 lbs. Price.....**$40.25**
Price, with Special steel cable..... **31.75**

No. 32F2604 No. 4 Stump Puller, suitable for use with two horses on a 14-foot sweep. Furnished with a 12-foot anchor loop and 75 feet of ⅞-inch highest grade English steel pulling cable, which is guaranteed to stand a strain of 140,000 pounds when a double power pulley is used. Wt., 875 lbs. Price.....**$59.85**
Price, with Special steel cable..... **49.25**

No. 32F2605 No. 5 Stump Puller, suitable for use with two horses on a 16-foot sweep. Furnished with a 12-foot anchor loop and 75 feet of 1-inch highest grade English steel pulling cable, which is guaranteed to stand a strain of 180,000 pounds when a double power pulley is used. Wt., 1,000 lbs. Price.....**$67.85**
Price, with Special steel cable..... **54.80**

DOUBLE POWER PULLEYS.

A double power pulley will double the efficiency and power of your stump puller. Our improved double power pulley is made entirely of toughest Bessemer steel and is unbreakable. Clevis extends over sheave and prevents cable from running off sheave or cable cutting in two on edges of sheave. Hitch cable is babbitted into pulley and hook, and no clips are used. The size number indicates the size of machine with which these attachments are to be used. No. 1 Pulley has 8 feet of ⅞-inch Special cable and weighs 55 pounds. No. 2 Pulley has 10 feet of 1-inch Special cable and weighs 60 pounds. No. 3 Pulley has 12 feet of 1-inch English steel cable and weighs 65 pounds. No. 4 Pulley has 15 feet of 1⅛-inch English steel cable and weighs 95 pounds. No. 5 Pulley has 15 feet of 1¼-inch English steel cable and weighs 110 pounds.

No. 32F2611 Double Power Pulley.

$6.42	$7.98	$12.80	$16.00	$17.10

STEEL STUMP HOOKS.

Extra heavy and made of the very best cast steel. For use in pulling stumps so low or badly decayed that cable cannot be hitched around them. Very deep in the throat. No. 1 Hook is for use with Nos. 1, 2 and 3 Stump Pullers and weighs 60 pounds. No. 2 Hook is for use with Nos. 4 and 5 Stump Pullers and weighs 80 pounds.

No. 32F2630 Steel Stump Hook.

	No. 1	No. 2
Price	$7.70	$10.55

STEEL MESQUITE HOOKS.

Do absolutely satisfactory work on a mesquite cluster and on all other stumps. Have two prongs 10 inches long and 8 to 10 inches wide between points. The sharp inside edges of the prongs straddle and bury themselves in the stump and either pull it out or cut it off so deep as to be out of the way of the plow. No. 1 is for use with Nos. 1, 2 and 3 Stump Pullers and weighs 75 pounds. No. 2 is for use with Nos. 4 and 5 Stump Pullers and weighs 85 pounds. Made of highest quality cast steel.

No. 32F2635 Mesquite Hook.

	No. 1	No. 2
Price	$9.80	$11.90

HUMPHREY'S CLOVER CUTTERS, $7.45 AND $9.45.

A rapid, easy turning cutter which will reduce clover to ⅛-inch lengths for feeding poultry. The cutting knife has five edges and being geared 8 to 1, gives forty cuts to each revolution of the fly wheel, while the ordinary clover cutter gives ten or twelve. It cuts to uniform lengths. The reversible table knife, as well as the circular cutter, is made of the hardest white iron **cast on a chill,** harder than you could possibly temper steel. Made with stand or legs, and as a bench machine without legs. Shipped from factory in Northern Illinois.

No. 32F3125 Clover Cutter without stand. Wt., 85 lbs. Price.....**$7.45**
No. 32F3126 Clover Cutter with stand. Wt., 108 lbs. Price.....**$9.45**

No. 0B DANDY GREEN BONE CUTTER, $6.90.

Back geared, operated by handle on rim of large balance wheel; suitable for a flock of 50 to 75 fowls. Made with a standard and is to be fastened to a bench. The bone box is 3¼x4⅝x6 inches inside. It is fed by a hand feed screw which has a split nut that swings entirely out of the way when filling bone box. Cutter has one straight and two corrugated knives. Guaranteed better than any other cutter of similar size or price. Shipped from factory in Western Pennsylvania.

No. 32F3200 No. 0B Bone Cutter. Wt., 75 lbs. Price.....**$6.90**

GENUINE DANDY GREEN BONE CUTTERS

$8.85 and up. **Made by the Stratton Manufacturing Co. The World's Best.**

Nos. 9, 10, 11 or 12 CUTTERS

We guarantee them to be the very best, most durable, easiest running and most satisfactory green bone cutters made, and that with the same amount of power applied they will cut more green bone than any other machine made for this purpose. Cut dry or green bones with the meat on just as they come from the butcher shop, without clogging, and fine enough for chicks four days old. **Nos. 9, 10, 11 and 12 machines** have three solid tool steel knives. Two are corrugated and these cut grooves into the end of the bone as it is fed up to them. A straight knife follows, which makes a clean, smooth cut through all the meat and gristle, obviating the stringy texture of the cut bone, which other cutters produce. **Nos. 9, 10, 11 and 12 machines** mounted on low legs, as shown in the illustration of the No. 13 machine, or on high legs, as shown in larger illustration. The feed is automatic and adjustable. Nos. 9 and 11 have a solid nut on the feed screw and the feed screw must be turned back when filling the bone box, but Nos. 10 and 12 have a split nut which allows the feed screw to be pulled back instantly. Balance wheels are very heavy and the cutters operate easily. The Nos. 9 and 10 cutters have a bone box 3½x3x11 inches inside and are suitable for a flock of from 100 to 150 fowls. The Nos. 11 and 12 cutters have a bone box 4x3x13 inches inside and are suitable for a flock of from 200 to 250 fowls. By ordering our No. 32F3233 pulley with either of these machines they can be run by power and the capacity will be fully double what it is by hand. No. 13 machines have bone box 4x4x20 inches inside. They have three corrugated and one straight knife and when run by power are suitable for a flock of 1,500 fowls. When run by hand, being geared 4 to 1, they turn easily and are suitable for a flock of 400. They have split nut and adjustable automatic feed and a safety device which stops the feed if iron or other metal gets in bone box. **No. 13H** has balance wheel and handle for hand use only. **No. 13HP** has balance wheel, handle and 12x4-inch pulley and is for hand or power. **No. 13P** has no balance wheel or handle, but has 12x4-inch tight and loose pulleys and is for power only. Shipped from factory in Western Pennsylvania.

Imperial Double Wall Incubators $8.85

FOR 80-EGG SIZE.

New Styles, New Sizes, Greater Values —— Self Regulating, Self Ventilating, Self Moistening

SUCCESSFUL IN ALL CLIMATES. HIGHEST AWARD AT SIX SUCCESSIVE WORLD'S FAIRS.

FOR 80-EGG SIZE.

Kiser, Arondo, Wash., says: Talk hatching chickens. Got ninety-two lively chicks out of ninety-six eggs I put in a moist cellar. Your beat anything in this part of the country.

Bentley, Spencer, Va., says: The Incubator is one of the best on the market. I hatched 125 chicks out of 150 eggs.

Southport, La., says: For three years the incubator has given wonderful results. Six days ago I had a 90 per cent hatch.

Sandy, Utah, says: Your incubator has given entire satisfaction. The 50 hatched fifty chicks from sixty eggs and every one with your brooder, not one.

Pokegama, Ore., says: The first I used the Imperial Incubator I hatched ninety-two chicks from 107 eggs, my neighbors. Saved at least $7.00.

SIXTY DAYS' TRIAL

GUARANTEED TO HATCH EVERY FRESH AND FERTILE EGG, TO BURN LESS OIL AND TO PRODUCE STRONGER CHICKS THAN ANY OTHER INCUBATOR MADE.

PERFECT HATCHES ASSURED if you buy an Imperial Incubator and follow the plain and simple directions we send free with every machine. No experience necessary, even a child can operate them; just give the incubator fresh, fertile eggs, follow our simple instructions and the machine will do the rest. Made expressly for us by one of the oldest and largest incubator makers in the world. Winners of highest awards at Brussels, Chicago, Paris, Omaha and St. Louis World's Fairs and hundreds of other expositions. For thirty years these incubators have been **the world's best** and they always will be because **they are made by the most expert and progressive incubator manufacturers in the business.**

Send for our free Incubator Catalog if you wish to learn more about these wonderful hatching machines, how they are made, why they are the best, etc. This book also contains a world of information interesting and valuable to every poultry raiser.

OUR SIXTY DAYS' TRIAL OFFER. Order an Imperial Incubator and use it according to our plain and simple directions **for sixty days from the date you receive it.** This gives time enough for you to bring off at least two hatches, and if at the expiration of this trial period you are not satisfied that the Imperial is in every way the satisfactory machine we say it is; **the best incubator you ever saw or heard of,** return it to us at our expense and we will return you the price you paid us for the incubator, together with freight charges.

Imperial Incubators are made with either hot air or hot water heating systems. Heating pipes, etc., of the hot air machines are made of steel. Water tanks of the hot water machines are made of **heavy 14-ounce cold rolled copper and will not rust out.** Incubator cases are made of selected bone dry cypress lumber, proof against moisture and atmospheric changes and warranted not to crack nor warp. Walls are double and filled or insulated with the best non-heat conducting packing known. Tops are packed with alternating layers of wool and fiber. Doors are double, close against perfect fitting jambs and have glass fronts so you can see all parts of the egg chamber without opening. **Egg Trays** are strongly made, have screen bottoms, and our patent turning racks which turn all eggs at one operation. The 80 and 120-egg incubators have one tray, other sizes have two. **Nursery space** under egg trays accommodates young chicks as hatched. Lamp bowls are heavy galvanized steel with metal chimney. Burners are highest grade. The fluid pressure bulb regulator is reliable and accurate at all times and indestructible; it consists of a compound arrangement of levers, operated by a metal disc filled with a fluid which expands at a temperature just under 168 degrees and regulates the temperature of the egg chamber. Thermometers are the best, made especially for incubating purposes. They are thoroughly tested and seasoned for one year before using. Heater parts are steel, and are enclosed in the incubator case. All sizes rigidly mounted on nicely turned legs. **Capacities** given are the number of average size hen's eggs the machine will hold when patent turning rack is **not** used. When turning rack is used, capacities are reduced about one-third. Machines are nicely finished in the natural wood and highly varnished. Price is for the complete incubator, ready to operate. All you need supply is the oil for fuel, and the eggs. Our simple directions tell how to test the eggs as well as how to run the incubator. Follow them and **we guarantee the Imperial Incubator to hatch every fresh and fertile egg** and to produce stronger, healthier chicks than any other incubator made. Shipped from factory in Western Illinois.

No. 32F3049 400-Egg Imperial Copper Tank Hot Water Incubator. Size No. 168. Wt., 290 lbs. Price **$29.90**

120-EGG AND 220-EGG SIZES ARE THE BEST FOR GENERAL USE. WE RECOMMEND THE PURCHASE OF A HOT WATER INCUBATOR.

R. Beck, Harvard, Ill., says: The Imperial Incubator is safe, simple and convenient. Cannot find one fault with it. Does better work than any other in this locality, and burns less oil.

A. H. Normar, Concord, Tenn., says: The Imperial Brooder is O. K. Have raised three broods and have not lost a chick. I can put seventy eggs in your 65-egg incubator and it never fails to work.

J. L. Duckworth, Magee, Miss., says: The 120-egg Imperial Incubator is as good as it can be made. Had five hatches with the best success. It is simple and easy to handle and economical with oil. Have put as many as 135 eggs in it.

Bernard Devar, Coal City, Ill., says: Your Imperial Incubator certainly does run fine. It is the best on the market. Got 162 chicks out of 180 eggs the first time, 143 chicks out of 160 eggs the second hatch.

Wyandotte Indoor Brooders.

$2.92 AND UP — New Sizes

Intended for use within a building, but in mild weather may be used out of doors if protected by a shed roof. Built on the "mother hen" plan, that is, the heating apparatus is in the top, as it should be. These brooders are divided into two compartments by a curtain of heavy woolen cloth; one compartment is about fifteen degrees warmer than the other, and the chicks can go to or from the heat at will. Pure air circulation is perfect and the brooders maintain an even temperature. The hot air and hot water brooders are identical in construction, except that the hot air tanks are steel while the **hot water tanks and reservoir are made of copper.** Fumes from the lamp cannot enter the brooding chamber, and lamps are placed and protected so that they are absolutely safe under all conditions. Lamp bowl and exposed parts of heater are heavy galvanized steel. These brooders have single door with glass panel, easy to clean and furnish plenty of light. While these machines will give perfect satisfaction when used indoors, we recommend that you select an outdoor brooder because it can be used with equal success indoors or out of doors. Every poultry raiser should have one or more brooders. They are absolutely necessary in order to experience the best of success. You cannot always intrust your chicks to the care of a hen with safety, for she is apt to abandon and neglect them and the increased number of chicks you will raise by using a brooder will more than pay for the machine. The brooder method is the only successful way in which to raise young chicks. Price includes a high grade thermometer, a runway, an instruction book and all attachments. Shipped from factory in Western Illinois.

No. 32F3050 60-Chick Wyandotte Hot Air Brooder. Wt., 55 lbs. Price **$2.92**

No. 32F3051 60-Chick Wyandotte Hot Water Brooder. Wt., 60 lbs. Price **$4.53**

No. 32F3052 120 Chick Wyandotte Hot Air Brooder. Wt., 80 lbs. Price **$5.18**

No. 32F3053 120-Chick Wyandotte Hot Water Brooder. Wt., 85 lbs. Price **$6.98**

No. 32F3054 220-Chick Wyandotte Hot Air Brooder. Wt., 90 lbs. Price **$7.12**

No. 32F3055 220-Chick Wyandotte Hot Water Brooder. Wt., 100 lbs. Price **$9.35**

Imperial Colony Brooders, $11.90

A perfect brooder, and colony house or coop combined. Put together with hooks and can be quickly set up or taken apart. Lamp chamber attaches to outside of brooder, thus lamp is protected from the wind and lamp fumes cannot get into brooder. Lamp and heating system are the same as in our Imperial Outdoor Brooders. Hover accommodates 100 chicks, and has automatic regulator same as used on our incubators which allows surplus heat to escape from hover to outer compartment of brooder, thus preventing waste of heat. Hover can be removed and brooder used as colony house or coop. The single brooder has one compartment, 36x36 inches, with hover, heating system and regulator. Double brooder has two compartments, 36x36 inches, making it 72 inches over all. The second compartment is not heated. Doors are flush with bottom, making it easy to clean out brooder. Glass panel in doors opens upward, and in mild weather can be propped open. Opening is covered with wire netting. Prices include lamp and heater complete, regulator, hover and thermometer. Illustration shows single brooder. Shipped knocked down flat from factory in Western Illinois.

No. 32F3070 Single Colony Brooder. Wt., 170 lbs. Price **$11.90**

No. 32F3071 Double Colony Brooder. Wt., 278 lbs. Price **$15.85**

$4.65 WYANDOTTE INCUBATOR

THE BEST SINGLE WALL INCUBATOR MADE.

HOLDS 65 EGGS

Designed especially for beginners and small poultry raisers. Made in one size only and intended for use in a room where the external temperature is practically even at all times and when properly operated will hatch just as large a percentage of eggs as any incubator made. If a small incubator of this character will meet your requirements, this machine represents the best value you can obtain anywhere, but we recommend that you purchase an Imperial Double Wall Incubator because you will find it possible to operate it with better success in rooms where the temperature is subject to change. We also recommend that you use a 120-egg or larger incubator because it will cost you no more for fuel than a small one and you can hatch a great many more chicks with practically no more labor and expense than you would be put to with a machine of less capacity. The Wyandotte is positively the best single wall machine on the market; material, workmanship and finish are first class. The case is made of thoroughly seasoned, bone dry lumber which will not warp nor crack and is smooth dressed, well varnished and finished in natural wood color. It is mounted on nicely turned legs. Has ventilated bottom and the top is insulated with best non-heat conducting packing. The door is single, has double glass and closes against felt jambs. Egg tray is well made and has screen bottom; a nursery space below it accommodates young chicks as hatched. Regulator is the same as used on our Imperial Incubators. Heater jacket and lamp bowls are heavy galvanized steel. Heater pipes are steel. Hot water tanks on the hot water machines are **heavy cold rolled copper.** Price includes a high grade thoroughly tested thermometer, an egg tester and complete instruction book. Shipped from factory in Western Illinois.

No. 32F3035 65-Egg Wyandotte Hot Air Incubator. Wt., 50 lbs. Price **$4.65**

No. 32F3036 65-Egg Wyandotte Hot Water Incubator. Wt., 55 lbs. Price **6.40**

Outdoor Brooders.

New Sizes

makes our brooders to be larger than others rated at the same capacities. Outdoor brooders to combine more than any other make or style of Constructed for outdoor use, but used indoors as well. Warmed by exclusively, on the "mother hen" plan. 60-chick brooders differ from the 120-chick brooders. They have but one forward compartment with single door in the roof, like the 120-chick brooders and 120-chick brooders and a center compartment partitioned off from outer compartments by heavy curtains; the temperature of the compartment is about fifteen degrees warmer than the outer ones, and the chicks can go to or from the heat at will. The heater is placed within a metal lined chamber, completely protected from wind, and easy to get at and arranged so that fumes cannot enter the brooding chamber. Ventilation is perfect and the brooder gives an even temperature. The roof is covered with heavy galvanized sheet steel, and the machine is nicely painted. The front affords abundance of light and is arranged so the brooder can be closed, and either door may be opened for sunlight and fresh air. Tanks of these machines are made of steel, but the tanks and reservoirs of the hot water machines are made of copper. The lamp bowl, jacket and lining of the lamp chamber are made of heavy galvanized steel. Every poultry raiser should have one or more brooders. You cannot depend upon the hen to hatch the chicks intrusted to her care. She is apt to abandon and neglect them, and the time you lose would easily pay for a brooder. The most successful poultry raisers use our brooders with most profitable results. Price includes a high grade thermometer, a runway, an instruction book and all attachments. Illustration shows a 120-chick brooder. Shipped from factory in Western Illinois.

No. 32F3060 60-Chick Imperial Hot Air Brooder. Wt., 80 lbs. Price **$5.13**

No. 32F3061 60-Chick Imperial Hot Water Brooder. Wt., 85 lbs. Price **$6.92**

No. 32F3062 120-Chick Imperial Hot Air Brooder. Wt., 90 lbs. Price **$7.20**

No. 32F3063 120-Chick Imperial Hot Water Brooder. Wt., 95 lbs. Price **$9.20**

No. 32F3064 220-Chick Imperial Hot Air Brooder. Wt., 115 lbs. Price **$10.50**

No. 32F3065 220-Chick Imperial Hot Water Brooder. Wt., 125 lbs. Price **$12.45**

No. 32F3066 300-Chick Imperial Hot Air Brooder. Wt., 175 lbs. Price **$13.35**

No. 32F3067 300-Chick Imperial Hot Water Brooder. Wt., 190 lbs. Price **$15.95**

Poultry Vegetable Cutter, $3.40

Cutter for poultry feed. Cuts vegetables, roots and tubers into fine ribbons, which can be taken by poultry for food. Cutter can be adjusted to cut the soft vegetables fed to poultry. Cutter is adjustable and is made of cast iron. Knife allows gravel to escape before reaching the feed. Suitable for a flock of any number up to 1,000. Price does not include freight. Get your neighbor to let you use it for him also and save in freight. Shipped from factory in Western Illinois.

No. 32F3090 Poultry Vegetable Cutter. Price **$3.40**

THE HIGHEST STANDARD OF WINDMILL QUALITY.

$13.50 AND UP Kenwood Ball Bearing Windmil

THE EASIEST RUNNING, LONGEST LASTING AND M

HONESTLY CONSTRUCTED WINDMILLS MADE

Self Governing, Adjustable Stroke, Large Self Feeding Waterproof Oil Cups, Removable Boxes at All Bearings, Double Nuts at Every Bolt. ALL GALVANIZING DONE AFTER COMPLETION. Surface and Edges, Joints, Rivets, Bolts and Nuts Thoroughly Galvanized. That's Why Kenwood Windmills are More Rustproof Than Others.

ILLUSTRATION SHOWS A BACK GEARED STEEL WINDMILL.

WE GUARANTEE

every Kenwood Windmill when properly erected and cared for according to the instructions we furnish to run in lighter winds, endure as hard service and to prove to be as durable and accomplish as much work as any other make of windmill of corresponding size and style, regardless of price. We also guarantee our towers when properly put together, erected and anchored according to instructions we furnish, to stand without damage all winds which do not blow down substantial buildings or live trees in the immediate neighborhood. We also guarantee every piece and part of our windmills and towers to be free from defect, either in material or workmanship, and we will replace free of all charge any part which may break or give out on account of such defect. This guarantee is in full force and effect for one year from the date you receive the mill or tower.

THE BEST WINDMILL FOR YOU TO BUY

is the Kenwood, not only because our prices are about one-half what others ask for any of the standard makes of windmills, but because it is positively the best windmill made, the most strongly built, the most honestly constructed, the easiest running, the most efficient, the most rustproof and the best wearing windmill ever produced. Aside from this, it is the easiest windmill to erect. **You need not go to the expense of hiring expert help to put up these windmills.** You can do this work yourself with but little assistance and just as well as any windmill expert could do it. We have devoted years to the sale of windmills and have found out how to produce mills which even in the hands of the most inexperienced will go together easily and properly. We believe that ninety-nine out of every one hundred farmers can easily put together and erect our mills and towers without the aid of directions of any kind, but to insure our customers against any difficulties in this work, we have prepared complete directions, explaining in the simplest manner possible how to quickly, economically and correctly erect Kenwood windmills and towers. **We send a copy of these simple directions with every windmill or tower** and we guarantee them to make it possible for you to erect the mill or tower as easily and quickly as it would be possible for any expert to erect it. We tell you where every piece or part of the mill or tower belongs, how you should place it in position and the safest economical way for you to raise a mill and tower after it has been put together. We have received hundreds of letters from telling us how easy they found it to erect our mills and how much money they saved by not being compelled to employ a windmill as they would have had to do with other mills. We can honestly say that in all our years in the windmill business we have never of anyone who has not found it perfectly easy to erect our mills and towers. You cannot afford to buy any other windmill than a wood because, aside from saving you about one-half, we will give you a better mill than you could possibly buy elsewhere, one will find easier to erect, lighter running, longer lasting, handsomer and in every way more satisfactory than any other mill at any price.

The Kenwood Alw Satisfies

Mrs. N. Peck, Ossian, Iowa, says: The windmill bought two and one-half years ago cost one cent for repairs. We had a terrible storm here which ruined half of the mills around but the Kenwood was not hurt a bit.

W. L. Judkins, Chadron, Neb., says: I never a piece of machinery around that has given satisfaction than the Kenwood windmill. It pumps water up a grade of 12 feet for a distance of 3 to the barn. I could not ask for greater value for my money.

A. C. Van Velzer, Houston, Texas, says: The wood windmill and tower are perfectly satisfactory saved about $16.00 on original cost. A carpenter and myself erected it one Sunday afternoon and tion by following your detailed instructions about $10.00 on that item.

Charles H. Burnham, Touisset, Mass., says: repaired and erected windmills for twelve years have never found a windmill quite as simple Kenwood. It has no complicated parts. No compete with it for ease of operation, quietness easy pumping in a gale. The governor takes it perfectly. We erected and had the mill operate in 48 hours after receipt. We saved $27.00 on it.

F. J. Potter, Holley, N. Y., orders a Windmill and says: This makes five Kenwood mills I have bought of you in the past three We had a gale here which blew down hundreds of trees, unroofed schoolhouses and down all kinds of windmills, including all makes, but all the Kenwoods are safe and am ordering this mill for a neighbor whose destroyed, and who is now going to have a which I am thoroughly satisfied is the best complete windmill on the market, regardless

WHY THE KENWOOD IS THE BEST.

They are made heavy enough and strong enough to withstand great wind strain usage, the engine heads as well as the material used throughout the mill heavier than will be found in most of the highest priced windmills on the market. **Our 10-foot windmill weighs from 150 to 200** than the majority of 10-foot mills of prominent makes. The heavier the mill, the more it costs to make, and while we could money and still further outdistance competition by having our windmills made lighter, we refuse to sacrifice strength or quality for price. **All bearings have removable boxings** which if ever worn can be quickly replaced without removing the mill from the tower and at but a few cents' expense. **Large self feeding waterproof oil cups** insure ample and positive lubrication with but occasional filling. **Wind wheel hubs have ball bearings,** which reduce the end thrust friction, making the mill run in the lightest of winds. **Turntables also have ball bearings,** which make the mill respond and turn more quickly when the wind changes direction. **The governor is self acting** and reliable under all conditions. It is of the weight and lever type. No springs to weaken nor break. In high winds the mill is automatically thrown out of gear; as the wind subsides it goes back into gear of its own accord. The governor does it all, no assistance from you necessary. Aside from being the heaviest, strongest, best made and easiest running mill on the market, the Kenwood is the most handsomely finished and attractive of all windmills. The wind wheel, rudder, all braces and every bolt and nut on Kenwood Steel Windmills are heavily galvanized and the wind wheel sails and rudder sheets are tipped with a brilliant red. **All galvanizing is done after each part is completed,** making it impossible for water to get at the rivets or into the joints to rust them away. The Kenwood is one of very few mills which are made in this way and this is one reason why they are so much longer lived than others. We have sold these windmills for years; they are made for us by one of the most prominent windmill manufacturers in the United States and if you are at all familiar with windmills you will recognize in the Kenwood a mill for which, if you were to buy from the manufacturers or their agents, under their own name, you would pay at least double our price. These manufacturers have for years been known as the most expert windmill makers in the world.

IF YOU WANT AN OUTFIT LIKE THIS SEND FOR OUR FREE WINDMILL CATALOG.

YOUR NAME ON THE RUDDER FREE.

If you so desire, we will stencil your name on both sides of the rudder without charge, or if you wish we will send the windmill with a plain rudder, or we will leave off the brand Kenwood and stencil your name and the name of your town on both sides of the rudder. We often do this for dealers who sell and erect our windmills. If you wish your name on the rudder, be sure to say so in your order and carefully print your initials and name so as to prevent mistakes.

WRITE OUR WINDMILL EXPERT

if you cannot make up a suitable windmill outfit from the goods shown in this catalog. Our line of windmill goods is the most complete in the United States. We can supply you with any kind or size of a windmill outfit you want, a Suburban or Combination Outfit with tank in the tower, deep well and irrigation outfits, power windmill outfits, 14-foot and 16-foot windmills, extra heavy towers and tank structures, in fact, anything and everything in the windmill line. Write for our **free special Windmill Catalog.** Our profusely illustrated special catalog will be sent you, offering the widest selection and containing complete information on this important subject. If you tell us the kind and depth of well you have, the work you want to do, etc., our windmill expert will submit to you an estimate of just what you require and quote you the lowest prices you can obtain anywhere on windmills, towers, tanks, pumps, cylinders, pipe, fittings, etc. Address, **Windmill Expert, care of Sears, Roebuck and Co., Chicago, Ill.**

OUR WINDMILLS ARE MADE IN THREE STYLES:

Back geared steel windmills, as shown in the large illustration, direct stroke steel windmills, and direct stroke wood windmills. The back geared steel and direct stroke steel windmills differ only in the gearing, length of stroke, in the curvature of the wind wheel sails and in that **the direct stroke mill has an auxiliary side rudder.** OUR DIRECT STROKE WOOD WINDMILLS are the same as the direct stroke steel mills with the exception that the wind wheel and rudder are of wood, painted white, with bright red border. They are great favorites in the Southwest and along the salt water coast. Prices are for the windmills complete and include pump pole, pull-out wire, reefing gear, bed plate and truing spider with which the mill is to be attached to a tower or mast, but price does not include a tower or platform. When windmill is ordered without tower, we will ship it with bed plate and truing spider for a four-post wood tower and with pump pole and pull-out wire for a tower 40 feet high, unless otherwise ordered. **We send complete instructions for erecting windmills and towers** and for building wood towers. Shipped from factory in Northeastern Indiana.

KENWOOD FOUR-POST WINDMILL TOWE

GALVANIZED AFTER COMPLETION.

$13.48 AND UP

Our Steel Towers are of the strongest possible construction. They are made of the best of materials and are properly proportioned and braced in every way. Every corner post, brace, band girth, bolt and nut **is heavily galvanized after all cutting, punching and other machine work is done.** This most important feature insures every part of the steel being covered with nonrusting metal and makes our towers more rustproof than others. **Our towers are braced diagonally as well as crosswise at every corner post joint** and they are so strong and rigid that when properly anchored they cannot be blown down. No. 1 towers have one set of bands for each 10 feet of their height, also a band at the platform and two bands above the platform which serve as steps. No. 1 towers are intended for use with 6 and 8-foot windmills, but in view of the small difference in price we recommend that a No. 2 tower be used with an 8-foot windmill. Nos. 2 and 3 towers have bands 5 feet apart for the entire height of the tower, also a band at the platform and two extra bands above the platform which serve as steps. No. 2 towers are suitable for 8-foot and 10-foot windmills, but we recommend that you use a No. 3 tower for 10-foot windmills when elevated more than 40 feet. No. 3 towers are suitable for 10-foot or 12-foot windmills at any height. **Our towers are full height;** every corner post is 10 feet 6 inches long, the extra 6 inches being allowed for the lap of one post over the one below it. This feature makes a stronger and better finished tower and also serves to prevent water from running into the corner post joints. **Illustration shows a 40-foot No. 2 or No. 3 tower.** Prices are for towers complete with platform, ladder, rod guides, anchor posts and anchor plates and building instructions for erecting, but does not include windmill, bed plate, truing spider, pump pole, pull-out wire nor reefing gear, these being parts of the windmill. Shipped from in Northeastern Indiana.

STANDARD GALVANIZED STEEL TANKS

PRICES GREATLY REDUCED

We guarantee our STEEL TANKS to be the best it is possible for anyone to produce and our prices to be lower than any other concern can make on tanks of as high quality. Order a tank from us with the understanding that it must be exactly as we represent it or you can return it at our expense and we will return your money and freight charges. Prompt shipment of all sizes.

Our Standard steel tanks are made of the very best quality of United States Standard No. 20-gauge galvanized sheet steel or heavier. Do not buy a tank made of No. 22 or 24-gauge steel. Such tanks are too light to give good service and will likely rust out or break down during the first season. Workmanship on our tanks is absolutely first class. All seams are lock seams and are carefully soldered, no edges coming in contact with the water. Tops are bound with angle steel. Bottoms of all tanks over 1 foot in height are secured between two pieces of flat steel or are bound with angle steel, depending upon size and shape of the tank; see illustrations. Sides are firmly braced (when size and shape require it) with angle steel bars. Round end, square end and oval tanks 6 feet or longer and the larger sizes of round storage tanks have angle steel bars across the top, the number of bars depending on size of tank.

Certain Standard tanks which are regularly shipped set up can and will be shipped knocked down if so ordered, and when such tanks weigh much over 200 pounds and are to be shipped over 500 miles or when any sizes of such tanks which weigh 125 pounds or more are to be shipped over 1,000 miles, we advise you to order them shipped knocked down, because you will then save in freight charges more than it should cost you to put the tanks together.

When tanks are shipped knocked down, all holes are punched, every part is fitted together at the factory and sufficient solder and rivets are sent with which to put the tank together. Capacities shown in barrels are based on 31½ gallons to the barrel.

We will not cut pipe connection holes in steel tanks. You can easily cut holes exactly where you want them, by using a cold chisel and cutting against a block of hardwood. We cannot accept the return of tanks in which holes have been cut. Order pipe connections if you wish to connect pipes to tank.

CONNECTIONS for STEEL TANKS.

We do not cut pipe connection holes in steel tanks, because it is a difficult matter for anyone to tell until they receive their tank just where it is best to cut the hole. You can easily cut the hole by using a cold chisel and cutting against a block of hardwood. Our galvanized pipe connections consist of one close nipple, two leather washers, two lock nuts, and cap, to close the pipe hole when you wish. Shipped from factory in Southwestern Michigan.

F4300 Pipe Connection.

90	8	3	2	12	155	7.65
91	10	3	2	14	195	9.00
92	10	4	2	19	225	11.65

$18.45 ROUND STORAGE TANKS.

Sizes Nos. A23, A8, A24 and A25 are made of No. 20-gauge galvanized steel, but can be made of No. 18-gauge at prices one-fifth higher, or of No. 16-gauge at prices two-fifths higher. Size No. A12 is made of No. 18-gauge steel but can be made of No. 16-gauge at a price one-sixth higher. Sizes Nos. A18, A26 and A21 are made of No. 16-gauge steel, because lighter gauge is not strong enough for such large tanks. **When comparing prices, don't forget to compare the gauge of steel of which the tanks are made.** These tanks are always shipped knocked down because they are too large to go into the door of a freight car. Shipped knocked down from factory in Southwestern Michigan.

No.	Size No.	Gauge No.	Diam., feet	Ht., feet	Cap., bbls.	Wt., lbs.	Price

DIPPING TANKS, $6.90

For dipping sheep and hogs, as a preventive of contagious diseases. They are placed in the ground with the top level with the surface. The animals can then be driven in and out of the tank. Made of No. 20-gauge galvanized steel, but can be made of No. 18-gauge at prices one-fifth higher. Always shipped set up. The long incline of these tanks allows the sheep or hogs to walk out easily. All sizes are 2 feet wide at top and 1 foot wide at bottom, and are furnished with end ladder. Shipped set up from factory in Southwestern Michigan.

32F4434	B6	10	6	4	230	13.25

WAGON TANKS, $7.35.

The top rim of this tank is fitted with 1x1x⅛-inch heavy galvanized angle steel closely riveted, over which the cover is flanged and on top of the rim of the cover is riveted a strip of ⅞x⅛-inch band steel, which reinforces the cover. Others do not make their tanks in this way and this is why our wagon tanks outlast all others. A three-quarter partition is fitted across the center of 8-foot tanks, and two partitions fitted in 10-foot tanks. These partitions serve the double purpose of splash boards and braces and give to our tanks strength not possessed by cheaply constructed ones. Made of No. 20-gauge galvanized steel, but will make of No. 18-gauge at prices one-fifth higher. All made 2 feet high, and with water tight top, having 14-inch round manhole. Have 1-inch pipe connection in rear end. Used on any wagon by laying board on the wagon gear. Capacity is not quite as much as shown in the table, as no allowance has been made for round corners. Shipped set up from factory in Southwestern Michigan.

32F4444	E5	10	3	14	235	13.85

$19.15 THRESHER TANKS.

Made of No. 20-gauge galvanized steel. Will make of No. 18-gauge at prices one-fifth higher. Trusses are heavy angle steel and entire tank is built far in excess of necessary strength. Seams are double locked. Fuel box large and its bottom is lined with 1-inch plank. Rear end of top has a 14-inch round manhole. Has 1-inch feed pipe connection in the bottom between trusses. Just wide enough to fit a 38-inch bolster, but you can bolt a piece of 2x4-inch lumber to each side of each truss to make fit a 42-inch bolster. A stationary metal bulkhead or slush board secured to fastenings on inside walls which stays the water against sudden movement and supports the tank against outward pressure. Price does not include trucks. Shipped set up from factory in Northern Indiana.

$5.98 WOOD TANKS.

Made of best Louisiana Cypress. The stock is free from unsound sap and unsound knots and is in every way suitable for tank purposes. Prices are for tanks made of 1½-inch Louisiana cypress. **We can furnish these tanks made of 2-inch Louisiana cypress at prices two-fifths higher than those shown.** We advise that a tank be made out of 2-inch stock when the bottom is 8 feet or more in diameter. The 1½-inch stock is dressed to about 1⅜ inches thick and the 2-inch stock is dressed to about 1⅞ inches thick. Tanks up to 2½ feet high are called stock tanks; tanks over this height are called storage or cistern tanks. Furnished with flat bands and adjustable draw lugs. Will furnish with round hoops at same price if so ordered. Always shipped knocked down. Shipped from factories in Western Iowa or Southwestern Wisconsin.

WESTERN SPECIAL GALVANIZED STEEL TANKS SHIPPED FROM FACTORY NEAR OMAHA, NEB.

While these tanks, as indicated in illustration, differ slightly in style of construction, they are of the same high quality as our Standard steel tanks and we guarantee them to give perfect satisfaction. This style of tank is very popular in western states and on account of the favorable location of our factory can be shipped to western points at a very low rate of freight. Prices here quoted are for tanks made of **United States Standard 20-gauge galvanized sheet steel,** but will furnish made of 18-gauge steel for prices one-fifth higher. Top rims are formed of a piece of steel pipe around which the top edges of the tanks are rolled, making rounded tops which cannot possibly cause injury to stock. Bottoms are securely bound with steel angles and all seams riveted, soldered and rustproof. These tanks are regularly shipped set up, but if so ordered we will ship knocked down. Prices on other sizes and styles quoted on application. **F. O. B. factory near Omaha, Neb.**

HIGHEST QUALITY.

BEE HIVES AND BEE KEEPERS' SUPPLIES

You cannot buy at any price better bee hives and bee keepers' supplies than ours. We guarantee our goods to be the very highest quality, and if for any reason you should feel dissatisfied with the construction or the quality of any bee keepers' supplies purchased from us, you may return them at our expense and we will immediately return your money and freight charges. Our hives are made to absolutely accurate measurements and standards, and the supers, bodies, frames and other parts will interchange with any other make of hives of the same style.

We have brought together on this page and put at the command of every bee keeper the resources of two of the largest and most reputable manufacturers in the country, thus making up the best and most complete line of high quality bee keepers' supplies on the market and giving a far better and larger list to select from than any other one dealer, jobber or manufacturer can offer.

Five Complete Hives Crated for

WHITE PINE HIVES are preferred by most bee keepers to hives of any other material, because white pine, being an easy lumber to work, it is possible to obtain a better and more uniform finish than with any other hive lumber. It is also closer and clearer grained, and when the lumber is selected and properly handled, white pine hives are unquestionably superior to those made of any other material. **The most particular fancy bee keepers will be satisfied with our white pine hives.** We guarantee them to be the best finished and most perfectly made hives on the market.

YELLOW CYPRESS as a hive material has been coming into general use in recent years, and while not permitting such a high finish as pine, it is, from the standpoint of utility, a perfectly satisfactory hive lumber. Where hives are used without paint, Bees will work in it as readily as in pine hives. Our cypress hives are made from the best grade of smooth dressed yellow cypress lumber and will stand moisture and weather better than any other lumber. Good cypress being more plentiful than a suitable quality of white pine, it is also cheaper. We guarantee them to give perfect satisfaction.

Bee hives are generally used 1½ stories high, that is with brood or bottom hive, and one super or top hive, but by ordering extra supers you can make two stories or more. Hives are sold in lots of five, ten, etc., but we list single hives so that you can order any quantity. **They are always shipped partly knocked down, and are not painted.** Bee hives, extras and smaller supplies when ordered with them are always shipped direct from factories, **but we carry a large stock of sections, frames and smaller supplies at our Chicago store, and from there when ordered with other merchandise or when to purchaser's advantage.**

White pine hives are shipped from factory in Southeastern Wisconsin. Cypress hives and all Massie hives from factory in Western Iowa.

Section Honey Boxes.

No. 1 Quality. We do not handle seconds.

One-piece scalloped sections. Made of clear basswood, perfect in finish, free from defects. No. 1 grade, the very best sections made. Size, 4¼x4¼x1⅞ inches. **Sold only in full crates.**

No. 32F3524 Crate of 250 Sections. Wt., 18 lbs. Price.....$1.37

No. 32F3525 Crate of 500 Sections. Wt., 36 lbs. Price.....$2.48

Plain sections for Massie Hives furnished at same prices as above.

Dadant's Wax Comb Foundation.

The best in the world, as every bee keeper knows. Made of strictly pure, bright yellow beeswax. Very tough, free from grit and dirt and easily worked. Brood foundation sheets are 8x16½ inches, about 7 sheets to the pound. Super foundation sheets are 3⅞x16½ inches, about 28 sheets to the pound. **Sold only in even pounds.**

No. 32F3528 Medium Brood Foundation. Price, 5 lbs., **$2.70;** per lb.....55c

No. 32F3529 Thin Super Foundation. Price, 5 lbs., **$3.05;** per lb.....62c

Parker Foundation Fastener.

For fastening comb foundation into section boxes. Made only for 4¼x4¼-inch sections.

No. 32F3532 Parker Foundation Fastener. Wt., ¾ lb. Price.....22c

Hand Section Press.

For putting together one-piece section honey boxes. Presses the dovetailed ends together squarely, without breaking the corners.

No. 32F3538 Hand Section Press. Wt., 1¼ lbs. Price.....47c

Hoffman Self Spacing Frames.

The deep frame is the same size used in all of our brood hives. It is 17⅝ inches long by 9⅛ inches deep, with 19-inch top piece. The shallow frame is the same as is used in our extracting hive supers. It is 17⅝ inches long, 5⅜ inches deep and has 19-inch top piece. **Sold only in full crates.** Shipped knocked down.

No. 32F3520 Crate of 100 Shallow Hoffman Frames. Wt., 25 lbs. Price.$1.94

No. 32F3521 Crate of 100 Deep Hoffman Frames. Wt., 50 lbs. Price.....$2.82

Wood Slat Zinc Honey Board.

Has thin slats within the rim, with strips of zinc having two rows of holes between each two slats. Stiffer and stronger than other forms, and preserves the bee space more accurately.

No. 32F3550 Honey Board for 8-Frame Hives. Wt., 1½ lbs. Price.....23c

No. 32F3551 Honey Board for 10-Frame Hives. Wt., 1¾ lbs. Price.....26c

Drone Trap and Swarm Guard.

For exterminating drones when too numerous and to prevent loss of swarms. Front and back are covered with perforated zinc through which the workers can pass, but with holes too small for drones and fertile queens. In the act of swarming, the queen enters the upper compartment and the workers cluster on the trap ready to be hived.

No. 32F3547 Drone Trap. Wt., ¾ lb. Price.....39c

Division Board Bee Feeder.

Sets into the brood hive in place of a brood frame or division board. Can be used for stimulating as well as feeding in the winter. Bees can be fed without exposing the cluster and without smoking. Holds 3 pints, is nailed together and coated inside with paraffin wax.

No. 32F3556 Division Board Bee Feeder. Wt., ¾ lb. Price.....25c

Swarm Catcher.

This is a very simple catcher, but is the best made. It is a conical wire basket with four sides and a cover and is to be attached to a long pole or handle. Pole is not furnished, as any long pole will answer.

No. 32F3570 Swarm Catcher. Wt., 4 lbs. Price.....74c

$7.65 Cypress. FOR FIVE STANDARD DOVETAILED HIVES. $8.75 White Pine.

COMPLETE WITH SECTIONS AND STARTERS.

Fitted with supers and sections for comb honey. Have lock cap rainproof cover and reversible double surface bottom. The illustrations show a complete 1½-story hive and an 8-frame hive super, 4¾ inches deep, which is fitted with six scalloped section holders, five scalloped separators, one adjustable follow board, twenty-four 4¼x4¼x1⅞-inch scalloped sections, twenty-four foundation starters and two flat springs. Supers for 10-frame hives each contain seven section holders, six scalloped separators and twenty-eight sections with starters. Brood hives are 9½ inches deep and fitted with standard Hoffman frames. Cypress hives are shipped from factory in Western Iowa. White pine hives from factory in Southeastern Wisconsin.

MASSIE PATENT DOUBLE WALLED HIVES.

Complete with Sections and Starters.

The Massie is a double walled, double cover, divisible, alternating hive, and possesses numerous advantages over all others. It excels the chaff hive because there are no open spaces between and behind open end frames to be warmed by the bees and it is also of lighter weight. With a Massie hive for winter quarters you will avoid the loss of many bees and find a greater number of young bees early in the spring. The queen enlarges the brood nest more rapidly and brood rearing continues without interruption. When the honey season arrives the Massie will be full of bees ready to work, while the colonies in other hives are just in good breeding condition. **The cover** is formed of a sheet of heavy **galvanized steel,** fastened to 2-inch dovetailed wood sides which fit down over the super. Inside top of cover is lined with strawboard held in place by wood cleats. Inside this is an inner wooden cover or escape board with space in center to receive a Porter bee escape. **The super** is 5⅝ inches deep and has thirty-two 4x5x1⅜-inch plain sections with foundation starters, eight section supporting slats, nine cleated fence separators and two flat steel spring clamps to hold sections securely together, leaving no space between for deposit of bee glue. **The brood chamber** is 7½ inches deep, has nine frames 15⅝ inches long and 7¼ inches deep, close fitting their entire height. These frames are hung in the hive by rivets on the end of each. Bees are excluded from the frame rests by removable wedges which also lock the frames, permitting the brood chamber to be inverted. When in place the ends of frames form solid inner end walls with air space between them and the hive ends. The frames may be handled singly or in pairs or more at once. A movable division board at each side of frames constitutes inner side walls with an air space between them and the hive sides. Two flat spring steel clamps lock frames and division boards securely together. The top bars of frames have grooves with wedges for holding foundation starters. Hives can be enlarged to 2 or 2½ stories by ordering extra brood chambers. The brood chambers can also be used as supers for extracted honey. **The bottom** is ⅞-inch thick, secured between interchangeable grooved side rails. The rear end of the floor is covered with a wire screen, with a removable slide over it which can be moved back to afford ventilation without disturbing the bees. A reversible entrance block regulates depth and size of entrance or closes it entirely. Shipped from factory in Western Iowa.

PRICES OF CYPRESS HIVES.

No. 32F3585a Crate of five 1½-story 9-frame Massie Cypress Hives. Wt., 155 lbs. Price.....$8.98

No. 32F3587a Crate of five extra 9-frame Massie Cypress Hive Supers. Wt., 50 lbs. Price.....$3.33

Dandy Bee Smoker.

A splendid smoker for the money. Has straight fire chamber; 2¾ inches in diameter. Gives good smoke when one has but a few colonies of bees.

No. 32F3540 Dandy Smoker. Wt., 1 lb. Price.....

Champion Bee Smoker.

The best smoker on the market, convenient and serviceable. Has 3¼-inch lined fire chamber made of heavy tin, beaded. Nozzle is hinged to top of bellows. The air passage between the bellows and the fire chamber compels all the air from the bellows to be forced through the fuel.

No. 32F3541 Champion Bee Smoker. Wt., 1¼ lbs. Price.....

Globe Bee Veil with Spring.

Made of French cotton silk face piece. Fine bars keep the veil away from face and neck. These bars to studs on the neckband of veil.

No. 32F3544 Globe Bee Veil. Wt., 5 oz. Price.....

La Reese Bee Escape.

Can be placed under hive supers which are crowded without smothering the bees. The hum of the bees below induces the upper bees to descend through wire cones in less time than with any other escape.

No. 32F3553 La Reese Bee Escape. Wt., 1½ lbs. Price.....

Porter Bee Escape.

To be placed in the honey board and saves the worry of smoking and brushing out of supers. Place the escape board and slip between super and hive next morning your bees are out of the super.

No. 32F3558 Porter Bee Escape. 2 oz. Price.....

Bee Brush.

Strongly made with soft pliable fibers, secured in a wood handle, long enough to reach across an ordinary frame.

No. 32F3565 Bee Brush. Price.....

Rubber Bee Gloves.

The most durable glove made of rubber applied to elastic material. Seams are sewed and cast like a kid glove. No gloves to come apart. Have long gauntlet with elastic bands to prevent bees from entering.

No. 32F3543 Bee Gloves. Price, per pair.....

1911 Model Improved Honey Extractors.

New improvements, consisting of ball bearings at top and bottom shafts upon which the inside mechanism revolves, and improved pocket hinges make them easier running and more durable than ever. Strongly made of galvanized steel, with conical bottom and supplied with anchor rods. The comb pockets are hinged inside of a pair of hoops. Combs in these pockets (after uncapping) are extracted from one side by a few turns of the crank, and then without the comb the pocket is swung around and more turns of the crank extract the honey from the other side. Intended for extracting sections by placing them in the pockets. Shipped from factory in Western Iowa.

No. 32F3575 Improved No. 1 Honey Extractor. Comb pockets, 22 inches in diameter, 29 inches high. Wt., 70 lbs. Price.....

ABOVE ILLUSTRATION SHOWS OUR No. 32F5211 X-L-ALL FARM FENCING.

WE GUARANTEE TO FURNISH YOU THE BEST MADE, THE EASIEST STRETCHING, THE LONGEST LASTING WIRE FENCING YOU EVER USED AND TO SAVE YOU MONEY ON EVERY ORDER.

BUY DIRECT FROM THE MANUFACTURERS when you buy wire ... and at a price which represents the actual cost to produce, with but our one ... We own and operate, at Knightstown, Indiana, one of the largest and most ... equipped fencing factories in the country. There we make every rod of fencing we ... sell every rod we make direct to our hundreds of thousands of customers at ... prices. We cut out the middlemen and save for you the jobbers', dealers', and ... giving you the highest quality, easiest stretching, and longest lasting fencing ... at a less price than your dealer pays for fencing which for height, strength, ... durability cannot compare with ours. Our line of fencing is complete. We manufacture a ... assortment of styles and sizes, among which you cannot fail to find the exact ... of fencing you need. Send us a trial order. Our fencing will prove to you ... our claims and make you one of our steady customers.

GUARANTEE THE QUALITY of wire used in our fencing to be the best. It is possible to produce and every wire to be standard gauge. We do not use undersize wire. Look well to this before buying ... that you get No. 9 wire when you pay for it, not No. 9½, and No. 12 when ... not No. 12½, and so on. We state in our descriptions the exact sizes of wire ... guarantee every wire to be full size, exactly as described.

GUARANTEE THE GALVANIZING of our wire to be the heaviest and best. ... ensure our wire is more rustproof and will withstand the ravages of time longer ... do not buy a fence made of lightly galvanized wire. It will soon rust out ... most costly fence you ever bought.

GUARANTEE PROMPT SHIPMENT. We own and operate our own wire fencing factory and also ... stocks of fencing ready to ship upon almost a moment's notice. Since we ... manufacture of wire fencing, this branch of our business has increased to such an extent as to make it necessary for us to erect new buildings and add new machinery year after year, until now our wire fencing plant is one of the largest and best equipped in the world and we are safe in saying that we are in a position to give our customers better service than ever and to favor them with more prompt shipment than any other wire fencing manufacturer in the country.

FENCING FACTORY AT KNIGHTSTOWN, IND.

WE GUARANTEE safe delivery of every order you send us. If by chance your shipment should be delayed or lost by the transportation company, we will either return your money or send you another shipment of fencing without charge.

WHERE WE SAVE YOU MONEY. We make ... fencing we sell. We cut out the jobbers' and ... Our prices to you represent the actual cost ... with but our one small profit added.

WE GUARANTEE perfect satisfaction with every ... you buy from us. We guarantee to furnish you fencing just as described in ... the best it is possible to make, and to fill your order correctly and promptly ... money on every order you send us or you may return the fencing to us at our ... we will return to you the money you paid us for it and freight charges.

ARE OUR FENCING WITH OTHER MAKES. Order a sample bale ... to make 100 pounds in weight, so that you may obtain every advantage in ... the same time order a bale from some other manufacturer or dealer and then ... and use which pleases you best. If you are not satisfied that our fencing ... you to buy, that it will give you better satisfaction and that you can see ... making from us, we do not ask you to keep our fencing, but to return it to us ... and we will return your money, with the freight charges you may have paid. ... judge and if the high quality and superior construction of our fencings do ... that we are entitled to your fencing orders, you will not be out one cent.

SUPERIOR CONSTRUCTION OF X-L-ALL FENCING is shown in the ... illustration of our 33-inch 8-line wire X-L-ALL fencing. In this illustration the ... necessarily reduced, but the method of weaving is plainly shown. Compare ... construction with that of any other fencing manufacturer and you will readily ... search of every claim of superiority we make for X-L-ALL fencing.

OUR INTERLOCKED STAY is a distinctive feature of X-L-ALL fencing and will be found in no other. Aside from the high quality of wire we use, this feature makes X-L-ALL fencing the best and enables us to produce it so economically that we can offer it at prices far lower than others are compelled to ask for fencing made of as heavy wires.

YOU PAY FOR NO WASTE WIRE WHEN YOU BUY X-L-ALL FENCING. Every pound of fencing is a pound of value. You will note that the vertical stay wires are in one continuous length and interlocked with the intermediate line wires. This enables us to do away with ties of all kinds, thereby effecting a saving of about 2½ inches of wire at every junction of the wires. This saving amounts to from 1 to 5 pounds of wire (depending upon the style and height) in every rod of fencing and enables us to produce a fencing of just as heavy or heavier wires than others use and in every way as strong as it is possible to make a fence, but weighing from 1 to 5 pounds per rod less. You get the benefit of this saving in our low prices.

X-L-ALL FENCING IS TRULY A WOVEN WIRE FENCING and (unlike other makes) not merely a series of horizontal and vertical wires held in place by wraps, staples or other devices. It is a closely woven fabric. The intermediate line wires and stay wires are each one continuous length and interlocked so that one wire reinforces the other, making the handsomest, strongest, stiffest and most elastic wire farm fencing ever produced.

YOU CAN DO WITH FEWER POSTS because the stay wires, not the posts, support the line wires. The number of posts you will require depends upon the use to which the fencing is put, but many of our customers set their posts two rods or more apart and find them sufficient.

X-L-ALL FENCING IS HOG TIGHT because the stay wires cannot slip on the line wires, neither can the line wires move up or down on the stay wires. Animals cannot possibly work their way through the meshes if the fencing is close enough to hold them when first stretched up. Every wire stays in place just where we put it when the fencing is made.

Our 33-Inch 8-Line Wire X-L-ALL Fencing.

THE STRAIN IS EVENLY DISTRIBUTED over the entire height of an X-L-ALL fence. No matter which line wire is subjected to strain, every wire in the fence stands its share and the entire fence springs back into perfect shape when the strain is removed.

NO CUT ENDS EXPOSED TO RUST. Other makes of fencing have cut ends at every junction of the stay and line wires, which rust quickly, giving the fence an unsightly appearance and making it short lived. Our interlocked stay overcomes this objectionable feature and also makes it impossible for moisture to accumulate at these points and cause the wires to rust out.

X-L-ALL FENCING IS EASILY REPAIRED because if a line wire or stay wire should break through accident it does not loosen up beyond the second wire and the fence will not sag or lose its shape until you have had an opportunity to repair it. It is a simple matter to repair broken wires by splicing.

LINE WIRES ARE HEAVILY CRIMPED and provide perfectly for expansion and contraction on account of heat or cold. This feature, together with our interlocked stay makes X-L-ALL fencing self regulating and gives it an elasticity so that it conforms to all kinds of ground and stretches up easily under all conditions. Some manufacturers subject their wire to a short bend or a V shape crimp in order to attain this object, but this method not only weakens the wire, but cracks the galvanizing and makes the fence more susceptible to rust.

READ THESE VOLUNTARY TESTIMONIALS FROM USERS OF X-L-ALL FENCING.

We print herewith a few of many testimonials received from our customers. We feel that we can offer no stronger evidence to support our claims than these bona fide letters from customers who are only too glad to tell us how well pleased they are with our fencing and how they appreciate the money we have saved them. We receive scores of such letters every day and if space permitted we could print thousands of others just as convincing. We will be only too glad to have you write any of these customers, asking about X-L-ALL fencing, but should you do so, be sure to enclose a 2-cent stamp for reply.

...ford, Maysville, Ky., R. F. D. ... I like the 41-inch Standard ... better than any fencing I ... and I have all kinds. I ... to slip the wires and get ... I think anyone can buy as ... anywhere for the same money. ... Everyone who sees your fence ... intend to put up more in the ... and you another order for ...

...ndley, West Acton, Mass., says: I ... my X-L-ALL fence likes it. ... wants me to get him 40 rods ... kind. Another says he paid ... rod for another make and I ... him one rod of mine for two ...

...wright, Bay View, Wash., says: I ... 30 cents per rod on the ... fencing bought of you.

...R. Harvey, Iowa, says: I saved ... buying X-L-ALL fen... rods more in the near future.

C. A. Catione, Knoxville, Ill., Box 212, says: The 100 rods of X-L-ALL fencing is more than satisfactory. I saved at least $7.00 on this order and could not have gotten a better fence.

L. S. Burgess, Flora, Ill., R. F. D. No. 1, says: The 80 rods of X-L-ALL poultry fencing and three gates received, and am well pleased. Saved 15 cents a rod by purchasing from you. Will send you another order in a few months, and some of my neighbors will join me.

John J. Miller, Bradford, Penn., R. F. D. No. 1, says: I am highly pleased with your X-L-ALL fencing and I did not have to wait one day after you notified me it would arrive. You saved me at least 30 per cent. Will call again.

J. W. Lint, New Paris, Penn., R. F. D. No. 1, says: Am well pleased with my X-L-ALL fencing. It looks fine and I saved $2.97 on the deal.

Joseph Rostiels, Paducah, Ky., says: Your X-L-ALL fencing beats all kinds in this country for quality and looks. Expect to get 100 rods more this fall.

J. W. Hoy, 569 W. King Ave., Columbus, Ohio, says: X-L-ALL poultry fence is easy to handle and the best all around fencing on the market. Everybody says it has every hog and chicken fence skinned a mile. I recommend it to everybody. I enclose an order for 30 rods more.

Lee Claybrook, 131 Hall St., Montgomery, Ala., says: I am perfectly satisfied with the X-L-ALL hog fencing.

Fred Heimlicher, 744 N. Randolph St., Champaign, Ill., says: I am well pleased with the X-L-ALL poultry fence. It is every bit as good as you represent it and makes a nice appearing fence.

William C. Zboller, Chatsville, Ill., says: Since 1887 I have used tons of wire fencing of all styles and makes and I find that all styles of your fencing are superior in lasting qualities, especially your X-L-ALL poultry fencing. It is better than any I have bought for the last five years. I have a stretch of your 58-inch X-L-ALL poultry fencing which in 1905 cost me 46 cents per rod and a stretch of ——— fencing which cost me 69 cents per rod. Both fences have been up the same length of time and the ——— fencing is about rusted out, while the X-L-ALL will easily last two or three years longer. This is either because your wire is better or because it is better galvanized.

Roscoe C. Day, Arthur, W. Va., says: I am well pleased with X-L-ALL fencing. It is better than any fencing sold here for 50 cents a rod.

...MY CHIEF CREAM SEPARATOR MAKES ANY DAIRY A MONEY MAKER.

HEAVY STANDARD X-L-ALL FENCING.

MADE WITH STAYS SPACED EITHER 6 OR 12 INCHES APART.

No. 9 — No. 12

SIZES OF WIRE USED IN HEAVY STANDARD X-L-ALL FENCING.

This is the best and strongest fencing we make because it is made of the heaviest wires. It is exceedingly strong and stiff and will last for years, and although it is the fence we must ask the most money for, it is really the cheapest in the end because there are more years of good satisfaction in every rod of Heavy Standard X-L-ALL Fencing than in any other fence you can buy, regardless of price. We recommend that you select this fencing with stays spaced 6 inches apart, especially if you wish to confine sheep or hogs. **Made in bales containing 5, 10, 20 and 40 rods. We do not cut bales. All orders for X-L-ALL Fencing are shipped direct from our big fencing factory at Knightstown, Indiana.**

Prices Reduced

NOTICE THE HEAVY SIZES OF WIRE USED IN THIS FENCING. DO NOT CONFUSE IT WITH ORDINARY POULTRY FENCING OR NETTING. IT WILL LAST FIVE TIMES AS LONG.

Size of Top and Bottom Line Wires.

STAYS SPACED 6 INCHES APART

No. 14

Size of Intermediate Line and Stay Wires.

This fencing was originally designed for poultry yards, lawns, gardens, orchards, stay wires and closely spaced line wires and stay wires make it an excellent fencing purposes, and we do not hesitate to recommend it as such. The smallest pig through its meshes and its wires are heavy enough to withstand any pressure stock may put upon it. While much lower in price than ordinary poultry will last at least five times as long, and it does not require either top or bottom rest it. The heavy top and bottom line wires are sufficient supports with posts and the fence will not sag or bag.

This has proven to be the most popular fencing we ever offered, and at the request of many of our customers we are now making it also in 23-inch and 34-inch heights, providing a close mesh sheep and hog fence and a stock fencing of good height which will serve ordinary farm purposes. If you are looking for a poultry fence, an orchard fence, a light field and stock fence, or a good all around farm fencing, we recommend the X-L-ALL Poultry and Farm Fencing as the best value you can possibly obtain. We sell more of the 58-inch height of this fencing and recommend it as the most desirable. Made in bales containing 5, 10, 20 and 40 rods. We do not cut bales. Shipped from our factory at Knightstown, Indiana.

X-L-ALL POULTRY AND FARM FENCING, PRICE REDUCED TO 19c A ROD

Has 12 line wires. Spaces between the line wires, commencing at the bottom, are 1½, 1½, 2¼, 2¼, 2¼, 2¼, 2¼, 2½, 2½, 2¾ and 3 inches, respectively. The interlocked stay wires are spaced 6 inches apart. Top and bottom line wires are made of No. 11 hard galvanized steel wire and the stay wires and intermediate line wires of No. 14 hard galvanized steel wire. This constitutes an ideal sheep and hog fencing, so closely the smallest pig cannot squeeze through its meshes and it is strong enough to chickens kind of hogs. Weight, per 100 rods, 552 pounds.

58-INCH X-L-ALL POULTRY AND FARM FENCING, 31 4/10 c A ROD

Has 20 line wires. Spaces between line wires, commencing at the bottom, are 1½, 1½, 2¼, 2¼, 2¼, 2¼, 2¼, 2½, 2½, 2¾, 3, 3¼, 3½, 3¾, 4, 4¼, 4½, 4¾ and 5 inches, respectively. The interlocked stay wires are spaced 6 inches apart. The top and bottom line wires are made of No. 11 hard galvanized steel wire, and the stay wires and intermediate line wires are made of No. 14 galvanized steel wire. We sell more rods of this height of poultry fencing than of any other and, taking the total sales of all heights, we sell more poultry fencing than the total sales of any other style of fencing in all its heights. This goes to show how exceedingly popular this fencing has become within a very few years' time. Weight, per 100 rods, 960 lbs.

DIAMOND MESH POULTRY NETTING

While we recommend that you purchase our X-L-ALL Poultry Fencing for making poultry fences, etc., We carry a complete line of poultry netting, because there are many times when nothing else will answer your purpose. Our Diamond Mesh Poultry Netting is the highest grade poultry netting on the market. Made from genuine Bessemer hard steel wire and always galvanized after weaving, which makes it last much longer than netting galvanized before weaving, because it is much more rigid and rustproof. There are inferior grades of netting on the market made from soft steel wire, galvanized before weaving. You will find our poultry netting to be easily worth double the price of inferior grades, because it will stretch up better, last twice as long and give you better satisfaction in every way. When to the advantage of our customers we will fill orders for poultry netting from stock at our Chicago store, or if we can save you in freight by doing so, we will ship direct from the factory in Massachusetts. Our poultry netting is put up in rolls 150 feet long. We do not sell less than full rolls.

No. 32F5450 Diamond Mesh Poultry 2-inch mesh, made from No. 19 standard size mesh most generally of our competitors sell this mesh made from No. 20 wire, which is enough to be serviceable.

HARVARD DIAMOND MESH WIRE FENCI

AN EXCELLENT GENERAL FARM, STOCK AND HOG FENCING. Extensively used for fencing fancy stock farms, private grounds, etc. Top and bottom wires are No. 9 hard galvanized steel wire, which is stronger and more durable than a cable made of two No. 12 or even lighter wires, such as ordinarily used by other manufacturers of this style of fencing. The double truss stays act as braces in every direction making a firm, solid and smooth fabric, and every cross in the woven wire acts as a spiral spring, providing elasticity as well as firmness. Line wires are heavily crimped on 4-inch centers. Crimping is done and allows for all expansion and contraction due to changes in temperature, stretching the fence tightly, smoothly and evenly. If you prefer a Diamond either our Standard Harvard or our Special Harvard Fencing will give you a satisfaction that of the same buy elsewhere. price. Made in ling 5, 10, 20 and do not cut bales.

SIZES OF WIRE USED IN HARVARD DIAMOND MESH FENCING.

20c A ROD AND UP SPECIAL HARVARD FENCING

Made in three heights: 25 inches with 6 line wires, 40 inches with 8 line wires, 48 inches with 9 line wires. Commencing at the bottom, first five line wires of the 25-inch fence are spaced about 4½ inches apart. In the 40-inch and 48-inch fence the first 6-line wires are spaced about 4½ inches apart. Remaining line wires about 9 inches apart. The double trussed stay wires are wrapped around line wires about 8 inches from center to center, making openings from 6 to 7 inches at their greatest width. Top and bottom line wires in all sizes are No. 9 hard galvanized steel wire. Intermediate line wires in the 25-inch fencing are all No. 12 galvanized steel wire; but in the 40-inch height, counting from the bottom, the second, fourth, sixth and seventh line wires are No. 12, and the other two intermediate line wires are No. 14 galvanized steel wire. In the 48-inch height the third, fifth and eighth line wires are No. 12 and the other three intermediate line wires are No. 14 galvanized steel wire. Stay wires in all heights are No. 15. Weights per 100 rods are as follows: 25-inch, 640 pounds; 40-inch, 806 pounds; 48-inch, 922 pounds. Shipped from factory at Knightstown, Indiana.

ORNAMENTAL LAWN FENCING

THE MOST ATTRACTIVE LINE OF LAWN FENCING EVER OFFERED. DESIGNS PATENTED.

Our line of Ornamental Lawn Fencing is the handsomest, strongest and most durable on the market, and our prices are at least one-third less than others ask for light, loosely woven fencing. We use more line wires in the different heights than are found in any other makes. The double twisted cable line wires are spaced about 6 inches apart and locked around the upright pickets with right and left twists, thus providing for contraction and expansion. Pickets are spaced 4 inches, apart. The bow pickets overlap each other, making fence stiff and strong at top, so that it cannot be easily broken down. Every order is specially woven in the exact lengths ordered, and the end pickets finished off square, leaving no ends. Sometimes during the rush season it may require from three to five days order, but you will be amply repaid for waiting a few days by receiving brig fencing fresh from the looms. We guarantee our fencing to be made of the full wire specified and to be made of the very best wire obtainable, heavily galvanized proof as it is possible to make. All ornamental lawn fencing will be shipped fro in Eastern Indiana.

PRINCETON LAWN FENCING.

Our best and strongest design. Double twisted line wires are made of two No. 12½ heavily galvanized Bessemer steel wires with right and left twists locking pickets. Continuous bow top pickets, also intermediate upright pickets are made of two No. 11½ galvanized steel wires twisted and formed under pressure. Fabric is closely woven and poultry proof. This is one of the most artistic designs ever produced and will add to the value and beauty of any home.

No. 32F5367 Princeton Lawn Fencing.

SINGLE WALK GATES, $2.35

Strongly made and artistic in design. Frames are 1⅛-inch outside diameter steel tubing, nicely painted. Filled with our Princeton lawn fabric, which is closely woven and poultry proof. The scroll top ornament adds greatly to the attractiveness of the gate. These gates are amply strong and suitable for all farm purposes, as well as for lawn fencing. Furnished with good hinges and a positive automatic latch. The fabric in all gates will be woven in a special panel to fit the gate, end pickets being finished off square. When ordered with any of our three styles of lawn fencing these gates will, if so ordered, be filled to match the fencing and will be shipped from factory in Eastern Indiana. When ordered with our X-L-ALL or Harvard farm fencing we can ship from our fencing factory at Knightstown, Ind.

X-L-ALL = ADJUSTABLE = FENCE POST BRACES

The only practical fence post brace on the market. Will keep your fence in permanent good shape. It is adjustable, and the tension on fence can be regulated at any time to take care of expansion and contraction caused by hot and cold weather. You can quickly tighten up a loose, baggy fence which otherwise might soon be broken down and ruined. Saves time and money. Can be attached in ten minutes, and no digging necessary. You can use lighter corner posts and fewer line posts. Adjustable to any height or kind of posts, round or square, wood or cement. Straightens up leaning posts and holds them straight against any tension. Made entirely of steel and iron and will last forever. Brace consists of a heavy steel pipe, a long threaded nipple with adjusting nut, a foot plate, post casting and a galvanized steel cable for bracing bottom of post and equalizing the strain. Made in three sizes: No. 5 with pipe 1¼ inches diameter, 5 feet long, suitable for a 40-rod stretch of fence; No. 7 with pipe 1½ inches diameter, 7 feet long, suitable for 100-rod stretch of fence; No. 9 with pipe 2 inches diameter, 8 feet 6 inches long, suitable for a 300-rod stretch of fence. Order one brace for line end or gate post; two braces for corner post. Shipped from factory in Northeastern Indiana.

Champion Combined Fence Stretcher and Wagon Jack, $4.38.

The most powerful stretcher made. The easiest and simplest to operate. One man operating the lever back and forth can accomplish more than two men with an ordinary stretcher. Stretches the fence within a foot of the post, and by setting the foot of the ratchet bar against the end post it enables you to stretch past it without setting an anchor post. Made entirely of iron and steel. Ratchet bar is 4½ feet long. Price is for stretcher complete with anchor chain and pair of 63-inch hardwood clamps with bolts. Can also be used as a wagon jack, post puller, pump lifter and for numerous other farm purposes. When ordered with fencing will ship from our fencing factory at Knightstown, Indiana.

No. 32F5384 Champion Fence Stretcher. Wt., 45 lbs.
Price.....$4.38

INDESTRUCTIBLE STEEL FENCE POSTS.

Line posts consist of rigid angle steel uprights in which holes are drilled at proper distances to suit all kinds of wire fencing, ...fencing to be fastened with tie wires. Corner and end posts are not drilled, wires should be wrapped around them. Can ...set in a concrete base, as shown in the illustration to the left, or if posts are wanted to drive we will furnish them ...listed at an extra charge of 1½ cents per post. Many form a concrete base by setting the post in the hole and pouring ...concrete around it. Height of posts given below is the height above the base or ground. Line posts are 20 inches ...and corner and end posts 32 inches longer than the heights we name. Prices do not include concrete bases. With ...molds you can make these for much less than what you would pay for freight on them. Full directions for setting ...posts and for making concrete bases sent with each shipment. X-L-ALL Tackle Block Fence Stretcher and Safety Hoist.

A combination fence stretcher and self locking tackle block or safety hoist. Can be used by hand or power and holds at any point without slipping. Every pound pulled on the rope equals four pounds on the wire. Consists of two heavy 63-inch hardwood clamps with bolts, a pair of broad steel clevises with chains and a pair of double sheave tackle blocks, one fitted with safety clevis to grip and hold the rope when the pull is stopped. Blocks are made for ¾-inch rope. Rope is not furnished. When used as a safety hoist with ¾-inch manila rope, one man can easily raise 600 pounds or a team 2½ tons and hold the load wherever it is stopped. When ordered with fencing will ship from our fencing factory at Knightstown, Indiana.

No. 32F5385 X-L-ALL Fence Stretcher. Wt., 48 lbs.
Price.....$3.98

HIGH QUALITY BARBED WIRE.

OUR BARBED WIRE is the best on the market. Barbs are sharp pointed and double twisted around the main wire, and spaced with greater uniformity than will be found in the lower grades of barbed wire. Our galvanized wire is thoroughly galvanized and is as rustproof as it is possible to make it. We furnish only two-point barbs, which make a neater fence than a four-point barb; it is easier ...and serves every purpose just as ...wire has barbs about 3 inches apart; ...line barbs about 5 inches apart. ...commonly wound on good sub-...stance and will be found much easier ...than the wire you ordinarily buy.

...ndard Barbed Wire.

...No. 12 wire, barbs are of No. 14 ...wire. The 80-pound spools contain from 90 ...of perfect wire and weigh about ...lbs. We sell full reels only. Shipped ...in Central Indiana.

Special Barbed Wire.

We recommend the purchase of this wire because in nearly every instance it will serve your purpose fully as well as heavier wire and in many instances much better. Has two cable wires made of 14-gauge wire, and barbs made of No. 15-gauge wire. This wire is easier to handle than heavier wire; it is also more elastic and will yield quicker to pressure. For this reason it is really less dangerous to stock. Put up on spools containing exactly 80 rods. We guarantee each spool to contain this amount of perfect wire. Full spools weigh about 57 pounds each. Shipped from factory in Central Indiana.

FACTS ABOUT THE NEW CHIEF

Year We Have the Pleasure of offering our customers the **Economy Chief Cream Separator,** the most sensational in the history of the en- eam separator business, its original features and new and very valuable ments in addition.

ou Know That the omy Chief was the first separa- sold at a fair and square sed on the factory cost single very reasonable dded? Before we entered with the Economy Chief rator manufacturers asked 5.00 to $150.00 for their s, according to size. This as mostly profit and the n paid the bill.

a Single Stroke these prices in half. We with agents and agents' ions, road men, canvass- ch houses and exorbi- s. We cut prices down with just a fair living ded.

Same Time we pro- duced real farm separator, a ma- without fancy frills, ball , friction clutches or other ated mechanism; one de- o stand the hard grind of everyday farm use; strong and et simple and without a single weak or complicated

We Tell You of its wonderful success? How our sales grew by leaps and from day to day, in the face of the most bitter op- on the part of the old line high priced manufacturers lers this country has ever known? Of lawsuits brought pretext, to intimidate us and our customers, and the s wild and foolish stories circulated and machines d by agents in their desperate effort to stem the great our business?

Spite of All, orders came to us fairly in floods. Running the factory night and day, its capacity as fast as machinery could be bought vered, buildings erected and men trained, we could all the orders. Many thousands of orders were re- ndreds of thousands of dollars returned to custom- e many of our friends waited months for their turn an buy any other machine.

ngly Each Separator We Shipped Out dozen others. Each year has seen the business grow. n immense factory filled with acres of the finest time ey saving machinery and over 600 skilled mechanics the year around are needed to fill the great and con- growing demand.

250,000 Economy Separators are now in use. They en themselves to be not only the greatest value for ey, but the best that any amount of money can buy. hardly a neighborhood where dairying is done in y cannot be found, and in thousands of communities taken the place of all other makes. Year by year the use of the Economy Chief has increased and of other machines decreased, until the Economy is today the standard cream separator of the United States.

"I see you are bringing a lot more cream, John. Been buying some more cows?"
"No; same old cows. But I bought an Economy Chief."
"Oh, that accounts for it. I notice when a man gets a Chief his cream checks jump up quick. Well, I say, three cheers for the Economy Chief! When all the farmers around here get them we will all make money."

Not a Dollar Has Been Saved in cost that has not been given to our customers in reduced prices or improved quality. We make each customer practically a partner, and as by improved methods and machinery we have reduced the cost, we have made an equal reduction in our price to the buyer. We pay no attention to what others ask for separators or what we might get. Our selling price is entirely regulated by the cost to produce, plus a fair rate of interest on the money invested, which is all we expect and the only true and fair way between seller and buyer.

Not a Year Has Passed in which the Economy Chief has not been improved, strengthened or simplified. When the experience of ourselves and our many thousands of customers has pointed to an improvement which could be made, it has been made without thought of expense. Our only aim has been to build the very best. This year is no exception, and while every one of the great original Economy Chief features has been retained, valuable improvements have been made which add much to the life of the machine and its convenience to the user.

The New Tool Shelf speaks for itself. A more handy device could hardly be imagined. The oil collector not only saves every drop of oil, but prevents all oil stains on the floor and will prove a blessing to the busy housewife, as well as a great economizer of oil.

The Double Thick Top and Bottom Plates and reinforced ribs on the skimming cores double their strength at the only points where there is any wear, making them practically as strong as if cut from a solid block of steel, and they should last almost indefinitely.

The New Removable Cream Tube Top can be easily unscrewed, and replaced with a new one in a minute's time by the user in case it should ever be bent or damaged.

The Improved Single Ball Bowl Bearing reduces friction and makes the easy running Economy Chief run still easier. The automatic sight feed oiler has been doubled in size. Bowl and machine wrenches are now made from forged steel, and many improvements in other details have been made.

The 1911 Economy Chief is as good as we know how to make it. We positively guarantee that you cannot buy a closer skimming or more simple and durable cream separator. Regardless of price, the Economy Chief is the best; not only the best at the price, but the best for any price, and is so guaranteed by us.

TAKE SIXTY DAYS' TRIA

AND SEE FOR YOURSELF

We Want Every Prospective Customer to Understand that the only way we have ever sold an Econ Cream Separator or ever will sell one is subject **sixty days' free trial** by the customer before he finally decides whether he will keep it or not. We never yet have tried force an Economy Cream Separator on anyone. We say that the sale is not closed merely because you have ordered the chine and sent us the money, and it will not be until you have had plenty of time to try the machine out for yourself and have found out just what it will do for you. We say if the Economy Chief Separator is not a paying investment in your estimation after having tried it for sixty days, you not only have the privilege of sending it back, but we **want** you to send it back and get all your money back. Should you decide after trying the Economy Chief that you do not wish to keep it and return it within the sixty days, we at once, without quibble or question, cheerfully return all your money. We go farther than this, we also return to you the freight charges which you paid when you received it from the railroad agent. It doesn't cost anything to try the Economy Chief Separator and we urge you to give it a trial because we are so sure that it will be a big money maker and work saver for you.

If You Have One Cow, **two cows, five cows, ten cows, or one hundred cows,** please order an Economy Chief Cream Separator on trial and find out just what it will do. We want every farmer in the United States who keeps cows to try it all at our risk and at our expense. They are saving $65,000.00 a day for farmers in the United States today, over $24,000,000.00 a year in money, to say nothing of the work saved, time saved and thousands upon thousands of homes made happier by their use.

It Is the Greatest Advantage of the Age for the Farmer. **Such a big money maker that the time is coming when every farmer who has even a single cow will have one.** Why not order one today on trial and find out what it will do for you? No risk at all on your part. You make no agreement, sign no contract or paper of any kind, simply send us your order according to our terms as explained on the following page, then after you get the separator try it for two full months. Skim all the milk you want to. Have the skim milk and cream tested at your creamery or test it yourself. Compare the income from your dairy after you start to use it with what it was before. Run it yourself and let your wife and hired man run it. Call the neighbors in to inspect it. Compare it with other machines in your neighborhood, and if at the end of two months you feel that you would rather have your money than the Economy Chief, just send it back and get all your money back, right away, including the freight charges which you paid when you received the machine.

Don't Think for a Moment **that ordering the Economy Chief puts you under any obligation to buy it.** The obligation is all on our side. We will thank you for the opportunity of putting one of these machines on your farm and you shall be both judge and jury. We accept your judgment gladly. If for any reason you don't want to keep the separator after trying it for two months you cannot do us a greater favor than to send it back. The mere sale of a separator with its few dollars' profit is nothing to us compared with the value of your good will, and we are going to do everything in the world within reason to retain it.

BEST AT ANY PRICE

We Will Be Glad **to have you test the Economy Chief alongside of any cream separator made,** regardless of price or maker's claims. Pay no attention to the price, but set the Economy Chief up alongside of a Sharples, United States, Omega, De Laval or any other separator sold at two or three times our price and give them both a good thorough tryout. If the Economy does not outskim the other machine on any kind of milk, if it don't give you more cream in better condition, if it is not stronger, more simple, more durable and more easily cleaned, if it is not easier to run, understand and handle, if you don't say after a good honest test that the Economy Chief will beat the other machine on every point, we will not only take it back and return any money paid us, but we will pay all freight charges both ways. We will do more than this. We will, in addition, pay you for your time in hauling the Economy Chief to and from the depot and for reboxing it for shipment.

We Do Not Know How **we could make this offer any fairer or more liberal.** We have confidence in the Economy Chief and are more than willing to put it to the hardest test in competition with the very best machine that any other maker can produce.

THIS SHOWS THE BUTTER A CREAM SEPARATOR WILL SAVE YOU

The Purdue University Agricultural Experiment Station for the State of Indiana made extensive experiments with the hand separator and gravity systems of creaming for the purpose of pointing out to Indiana farmers the best methods of reducing the loss of butter fat in the skim milk and improving the quality of the cream.

Send for Bulletin No. 116, published by the station at Lafayette, Indiana, and it will tell you all about it. Remember, this is a state institution, supported by the taxpayers, and these experiments were made purely in the interests of the dairy farmers, and for no other reason, so you cannot doubt the results.

These pictures show you how the butter fat lost in the skim milk from a herd of twenty cows in a year by the different methods looks if packed in standard 60-pound butter tubs.

OUR GREAT SKIMMING CHALLENGE TO ALL SEPARATOR MANUFACTURERS

The Economy Chief Is the Closest Skimmer in the World, Under All Conditions, and We Can Prove It. There Is No Other Just as Good.

We Will Give $1,000.00 in Gold

to the separator manufacturer who can produce a machine that will outskim the Economy Chief at temperatures of 50, 60, 70, 80 and 90 degrees. We make this offer to the makers of the De Laval, the Sharples, the Empire, the United States and every other machine sold in the United States. We have tested them all and we know what we are talking about. **The New Economy Chief ranks first. The best of the others is a poor second.**

OUR GREAT $1,000.00 SKIMMING CHALLENGE HAS BEEN WIDELY ADVERTISED FOR YEARS

It has been open to every cream separator manufacturer in the United States, is still open and has never been accepted. No separator manufacturer dares meet the Economy Chief in a fair and square skimming test. It simply outskims and outclasses all competitive machines on hot or cold milk.

ERE IS THE GUARANTEE WE GIVE YOU

rly All of Our Customers, **especially those who have dealt with us for some time,** will say a written **guarantee** with our goods is unnecessary, as our policy ating our **customers as** we would want to be treated ourselves eping every **customer satisfied** regardless of expense to ourselves known of them. Still, that every cream separator buyer may positively **secure and may** have the written evidence of it, we issue every **Economy Chief** Cream Separator we sell a written guaran- By it we **warrant** our machines to be perfect in material, work- ship and **operation** if properly set up and managed and further to replace **entirely** free of charge any piece or part which may out by **reason of defect** in material and workmanship for a period twenty years from the date of the purchase.

very Economy Separator **is built of the best material that money can buy.** It is made and mbled by expert workmen assisted by the most perfect machinery we can secure. Each separator is inspected carefully and given a thorough running test by power and by hand before it is finally ed for shipment, and it is rare indeed that we are called upon to ish a part or parts under our guarantee. Still there is a chance concealed under the surface of the metal there may be a flaw or

CERTIFICATE No._____

CERTIFICATE OF GUARANTEE

This is to Certify that the Catalog No._____ CREAM SEPARATOR, sold_____ Town of_____

State of_____ is warranted to be perfect in material and workmanship, and perfect in operation, if properly set up and managed. We agree to replace, free of charge, any piece or part giving out by reason of defect in material or workmanship, for a period of twenty years from date.

When referring to this guarantee, please do not fail to mention Certificate Number, and also bowl number, which will be found stamped on bottom of bowl of machine.

Dated at Chicago, this_____day of_____A. D. 19____

SEARS, ROEBUCK AND CO.

blow hole which cannot be detected by the keenest eye and which in years to come may give way in use, and while it is rare indeed that such a thing will happen, yet should it be the case our guarantee protects you. We replace the defective part free of charge, sending it to you with all transportation charges prepaid by us.

THE WAY TO ORDER

ou Have the Benefit of the Sixty Days' Trial **which we al- ys give on cream separators no matter how you order.** You get the twenty-year ironclad signed guarantee with your machine. You fully protected and cannot lose a penny whichever method of ing you follow.

ne Way of Ordering **is to go to your banker and get from him a letter saying that he knows you to be** ble (which you can easily do). Enclose this letter with your order will at once ship the separator selected. After you have had days' trial and are satisfied that the machine suits you in every we will send you a bill for it and you can then send us the money.

We Will Ship Any Separator on $1.00 Deposit **live east of the Rocky Mountains,** or on $5.00 deposit if you live of the Rocky Mountains, the balance to be paid to the express when the separator reaches your depot. This is a good way of ing, but has a slight disadvantage, as the express companies a charge of from 50 to 75 cents usually for the collection and n of the money to us. This is not a large amount, still by sending ash in full with your order you can save it, and it is, of course, worth saving.

ther Way of Ordering **is to send us no money at all.** Just drop us a line asking us to send you of our Certificate of Deposit and we will send you a certificate reads just like the one below.

CERTIFICATE OF DEPOSIT

_____State_____Date_____

RECEIVED FROM Mr._____

Cream Separator No._____ Dollars in payment of Sears, Roebuck and Co.'s Separator has been received by Mr._____ We agree to hold this money until the Cream ing in_____ and has had thirty days' trial, en we shall forward the amount to Sears, Roebuck and Co., Chicago, Ill. If Mr._____ is not perfectly satisfied with machine we will return his money to him on surrender to us of a bill of lading showing machine has been reconsigned to Sears, Roebuck and Co.

_____

You Can Take This Certificate to Your Local Bank in your own town and deposit the purchase price of the cream separator with your banker. He will fill out and sign the certificate and you can then enclose it with your order and we will ship the separator which you select as soon as we receive the order.

When the Separator Arrives take it home and use it for thirty days. Give it a good trial, and if at the end of thirty days the banker does not hear from you or if you let him know that you are satisfied with the machine he will send the money which you have deposited to us; or if you decide to return the separator to us within the thirty days simply deliver it at the railroad station and the railroad agent will give you a bill of lading.

Take This Bill of Lading over and hand it to your banker and he at once gives you back all the money which you deposited with him and we of course pay you back all the money that you paid for freight charges, so that your trial has not cost you a penny.

Please Understand that you have a full sixty days' trial. After the banker has held the money for thirty days and then sent it to us in case he does not hear from you, you have an additional thirty days' trial before finally deciding to keep the separator, or sixty days' trial in all.

The Best and Easiest Way of All, and the plan which is followed by nineteen customers out of twenty, is to simply send us the full price of the machine selected, with your order, either in the form of an express money order, postoffice money order, personal check or bank draft. As soon as we receive it we make prompt shipment of the separator. In a few days it arrives at your station and you merely call for it and pay the agent the small amount of freight charges due, take it home, set it up and use it for sixty days before finally deciding to keep it, and then if you don't want it send it back to us and we will promptly send back all your money and pay the freight charges both ways.

This Is the Simplest Way to Order. No bother, no extra expense, no running to the bank, no collection charges to pay to the express company, and we feel sure that if you adopt this method of ordering, as nearly all of our customers have done, you will find it to be the easiest, cheapest and quickest for you.

ved on a Stairway. Send for our Big Catalog of Mill Work and Building Material. SEARS, ROEBUCK AND CO., CHICAGO, ILL.

The Reason Why THE ECONOMY CHIEF IS THE DAIRYMAN'S FAVORITE—

The Economy Chief has always been built for everyday farm use. It is not made to show at fairs and exhibitions. There are no fancy fixings put in just for the sake of having something to talk about or to catch the eye of prospective customers, and give trouble forever afterward.

Agents' Machines are built to display a lot of so called talking points and selling features. The agent must have something new and something different from everyone else to talk about. His new feature may be of no value and is more than likely to be entirely impracticable for use in a farm separator, but it gives him something to talk on, and that is the main thing, for talk is his stock in trade.

The Economy Chief is built, not for show purposes, but to do the work, not only when you buy it, but for months and years afterward. Built to last indefinitely. There is almost no wear out to it with ordinary care. All the parts that are subjected to any wear whatever are removable and can be replaced, if need be, at a trifling cost.

The New Tool Shelf and Oil Collector.

This is one of the greatest improvements ever put on a separator. The oil collector saves every drop of oil and keeps the floor beneath the machine perfectly clean and free from oil stains. The tool shelf is of generous size. Plenty of room for screwdriver, wrenches, oil can, etc., and they are always within easy reach of the user.

It Is the Acme of Simplicity; really by far the most simple cream separator made. There are no fine adjustments for the user to make. It is adjusted just right at the factory when it is built, and stays that way. No ball bearings, cones, adjusting nuts, washers, etc., to fuss with; no clutches that do not clutch. Nothing for you to ever change but the cream screw, which is just a simple screw. If you want heavier cream, turn the screw in a little. If you want a lighter cream, turn it out. That's all there is to it.

Anyone Can Learn to operate the Economy Chief in a few minutes' time, even though they never before saw a cream separator. Every operation is so simple and so natural that directions are hardly required, although we furnish full and complete directions with every one.

There Is Nothing About It that requires a mechanic or a skilled workman. No tools are needed except the screwdriver and wrenches that go with it. Your wife, boy or hired man can run it and skim the milk just as well as the most accomplished expert. It's almost nothing to clean. Needs no special care except the ordinary oiling and cleaning any piece of machinery must have.

Has Very Few Parts and not a single weak or delicate one. Only one-half to one-tenth as many parts as other machines (by actual count some widely advertised machines have ten times as many parts as the Economy Chief). Only five parts to the Economy Chief bowl, instead of 40 to 50 separate parts as in some machines. Only three parts to the Economy Chief ratchet. Pinion and shaft are cut from a single steel bar. The worm wheel is pinned immovably to the shaft.

Adjusted Right at the factory and stays that way. How much better this is than having to bother with a handful of cones, balls, washers, nuts and set screws that are always working loose and giving trouble. Look out for the complicated machine that the agent sells. Many of them are filled with talking points for the agents and trouble for the user.

The Economy Chief Frame is a tower of strength. Strong and solid as a rock and will not weave or give while running. Scientifically built to give the greatest rigidity, and of ample weight. It is sanitary; easy to sweep or mop under; no corners for dirt to gather. No spilled milk, and the new tool shelf and oil collector prevents oil stains on the floor. It is the only separator that can be used in the kitchen without giving the housewife a world of cleaning to do.

The Crank is only 9½ inches long and is just the right height for easy turning without straining the back and arms. The supply tank is low enough so that a short person can pour a pail of milk into it without straining himself or splashing the milk, yet high enough so that dirt or dust is not likely to fall into it.

A Shelf Is Provided for the cream pail, raising it up from the floor. The skim milk spout is high. You can set a 10-gallon can under it easily. This is a point worth watching. On the so called low tank machines the skim milk spout is often so low that you can only put a small vessel under it, which must be changed continually, as it fills while skimming, usually splashing the milk over the floor and machine in making the change.

The Bowl is light and easy to handle, yet of enormous strength. The bowl spindle is of solid carbonized steel of the highest quality. All shafting is cut and turned from fine steel. Every moving part runs in extra long bearings of the genuine Harding formula phosphor bronze, the finest anti-friction metal in use.

Only Three Gear Wheels, all heavy and strong, and cut with the finest gear cutting machinery money can buy, insuring perfect accuracy and easy running. The supply tank is not made of pieces of tin soldered together in the ordinary way, but is drawn from a single sheet of heavy steel, smoothly without a wrinkle or sharp corner. No dirt and germ collecting or leaky seams in this tank. It will last as long as the separator

The Economy Chief is built complete in the big Economy tory. Most other makers buy nearly the parts from different manufacturers, as their output is not enough for them to put in the costly and expensive machinery essary to make the principal parts. They buy the gears already from one maker, the tanks from another, and so on, and merely ble these parts together and then sell them under their own label.

The Economy Chief Factory on the other hand is comp Not only the supply t and in fact all the tinware, but even the steel bowl shells are from heavy steel sheets in enormous toggle presses. The tinning cutting, nickel plating and other operations, even down to makin bolts and nuts, which all other manufacturers buy, are also done in the factory, the finest, largest and most completely equipped United States.

Every Economy Chief Separator is run by hand and an actual test by al inspectors. To insure its being perfect in operation it is then a long run by power, and from there passes to our final inspe men with long practical experience in handling separators and ming milk. They go over the separators from top to bottom every one. By years of experience they have become so exper they can detect the slightest irregularity in running, and any that shows the smallest imperfection in material, finish or operat rejected; only machines that are perfect in every detail are all to be packed for shipment.

It's Only by Building the Economy Chief complete in great factory, so that we know every bit of material in it is the best that money can buy for its pose and that every part is of ample strength and accurately ma careful workmen under our own supervision, that we can ship out as we do all over the United States on sixty days' trial. matched against any and all machines in the hands of expert age

The Economy Chief is built to compete with any cream se tor made at any time or any place. hands of the most inexperienced dairyman who perhaps has fore seen or at least run a cream separator, it must defeat the perienced agent who is an expert in covering up the weak poi his machine and showing up its good points, and it does it.

The Economy Chief cannot have a single weak point. If we could not send it out on trial do. About 250,000 Economy Chief Separators have been sent o trial and are now in use. They have met and defeated all the ment machines in the hands of experienced agents thousands thousands of times. The Economy Chief is simply unmatch simplicity and effectiveness. It outskims, outwears and out all competition.

Use It Alongside of any other machine and see for yourself much better it skims warm or cold milk much easier it runs, how simple it is compared with other ma how easy to handle, to clean and to care for. The Economy Chi won its place on pure merit as the most popular and biggest cream separator in the United States, simply because it is the b every way.

No Matter What Separator You May Favor or what agent dealer may tell you, do not close the deal for any machine at price without first trying it alongside of the Economy Chief. Re ber, it costs you nothing to try the Economy Chief. We will ship it to you for sixty days' trial alongside of any cream sep made, regardless of price or reputation, and you are to be the judge of which is the better.

We Do Not Ask You to sign any contract or agreement any kind. You are not under the obligation to us to keep the Economy Chief because you have or it on trial. If after your test you wish to return it to us, we w once without question return all the money you sent us and pa the freight charges both ways, so that your trial will not cost you much as a single penny. Send us your order on trial and let us you what the Economy Chief will do.

The New Reinforced Cores.

The skimming cores in the bowl are made this year with double thick top and bottom plates and ribs. As these are the only parts on which there is the rubbing or wear when the bowl is being put together or taken apart, the life of a bowl is more than doubled. The new bowls are also fitted with a removable cream tube top which may be easily unscrewed and replaced with another one if it should ever become worn or damaged by accident, saving the trouble and expense of returning the bowl for repairs. Everything that skill and care can devise is used to make the Economy Chief the strongest and most durable separator offered to dairymen.

School Furniture Guaranteed for Lifetime. Desks, $1.55, $1.65 and $1.7

GREAT ECONOMY CHIEF BOWL

IS THE ONLY ONE THAT WILL SKIM COLD MILK

THE ECONOMY CHIEF BOWL.

This Is All There Is to It.

OUTER SKIMMING CORE.

INNER SKIMMING CORE.

CENTER BOLT.

The Economy Chief Bowl **skims anything in the milk line that can be skimmed.** Skims warm or cold milk, new, old or mixed milk, strippers' milk, and milk from cows of all breeds and cows on dry feed. Skims milk in any condition right down to a trace so small that it can only be found by a fine chemical test. Skims perfectly clean for all practical purposes.

We Fully Guarantee the Economy Chief **to outskim any cream separator made, at all temperatures.** Some separators skim warm milk fresh from the cow nearly as closely as the Economy Chief, but when conditions for skimming are difficult, when the milk is old or cold, or from cows far advanced in lactation, they fail, waste cream, clog up and are useless. They one and all lack the wonderful reserve capacity, the great patented improvements that put the Economy Chief bowl in a class by itself as the only cold milk skimmer. The best separators of the other makes lose twice as much butter fat as the Economy Chief under average conditions; ordinary separators lose from five to ten times as much. Butter fat is by far the most valuable of all farm products, and you cannot afford to waste a drop of it.

To Get All the Cream **under all conditions, winter or summer, you must use the Economy Chief.** No separator is made or can be made that will skim the cream from thick, clabbered milk or milk that is so cold that it is partly frozen, as the particles of ice and slush will fill up the exits. But the Economy Chief will skim anything else.

In Winter **when the cows are giving but little milk,** you can mix the morning and evening milk and skim once a day if you use the Economy Chief. With any other separator you must heat the milk before you can skim it. Think of the labor of building fires and the fuel you must use if you are obliged to heat milk before skimming during the cold winter season, which means nearly six months of the year.

You Can Save **all the heavy lifting and fire building and the danger of scorching the milk** by buying the right separator in the first place, the only one which will skim the milk cold as well as warm. This is the patent protected Economy Chief that other makers dare not imitate. Close skimming under all ordinary dairying conditions is necessary if you are to make the greatest profit from your herd. Every drop of cream left in the skim milk means valuable butter fat lost. Some separators lose cream with every turn of the crank. None skim as closely as the Economy Chief.

You Have Read **our great $1,000.00 challenge offer on the preceding pages.** This offer has been made for years and widely advertised. Every separator maker knows about it, but it has never been accepted. They know from their own tests and from the experience of their in the field that their separator cannot compare with the Economy Chief close skimming.

ou Can Buy a Cow Every Year **with the cream that the Economy Chief will save** that other separators would if you are skimming the milk from a herd of ten cows.

ike All Really Great Original Inventions **the Economy Chief bowl is simple.** There are only five to it: The bowl shell, two skimming cores, center bolt and bowl cover. Yet this five-part bowl, because of its wonderful control of the separating currents of milk and cream so that every inch of its skimming surface is utilized evenly to its fullest extent, is more effective than the thirty or forty-piece bowls of less construction.

the Economy Chief Bowl **the milk is guided and controlled from the moment the whole milk enters the bowl** until separated skim milk and cream pass out their respective exits. The cream purified and velvety, and the completely separated skim milk also purified and aerated.

here Are No Conflicting Currents **and no remixing of milk already skimmed in this bowl.** The milk and are separated almost instantly under the influence of the centrifugal force, skim milk passing out at the bottom of the bowl and the cream at the top, and quietly. It is this perfect control of the separating fluid in the bowl prevents clogging in the Economy Chief and makes it such a remarkable cold skimmer.

he Dirt Collector and Purifying Chamber **is an original Economy feature.** Every drop of whole must pass through it before it enters the skimming chamber. Here all dirt, and other impurities are removed and deposited, and the purified milk passes through an equalizing distributer which feeds it into the neutral zone of the chamber, where under the action of the centrifugal force and controlled the patented Economy double opposed skimming discs it is almost instantly The cream as it passes out is regulated to any desired density by turn- a simple screw in or out. The dirt and impurities do not enter, the skimming at all, and both skim milk and cream leave the separator in better con- than the original whole milk.

he Economy Chief **has the nearest to a self cleaning bowl that has ever been invented.** The skimming cores are cleaned by the same great centrifugal force that skims the milk, more powerful than the strongest hand, acting upon every inch of the surface at once.

Clean It **requires but two or three minutes' time.** After the skimming is finished and the cream flushed out of the bowl while the bowl is still running, simply run through 2 or 3 quarts of warm water, to which a little powder has been added.

he Centrifugal Force **cleans the cores perfectly,** and when the bowl stops, remove them and you will find them clean, dry and shining like new. The casein that adheres to the inside of the bowl shell is quickly with the brushes we furnish. Rinse the tank and cream cover and the cleaning is finished.

Dirt Collector and Purifying Chamber.

This is an original and very valuable Economy feature. It is located between the cover and the top plate of the inner core. It receives all the whole milk as it enters the bowl, and by centrifugal force every particle of dirt is extracted from the milk and deposited here. Only purified milk enters the skimming chamber, and clean milk is not contaminated with the dirt from milk which as gone before, as it is when the dirt is deposited between the discs as in ordinary separator bowls.

Cream Regulating Screw.

The cream screw is located in the bowl cover and is easily turned in or out, to regulate the density of the cream, without removing the center bolt or cover. The Economy Chief skims the very heavy cream, so desirable for shipping, just as easily as light cream. The cream is delivered in elegant, smooth, velvety condition, free from froth or foam.

Digitized by Google

Although the Economy Bowls are so light and small, because of their scientific construction they easily o bowls twice as large, weighing 12 to 15 pounds and containing thirty to forty parts. They measure but 3 3-16 inches inside diameter, and other bowls are clumsy and hard to handle compared with

The Bowl is the most important part of any cream separator. The Economy bowls save valuable cream that is lost by less perfect ones. They have the fewest parts of any and are the easiest to clean. Careful dairymen with own best interests in view have found they can use no other. Nearly 250,000 are now in use.

PHOSPHOR BRONZE BEARINGS.

We Use the Genuine Harding formula phosphor bronze in all of our bearings. This is the finest and most du anti-friction metal now in use. Harding formula phosphor bronze is not only expensive very hard and difficult to work. It can only be turned and drilled slowly, which adds to the cost of the finished parts, bu use it in the New Chief because it is the best material for this purpose and will last the longest.

We Do Not Use wrought bars or tubing, but turn each bearing out of a solid cast block so as to get the material hardest and most durable form. The pinion shaft bearings, for example, are each 1⅜ inches long, a bearing surface of 2¾ inches, with an oil well in between. The crank shaft, although a slow moving part which few ufacturers bush at all, runs in two Harding formula phosphor bronze bearings, each 1½ inches long, giving 3 inches of friction bearing surface. This is a costly construction, but it makes the Economy Chief outlast every other separator a the end it pays to use it.

Some Makers Use cast iron bearings. Some do not use bearings at all for the slowly moving parts, but simply run

SIMPLE AND STRONG IN DESIGN

The Automatic Sight Feed Oiler.

Feed Oiler, Showing the Continuous Oil Feed Into the Upper Bearing.

This is a sectional view of the Economy Chief sight feed oiler and the tube that carries the oil to the upper bowl bearing. Because of the high speed of the bowl this bearing must be continually supplied with oil while the separator is in operation. The amount needed is very small. Three or four drops a minute is the proper feed, but the supply must be regular. Our sight feed oiler is easily regulated to feed the desired quantity by turning the knurled nut at the top, and after being once regulated needs no further attention except to start and stop the flow of oil, which is done by simply raising or turning down the top lever. We have doubled the size of the oiler this year. It is made from solid brass, nickel plated, and has a glass sight feed through which the flow of oil can be easily seen.

The Main Driving Gear.

This is a splendid example of scientific gear cutting and is as accurate as human skill and the very finest automatic gear shaping machinery can make it. Each gear is perfect. Its teeth are all exactly alike and properly spaced apart so that the gears run perfectly smooth and without noise. The crank shaft is ⅞ inch in diameter and turned from a solid bar of tough carbonized steel so that there is no chance of its springing or bending.

The ratchet plate on the opposite end of the crank shaft from the drive wheel is a solid steel forging, drilled and fitted to place. Shaft runs in two phosphor bronze bearings, each 1½ inches in length, giving 3 inches of anti-friction bearing surface. We use these removable bronze bearings for every moving part.

Main Drive Wheel With Shaft and Ratchet Plate.

The New Lower Bearing.

The lower bowl spindle bearing consists of a single hardened steel ball revolving freely in a phosphor bronze holder and resting upon a diamond tempered tool steel point in the lower adjusting screw. The hardened steel point in the end of the bowl spindle rests on this ball and the bowl spins like a top on it, making a nearly perfect frictionless bearing. A fine phosphor bronze bushing surrounds the spindle and provides for lubrication. Should either the points or the ball ever show wear, which is unlikely because of their quality and fine temper, they can be easily removed and replaced at a trifling expense. This frictionless lower bearing in combination with the flexible upper spindle bearing, which centers the bowl and permits it to run at high speed almost entirely without friction, are two great reasons for its light and easy running which has made the Economy Chief famous.

Frictionless Lower Bearing. One Reason Why the Economy Chief Runs So Easy.

Seamless Sanitary Supply Tank.

The Never-Slip Ratchet.

This is the simplest and best ratchet of all. Only three parts to it: the forged steel ratchet plate, the hardened tool steel pin and the single strong tempered spring. Nothing to get out of order, always positive and never fails. No slipping or loss of speed, as with complicated friction clutches. No weak delicate parts working under an excessive strain, as in spindle and pinion ratchets. When you stop turning the crank the bowl and gearing run down together, stopping the bowl quickly without undue wear upon any single part, as the wear is distributed over all the moving parts evenly and is not all upon one or two parts, as it is where other ratchets and clutches are used.

X-Ray Picture of the Never-Slip Ratchet. It's Positive and Never Fails.

Sanitary Supply Tank.

The Economy Chief supply tank is drawn from a single piece of heavy steel without a seam or joint. It has full rounding corners, making it sanitary and easily cleaned. The new circular gutter drains it quickly and to the last drop. It is extra heavily retinned and provided with a broad flanged rim at the top, making side handles unnecessary, and it is conveniently lifted from any position whether full or empty. The Economy factory is the only one drawing their own seamless tanks from steel sheets.

X-Ray Picture of Our Automatic Self Centering Upper Bearing.

Supply Tank Faucet and Quick Draining Gutter.

The Upper Spindle Bearing.

There is an X-Ray picture of our flexible upper bearing. It surrounds the bowl spindle just below the bowl and centers it. If a jarring jar or shock causes the bowl to swing or wobble this flexible bearing quickly brings it back to its true center. It is an ingenious patented device and is positively and automatically self centering. The phosphor bronze spindle bearing is set in a heavy steel block which rests on a conical rim and is centered by springs at the bottom. It acts gently and positively and centers the bowl without noise or jar.

Supply Tank Faucet.

The new faucet is made complete with drainage channel all in one piece. It is cast from solid brass and handsomely nickel plated. The bore is extra large, insuring an even flow of milk into the bowl whether the tank is full or nearly empty. The key is removable for cleaning and an improved rest takes the weight of the tank and its contents from the end of the faucet when it is standing on a table or flat surface.

The Pinion, Shaft and Worm Wheel.

The pinion gear is driven by the large gear wheel. It in turn drives the bowl through the worm wheel on the other end of the pinion which meshes with the worm on the bowl spindle.

The pinion and shaft are cut complete in a single piece from a solid bar of carbonized steel. The worm wheel, which is of fine phosphor bronze has an extra wide bearing hub and is pinned solid to the shaft. There is no chance to slip and no nuts or washers to come loose.

There also the long anti-friction bearings. Although this entire part weighs but 2¼ pounds, it has 2¾ inches of bearing surface with a good size oil well in between the bearings. This is an almost wearproof construction. We ran an Economy Chief with power for 8¾ hours each working day during an entire year and at the end of this test the gearing was practically as good as new, showing almost no wear.

Pinion Shaft and Worm Wheel, Showing the Extra Length Phosphor Bronze Bearings.

The 1911 Economy Chief was designed and is built by the world's greatest cream separator experts. The records of the patent office of the United States and other countries prove them to be in the very forefront of cream separator development and construction work.

The Open Frame.

All gears in the Economy Chief are fully and carefully protected, so that it is impossible to catch the clothing or injure the fingers. In addition the high speed gear and the bowl spindle are encased and protected from dust and moisture. When it is necessary to clean the inside of the machine or inspect the gears, the gearing cover is easily removed so that the entire inside of the frame is exposed and easy to get at. It is impossible to get at the gearing in most separators, but in the Economy Chief it is so easy that you can always keep it in a clean and sanitary condition inside as well as outside.

Only the best material is used regardless of cost. Nothing is skimped in size or quality. Each part is generously large and amply strong.

Frame with cover removed, showing how easy it is to reach and clean the inside and gearing.

AGENTS' HIGH PRICES · EXPLAINED

The Cream Separator Agent must say something to excuse the big price he asks you for his machine and he usually tells you that he is obliged to charge more because his separator is made of better material and has some wonderful improvements that make it worth the big difference in price.

Of Course there is nothing about his machine that backs up his claim. As far as you can see when you compare it with the Economy Chief the Economy Chief appears to be finished even better than his. The Economy Chief frame looks to be even stronger. The Economy Chief gearing is plainly more simple and when you come to skim with both machines and have the skim milk tested you find that his machine is not nearly as good a skimmer and leaves from two to ten times as much butter fat in the skim milk as the Economy Chief.

All Other Cream Separator Makers Know This. They know that any sensible man using the two machines side by side will see that if there is any difference it is all in favor of the Economy Chief, so these makers resort to what is known to the trade as mechanical freaks so they will have some grounds to explain the difference in price.

Mechanical Freaks are complicated contrivances used sometimes on one part of the separator and sometimes on another part. They are usually composed of a large number of small parts, balls, springs, cams and other devices and while they are delicate and almost impossible to keep in order they merely take the place of some single, simple piece and are used just to fool the public and give the maker a chance to make a great noise about the extraordinary merit of his machine because of the particular freak that he is advertising.

For Example, one agent says: "My machine has ball bearings all the way through." You say: "Take one of these ball bearings apart and let us see what it looks like." The agent will try to dodge this question, but if you insist he will probably say: "Well, there are twenty or thirty loose balls, cones, nuts, washers and other parts to each one of these ball bearings and I am afraid if I take it apart I would not be able to get together right. The work of assembling these bearings is done by the experts at the factory." You say: "Why are these intricate ball bearings better than the simple one-piece anti-friction bearings used in the Economy Chief?" The agent replies: "They cost more to make, so they must make my machine run."

OLD CREAM SEPARATORS

OF ANY MAKE TAKEN IN

EXCHANGE

AS PART PAYMENT FOR THE NEW BIG CAPACITY ECONOMY CHIEF

WRITE FOR OUR **Liberal Cream Separator Exchange Offer.**

When You Run Both Machines, you find the Economy Chief runs the easier of the two. Then the agent, of course, will explain this by saying that his is a same machine and has had rough handling and does run as easy as the machine which you will (This is so; provided you buy the Economy Chief.)

Another Agent has a machine with a wonderful friction clutch more works to it than a Waterbury watch ought to be better than the simple and reliable pin and spring ratchet, but it is. other has a great self balancing bowl spindle that runs in bearings from end Ball bearings, spring bearings and plain ings. Nothing but bearings. About one dred and fifty parts in all and all rattling around trying to keep up with marvelous self balancing bowl. All his needs now is a self balancing spindle. on through the line, each of the high makers has his own pet mechanical freak every freak is different from the other freak. Each agent says that the particular that he furnishes with his machine is the freak of all and that is the reason why he charge double prices for it.

But You Don't Want Freaks, not spending money for foolish contrivances are no earthly advantage over plain simple struction and that take an expert to tinker them up so they will work. What you want is a good strong simple machine doesn't require any adjustment, one that will stand the knocks of everyday farm use, one that anyone can use and anyone who can turn a crank can run. A machine always ready for use when you are ready to use it.

THE TRUTH ABOUT THE PRICE

No Cream Separator Made, now or ever made, has any better material in it than the Economy Chief. There is no machine that is stronger, more carefully and accurately made or adjusted. It has not a single mechanical freak in it anywhere. Not a delicate complicated part. We don't charge two prices for our machine as the agent does and we don't need any freak contrivances as an excuse for doing so. The real and only reason that you must pay the agent double prices if you buy from him is that there are too many profits between the manufacturer and you. The agent alone makes many times our profit. His share of your money when he sells you a separator is usually from $15.00 on a small size to $25.00 on a large size. He gets the machine from the state agent, who is not in business for his health, but takes $10.00 to $20.00 more of your money as his share. Back of the state agent is the jobber and he gets another $10.00 to $20.00, according to the size of the machine, and finally the factory must have their profit. Now, if you will deduct all these profits from the price the agent wants to charge you the secret is out. The machine itself doesn't cost a cent more to build than the Economy Chief. The most of your money goes to pay a lot of profits and less than half of it for the machine itself. The high priced machine doesn't cost a cent more to build than the Economy Chief.

We Will Give $1,000.00 to Charity if any high priced maker or agent can prove that his machine contains better material or is more carefully and accurately made than our Economy Chief. The agent's machine at $100.00 costs not a penny more to build than the Economy Chief at $42.50. The difference in price is all profits and you are lucky if you get $42.50 in real value when you pay an agent $100.00 for his machine. When you buy the Economy you pay just the factory cost with one very small profit and that is all. If you buy from the agent you pay the cost and three or four big profits, any one of them several as much as our small profit.

Don't Let the Agent Fool You. He is an expert and makes his out of the farmers with his tongue. Pay no serious attention what he says. Remember, you are not buying salesman's mere talk never skimmed any milk yet. You are buying a to skim milk, and it's your place to see that you get your worth. We say, let the agent put in his machine on the wants to, but don't pay him any money or sign any agreements. Then for your own benefit order an Economy on sixty days' trial, as explained on page 1146 (we always sixty days' trial), and set up and use the two machines side, day after day, on your own farm. Give them a g test and at the end of two months you will have no making up your mind which is the best and you can back the one that you don't want. If you return the Chief we give you back all the money, every cent you paid not only that, but we return to you the freight charges paid when you took the separator from the depot. Nobody is

Look Out for Your Own Interests. ing you three big profits on the farm truck you sell, why should fancy prices on the goods you buy? It pays to be a close and make your cash go as far as you can. Get your worth by ordering an Economy Chief on trial. It is separator sold on a single small profit over the factory build.

THE BEST PAYING MACHINE ON THE FARM

he Old Ways of Gathering Cream are not only out of date but **ost sinfully wasteful.** The old fashioned way of setting the k in pans or crocks and waiting for the cream to rise causes ss of from one-third to one-fourth of the butter fat which er comes to the top and is fed to the pigs in the sour skim k. If you use the deep setting or Cooley can system and e the cream in tall narrow cans plunged in ice water you can a little better but your loss is still a serious one.

e So Called Dilution System by which cold water is mixed with the milk re setting it aside to cream is the very worst of all. The n is thin, poor in quality and there is not much of it. The r skim milk and water that is left is useless for food and als grow poor while drinking it.

uling the Whole Milk to the Creamery is another wasteful as the cost of the double hauling eats up nearly your e profit if you pay to have it done or takes a large part of valuable time if you do it yourself. The skim milk from creamery is more than likely to contain contagious germs nfected animals in other herds and may spread tubercu- lumpy jaw or other deadly disease among your young stock.

ere Is Just One Way to make the biggest possible profit from your cows, and that separate all the butter fat from the fresh milk as soon as milking is finished, while it is still fresh and in perfect con- n. Then you will have the sweet skim milk still warm with animal heat of the cow, full of nutritious and life giving ties and worth ten times as much as the old sour milk feeding. In fact, the addition of a little chopped corn or al to the sweet skim milk makes it fully equal to whole for feeding at a very trifling expense.

y the New Economy Chief Separator and separate your m from the milk at home just as soon as the milking is fin- and whether you sell the cream or make and sell butter have solved the profit problem in your dairy. The Economy will make it a sure money maker at all seasons of the year. practically every bit of the value out of the milk and gives products in the very finest condition while they are of the test value for yourself and others.

The Day You Start to Use the New Economy Chief, the hard, tiresome work of the dairy disappears and the market value as well as the quantity of your dairy products increase. You are proof against ordinary bad seasons or crop failures. From the sale of butter or cream there is a continual stream of money flowing on to your farm, the soil is growing richer and more fertile and the harvest is not confined to one season, but is continuous.

The New Economy Chief is a simple, strong, light running machine. Nothing complicated or mysterious about it. You don't have to be a mechanic or know anything about machinery to use it. Your wife or hired man or a half grown boy can run it just as well as you can. But simple though it is, it is the most wonderful money maker and profit saver that was ever set up on a farm. Any one can understand it at a glance. Anyone can run it.

You Simply Pour the Milk Into the Tank as fast as milked or as soon as the milking is finished. Turn on the faucet which lets the milk into the bowl and turn the crank. A stream of the finest pure, smooth cream of any desired density comes from one spout and the sweet, fresh skim milk from the other. It separates the milk from the cream at the rate of a milk pailful in from two to four minutes, according to the capacity of the machine. The cream is perfect, sweet, smooth and velvety and of any desired consistency from the thinnest to the heaviest, just as you regulate it. It has been freed from germs and dirt in passing through the Economy bowl and when cooled will keep three or four times as long as the old sour cream from the pan raising system. The skim milk purified and aerated is in the best condition for feeding.

Instead of Getting one-half or three-quarters of the butter fat from the whole milk in poor condition, you have taken practically all of it in the very finest condition and the Economy Chief has made the difference. The dairy work is so easy. A half hour after the milking is over the skimming is finished, the separator washed and the cream set aside to cool in a single can. The sweet milk has been fed to the stock and the dairy work is over. Instead of 100 pounds of milk to handle you have but 10 pounds of cream. Only one can to scald and wash where you have had twenty pans before. No old sour milk standing around, no tiresome hand skimming, no long hauls to the creamery. You hardly know you have cows, they are so little trouble, and the best part of it is that you will make several times as much profit from each cow as you did before using the Economy Chief.

SEPARATOR CREAM MAKES THE FINEST BUTTER

e Wonderful Economy Chief Bowl has a purifying chamber through which the milk and cream pass before entering the ming chamber which removes dirt and germs that may opped into the milk after leaving the cow. The cream ted and delivered in the smoothest and most velvety con- ree from froth and foam and containing any desired age of butter fat. After being cooled it will keep in condition much longer than any gravity raised cream has been spread over the top of the sour milk for hours, ing dust from the air and rapidly fermenting.

e Economy Chief Separator will skim a cream of any consistency, the thinnest to a cream so heavy that it will scarcely flow. big advantage to skim a 30, 40, 50 or even a 60 per cent as you can do with the new Economy Chief.

The Saving in churning separator cream alone amounts to 15 or 20 pounds extra in the course of a year from the milk of a single cow. Separator cream can be shipped hundreds of miles if necessary, so that you have the benefit of a broad market and can always sell at the highest price. In shipping it is very important to ship rich cream, as a can containing rich cream may contain twice as much butter fat as a can of thin cream, and although the value is twice as much the freight is no more for rich cream than for thin cream, so the transportation charges are proportionately only one-half of what they are when a thin cream is shipped.

Separator Cream churns in about one-half the time of gravity raised cream and much more completely. The butter granulates quickly; there is less buttermilk and less fat left in the buttermilk.

SWEET SKIM MILK IS BEST FOR YOUNG STOCK

e Sweet Skim Milk From the Separator, fresh and purified, warm with the animal heat of the cow, aerated and cleansed ssing through the bowl of the Economy Chief, is splendid r young animals, and they thrive on it. They grow big and flesh rapidly, for it contains all the protein of the whole the rich nutritious sugar of milk, the casein—everything ry to build muscle and bone rapidly and cheaply. The at alone is lacking and this simply supplies the animal heat e fat producing elements. A little chopped corn or oilmeal, cent a pound or less, takes the place of the butter fat and the skim milk just as good for the calf as sweet warm milk om the cow.

ves and Pigs brought up on a sweet skim milk diet grow rapidly and at the end of the first re strong and healthy and in more marketable condition ey would be at the age of two years if fed old sour milk. kim milk makes a splendid food for chickens and careful feeders value it at not less than 50 cents per hundred for this purpose when fed with cornmeal. In the vicinity s and cities it is in great demand by bakeries and is very as human food.

't Continue to Raise Sickly, Stunted Stock sour milk, for they are a drug on the market and hardly the time and trouble of bringing them up. Use the Economy Chief. Feed nothing but sweet, nutritious skim milk and raise stock that you will be proud of and can always sell easily at a big price.

Separator Butter always brings the highest price. If you will turn to the market report in your daily or weekly paper you will see that separator or creamery butter sells for from 3 to 10 cents a pound more than dairy butter at all times. Even in the spring when butter is most plentiful there is always a greater demand for high grade butter than can be supplied. Use the Economy Chief and you can easily make butter of the finest quality.

The Cream Has Been Purified by passing through the separator. The dirt and harmful bacteria have been removed. It is smooth and velvety and in just the proper condition to be ripened for butter making. It ripens evenly, churns completely and quickly, and with the proper care the grain of the butter is perfect, the flavor unsurpassed and in keeping qualities it has no equal. It is worth more than dairy butter made from gravity raised cream and always brings more.

Use the Economy Chief and you will be surprised to see how easily your butter will sell and the high price it will bring. Hundreds of our customers have told us that they are now getting from 8 to 10 cents a pound more for their butter than they did before buying a cream separator and many have said that the increase in the selling price of their butter alone has paid the whole cost of the Economy Chief the first season.

MAKE YOUR DAIRY A SURE MONEY MAKER

Don't Hesitate, don't put it off, but start on the easy and profitable way of dairying by ordering the new Economy Chief this very day. Sell a cow if necessary. Three cows and an Economy Chief will pay you much bigger profits than four cows without one, for you will double your profits and save the board of the extra cow and at the same time make your dairy work so easy that it will seem almost like play compared with what it was before.

The Economy Chief will pay for itself the first season if you have three cows and pay for itself ten times over in a season with thirty cows and will continue to make money for you at the same rate for many years to come. Your dairy work is so quickly and easily done that you can double your herd and hence your profits, and still your work will be less than it was before. You will have a sure, steady cash income all the year around. Whether other crops are good or fail, the dairy crop never fails. Your cream money or butter money is coming in in cash in a steady stream every month. When prices for other farm products are high butter and cream bring a high price also. When prices are low the price of good separator butter is the last to fall, as the demand is greater than the supply. Your farm grows richer year by year. Your dairy herd keeps up the fertility of the soil and saves you the expense of buying high priced commercial fertilizers. The butter fat which you sell contains almost no plant food and the skim which you feed loses practically none of its fertilizing v passing through the animal.

Don't Delay but order an Economy Chief right away, we guarantee that the results will surpris Your result will be better cream and more of it. Cream density from the thinnest to the richest. A big reduction in work. Better butter with less churning. Sweet, pure skim in the best condition for feeding. Larger and better calv swine. Bigger prices for everything, for butter, for crea for stock. Do away with the spring house, the creame cellar and the ice house, the handling and hauling, the drudgery and the labor of building fires and washing ca heavy lifting and the wear and tear on man and beast in th hauls to the creamery.

There Is a Sure Profit for You in the new Ec Chief. A pr every turn of the crank, week days and Sundays, all th around. You will get big returns and make big money one-quarter the labor and time that you have spent he in striving for small profits, or perhaps no profit at al have tried in these pages to tell you about the Economy in a plain, honest way. But the best way is to find yourself just what it will do for you under your own farm ditions. Order one on sixty days' trial. That's the way out. Don't put it off, but order now—today.

WE CAN FURNISH ANY REPAIRS AT ANY TIME

We Have Very Little Call for Repairs for Economy Chief Cream Separators, as there are so few parts that ever give out in use that it is rarely a repair is needed.

Repairs Are Free if they come under the terms of our twenty-year binding guarantee, and they go to you with express charges prepaid so that you are not put to a penny of expense. If, however, it is necessary to replace a part giving out through natural wear or a part broken through accident which is not covered by our guarantee we charge you only about one-half as much as other makers would charge you for similar repairs.

We Carry a Complete Stock of Repairs for all Economy Separators, old and new, at Chicago and of course another stock at the factory and in addition we have a complete repair shop cago where we are equipped to do bowl balancing, rebu and separator repairing of all kinds.

Our Prices for both repairs and repair work are ver Our repair shop is run at an actual los benefit of our customers and we sell repairs at just enough over the cost to cover the handling expense.

We Guarantee to Furnish any needed repair f Economy Separator chased from us, whether it is in one, five, ten or twenty from now or take back your machine and return the fu chase price. This guarantee relieves you of any anxi the question of repairs.

FREIGHT CHARGES AMOUNT TO VERY LITTLE

So That You Can See how small the freight charges on cream separators are, how little they amount to compared with your saving by buying a separator of us, we print below a table which gives you the freight rates per 100 pounds on cream separators from the factory at Waterloo, Iowa, to points in each state. The average shipping weight is about 200 pounds and the freight rates to your town will be almost exactly the same as they are to the town which is nearest to you.

You Will Notice That the Freight Charges are a very item, indeed when you consider that your saving in buying a cream separator is from $40.00 to $85.00, you will see that the freight charges are that they are hardly worth considering when compared with the b which you make.

PULLEYS FOR POWER.

We Can Furnish Either a Solid or a Friction Pulley for use with our Economy Chief Cream Separator when it is to be operated by a gasoline engine, animal or other power. These pulleys fit all sizes and are attached by simply removing the crank and replacing it with a pulley which is fastened on with a bolt the same as the crank. The pulley should revolve at the rate of sixty turns a minute and the belt should not be too tight.

We Advise the Use of the Friction Pulley, which enables you to start the separator slowly and bring the bowl up to the proper speed without strain on the gearing. If operated with a gasoline engine the best results can be obtained by using a countershaft with tight and loose pulleys.

No. 23F127 Solid Pulley to attach to crank shaft. Size, 12 inches in diameter and 2-inch face. Shipping weight, 22 pounds. Price $1.25

No. 23F128 Friction Pulley to attach to crank shaft. Size, 14 inches in diameter and 2-inch face. Shipping weight, 32 pounds. Price 2.25

We Cannot Furnish Pulleys to Fit Separators of Other Makes.

RUBBER BOWL RINGS.

17.90 FOR THE 1911 Economy Chief Cream Separator

With the New Tool Shelf and All the Latest Improvements

AGENTS ASK $60.00 TO $70.00 FOR THIS SIZE.

$27.90

We Were the First to offer cream separators of the very finest quality and highest grade at just a small profit over the actual cost of the material and labor. Why pay agents big prices for cream separators that don't equal the wonderful 1911 Economy Chief Separators?

THIS IS OUR LATEST AND BEST MACHINE

A new skimming wonder, the $1,000.00 challenge cream separator with all its improvements, sold only by us, and with more new patented improvements and conveniences than all other cream separators combined. This new machine is so strong that there is almost no wear out to it. A real giant in strength. So simple that you will understand it at a glance. Not a separate complicated part in it anywhere.

Woman or Boy Can Operate It just as easily and conveniently as the strongest man. The bowl is quickly brought to speed, and so that it almost runs itself and skims the milk more completely than it has ever been skimmed before.

This Size Has a Capacity of 250 to 300 Pounds, or 120 to 145 quarts per hour, suitable for a dairy of from two to five cows and will separate any quantity of milk from one gallon up. The crank is only 9½ inches in length. The bowl measures but 3 3-16 inches in diameter inside and weighs but 8 pounds. The bowl consists of but five parts in all.

The Bowl is almost self cleaning and the cores are cleaned as bright as new in two minutes' time by the same great centrifugal force that does the skimming. It is the strongest, solidest and simplest separator of any. No delicate adjustments to be made and nothing to get out of order. Almost no wear out to it. A twenty-year signed guarantee against defects with every one.

Give the New Economy Chief a Trial. A few days' actual test on your own farm will do more to convince you that the new Economy Chief, is a wonderful money maker and work saver than anything we can say.

No. 23F31 **The New Economy Chief Cream Separator.** Capacity, 250 to 300 pounds per hour. Shipping weight, 190 pounds. Price..... **$27.90**

33.80

$33.80 FOR THIS SPLENDID Economy Chief Cream Separator

WITH ALL THE NEW 1911 IMPROVEMENTS

AGENTS' PRICE IS $75.00 TO $85.00 FOR THIS SIZE.

The Economy Chief is the only separator sold at a fair and square price, at a single small profit over the cost to build in the biggest separator factory on earth. We give you the strongest guarantee ever given, the longest trial ever heard of. We sell on the most liberal terms.

We Want You to Try this new and perfect cream separator on your own farm all at our risk and at our expense. Match it against any and all separators. Skim with it under the hardest conditions when other machines clog up and refuse to work. Skim milk when it is hardest to skim. Test your skim milk or have it tested with a Babcock tester and if the new Economy Chief does not fulfill every condition, does not meet every expectation and excel all machines sold by others, regardless of name and price, we want you to send it back and get all your money back. This is our newest and latest style. The machine with the double opposed disc system in the bowl which makes it the skimming wonder of wonders, twice as effective as the old style skimming devices offered by others.

NOT A DROP OF CREAM WASTED

and it skims so much quicker and easier than other machines that the difference will surprise you.

In This Size the inside dimensions of the bowl are but 3 3-16 inches by 6½ inches, the weight of the bowl only 8 pounds, yet superior in skimming capacity and efficiency to bowls weighing 15 pounds. The length of the crank is only 9½ inches. It is a remarkably easy running machine and will give you splendid satisfaction. It is excelled by but one other separator, and that is our biggest and best Economy Chief machine, the big Jumbo capacity size that skims 600 pounds or almost 300 quarts, per single hour, and illustrated and described on the next page. While this size is best suited for a small dairy of five cows or less and could be made to do for a slightly larger dairy, we strongly advise you to buy the big Jumbo capacity size, as you will save more time and money in the end by using the larger size and you will be prepared in case you wish to increase your dairy.

It Is Just as Carefully Made and built of the same material as the big size. Fully guaranteed by us to give you the most perfect satisfaction and every one is sold subject to sixty days' trial, so that you can give it a most thorough test and try it on your own farm under your own dairy conditions before you finally decide to keep it.

No. 23F32 **The New 1911 Economy Chief Cream Separator.** Capacity, 350 to 400 pounds per hour. Shipping weight, 200 pounds. Price..... **$33.80**

The Size to Buy.

THE LARGE 600-POUND PER HOUR CAPACITY ECONOMY CHIEF CREAM SEPARATOR IS, FOR SEVERAL VERY GOOD REASONS, THE CHEAPEST MACHINE TO BUY, NO MATTER WHETHER YOUR HERD IS A LARGE OR SMALL ONE.

To begin with, the 600-pound per hour capacity Economy Chief will last twice as long, just twice as many years as the 300-pound per hour capacity machine, for the simple reason that it skims any quantity of milk in one-half the time.

A cream separator, like any other machine, is only worn as it is used and will run a certain number of days and a certain number of years before it will require repairs. But the big capacity machine does the skimming in one-half the time, naturally it will last twice as long and do twice the skimming before repairs will be needed.

Even at double the price of the small size machine it would pay you best to buy it, as it does not cost you anything like twice as much.

Consider also what your time is worth. In the spring when you are putting in your crops, every hour and almost every minute is worth big money to you. You cannot afford to waste your time or use it uselessly.

When you think that with the big 600-pound capacity Economy Chief you can save half the time needed to do the skimming twice every day in the year and save half the labor of turning the crank, you can easily see what a world of time and money you will save in the course of a year.

The big machine runs practically as easy as the smaller ones; the difference in turning is hardly noticeable. It will require only one-half as much oil, as it is used only one-half as much, and, best of all, these big advantages that you get the benefit of every day in the year really cost you nothing, because the big capacity machine lasts twice as long and actually costs you less per year to use than the smaller machine.

Another reason: You will surely want to increase the size of your herd when you start to use the Economy Chief, because it makes the dairy work so light and easy that you can double the number of your cows and still have less work to do than you had before.

The big machine will always take care of an increase in the size of your herd and of the extra milk supply which you will have at certain seasons of the year.

Purely in your own interests we ask you to order the big 600-pound capacity Economy Chief described on the following page. No customer who has ever bought the big size has had reason to regret it, while many who have purchased the smaller sizes have found it to their advantage to increase their herds and buy the large machine later on.

Order the right size in the first place, the big 600-pound per hour Economy Chief and you will make a wise choice.

$42.50 FOR OUR BIGGEST AND BEST Economy Chief Cream Separat

WITH ALL THE NEW 1911 IMPROVEMENTS

This is the big 600-pound per hour capacity Economy Chief that skims a milk pailful every two minutes and is guaranteed superior to any separator sold at $125.00 or under.

At Only $42.50, a price which is factory cost with but a single small profit added, we now offer our biggest and best Economy Chief Separator for 1911, the latest model with all its splendid improvements. If this separator were not made in the biggest factory in the world, equipped with the finest and most modern labor saving machinery that money can buy, the only factory that builds a separator complete from base to tank, we could not afford to sell it at $42.50.

Separator Manufacturers and Agents everywhere ask from $100.00 to $125.00 for separators of this capacity and claim that they are giving you great value for your money, but the biggest factory in the world, our factory to consumer direct selling system, our one small profit plan, all combine in making our $42.50 price possible. Make it possible for you to save from $55.00 to $85.00 in actual cash in the purchase of a single cream separator.

This Is the Size to Buy. the one we recommend above all others. It does the skimming in from one-half to two-thirds the time of the smaller sizes every day and runs practically as easy. There is so little difference in the running that you can hardly notice it.

This Is the New Biggest Capacity Machine. It fits a dairy of any size from one cow up, and will always take care of your milk supply during the seasons when you have the most. It will enable you to increase the size of your herd, hence your profits in the future. It will be such a wonderful time saver, labor saver and money saver for you that you will surely want to keep more cows and make more money out of your dairy. With the new big size machine you can take care of any number of cows up to fifty without trouble. It handles a big supply of milk easily because of its wonderful capacity and rapid skimming.

Consider that it skims a milk pailful every two minutes, skims the milk almost as fast as you can pour it in, and skims it perfectly. Purifies and aerates both the skim milk and the cream and both leave the machine in better condition than when they went into it. Has every improvement. Wonderful solid steel bowl with the double opposed disc system, making it twice as effective as any other. The new solid massive frame that doesn't shake or weave. The protected gearing, the sanitary easily cleaned tinware. The great one-piece seamless supply tank without a joint or corner anywhere, all made right in the complete Economy Chief factory and guaranteed to be of the finest quality.

IF YOU DON'T WANT THE ECONOMY CHIEF AFTER SIXTY DAYS' TRIAL WE DON'T WANT YOU TO KEEP IT.

THE GREATEST VALUE EVER OFFERED.

THIS IS THE SIZE TO BUY.

This Is No Parlor Mac but is built to stand the knocks of everyday farm us most impossible to get it order, always ready for us you are ready to use it. T double opposed disc bowl m but 3 3-16 inches by 7⅞ in the inside and the weight bowl is only 8¾ pounds, that it makes the machine s prisingly easy. It is pr self cleaning and is cleaned same great centrifugal for skims the milk in one-quar time necessary to clean oth arators.

Only Five Parts to Bowl in All: The bowl cover, fe and two simple cores. Onl gear wheels. Not a weak, part anywhere. It is th farm cream separator.

This Size is Suitable from two to thirty-five or ty cows. We strongly rec it as being the best to use dairy, because of the speed which it does the work and same time it takes no more clean and care for it and ru tically as easy as the sma chines.

It Has the Patented Reflex Upper Bearing tionless lower bearing tool shelf and oil collector these great improvements vantages make the new Chief Separator in the big fastest skimming, most co simplest, strongest and e all separators to handle. it is so strong that there no wear out to it. Every part runs in the finest and phosphor bronze bearings length. All shafting is of quality high carbon steel weak, delicate part anywhere ing to give out in use. T chine will be running and d work perfectly when the mo plicated and weaker mach other makes are in the scra

A Half Grown Boy Woman can skim the mi easily with the pacity Economy Chief machi a strong man. It is the lasting machine of any does the skimming in fro half to two-thirds the time smaller machines, it is used one-half to two-thirds as mu naturally must last nearly tw long.

We Want You to O This Economy Chief Trial, and in case it does not after using it for tw months, you will not be more a return it than we will be to have you giving us an opportunity to either another machine or your money back as you wish.

We Will Go to Any treme to accommodate our cream arater buyers. We take terest in every machine that is in are always ready to furnish any vice. We carry a complete stock at our factory and at our Chicago that we will always have them ready you should ever need anything of

It Is Our Aim to put an omy Chief Separator in the hands of every the United States who keeps skims milk, not because of the there is for us in the sale, but Economy Chief may save him money that was wasted before, his dairy so profitable and his so easy that he will always entertain kindliest feeling toward us and to to buy everything he needs from us.

Write for Our Tile Color Book.

Ceramic Mosaic Floor Tile in this black and white design ready for laying reduced to 16 cents per square foot.

We want you to know you can have a beautiful ceramic mosaic tile floor in your vestibule, bathroom, or any other room at the astoundingly small cost of 16 cents per square foot, ready for laying. The greatest opportunity of the age for owning a beautiful aseptic, sanitary floor at prices never dreamed of before, a floor that will outwear the house itself.

Fireproof, sanitary, and the cleanliest floor ever laid. The sweetest, prettiest bathroom floor you ever saw when laid in pure white.

Send for our Ceramic Mosaic Floor Tile Color Plate Book, where we tell you all about the simple method of preparing, leveling and laying ceramic mosaic floor tile; how any workman who can level a Portland cement bed can lay the floor.

Home builders and contractors, do not overlook this opportunity, as this reduced price is to be obtained from us and us alone, and our straightforward, simple instructions how to lay it and how to dispense with the high priced tile setter under our directions for laying.

16c AND UPWARD A SQUARE FOOT, flexibly connected in sheets of 2 square feet, ready for laying, accompanied with a perfect plan and thorough instructions so that no one may make a mistake in laying it perfectly.

JOHN M. CLEAR SAVED $800.00 ON THIS HOUSE

Colorado Springs, Colo.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I will state that I am more than pleased with my home built by your plans and your mate ial. I have saved on my order given you about $800.00 and the quality of the material furnished by you far surpasses any that is being furnished for other houses being built right here, and your prices are more than 50 per cent less, and in some cases even more than that. I received my entire order in a little more than two weeks from the time you shipped it from your factory and not a single article was damaged and was packed in fine shape. I thank you for the promptness and the courteous manner in which you treated me. I intend to erect another house for renting purposes next spring and you can rest assured your firm will receive my order. Enclosed please find picture of our new home.

Wishing you success in your business, I remain

Yours truly,
JOHN M. CLEAR.

CANNOT BE EXCELLED AT TWICE THE COST

Bay Shore, Long Island, N. Y.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I was very well pleased with the quality of material sent by you. The red oak trimming was the prettiest lot of mill work I ever saw, and the carpenters did not have to sand it or dress it in any way before using. Your columns were of the best, also your doors and sash cannot be excelled at twice the cost. I saved at least 30 per cent on the material.

Yours very truly,
S. J. SMITH.

COULD NOT OBTAIN THE SAME GRADE OF MATERIAL ELSEWHERE FOR LESS THAN TWICE WHAT HE PAID US.

Roselle Park, N. J.

Sears, Roebuck and Co., Chicago, Ill:

Gentlemen:—I enclose herewith photograph of my house, the same which I built according to the general layout of plans No. 114. The picture of the house, as you will see, is identical with that shown in your catalog, with but a few exceptions. Am very glad to say that whatever I purchased from you for my house, which I think amounted to $800.00, has been found to be very satisfactory. I know that I could not have obtained the same material here for less than about twice the amount. Comparing the cost of my last house which I sold, with the present one, the latter cost me only about $500.00 more than the former, which contained only six rooms and bath, my new house containing nine rooms and bath and besides one or two other conveniences. Furthermore my present house is much better built. In conclusion would state that all transactions between you and me have been attended to promptly and fairly in every respect. I shall certainly favor you with as many orders as I can.

Wishing you continued success, I remain

Your customer,
J. C. JOHNSON.

THREE COMPLETE HOUSES FOR $2,028.00 ($676.00 EACH)

606, 608, 610 WAYNE ST., PEORIA, ILL.
Built by W. E. Foley, 801 N. Monroe St., Peoria, Ill.

$2,028.00 paid for all the mill work, flooring, ceiling, siding, finishing lumber, building paper, pipe, gutter, sash weights, hardware, mantels, painting material, lumber, lath and shingles used in the construction of these three modern eight-room city houses. Low as this figure may seem, yet we guarantee every stick of lumber, every bit of mill work, in fact everything we furnish to be absolutely first class.

Successful Building

A BOOK WRITTEN BY OUR CUSTOMERS.

Write for Book of One Hundred Modern Homes and Barns. *Mailed Free*

RESIDENCES, BUNGALOWS, COTTAGES AND FLAT BUILDINGS. BEAUTIFULLY ILLUSTRATED. FREE PLANS FOR ANY OF THEM.

In our Book of Modern Homes we illustrate one hundred different styles of houses adapted for city dwellings, suburban homes, country and farm houses, also barns, ranging in cost for building from $500.00 to $5,000.00. A few of these are illustrated on this page. Our costs are not estimates. Each house in this book is shown by a beautiful halftone illustration of a finished house, with first and second floor plans in reduced size, with number of rooms, sizes, etc., plainly marked, and our cost for all the materials printed with each illustration. Remember, our costs are not guesswork. They are positively accurate. We prove them by giving you a typewritten bill of materials, specifying every item of building material, showing the price for which we agree to furnish this material. The price at which we claim these houses can be built includes all of the material. Don't break ground or sign a building contract before you get a copy of our Book of Modern Homes. We can positively save you one-third or more in the cost of your home. You will get better results out of our building plans, which cost you nothing, than you will get out of building plans you pay other architects $100.00 or more for.

Whether you are a contractor and builder or intend to build your own home, you positively cannot afford to be without this Book of Modern Homes. Write for it today.

OUR $100.00 BUILDING PLANS FREE

For any of the houses shown on this page or any of the one hundred styles of houses illustrated in our free Book of Modern Homes described below **will cost you nothing.** If you intend building any kind of a house, be sure to write for our Book of Modern Homes. It will mean a saving to you of fully one-third the entire cost of your building. The original set of each one of these plans cost us from $100.00 to $150.00 per set to produce (but cost you nothing). The high grade materials we furnish at wholesale prices enable you to make such savings as the following: **We save you $500.00 on a $1,500.00 house, $650.00 on a $2,000.00 house, $1,000.00 on a $3,000.00 house, $1,500.00 on a $4,500.00 house.** Such are the savings we make you on every house illustrated in our Book of Modern Homes. The prices printed directly below the houses shown on this page will give you some idea of our ability to save you all we claim, but remember our Book of Modern Homes shows one hundred different styles of houses with floor plans, designed by our own architects, and on any of these houses you make the same big saving.

Our building plans, specifications and bill of materials, which cost you nothing, as explained below, include the following:

1—A complete set of blue prints, with all details and dimensions plainly marked, drawn to the scale of one-quarter inch to the foot.

Front Elevation, showing the front view of the house.

Right Side Elevation, showing the right side view of the house.

Left Elevation, showing the left side view of the house.

Rear Elevation, giving a back view of the house.

Longitudinal Plans, showing cross section.

Foundation Plans, giving information with reference to excavation, foundation, etc.

First Floor Plans, with sizes of rooms, partitions, doorways, windows, etc., given in detail.

Second Floor Plans (if a two story structure) giving size of rooms, partitions, location of windows, doors, etc., in detail.

Detailed Drawings of Materials, showing stair finish, balusters, style of window trimmings, hardware, porch finish, cornice finish, and all the material necessary to give style and character to the structure inside and out.

2—Complete specifications of material and labor, outlining all the conditions under which a contract may be let, enabling you to protect your interests perfectly, if house is to be built by contract.

3—Complete bill of materials and labor, itemizing the quantity and dimensions of timbers required, also the quantity and kind of exterior finishing lumber, porch work, roofing, window and door frames, doors and windows, inside finishing lumber, including all molding, stairwork, etc., building hardware, such as door locks, hinges, cupboard catches, drawer pulls, sash locks, gutters and eaves troughs, glass, paints, varnishes and fillers for outside and inside painting. In addition to all these details, we will furnish you on request, when we receive your order, absolutely free of charge, a complete set of heating plans and plumbing plans.

Our plans are the work of the best known licensed architects specially engaged by us for this service. They fully investigated the requirements of home builders everywhere in the United States and have embodied in our plans the very latest ideas of the best posted contractors and builders in this country, as well as the very best architects, giving us a variety of houses specially adapted for city, town or farm homes. Ideas and suggestions impossible for you to secure elsewhere at any price.

Plans and Specifications Call for the Highest Grade Materials and Labor

specify the best grade of mill work, dimension lumber, hardware and paint, as well as the highest grade workmanship throughout. Our are accurate. We prove them by giving you exact figures on every item. We send you a typewritten bill of materials with our blue prints vations. We guarantee our prices on mill work such as windows, doors, interior trim, flooring, siding, hardware, paint, mantels, plumbing ing. On these we save you nearly one-half. We make a very liberal allowance for all labor such as carpentry, masonry, painting, lathing and plastering. The cost of it all is included in our estimate. Our estimates are absolutely reliable. You can tell within a two the exact cost of your finished dwelling before you start to build. Write and get our Book of Modern Homes at once.

No. 63F7152 glazed with single strength glass. No. 63F7153 glazed with double strength glass. Furnished in sizes listed under Nos. 63F7186 and 63F7187 at an advance of $1.00 over the price of Nos. 63F7186 and 63F7187 on page 1198.

No. 63F7154 glazed with single strength glass. No. 63F7155 glazed with double strength glass. Furnished for windows with glass up to 24 inches wide add $1.00, up to 32 inches wide add $1.58, up to 40 inches wide add $2.10 over the price of Nos. 63F7186 and 63F7187.

We can furnish cottage windows of the sizes listed below; you have your choice of any of these five designs of special glass for the top light. The prices in the columns below the headings Gem, Crescent, Crystal, Bay View and Rex include the two pieces of sash, bottom sash glazed with double strength glass, "A" grade, and the top light glazed with fancy glass as shown in illustrations. The glass is puttied in the sash and carefully packed to avoid breakage when shipped.

Top Light Crescent Design. Genuine leaded art glass, made up of bevel plate and colored art glass.

Top Light Crystal Design. Made of clear plain crystal glass, carefully leaded.

GEM Top and Bottom Lights clear double strength "A" grade glass.

Top Light Bay View Design. Sand blast landscape design on double strength "A" grade glass.

Top Light Rex Design. Sand blast figured design on double strength "A" grade glass.

600 KINDS AND SIZES OF PANEL DOORS READY FOR SHIPM

the day we receive your order. When sending us your order you are dealing direct with one of the largest mill work manufacturers in the world who controls the standing timber and who manufactures and sells direct to you. Read our prices, see what our "From stump to consumer method" means to you. We save you 35 per cent or more and guarantee to furnish a better grade of goods and can ship at once. Make up your mill work order from the pages of this book; we guarantee you entire satisfaction, but if you are not in a hurry or if you are a carpenter or contractor and require building material from time to time be sure to send for our 132-page grand Mill Work Catalog. While in both catalogs are the same, the large halftone illustrations and full descriptions in our Special Mill Work and Building Material Catalog are of special interest to carpenters and builders. Please send for our special Building Material Catalog today. It is free.

SOLID YELLOW PINE DOORS.

Our Yellow Pine Doors are all made with bevel raised panels and O. G. sticking. Carried in stock in No. 1 grade, which is practically free of all defects and an unusually high class door. Also No. 2 grade which is of the next lower grade and contains stock which is not good enough to be in the No. 1 grade. Carefully sanded and smoothed and packed for shipment.

For other sizes and designs send for our Special Mill Work Catalog

PAINTED AND GRAINED DOORS.

Our painted and grained doors are all made with bevel raised panels and O. G. sticking. Manufactured from low grade lumber, but no defects which seriously affect the wearing qualities. The doors are painted two coats and the grained doors two coats besides the graining coat, all painted by hand. Carried in stock in two grades, Standard Grade, which is the low grade usually furnished by other concerns, and the Special High Grade, which is a door very much better than the average and which is sold and furnished by us only. We recommend the high grade door.

For other sizes and designs send for our Special Mill Work Catalog

The column of sizes under the heading, "Size of Glass," shows the size of glass in inches in the window and all prices on the same line in the other columns WINDOW FRAMES, STORM SASH and BLINDS to fit this particular size. For illustration, take a two-light window, glass size 24x28, price on a window glazed single is $1.10, price on a pulley frame for this size window $1.68 and the size of the sash opening of this same window is 2 feet 4½ inches by 5 feet 2 inches. The price of a for this size window is $1.17 and for the blinds $1.20, weight of this window is 22 pounds, and if you wish to order sash weights, divide the entire weight of the window which will give you the size of each of the four weights required to balance the window. The word "GLAZED" means "including glass."

Two-Light Window

Sash 1⅜ inch Thick. Check Rail. Price includes Glass Glazed in the Sash, Held in Place by Putty. Price includes Both Sash.

Window Frame, Including Pulleys

Jambs, 5¾ Inches, Including Blind Stop. Outside Casing, 1⅛x4½ Inches. Plain Drip Cap. Sill, 1¾x7½ Inches.

SASH WEIGHTS.

No. 63F7200 Sash Weights. To hang a window, four sash weights are required, each weighing one-fourth the weight window. Our weights are standard diameter and length, according to weight. We weights from Chicago and two Eastern foundries, whichever foundry is nearest you. 8 to 9 pounds by half pounds, sizes from 9 to 26 pounds by pounds. When order- to state sizes. Price, per pound 1½c

—Our windows are made of soft pine and glazed with a good grade of window Very carefully packed.
We use better lumber in our frames than is used by most concerns. Our frames usually good. Shipped knocked down in bundles to save you freight.
—Made of soft wood and glazed with good window glass. Well packed for ment.
Made of soft pine and very well constructed, made same width as windows, but 1 inch.
this page we show only a part of this line. For other designs, etc., see our special catalog.

FLOORING, SIDING, CEILING AND FINISHING LUMBER

We carry an immense stock of gum products. Our siding, ceiling and flooring are made from carefully dried lumber. Furnished in two grades, Select Grade, which is practically free from all defects. Select Grade, may contain defects which can be cut out without wasting more than a tenth of any one piece and may also have imperfections in the work. We make the best gum siding, ceiling and flooring, cut from lumber mills in Chicago and Southern Ohio and mill work plant in Eastern Iowa.

Note—Gum siding should be primed as soon as it is put on the building.

"ROYAL ACME" GUM FLOORING. Thickness, 13/16 inch. Shipping weight, 2,000 pounds per 1,000 feet.

6, 8 or 10 inches wide	35.40	38.10
12 inches wide	38.50	41.50
14, 15 or 16 inches wide	41.50	44.90

Add 25 per cent extra (in quantity) for tongue and groove and lap.

WE FURNISH ROYAL ACME FLOORING IN TWO GRADES

Our Clear Grade is absolutely clear, free of knots or imperfections in manufacture. Furnished in random lengths from 2 to 16 feet inclusive. Not over 8 per cent of lengths 4 feet long and under. Our Select Grade is the kind most dealers sell as clear or high grade. This grade is not so clear as our clear grade, but will lay with but little waste and allows but few defects. Furnished in random lengths from 1½ to 16 feet inclusive. Oak and maple flooring is not sorted to color.

WHEN ORDERING, bear in mind that flooring with wide, and flooring with 2¼-inch face is figured as 3 inches wide, 2-inch face is figured as 2½ inches to allow for tongue and groove. When making up your order increase the amount about 30 per cent more than the actual measurement of the surface to be covered, also allow a few feet additional for waste. To illustrate: A room 10x12 feet equals 120 square feet. If flooring 2-inch face is ordered add 30 per cent (36 to 40 feet); order about 160 square feet. The same rules apply no matter from whom you buy your flooring.

MAPLE FLOORING.

Catalog No.	Grade	Thickness	Size of Face, inches	Shipping Wt., per 100 ft.	Price, per 1,000 feet
63F7441	Select	⅜ inch	1½ or 2	100 lbs.	$27.00
63F7440	Clear	⅜ inch	1½ or 2	100 lbs.	35.00
63F7442	Clear	⅞ inch	2¼	200 lbs.	47.00
63F7443	Select	⅞ inch	2¼	200 lbs.	38.60

All flooring, siding and ceiling illustrated and described on this page will be shipped from our factory in Chicago direct to you, or from the mill work factory at Muscatine, Iowa, when ordered with other mill work.

ROYAL ACME OAK AND MAPLE FLOORING,

the highest grade of flooring made. At these low prices anyone can afford to lay the highest grade of maple, quarter sawed red oak or plain oak floor. Our prices are but little higher than the retail lumberman charges for common soft wood flooring.

STEEL POLISHED AND END MATCHED.

Royal Acme Flooring in either maple, oak or quarter sawed oak is scientifically treated, cured in kilns at a temperature of 212 degrees Fahrenheit. Every foot is steel polished; every piece is end matched. The ⅞-inch is hollow backed and bored for blind nailing.

QUARTER SAWED RED OAK FLOORING.

Catalog No.	Grade	Thickness	Size of Face, inches	Shipping wt., per 100 ft.	Price, per 1,000 feet

GRILLES AND COLONNADES—COMPARE THESE PRICES

THIS PAGE we show six of the latest and best selling patterns in grilles and colonnades. Choose any one of these. All are wonderful values. Designs and prices are sure to please you, but if you want a wider line to select from, then send for our Building Material and Mill Work Catalog, which shows our big complete line of about fifteen different styles.

GUARANTEE the workmanship and material to be perfect, and if not satisfactory same may be returned at our expense and your money will be promptly refunded. However, we will not accept return of grilles when the wrong size is ordered. As grilles are made to your order it is necessary to allow ten days to complete this work. All grilles and columns are shipped from the Chicago grille factory.

Extends down 10 inches at ends.

No. 63F8436

Made in oak, birch, yellow pine or cypress (in the white). Price, per lineal foot.....60c

Extends down 24 inches at ends.

No. 63F8430

Made in oak, birch, yellow pine or cypress (in the white). Price, per lineal foot.....59c

Extends down 24 inches at ends.

No. 63F8431

Made in oak, birch, yellow pine or cypress (in the white). Price, per lineal foot.....58c

ALL GRILLES ORDERED UNDER 4 FEET WILL BE CHARGED AS IF 4 FEET LONG.

Nos. 63F8431 and 63F8430 are furnished with patent adjustable end shoe and can be taken out and refitted in the same size opening at any time without injuring the grille. Simple and easy to fit, the only tools required to make a perfect job being a hammer and screwdriver. If any of the above grilles, Nos. 63F8436, 63F8431, 63F8430, are wanted finished, that is, shellaced and varnished, add 15 cents per lineal foot to the price in the white and write the word "finished" after the catalog number. To insure a perfect match to your woodwork, state whether light or dark finish is wanted and, if possible, enclose a sample showing the grain and color.

$15.95 Buys This Elegant Colonnade and Grille.

Made of the same high grade material and careful workmanship used in our higher priced grilles, the only difference being that it is not nearly so massive. Base of column opposite shelf 4½ inches diameter; two-panel wainscoting measures 30 inches from the shelf to the floor; columns formed by octagon, 6 inches diameter; plain turned part, 4½ inches; fluted columns, 3 inches diameter. Trimmed with genuine carved ornaments. Shelf measures 16 inches from the inside of post to jamb. **No. 63F8456 Colonnade and Grille** for opening 8 feet wide 7 feet 6 inches high or less, furnished in oak, birch, yellow pine (in the white). Price.....$15.95

If shellaced and varnished, add $4.25 extra. For grilles of the above mentioned size, add for each additional foot thereof $1.50. Shipping weight, 150 lbs.

GRILLES AND COLONNADES are made special to your order. In ordering be sure to plainly state the exact size of the opening, also state whether oak, birch, yellow pine or cypress is desired. We ship grilles finished, that is, filled and varnished, when so ordered, at the additional price printed on this page. Not filled or varnished unless specified.

A $35.00 Colonnade for $18.00.

Made of the finest selected material by the highest class grille maker. Columns made with special lock joint, all joints carefully mitered. Every part of surface is smoothed and sanded by hand. Octagon base of columns, 7¾ inches in diameter opposite panels; base at floor, 9¼ inches in diameter; caps at top of column, 10 inches in diameter; columns above pedestal, 6 inches at the base, tapering to 5 inches at the top; panel work between column and casing, 16 inches; side shelf, 30 inches above floor line; columns ornamented by finest quality composition caps.

No. 63F8400 Colonnade. Includes two columns, pedestals and panel wainscoting for opening 8 feet 6 inches in height or less, furnished in oak, birch, yellow pine or cypress (in the white). Price, per pair.....$18.00

If shellaced and varnished, add $4.00 to the above price. Shipping weight, per pair, 200 lbs.

No. 63F8401 Columns including pedestals without wainscoting, for opening 8 feet 6 inches in height or less, furnished in red oak, birch or cypress (in the white). Price, per single column.....$7.50

Shipping weight, per pair, about 150 lbs.

$36.40 Buys This Massive Colonnade.

Contractors consider this one of the best high grade colonnades made. Hard to duplicate elsewhere for less than $75.00. Made from the finest selected material, very massive and effective, yet made in such a manner as to be no obstruction. Base of columns 7 inches square; fluted shaft or columns, 6 inches at the bottom, tapering to 5 inches at the top; fluted two-thirds length. Panel wainscoting measures 30 inches from floor to the top of the shelf; distance from jamb to inside of column, 32 inches. Massive carvings and trimmings, also column capitals, are made of the finest composition work in perfect imitation of wood. Side beams extend down 3 feet 8 inches to the bottom of the bracket and are 4 inches thick.

No. 63F8405 Loraine Colonnade, for opening 9 feet wide by 9 feet high or less, furnished in oak, birch, yellow pine or cypress (in the white). Price.....$36.40

If beam only is wanted (no columns, pedestals nor panel wainscoting) price will be $14.75.

If shellaced and varnished, add $4.25 extra. If ordered in quarter sawed oak, add $4.00 extra. For grilles larger than above mentioned size, add for each additional foot or fraction thereof $1.50. Shipping weight, 250 lbs.

THE PRICES QUOTED DO NOT INCLUDE CASING, JAMBS, BASE BLOCKS NOR CAP TRIM.

$1.95 PER ROLL

MARBLE COAT ROOFIN

REDUCED FROM $2.25 PER ROLL

HEAVIER AND BE THAN EVER

TAKE ADVANTAGE OF THIS BIG REDUCTION IN PRICE

MARBLE COAT ROOFING which we heretofore sold at **$2.25 per roll, a roofing which compares favorably with roofing now sold by retail dealers at $3.50 per roll, is now offered to you at our special reduced price of $1.95 per roll of 108 square feet.**

THERE IS A GOOD REASON WHY we can afford to lower this price and still maintain the same good quality. Since operating our big roofing factory we have been able to reduce our cost on Marble Coat Roofing in a greater measure than on other kinds of roofing. Since offering Marble Coat Roofing to the public our sales have steadily increased to a point that is far greater than we ever had reason to expect. Marble spar (the finish) which was formerly bought in shipments of a few sacks at a time, is now being bought in solid carload lots. Where we used to manufacture a hundred rolls a day, we are now making a thousand and as a result our manufacturing cost is now 30 cents lower per roll than the former cost. We propose to give the full 30 cents saved to our customers in the way of our special reduced price of **$1.95 per roll of 108 square feet.**

MARBLE COAT ROOFING IS OF THE HIGHEST QUALITY.

same long fiber 3-ply pure wool felt that is used in making our Best-of-all Roofing, only that the felt is all of one weight and thickness and first of all is treated grade compound which is absolutely without any animal oil and it is rolled or compr more at the time the saturation is put in. We use the same compound as is use Best-of-all Roofing, which is waterproof and fireproof, after which it is coated with pure mineral asphalt and is then surfaced or covered with a fine marble spar, which the most attractive roofing made, and at the same time this additional coating of marble adds to its fireproof qualities.

THERE IS NO ROOFING MORE BEAUTIFUL THAN MA COAT ROOFING. The color of the roofing is of a light silver gray or cl color, making it especially desirable for dwellings beautiful silver gray color effect is lasting; it will not fade away or lose its rains serving to keep it washed clean.

WE FURNISH FREE with every roll of Marble Coat Roofing plenty of large galvanized nails (which do away with the use of the plenty of waterproof cement for lapping the edges and seams, also a can of marble sprinkling along the edges after the cement has been used and the roofing nailed do roof will then appear as one solid mass of silvery white color, no seams or showing. The nails being galvanized will never rust. You can

but appreciate the fine appearance of this roofing and at the same time you must not overlook the fact that Marble Coat Roofing is made from the same high grade material as our Best-of-all Rubber Roofing that we have sold for many years.

SEND FOR A FREE SAMPLE OF MARBLE COAT ROOFING.

See its extra heavy weight and thickness, see how completely it is rolled or pressed together, see how tough and how hard it is to pull apart and then note its beautiful appearance. Marble Coat Roofing will be shipped from one of our big warehouses located in Kansas City, Mo., Cincinnati, Ohio, Pittsburg, Penn., or Chicago, Ill. We will ship from the warehouse nearest you, saving delays and reducing your freight charges to practically nothing.

Requires no coating when first put on the roof.

MARBLE COAT RUBBER ROOFING

WILL WEAR TWELVE YEARS WITH PROPER CARE AND ATTENTION. Each roll contains 108 square feet, enough to cover a space 10 feet by 10 feet, or a square, and have 8 square feet to allow for a 2-inch overlap at all the seams, complete with large headed galvanized nails, cement, etc.

Catalog No.	Grade	Width	Covering Space	Approximate Weight	Price, per Roll
63 F3030	Extra Heavy	32 inches	1 square, 100 sq. feet	70 pounds	$1.95

GRAVEL BURLAP ROOFING

A ROOFING OF THE FIRST QUALITY.

HAILPROOF; NEEDS NO COATING; FIREPROOF.

GRAVEL BURLAP ROOFING is just what the name implies, roofing made of wool felt as a base, burlap center, asphalt and gravel surface. The wool felt and burlap center are thoroughly saturated with asphalt at a temperature of 325 degrees Fahrenheit and formed into one solid piece, then heavily coated with a thick layer of asphalt compound and gravel coated with washed lake pebbles.

AN IDEAL ROOFING FOR LAYING OVER SHINGLES, because it is heavier and has a stiffness not found in other makes of roofing. The burlap gives added strength and equalizes contraction and expansion caused by sudden and extreme changes in temperature. It is the heaviest prepared roofing made and is sold in one weight (one thickness) only. Weight, 85 pounds, hence is warmer in winter and cooler in summer than shingles, slate, steel or other prepared roofings.

WE FURNISH FREE with every roll sufficient large headed galvanized nails and cement, and full and complete directions for laying. Anyone can lay it. No experience required. The only tools required are a common jackknife and a hammer.

CAN BE LAID IN ONE-FOURTH THE TIME it takes to lay shingles and at a total cost of one-half the cost of the commonest grades of wood shingles.

GRAVEL BURLAP ROOFING IS HAILPROOF

because it is made with a strong burlap center, making it sufficiently strong to withstand sleet, hail, snow and the heaviest downpours of rain. It never needs coating or painting, as the exposed surface is heavily covered with a thick layer of asphalt compound and further protected with gravel. As a result it will last ten years without coating or repairing. While a trifle more expensive to commence with, it is cheapest in the end, and when once laid your roofing troubles cease.

SUITABLE FOR ANY PITCH OF ROOF It can be used on any kind of roof, "from a mansion to a house." It is being extensively laid on buildings used for stores, offices, factories and houses which are located in districts where flying embers are a menace to the average roof in localities where steel roofs have been considered the only fire protection. Can be laid on roofs with the slightest pitch (nearly flat) because it is made with a 2-inch border from gravel, permitting a tightly cemented and waterproof seam.

SEND FOR SAMPLES. THEY ARE FREE AND WILL BE MAILED ON REQUEST, POSTAGE PREPAID.

FURNISHED IN ROLLS CONTAINING 108 SQUARE FEET, covering surface 100 feet. Price includes all necessary large headed galvanized nails and waterproof seam cement, and full directions for laying.

25 Per Roll of 108 Sq. Feet FOR THE Best Roofing on Earth

BEST-OF-ALL Rubber Felt Roofing

Guaranteed to Wear

Anyone Can Lay It. No Tools Necessary.

Thickest, Heaviest, and Most Durable Rubber Roofing Made.

FIREPROOF AND WATERPROOF, IT IS BETTER AND CHEAPER THAN TIN, TAR AND GRAVEL, or any other kind of ROOFING, and will outwear them all.

Don't Buy Roofing From Anybody Without First Reading These Tests:

PLEASE COMPARE

1. **THICKNESS**.....Best-of-all is from 10 to 15 per cent thicker.
2. **WEIGHT**.....Weighs from 10 to 15 per cent more than other makes.
3. **FLEXIBILITY and STRENGTH**....Ours exceeds others by 25 per cent, actual test.
4. **QUALITY**.....We use pure asphalt and long fiber felts.

YOU WON'T FIND TAR OR OIL IN THIS ROOFING.

If you were to make these four tests there would be but one result. Whether it be for house or barn you will buy Best-of-all Roofing. There is no doubt about Best-of-all wearing longest.

THE FOUR TESTS, simple as they may seem, tell the difference between good and bad roofing. When buying **Best-of-all Roofing you can't go wrong. WE GUARANTEE EVERY ROLL.** If you are not satisfied we will return your money as cheerfully as we accept your order; you simply take no risk whatever.

IN OUR BEST-OF-ALL ROOFING we offer you roofing that will outwear tin, tar or gravel roofing and has stood the test in all the climates from Alaska to the Gulf of Mexico. A weatherproof and fire resisting roofing that looks like rubber, feels like rubber and wears like iron. It is made of heavy, strong, long fibered wool felt, saturated with the best grades of asphalt. **BEST-OF-ALL ROOFING** is elastic, pliable and tough, not affected by changes in climate, vapors, steam or gas and will not rust. Unlike most other kinds of prepared roofing, it is free from odor and will not discolor rainwater, it can be used on either steep or flat roofs. Anyone can lay it, the only tools required being a knife and a hammer. **SAMPLES mailed free on request.**

A roofing that's HEAVIER, THICKER AND STRONGER than any standard make.

STOP! LOOK! COMPARE! Ours wears fully 25 per cent longer and is 30 to 50 per cent lower in price than retail prices.

Such sensational values can't be overlooked if you have a new or old building that needs a roof.

IT IS A PROVEN FACT that prepared roofing of good quality like Best-of-all will outwear shingles. Here's your chance to buy it at one-fourth their cost.

CAN BE LAID OVER OLD SHINGLES

Each Roll is 32 Inches wide.

STANDARD. Will wear seven years. **1-PLY OR STANDARD GRADE** is a most efficient covering for barns, sheds and outbuildings where economic priced roofing is wanted. With proper care will last for many years.

HEAVY. Will wear ten years. **2½-PLY OR HEAVY GRADE** is made of a very much heavier felt and body with a splendid coating and is used on the better class buildings and on any job where a good durable roof is wanted.

EXTRA HEAVY. Will wear twelve years. **3½-PLY OR EXTRA HEAVY Best-of-all Rubber-Felt Roofing** positively the best grade of roofing made. This grade of roofing is used on the finest and largest buildings and where quality is desired.

WE FURNISH FREE WITH EVERY ROLL

OF OUR BEST-OF-ALL RUBBER ROOFING large headed galvanized roofing nails and plenty of cement for lapping the seams or joints. Note that we furnish a galvanized nail with large head which costs 100 per cent more than the old style wire roofing or shingle nail and tin cap used by many concerns. We know that a good roof depends on its being firmly secured to the roof boards. Galvanized nails will never rust, hence will last for many years. No matter what kind of roofing you buy, insist on using galvanized roofing nails with large heads.

GALVANIZED NAILS

REQUIRES NO Coating When First Put On the Roof.

TO REDUCE YOUR FREIGHT CHARGES

TO MAKE MORE PROMPT DELIVERY we will ship all roofing described on this page from one of our big warehouses nearest you. Western warehouse, **KANSAS CITY, MO.** Eastern warehouses, **CINCINNATI, OHIO, AND PITTSBURG, PENN.** Central warehouse, **CHICAGO.** We also ship small orders for roofing which are ordered with other goods from **OUR CHICAGO STORE.** All orders will be shipped the day the order is received. Remember, there is no extra charge for making shipment to you from any of these different points. The saves delay and reduces your freight charges to practically nothing.

Best-of-all Roofing when laid over old shingles requires roofing nails 1¾ inches long. When nailed on roofing boards this roofing should last with ⅞-inch nails. **WHEN ORDERING BE SURE TO STATE WHETHER** ⅞-inch nails or 1¾-inch nails are required.

NOTE! All dealers' one-ply weighs from 30 to 35 pounds.

SAVED $50.00 ON AN AVERAGE SIZE ORDER. YOU CAN DO THE SAME.

Pierceton, Ind.

Sears, Roebuck and Co.,
Chicago, Ill.

Dear Sirs:—I have used about 40 rolls of Best-of-all Roofing on my own buildings. It is the best roofing made and it is at least $1.25 cheaper per roll than I could get roofing, of nowhere near the same quality, here in my own town. When I was using the roofing several of my neighbors were at my place and I called their attention to the quality of the roofing. They were so well pleased with the looks of it that they sent for some of the same kind. I could name at least eight different farmers in my neighborhood that have used the same kind and are well pleased.

Yours respectfully,
A. DANNER.

Rubber Roofing – Flint Sand Coated Roofing

We Offer Under the Trade Name of Composition Rubber Roofing

The "rubber" referred to in the description of this roofing is merely the trade name for a mineral substance that looks like rubber and feels like rubber, but, unlike rubber, it will never rot and is not affected by moisture.

For the BEST rubber finished roofing made see Best-of-all Roofing on page 1169.

We guarantee these prices to be far below what others charge for the very same roofing which they sell under various trade names.

Why not buy the best roofing, such as Marble Coat, Best-of-all or Flint Surfaced Asphalt Roofing? The above named roofings will wear many years longer than Composition Roofing or other makes and the price of these high grade fully guaranteed roofings is only a little higher than the cheaper grades. However, if you want a cheap roofing to last a short time, then buy our Composition Roofing.

Composition Roofing is sold by us for the purpose of meeting the demand of those who want ready roofing because it is low in price and who are not so particular about its wearing qualities. While this roofing is widely advertised by its manufacturer under various names to wear from five to ten years, we hesitate to recommend or guarantee it for this period because it contains low grade asphalts and crude oil which, according to best authorities, lack the wearing qualities such as are found in our Best-of-all Roofing, page 1169, and Flint Surfaced Asphalt Roofing shown at the bottom of this page.

OUR POLICY. Roofing which is recommended to wear a given time as printed in connection with our prices is backed by our binding guarantee; **IF IT DOES NOT LAST THE FULL LENGTH OF TIME WE CLAIM IT SHOULD WEAR, WE WILL REPLACE IT BY FURNISHING A NEW ROOF.** We make no claims as to the length of time Composition Roofing will wear, but believe that it is a remarkably good bargain at the prices we quote here. We would, however, advise you to be careful in selecting your roofing or you may buy this very same make of roofing and pay double our prices for it. Composition Roofing is made of standard felt, saturated with an asphaltic composition and is finished on one side with a solid mineral rubber coating and on the other side coated with fine sand. This roofing may be used with either side up, according to the wishes of the purchaser.

Composition Roofing is shipped direct from our Chicago store or any one of our four warehouses or warehouses located in Chicago, Ill.; Pittsburg, Penn.; Kansas City, Mo., and Cincinnati, Ohio. Composition Roofing is made 32 inches wide and is put up in rolls containing 108 square feet, or enough material to cover a square of 100 square feet, furnished complete with nails and cement inside the rolls.

The BEST flint surfaced roofing made is listed below.

FLINT SURFACED ASPHALT ROOFING

Heavier by a Half Ply Than Other Flint Surfaced Asphalt Roofing.

Our Flint Surfaced Asphalt Roofing is heavily surfaced on both sides with clean flint sand, adding much to its fireproof qualities. Being flint sanded on the under side as well as on the top side makes it especially fireproof, because flying embers or coals are not likely to set it on fire from the top, while the same coating of flint sand on the under side acts as a resistance against fire from the inside of the building. Flint Surfaced Asphalt Roofing is 32 inches wide. It is guaranteed to be made from a long fiber pure wool felt and saturated with the highest grade of asphalts and double coated with highest grade pure mineral rubber. The "rubber" referred to in the description of this roofing is merely the trade term for a mineral substance that looks like rubber and feels like rubber, but, unlike rubber, it will never rot and is not affected by moisture. It is absolutely free from animal oil and is guaranteed not to melt or run in summer, or crack or break in winter. It is the best fire resisting asphalt roofing on the market.

This is an asphalt roofing; there is positively no coal tar used in its manufacture. This fact alone helps to make it fireproof and the waterproofing qualities of our coating give it a good heavy body, making it very strong and flexible. We absolutely guarantee our Flint Surfaced Asphalt Roofing to be the heaviest sanded asphalt roofing ever made.

Please compare the thickness, weight, strength and quality of materials used in our Flint Surfaced Asphalt Roofing with other makes of flint coated roofing and the result will be that you will order from us.

Made of the same high grades of wool felt and asphalts that are used in our celebrated Best-of-all Roofing described on page 1169.

Flint Surfaced Asphalt Roofing Requires No Coating When First Put on the Building.

3½-PLY ROOFING specified by architects for the higher class of buildings such as residences, schoolhouses, factory buildings or wherever a high class, long wearing roofing is required. Will wear 12 years.

2½-PLY ROOFING. Used on residences, barns, public buildings and if not abused will wear 9 years.

1½-PLY ROOFING. Used on buildings of every description and with good care will last 7 years.

1-PLY ROOFING is intended for use on temporary buildings, sheds, etc., and will last 5 years.

We furnish free with every roll of our Flint Surfaced Asphalt Roofing plenty of large headed galvanized barbed roofing nails and sufficient cement, with all necessary directions for laying. We use large headed galvanized nails in place of tin caps because they more firmly secure the roofing and do not rust out as tin caps do.

Quicker delivery and lower freight charges are assured by shipping direct from our factories and warehouses near you. Large orders going to Eastern and Southern points will be shipped from factory in Cincinnati, Ohio, or Pittsburg, Penn. Orders to Western and Southwestern points will be shipped from our warehouse in Kansas City, Mo. We also ship from Chicago factory, and small orders going with other goods will be shipped from our Chicago store. Remember, it costs you no more for the roofing shipped from any of these points, but it enables us to reduce the freight charges to almost nothing.

SAVE YOUR ROOF

By Using Our Celebrated Prepared Roof Preservative.

Any roof, whether made of tin or other metals, wood shingles or any kind of prepared asphalt felt, will not give the best satisfaction, in fact will not give you **one-half its real wear unless properly coated with our Prepared Roof Preservative** at intervals ranging from two to five years. This roof coating is made from the same high grade waterproof and asphalt coating as is contained in our Best-of-all and Asphalt Felt Roofings. It forms a heavy yet flexible and pliable coating and is especially adapted for any kind of roof. For steel structures, such as bridges, iron fences, steel siding or metal structures of any kind which are exposed to the weather, it is by far the best preservative on the market. It is frequently used on old wood shingle roofs where the coating is found not only a most excellent preservative of the wood, but closes up any cracks or leaks. It dries with a fine black, glossy luster and will not crack nor blister. It is not affected by either heat or cold. A good preservative to use for painting any kind of fence posts before putting into the ground. **It is guaranteed to be free from coal tar or any by-product of coal tar.** We furnish it in the following packages. Packed in flat top wood jacket tin cans, also shipped in barrels and half barrels.

PRICES OF PREPARED ASPHALT PRESERVATIVE.

Shipped from Cincinnati, Ohio, Kansas City, Mo., or Chicago, Ill.

Catalog No.	Size		Weight	Price, per Package

63F3017	5 gallons		41 pounds	1.93
63F3017	10 gallons		80 pounds	3.60
63F3017	25 gallons, ½ barrel		250 pounds	6.67
63F3017	50 gallons, full barrel		475 pounds	12.50

We especially recommend our pure imported especially Prepared Asphalt Preservative for recoating our **Celebrated Best-of-all and Asphalt Felt Roofings** after they have been laid for about two years and recommend its use every two years thereafter.

ROOFING PITCH.

A GENUINE straight run American coal tar roofing pitch. We use the best grade of roofing pitch that we can obtain. We have a large sale among roofers and contractors on this material. It is in a solid state and requires melting and is the proper consistency for gravel roofers' use. Especially used for tarred felt roofs. Foundations below the ground will be practically waterproof after having been heavily coated with this roofing pitch. We do not sell less than full barrels which weigh 300-350 and 400 pounds. **Shipped from Chicago.**

No. 63F3056 Roofing Pitch. Price, per 100 pounds 65c

DUCK BRAND READY ROOF COATING

is especially prepared for coating tarred felt roofing. It is distilled from low heat, straight run American coal tar, and is more durable and far superior in every way to coatings made from the common kind of tar. The coating is the life of any tarred felt roof, keeps it soft and pliable, avoiding cracking in extremely cold weather and protecting the felt from the heat of the sun and the wear of storms and rain. Do not try to economize by not putting two coats of Duck Brand Ready Roof Coating on your tarred felt roof. Do not wait until your roof leaks or is in bad shape before renewing the coating. Afterward apply a coat of Duck Brand Ready Roof Coating every two or three years. Requires two gallons to a square.

PRICES OF DUCK BRAND READY ROOF COATING.

When comparing prices bear in mind that our sheathing paper will be 10 per cent heavier than "trade weights" usually furnished by the average retail dealer.

Fulton Brand Blue Plaster Board.

OUR FULTON BRAND Blue Plaster Board is a strong, tough paper, used for sheathing under clapboards and on walls and ceilings in the place of plaster. It makes a very durable substitute for plaster. It can be nailed to the boards or sheathing or can be tacked directly onto the studding. It is put on with an ordinary bill poster's tack, or any heavy tack will do, and then cover with wall paper. Has a good, hard, well finished surface. Fulton Brand Blue Plaster Board is made only in "AA" grade and is made from carefully selected all rag stock and makes a sheet exceedingly heavy, very strong and durable. We know that it will please you.

PRICES OF FULTON BRAND "AA" GRADE BLUE PLASTER BOARD.

Catalog No.	No. of Square Feet per Roll	Width, inches	Weight, pounds	Price, per Roll
63F3012	250	36	30	$0.62
63F3013	500	36	60	1.20

Competition Brand Blue Plaster Board.

We have an occasional call for a cheaper grade of Blue Plaster Board and while we do not recommend the use of "B" grade material, we can furnish it. This "B" grade Blue Plaster Board is not finished as well, is not as tough and strong as our "AA" grade Fulton Brand Blue Plaster Board, and for the difference in price we would by all means recommend that you buy our Fulton Brand "AA" grade Blue Plaster Board.

63F3021	500	36	60	1.10

TARRED FELT.

...Roofing, Sheathing or General Building Purposes.

...ED FELT is the best kind of building paper. Architects specify and recommend it in ...tion of a first class building. It is much cheaper in the end, as it adds warmth and comfort to the building and the saving in cost of the first year's fuel bills will more than offset the small difference in price between the Tarred Felt and the lower priced building papers. It is also used for gravel roofs. **Tarred Felt is made of carefully selected wool paper felt, thoroughly saturated with redistilled low heat American coal tar.**

THIS FELT is used extensively for roofing sheds and temporary buildings. It is still used in roofing of large buildings where the specifications require about three to five layers of tarred felt, each layer of which is thoroughly coated with pitch or our Duck Brand Ready Roof Coating. After ...layers of tarred felt have been laid, they are then ...the depth of an inch or more with sand and gravel. ...and No. 1 Tarred Felt for all first class jobs, ...excellent deadening felt and should be used ...floors where a good job is wanted. As a sheath-...for putting under weatherboard it has no equal.

...TARRED FELT. This grade of tarred felt is also used for gravel ...where several layers are specified. It can be used ...where the No. 1 grade is used, but is lighter ...(not so thick), and where a medium grade of work is ...No. 2 Tarred Felt will be found very satisfactory.

...TARRED FELT. This grade of felt is made with the same care as the ...grades but is lighter in weight and much thinner.

PRICES OF TARRED FELT.

RED ROSIN SIZED BUILDING PAPER.

FOR SHEATHING PURPOSES.

OUR PRICES are extremely low for this high grade building paper. Many of the largest contractors throughout this broad country are continually sending us orders for large quantities of this paper. Do not overlook the economy of properly lining your building with plenty of this high grade paper. It will save its first cost during the first winter, due to the reduction in your fuel bills to say nothing of the added comfort to your home.

Red Rosin Sized Building Paper is made with a filled paper for a body and is faced on both sides with a well calendered stock that is thoroughly rosin sized, rendering it dampproof and vermin proof. We sell four different weights of this paper. We recommend for ordinary building purposes our **Leader Brand,** as it is of sufficient thickness to give entire satisfaction.

Our Fulton Brand is made of exactly the same stock, but is considerably heavier than our Leader Brand and there is no better or heavier Red Rosin Sized Paper made by any other concern.

Our Acme Brand is the same quality as our Leader excepting that it is a lighter weight.

Our Competition Brand is a fair grade, similar to the kind sold throughout this country. It is light in weight, as it runs only 4 pounds to the square.

PRICES OF RED ROSIN SIZED BUILDING PAPER.

Seroco Brand Wool Deadening Felt.

DEADENING FELT is used to deaden the sound between floors and in walls. It is made of a good grade of wool felt, soft and pliable, and will add much to the warmth of your building. Seroco Brand Deadening Felt should be under every floor. The price of this material is so low that you cannot afford to put up a building without liberal use of it.

STEEL ROOFING AND SIDING

THE CHIEF MERITS of steel roofing are its durability, cheapness, ease of application and protection against fire. Suitable for all kinds of buildings; can be laid over old shingles, and can be nailed either directly to the rafters or to the sheathing. Steel roofing can be applied to either a flat or pitched roof, and is used on the finest residences as well as on factories, barns, sheds and many other buildings. Our prices are absolutely the lowest that can be quoted for full 28-gauge steel roofing. We guarantee every sheet of our roofing to be full 28-gauge. Where steel roofing is ordered by the square and no particular length of sheet given, we will ship 8-foot sheets. We recommend you ascertain the length of sheets that will best cover your building with the least and waste and then order by the sheet. We recommend galvanized steel roofing, as roofing is better galvanized than is usually turned out by the average steel painted roofing is coated on both sides with iron oxide, reground in pure linseed oil and applied with brushes. While our painted roofing is of the finest quality if not protected with paint. Paint as soon as put on and then at intervals of years if necessary. We sell full 28-gauge.

PRESSED CORRUGATED STEEL ROOFING AND SIDING

PRESSED CORRUGATED STEEL ROOFING is the strongest known sheet metal and is adapted for roofing, siding, ceiling, fire doors and fire shutters, awnings, etc. It is used extensively for siding and is especially well known for roofing purposes. We recommend corrugated sheets especially for roofing, siding ceiling and particularly for fireproof buildings. Corrugated siding is especially desirable for grain elevators, mills, barns and buildings where insurance amounts to a considerable figure.

CORRUGATED STEEL ROOFING is made from 26-inch material but only measures 24 inches from center to center of the outside corrugation. Corrugated roofing should have from 3 to 6 inches for end lap and 1½-inch corrugations for the side lap. When used for putting over old shingles, it is well to lap two corrugations, although it is not absolutely necessary; and when used of a building, 1½-inch corrugations are always sufficient to prevent under the steel.

CORRUGATED ROOFING IS CHEAPEST AND EASIEST It requires only a hammer and a pair of tinners' snips to lay this kind of roof a roof or side of a building. When you take into consideration the expense of you will find that this roofing is especially desirable where a large quantity is

CORRUGATED STEEL ROOFING is shipped to you direct from the in Central Ohio.

THE ILLUSTRATION TO THE LEFT shows our corrugated sheet steel with corrugations 2½ inches from center to center by ⅛ inch deep and made of full 28-gauge steel. We do not sell the light weight kind that is sold by some dealers as 28-gauge, while it is really only 29-gauge, which is much lighter than ours. This roofing weighs 68 pounds to the square, painted, and 85 pounds galvanized. Remember, we sell full 28-gauge.

THE OLD RELIABLE TWO-V AND THREE-V CRIMP STEEL ROOFING

V CRIMP ROOFING may be laid over sheathing, shingles, or can be nailed direct to the rafters, which should be placed 24 inches from center to center, and can be used on either a pitched roof or flat roof; in fact, can be used on any roof having more than 2 inches fall to the foot.

TWO-V Crimp Steel Roofing has a covering width of 24 inches after lapping one crimp over the other. The two-V crimp sheet appears to be the more popular because it is less work to lay it on the roof, as it can be put directly on the rafters and the V wood strips should be nailed on the top surface of the rafter. Put a crosspiece between the rafters wherever there is a joint or lap. This roofing should be well coated with paint under the lap and nailed down to the crosspiece between the rafters.

IT IS SO EASILY LAID, requiring no soldering and folding or hammering of seams or joints; anyone who has ordinary mechanical ability can put it on.

PRICES ON TWO-V CRIMP STEEL ROOFING.

No. 63F3077 Two-V Crimp Roofing, painted both sides. Price, per square of 100 square feet **$1.90**

Length of sheet, feet	5	6	7	8	9	10
Price, per sheet	21c	25c	29c	33c	37c	41c

PRICE, PER SQUARE (PAINTED), in lots of 15 squares or more $1.85

No. 63F3078 Two-V Crimp Roofing, galvanized.
Price, per 100 square feet $3.25

Price, per sheet	34c	41c	48c	55c	62c	68c

PRICE, PER SQUARE (GALVANIZED), in lots of 15 squares or more $3.15

Two-V Crimp Roofing weighs about 70 lbs. per square painted, and 85 lbs. galvanized.

THREE-V Crimp Steel Roofing has a covering width of 24 inches from center to center of two outside crimps. The center crimp adds much to the strength of the sheet as it stiffens the iron, prevents the sheets from rattling and, furthermore, adds to the appearance of the roofing, closely imitating batten boards. Three-V Crimp Steel Roofing can be laid over old shingles or on a smooth surface where you can place a wood V strip to support the center crimp. On a new roof it is only necessary to place sheathing boards every 2 feet, this being close enough to allow the V strips to properly support and strengthen the center of the sheets.

V CRIMP Steel Roofing is shipped direct from the steel mills in Central Ohio.

PRICES ON THREE-V CRIMP STEEL ROOFING.

No. 63F3085 Three-V Crimp Roofing, 28-gauge, painted both sides. Price per square of 100 square feet **$2.05**

Length of sheet, feet	5	6	7	8	9	10
Price, per sheet	22c	27c	31c	36c	40c	44c

PRICE, PER SQUARE (PAINTED), in lots of 15 squares or more $2.00

No. 63F3086 Three-V Crimp Roofing, 28-gauge, galvanized. Price, per 100 square feet $3.40

Price, per sheet	36c	43c	50c	57c	64c	71c

PRICE, PER SQUARE (GALVANIZED), in lots of 15 squares or more $3.30

Three-V Crimp Roofing weighs about 72 lbs. per square painted, and 88 lbs. galvanized.

THESE PRICES ARE FOR ROOFING ONLY AND DO NOT INCLUDE STRIPS, NAILS OR PAINT. SEE PAGE 1204 FOR PRICES ON NAILS AND PAINT.

Roofing requires 50 lineal feet for each square (100 square feet, or a space 10 while Three-V Crimp Roofing requires 100 lineal feet for each square.

No. 63F3081 Wood V Strips for V Crimp Roofing. Price, per 100 lineal It requires 50 feet of wood V strips for a square of the two-V roofing and 100 wood V strips for a square of three-V roofing, and 1 pound of dry paint and 1 pound nails for each square of roofing. Shipped with roofing direct from the mills in

WOOD V STRIPS

V CRIMP ROOFING requires a triangular wood strip, size ⅞ inch on each side, to be used under the crimps. These wood V strips are shipped from the steel mills with the steel roofing and sold in any quantity. The Two-V Crimp

OUR ROLL AND CAP ROOFING is used on all kinds of buildings, and is easy to put on, the only tools necessary being a pair of edging tongs, a wooden mallet or hammer and a pair of pair of squeezing tongs, a wooden mallet or hammer and a pair of tinners' snips. It can be used on a roof with only 2 inches fall to the foot. It is therefore adaptable for either flat or steep roofs, and is extensively used on old roofs where you might want to place it over the shingles or on uneven surfaces. A roll is 26¼ inches wide and contains 50 lineal feet, which covers one square or 100 square feet. With each order we furnish 50 side cleats which should be placed every 12 or 14 inches apart, and we also furnish 51 lineal feet of caps.

$2.20 PER ROLL

WE ESPECIALLY RECOMMEND Full 28-gauge Plain Roll and Cap Roofing for every kind of work where any kind of steel roofing can be applied. Sold only in full rolls containing one square or 100 square feet, which covers a space 10 feet by 10 feet square. Made of 28-gauge steel, either painted or galvanized. Shipped direct from the steel mills in Central Ohio, or from our Chicago store.

$58.95 STARTS YOU

Making Concrete

INSURING YOU LARGER PROFITS THAN ON OUTFITS COS $200.00 TO $300.00 ELSEWHERE. WE GUARANTEE EVERY O

WITH OUR TRIUMPH BLOCK MACHINE. SEE BOTTOM OF NEXT PAGE FOR OUTFIT INCLUDING THE WORLD'S BEST WIZARD BLOCK MACHINE.

MANUFACTURING CONCRETE BUILDING MATERIALS complete for general building purposes established and profitable business every section of the country. The outfits we show on these pages are complete in every detail. We furnish that you can start right in this profitable business with but small outlay for equipment. Each outfit necessary machinery and accessories for making concrete building blocks, window and door sills, window steps, porch piers, porch columns, chimneys, etc. There is a good market for these lines and you can furn materials necessary for building an ordinary dwelling, barn or handsome residence. We show two examples done with the outfits on these pages. Our porch outfit, included in either equipment, enables you to make line of porch materials, which can be used for remodeling old buildings; work of this kind commanding bigger profit than ordinary building materials. The tools we furnish for laying the blocks enable an unskilled an expert job in less time and at less expense than can be done by an expert mason.

THIS RESIDENCE CAN BE BUILT WITH PRODUCTS OF OUR $58.95 OUTFIT

COMPARE OUR OUTFIT WITH OTHERS and consider the value for the money we ask. Certainly you have never before been offered an outfit so complete for anything near our price. No dealer offers anything like it under twice our price. It includes everything you require to go into this profitable business—tools and all—so that all you need to provide is sand, gravel and cement.

GET INTO THIS BUSINESS and you are sure to make big money. When working for others have you ever stopped to consider your earnings in wages at the end of a year? Let us do a little figuring. The average laborer who works ten hours a day and gets $1.50 earns $450.00 in 300 working days. The average mechanic earns $2.50 a day or $750.00 a year.

THE FOLLOWING TABLE SHOWS YOU THE DAILY EARNINGS is making each of the various kinds of concrete products with our $58.95 outfit. Each line in the table shows the output of one man per day in that particular product, but as you can work four or five men with our outfit, you can readily see that a day's profit is big. In the first item alone your profits are $8.00 a day, and this is making allowance for your labor at $2.00 per day, for that is figured in the cost. Your profits in that item alone for 300 working days would be $2,400.00, and allowing you $2.00 for labor, is $600.00; thus making it $3,000.00 in all. We arrive at the cost of the various items, for example, as follows: Take the first item in the table, 100 8x8x16-inch concrete blocks made in the proportion of one part of cement to five of sand and gravel, requires two barrels of cement at $2.00 per barrel, $4.00; 1½ yards of sand and gravel at 75 cents a cubic yard, $1.00; and allowing yourself $2.00 a day for labor, $2.00; total, $7.00. Divide this by 100 and your cost is 7 cents per block. The cost of the other items in the table are figured on the same basis.

PRODUCT	Cost, Each	Selling Price, Each	Profit, Each	One Man's Daily Output	Total Daily Profit
Block, 8x 8x16 inches....	$0.07	$0.15	$0.08	100	$ 8.00
Block, 8x10x16 inches....	.09	.20	.11	90	9.90
Block, 8x12x16 inches....	.11	.24	.13	80	10.40
Porch Column complete..	2.40	7.00	4.60	5	23.00
Sill, 10 inches wide, 8 inches high, 5 feet long.....	.45	1.00	.55	20	11.00
Cap, 10 inches wide, 8 inches high, 5 feet long..	.45	1.00	.55	20	11.00
Step, 10 inches wide, 8 inches high, 5 feet long..	.45	1.00	.55	20	11.00
Lintel, 10 inches wide, 8 inches high, 5 feet long..	.45	1.00	.55	20	11.00
Water Table, 10 inches wide, 8 inches high, 5 feet long..	.45	1.00	.55	20	11.00
Chimney Block.....	.13	.30	.17	30	5.10
Pier Block.....	.13	.30	.17	30	5.10

The above figures are reasonable and conservative. We have rather underestimated the capacity of this outfit.

$58.95 STARTS YOU in this profitable with a positive of success. No matter what your present whether mechanic, laborer, farmer, merchant man, you can make good profits right from the not even necessary to take an active part in yourself. You can hire reliable and competent have a son or dependable relative, you management of the business and you can regular work, merely overseeing the affairs business.

WE GUARANTEE OUR MACHINES and equal to every test to which a concrete be subjected. You take no risk whatever, for machines fail to do the work thoroughly you are not satisfied, you are at liberty to at our expense, and we will return both the freight charges. We take all the risk. You penny.

WHY WE CAN FURNISH YOU $58.95. We have made arrangements with supply us with these complete outfits in very We naturally make a considerable saving handling this big outfit as one. We avoid all separate handling of each part.

THE ILLUSTRATIONS at the right of page show the ucts you can make with this outfit. Beginning you will note the various styles and sizes of the Triumph Machine. Next a column compl fluted column and ring, column base and pier blocks, water table and sill. Note the hat at the top of the opposite page, and the co house on this page. These are examples of make with our outfits.

We furnish free with each outfit or machine Instructions, fully describing the operation machines, so that you will have no trouble best results from each. It is a book of gen describing the various processes of mixing waterproofing, coloring and making of the building materials. It is valuable information the concrete construction business.

THE WIZARD FACE DOWN CONCRETE BLOCK MACHINE

$42.50

THE ONLY AUTOMATIC ELLIPTICAL CORE CONCRETE BLOCK MACHINE MADE. THE BIGGEST PROFIT MAKER IN BUSINESS AND SETS THE PACE FOR THEM ALL. HUNDREDS OF OUR CUSTOMERS HAVE WRITTEN US THAT THE WIZARD HAS DOUBLED THEIR OUTPUTS AND PROFITS. WE GUARANTEE TO SATISFY YOU ABSOLUTELY OR RETURN MONEY

THE WIZARD IS A BIGGER PROFIT MAKER than any other machine because it makes twice as many blocks in the same time. machines. Not only that, but it makes a stronger, truer and better looking block because it makes the block face down principle. All parts are perfectly fitted and our face designs are of the best styles that can be products of the Wizard machine have been thrown into direct competition with the products of the best priced machines of other makes—machines costing two to three times our price for the Wizard, and in every instance the Wizard products have been given the preference by the dealers. The Wizard machine on the market for several years. We have taken great pains to keep in close touch with our customers purchased the Wizard and we know positively from their own statements that they are enjoying the cess and the best trade with their Wizard products. There is always a ready market for concrete made on our machine, no matter what the style or type of blocks you make. We keep abreast times and take every opportunity to improve the construction and efficiency of our machine keep adding and bettering the designs of our face plates every season.

ONE MAN CAN MAKE 125 BLOCKS A DAY on the Wizard Machine, best that one man can average machine of other makes is 75 blocks a day. As the materials in each block cost (which is about 5 cents a block) and the labor is the only other item, you can readily see Wizard turns out 125 in place of 75 blocks in the same time with the same labor, the Wiz will cost less to make. Comparing the total output of the Wizard with that of the above and comparing the cost of the block in each case, you can double your profits by using

OUR CHALLENGE TEN-DAY TRIAL OFFER AND GUARA Send us your order for the Wizard machine and we will ship you the machine with complete including twenty-five pallets, as shown on the following page, direct from our factory to can compare it with other machines, test it for ten days, and if it does not make better make them faster and easier than any other machine on the market, even though other cost twice the price you paid for the Wizard, you can return it to our factory at and we will immediately return to you the price and any freight charges you paid.

THE CONSTRUCTION of the Wizard is mechanically perfect in every detail are made of the best quality of iron and fitted together form as to work smoothly and accurately, giving the operator a perfect, true and with a handsome face design every time.

THE STAND is heavy, well supported with ribs and braces, making it rigid, so not twist, shift or sag when making a block.

THE FLASK is made on the face down principle and all parts of the flask perfect centers, so that the mold will square up in perfect shape and open with ease. No part will interfere with the block when releasing and causes

THE CORES are two in number on the 16-inch length machine and three on length; they are elliptical in shape and are proportioned so as to give 33 1-3 per cent air space to 66 2-3 per cent bearing area, this being the standard all building ordinances. The elliptical shape of the core permits the material when to follow the sides to the center under the cores, so that the material is of even throughout. This construction eliminates tamping before the flask is full, which machines of other makes, and does away with all danger of breaking the block, before the flask is filled.

THE LEVERS are attached to the flask in such a way that they work all parts shifting. The flask can be turned, opened to release the block and of the way without letting go of the lever handles.

THE AUTOMATIC CORE EXTRACTOR is attached to the cores and frame so that when tilting the flask to block, the cores are withdrawn automatically and do not require separate

THE SHELF can be placed on either side of the machine, making it convenient to place the tools not in use when

THE PALLET is constructed of iron, very light and well reinforced, contains holes for the cores to pass through, and that the block can be lifted away from the machine without a carrying device. We furnish twenty-five pallets with each machine, but it is necessary for the operator to have as many pallets as he will make blocks per day.

Each machine, at the price quoted below, is furnished as illustrated above and with a complete outfit as illustrated and described on the following page, including twenty-five pallets. Shipped from factory in Central Ohio.

CAPACITY. The capacity of the Wizard Concrete Block Machine with one man is a day and with two men 250 to 300 blocks a day. We have had our customers who operate the Wizard, that they have made as many as thirty blocks an Wizard, and that one man has turned out blocks for a certain length of time at one

YOU WILL FIND that although the Wizard may contain several mechanical details, it is not a complicated machine, as it does not contain sprockets, springs, slides or ratchets and details of that kind that are so liable to become with concrete material and interfere with the smooth working of the machine. Every detail on the Wizard is simple and very essential, and is placed there for the purpose time, making a perfect block and relieving the operator from unnecessary work.

BE SURE TO READ THIS

WALLACE FORD, 181 Meldrum Ave., Detroit, Mich. "I saved the price of your Wizard on my foundation. The machine certainly works fast and turns out the work perfectly. I could use about 125 pallets more, I haven't enough at the present time to carry me through for a day."

WM. ROBERTS, 802 N. Pine St., San Antonio, Texas. "Received the Wizard Block Machine and Mixer I purchased from you and they are giving perfect satisfaction. My men can make thirty-five blocks an hour on the Wizard, and I fail to see it beat around here."

JOHN BYRD, Hudson, Ill. "I have sent you an order for more pallets, I haven't half enough to keep the Wizard going. The machine the better I like it, as perfect block every time, and the unlimited."

WM. D. FRAZIER, 419 W. Lafayette, Medina, Ohio. "To let you know how Wizard works, I will give you the time my molder made one perfect block, time he inserted the pallet in the machine the concrete in the mold, in fact, thing necessary to build a block, took him just fifty-six seconds. The all perfect and the designs are beautiful.

FEW OPERATIONS AND EVERY OPERATION AUTOMA

THE FLASK IS TURNED, BLOCK RELEASED AND FLASK TURNED BACK WITHOUT LETTING GO OF LEVER HA

G. O. McALEXANDER, Salem, Va. "I have made 5,000 blocks since receiving the Wizard Block bought from you, and will say that the blocks are as nice as any I ever saw. The machine turns them and fast, and I don't think anybody could buy a better machine for double the money."

CHANGES.

If you so specify in your order we will send you any two designs you may wish instead of standard rock and plain shown above. Our full line of designs is shown below. If you want a change made in your outfit be sure to say so very plainly in your order so no mistake will be made.

WITH EVERY WIZARD CEMENT BLOCK MACHINE WE FURNISH THE COMPLETE BIG OUTFIT SHOWN IN PICTURE TO THE RIGHT. READ THIS LIST AND SEE WHAT YOU GET.

2 Face Plates for making whole, half and quarter plain face blocks.
2 Face Plates for making whole, half and quarter medium rock face blocks.
2 Core End Doors for making core ends on the blocks.
4 Return End Doors to match the face plates for making corner and pier blocks.
2 Plain Dividing Plates for making plain ends on half and quarter blocks.
2 Core Dividing Plates for making core ends on half and quarter blocks.
1 Face Plate for making inside corner rock face blocks.
2 Joist Block Attachments for making space for joists in the building.
1 Dividing Plate for making gable blocks.
2 Wall Plugs for making solid blocks.
2 Pallet Plugs for making solid blocks.
1 Steel Striker for smoothing off the back of the block.
1 Double End Tamper.
1 Hopper.
25 Cast Iron Pallets.

ALL THESE ATTACHMENTS ARE INCLUDED IN THE REGULAR WIZARD OUTFIT.

The above items are furnished with the Wizard Block Machine at the price shown on the preceding page. We do not load you down with a whole lot of attachments which you very seldom have use for, but we furnish just what you will need for making the blocks required in an ordinary dwelling. You can always add extras and different designs if you need them, so that your initial outlay need not be very great.

E ILLUSTRATIONS above show the various special designs of face plates and end doors that we can furnish with either the Wizard or Triumph Block Machine. We can also furnish the plain face, rock face, panel face and cobblestone face for bay window attachment, and we can furnish plain and rock face designs in the circle block plate.

DESIRED we will send you any one of the above designs of face plates in place of the designs regularly furnished with the outfit. When ordering any above designs of face plates, together with those of the regular outfit, be sure to state design is wanted, and also allow our catalog price for each. Although we can furnish the same design of face plates for either the Wizard or Triumph Concrete Block Machine we want it clearly understood that these face plates are not interchangeable, that is, the plate that will fit the Wizard Block Machine will not fit the Triumph Block Machine and the face plate that will fit the Triumph Block Machine will not fit the Wizard.

END DOORS. **The end doors are not interchangeable for the different sizes of machines,** so be very careful to order the proper end door for your machine, giving the catalog number listed under the size of machine you have. It is advisable to order both right and left hand end doors, so you can make pier blocks when needed, although if you only want one end of the block to match the face plate, one end door will be sufficient. To make return ends for both right and left in the **scroll** design, you will need both end doors, as the block cannot be turned over. Use the regular rock end for **left** hand return corner in the **Broken Ashler styles, A and B.** Order a special return end door for the **right** hand end for **Broken Ashler styles, A and B.**

Do not order extras for the Triumph Block Machine from this list, but order them from list on page 1175.

ORDER EXTRAS FOR TRIUMPH MACHINE FROM LIST ON PAGE 1175.

WIZARD TILE MACHINE

THE SIMPLEST AND FASTEST HAND POWER TILE MACHINE ON THE MARKET

Two men can make from 850 to 1,000 perfect 4-inch tile per day on our Wizard Automatic Tile Machine at a cost, including labor, of less than 2 cents each. This is a much larger profit in proportion to the investment than you can make on a power machine, which requires from five to eight men to operate and an investment of from $1,500.00 to $2,000.00, including machine and engine to run it.

Large tile manufacturers can use Wizard Tile Machines in equipping their plant to much better advantage than they can use a power outfit. Three Wizard Tile Machines representing an investment of less than $150.00 and a crew of seven men will turn out more perfect tile than the same crew with a high priced power outfit representing an investment of from $1,500.00 to $2,000.00.

Farmers can afford a Wizard to make their own tile, saving enough in the use of the machine to more than pay for it. When weather does not permit outdoor work, you can spend your time making tile and you will have no difficulty in disposing of all the tile you do not need yourself at a handsome profit.

CONSTRUCTION. Our Wizard Tile Machine is constructed throughout of the best gray iron castings and steel shafting. In the illustration we show it ready for the making of a tile. The jacket is made of cast iron in two pieces, securely locked together with a simple latch, and can be instantly opened for releasing the tile, and is securely held in the machine around an immovable core, which insures the opening of the tile being in the center every time. The cement material is poured into the combination hopper and tamper, feeding uniformly as the tile is tamped, making it possible to thoroughly tamp the tile with but little labor and few blows. A set of cups, each holding sufficient material for one tile, is furnished with each machine. They can be kept filled by a boy and are more convenient and economical to use than a shovel. The tamper held in the guide hopper which fits over the jacket can be easily slid out of position when the tile is completed, and one movement of the side lever strips the tile in the jacket from the core. Every tile is a perfect one with the opening exactly in the center and both ends perfectly true and square. **An extra jacket and ring trowel for finishing tile furnished with each machine.**

GUARANTEE. Every machine is sold under a guarantee to give perfect satisfaction, or it may be returned at our expense and your money and freight charges will be returned. We also guarantee the machine to be perfect in material and workmanship and will replace any part or parts free of charge giving out on account of defects.

SIZE. We can furnish the Wizard Tile Machine in three sizes for making 4-inch, 5-inch and 6-inch tile, dimensions as shown below.

EACH SIZE INTERCHANGEABLE. This means that the parts of the machine forming the tile are interchangeable on the different sizes of machines. While it is advisable to buy a machine of each size, it is not absolutely necessary, as by purchasing a set of attachments you can change a machine of one size so that it will make tile of another size. Each set of attachments includes a core, core base, mold supports, tamping hopper, retaining hopper, two jackets and a set of cups.

LIST OF WIZARD CONCRETE TILE MACHINES AND ATTACHMENTS.

No. 11F5870 No. 4 Wizard Tile Machine, complete as described above. Makes concrete tile with 4-inch opening, 12 inches long with ⅝-inch wall. Shipping weight, 260 pounds. $41.50

$6.65 FOR OUR 4-INCH TRIUMPH DRAIN TILE MOLD

CONCRETE TILE ARE BETTER THAN CLAY TILE. THEY ARE EVERLASTING, EASIER HANDLED, AND ABSORB THE MOISTURE BETTER THAN CLAY TILE.

A Tile made on a Triumph Mold.

YOU CAN MAKE at least 100 feet a day at a profit of about $5.00 per 100 feet after paying for your material and labor.

One bag cement and ¼ yard coarse sand make about seventy 4-inch tile.

CONSTRUCTION OF THE TRIUMPH TILE MOLDS IS VERY SIMPLE.

They are constructed in four parts: 1st, the outside shell; 2d, the core; 3d, the hopper, and 4th, the core hood. The outside shell is made in two parts of the best gray iron, hinged on one side and closed on the other with a latch. The core on all sizes except the 4-inch is made of galvanized iron and is equipped with a collapsible adjustment of our own very simple in its arrangement, enabling collapse the core sufficiently to withdraw it easily. The 4-inch core is heavy galvanized iron slightly tapered. The hopper is made of cast iron and is large to retain the concrete while tamping and prevents any spilling. Jacket is made of galvanized iron and fits over the core, which prevents materials from getting into the core. Every part of the Triumph Mold is made and properly fitted and will turn out perfect tile.

Tongue and bevel attachments for these molds send for our special Concrete Catalog. It's free. Shipped from factory in Central Ohio.

OF TRIUMPH SEWER AND DRAIN TILE MOLDS AND THE SIZES OF THE TILE THEY MAKE.

PRICE SLASHED AGAIN!

$6.75 FOR THE IMPROVED TRIUMPH CONCRETE FENCE POST MOLD

Improvements in manufacture and increased output have enabled us to figure another reduction in the manufacturing cost. We formerly sold a mold of this kind for $9.85, then price was rduced to $7.95, and now we offer an improved type of mold at $6.75. Free yourself from the continual replacement and repair expense of keeping up a wood post fence. Make posts in your spare time of the best material ever known—concrete—and put in posts that will never rot or burn down. A concrete post well made and anchored will last forever. The first cost is the only cost.

Post and Mold.

Our Improved Triumph Fence Post Mold is made of best gray iron castings heavily braced and reinforced by ribs which prevent any spring or breakage. The ends are securely held in place by eye bolts fitted with thumbnuts, making it a simple and rapid operation to open or close the mold.

It makes a square post 7 feet long, 5 inches wide at the bottom, 3¼ inches wide at the top and 3¼ inches thick throughout. The sides are slightly rounding and the part of the post above the ground has a series of knobs projecting on two sides which serve to keep the fence wire from slipping up or down.

Any Wire Fencing can be attached to posts made in this mold. Simply place the fence wire between two of the knobs, twist a piece of wire around the fence wire close to the post and bring the other end around the post and twist tightly around fence wire on the other side. This is absolutely the strongest fastening known and does not require a special fastener or tool.

The concrete is mixed semi-wet and thoroughly tamped in the mold.

Immediately after tamping the mold can be opened and removed from the post. The post is allowed to remain where made until hard enough to move. One man with one mold can make about 100 posts a day.

COST OF POSTS made on our Improved Triumph Mold will average about 16 to 18 cents each, figuring $2.00 a day for labor, $2.00 a barrel for cement, 75 cents a cubic yard for sand and gravel and 7 cents for reinforcement. As a rule you have a lot of old barbed wire, ball iron, wagon tires, hoops or other similar material which can be straightened and used for reinforcement. No special or expensive reinforcement is necessary. For the convenience of those who wish to buy reinforcement from us we have arranged to furnish a steel rod which is a trifle less than ¼ inch in thickness and irregular in shape which is especially adapted for reinforcement of concrete. Shipped from factory in Central Ohio.

No. 11F5896 Improved Triumph Fence Post Mold. Shipping weight, 50 pounds. Price.....$6.75

No. 11F5897 Fence Post Reinforcement. Cut in 7-foot lengths, about 90 pieces to 100 pounds. Price from our factory in Ohio, per 100 pounds.....$1.80

Price in lots of 1,000 pounds or more from mills in Pittsburg, Penn., per 100 pounds $1.65

TRIUMPH PIER AND CHIMNEY MOLD

Concrete makes the strongest of all chimneys. With our Triumph Pier and Chimney Mold you can make concrete blocks, very rapidly and at little expense, which are especially adapted for chimney and porch pier construction. Blocks can be made hollow or solid as desired, the hollow block laying up perfectly with flue that is perfectly smooth and true. Each block represents a number of brick already laid and the saving in labor and time over common brick construction is very apparent. With these molds you can build a handsome chimney or porch pier, as we can furnish a number of designs for the body and a very pretty egg and dart design for the cap, which can be made with flue opening in center for chimneys using chimney mold core or it can be made solid for use as a porch pier cap. Our molds are of the best gray iron castings and are easily handled. A simple latch holds the mold together solidly and square, yet it is a simple matter to open the mold and remove it from the block. We can furnish any of the following designs:

Brick Face, Plain Face and Rock Face. Unless otherwise specified with your order, the brick face design will be sent, but should you desire a different design **be sure to specify the design wanted when ordering.** We include tamper with each mold. Shipped from factory in Central Ohio.

$29.95 For a High Grade Stationary Gasoline Engi

GUARANTEED ENGINES, BUILT IN OUR OWN NEW MODERN GASO ENGINE FACTORY. PRICES BASED ON LARGE QUANTITY, HIGH G QUALITY, ACTUAL COST OF MATERIAL AND LABOR WITH BUT ONE P

We Defy Competition on Gasoline Engines.

We have the factory and the facilities to turn o grade engines at the lowest prices ever name guarantee our engines to be equal to any engine on the market selling for twice the price we ask.

Sixty Days' Free Trial.

Send us your order and we will ship you an engine at once. When you receive it, put it to work, use it for sixty days, compare it as to finish, simplicity and power with any engine you know of, and if you are not perfectly satisfied, if you do not feel that the Economy Gasoline Engine is as good if not better than any engine on the market costing twice the price you paid us, you may return it and we will immediately return your money, together with any freight charges you paid.

Why We Are Able to Name Such Low Prices.

We have been selling gasoline engines for several years. Our gasoline engine business has been increasing. While we have always furnished the best engine we could at the lowest possible price, we felt satisfied in our own mind that if we could manufacture these engines in a new modern fully equipped gasoline engine factory, built exclusively for the purpose, we could sell to our customers a gasoline engine at a much lower price than we had ever before been able to name, at a much lower price than any high grade gasoline engine had ever before been sold. We therefore built and equipped at Sparta, Mich., one of the most modern and best equipped gasoline engine factories in the United States, a factory where every modern machine is installed, where every labor saving device is used, where we are able to obtain high grade mechanics, where we are able to secure our supplies at the lowest possible cost and for the lowest freight rates, and we are now building in this ideal factory the high grade Economy Gasoline Engines which we are offering for sale at prices way below what you would pay for any other engine made.

We Build Them by the Thousands.

In this factory we are able on account of our enormous sales to keep busy every day in the year; every machine is running at its full capacity every working day; there are no slack moments. We set our machines and run through thousands of parts of one kind without making a change. We have jigs, dies and tools that guarantee every piece and part to be exactly alike and interchangeable. You can take any part of any 2-Horse Power Economy Gasoline Engine and it will fit any other 2-Horse Power Economy Engine we ever made. You can take any part of any 4-Horse Power Economy Gasoline Engine and put it on any other 4-Horse Power Economy Engine; in fact, the Economy Engine is the engine that causes no trouble if repairs are ever needed. Every piece and part of similar design is exactly alike, made to fit within one-thousandth of an inch and fit perfectly.

What We are Doing and Will Do in the Gasoline Engine Business is Simply a Repetition of What We Have Done in Buggies, Cream Separators, Sewing Machines and Other Lines.

We found when we went into the gasoline engine business that the farmer was being charged from $100.00 to $150.00 for a 2-horse power engine such as we sell for $42.95; we found that the farmer and every user of a gasoline engine was paying the agent, dealer and m twice as much for handling expense and profits as the actu engine; we also found that engine factories were manufa very expensive way and that the cost on their 2-horse power more than we are now asking for the one we sell; and even cost of manufacturing was so much more than we ask, the making any better engine than we do. Our experience h taught us that to sell high grade engines at the right pri work up a large business. We first found there was a great a high grade engine if sold at a reasonable price. We then w to build gasoline engines in the most economical manner and the most economical manner; that is, direct from factory t price that was right, and the result has been that the large engines we have been able to make and sell has reduced the we are again making a reduction in the price of a high grad

The Guarantee Behind the Economy Gasoline Engi

We guarantee every Economy Gasoline Engine to do all that to develop its full rated horse power and do as much work cost for gasoline and oil as any other gasoli engine of the horse power, no matter what the name or price of the other guarantee all material and workmanship against defects, a place at any time during the life of the engine any part th on acount of defective material or workmanship.

Why We Expect Your Order for a Gasoline

We do not want you to send us an order as a favor. We compare the Economy with every other engine made, not price, but quality of material, simplicity and ease of ope more competition we have on gasoline engines the better w want you to look into the gasoline engine business thorough catalogs, look at the engines your dealers have for sale, and is to compare our engines with others. First compare our the man who wants to charge you more for a 2, 4 or 6-horse p what more he will give you than you can get from Sears, Co.; ask the man who tries to sell you any kind of an engi allow you to take it for sixty days and use it on your farm turn it if you are not perfectly satisfied; ask the man that you an engine if he will replace any piece or part that proves account of material or workmanship during the life of the don't want a one-year guarantee or a five-year guarantee: guarantee that will cover the engine during its lifetime, a will protect you from an unsatisfactory purchase. The Little Wonder Economy Gasoline Eng

SIXTY DAYS' FREE TRIAL SATISFACTION GUARANTEED

This Little Wonder Economy Gasoline Engine is the greatest value ever offered; more horse power for the money than was ever offered by anyone. This is all accomplished by our great manufacturing facilities in our wonderful new gasoline engine factory.

Don't Make a Mistake and Order Too Little Power.

While there is a small demand for a small engine like our Little Wonder, and while we build this Little Wonder Economy Gasoline Engine in 1½-horse power to meet the small demand, we want every customer to be sure to order an engine that will give sufficient power. While this 1½-horse power engine will do a certain amount of work, it has been the experience of most everyone who buys a gasoline engine that after they have purchased a small engine they find there are other things they could do, thus saving time and money, if they had more power. We really believe that nothing less than a 2-horse power should be used on the farm for farm work; in fact, we recommend a 4-horse power as the best all around engine for farm use.

No. 11F4509 1½-Horse Power Stationary Engine, shipped from our own factory at Sparta, Mich. Price..... **$29.95**

BORE—3¾ inches.
STROKE—5½ inches.

Two-Horse Power Economy Stationary Gasoline Engine

Our 2-Horse Power Economy Gasoline Engine may be used for running machinery usually operated by hand, such as feed cutters, grinders, grindstones, cream separators, washing machines, churns, sheep shearing machines, small lathes, drill presses, pumps, etc. It is one of the greatest labor saving machines you can buy and we guarantee it to be equal to any 2½-horse power engine on the market. It is constructed of the best material, is thoroughly inspected and tested before being shipped, is fully guaranteed, and we will ship it to you on sixty days' trial. At our price the engine is complete, all ready to run, with gasoline tank in the base, batteries, spark coil, wire, pliers, monkey wrench, oil can, one quart of oil and one box of grease. Also complete instruction book telling how to run and care for the engine.

HORSE POWER—Two.
TYPE—Four-cycle; water cooled.
BORE—4 inches. **STROKE**—6 inches.
SPEED—450 revolutions per minute.
PULLEY—8 inches in diameter, 4-inch face.
SHIPPING WEIGHT—About 550 pounds.
FLOOR SPACE REQUIRED—25x40 inches.
CRANK SHAFT—1½-inch, drop forged.

We describe just how these gasoline engines are made on page 1183.

Four-Horse Power Economy Stationary Gasoline Engine

ur 4-Horse Power Economy Gasoline Engine is a very popular size for general farm . It will run all machinery usually operated by hand and will also take care of um size grinders, shellers, shredders, light ensilage cutters, saws from 20 to 24 es in diameter, etc. For shop work it will handle all machines usually run by hand, power driven lathes, drill presses, forges, small planers, shapers, trip hammers, etc. thoroughly tested and inspected before being shipped, is covered by our binding antee and we will ship it to you on sixty days' trial. At our price the engine is plete, all ready to run, with gasoline tank in base, batteries, spark coil, wire, pliers, key wrench, oil can, one quart of oil and one box of grease. Also complete in- ction book telling how to run and care for the engine.

RSE POWER—Four.
PE—Four-cycle; water cooled.
RE—4½ inches. **STROKE**—9 inches.
EED—400 revolutions per minute.
PULLEY—12 inches in diameter, 6-inch face.
SHIPPING WEIGHT—About 750 pounds.
FLOOR SPACE REQUIRED—29x47 in.
CRANK SHAFT—1¾-inch, drop forged.

We describe just how these gasoline engines are made on page 1183.

No. 11F4511 Four-Horse Power Stationary Engine, all ready to run. Shipped from our own factory at Sparta, Mich. Price $74.75

o. 11F4512 Six-Horse Power Stationary ne, all ready to run. Shipped from our factory at Sparta, Mich. Price $104.45

Six-Horse Power Economy Stationary Gasoline Engine

Our 6-Horse Power Economy Gasoline Engine is adapted for heavy work, such as wood sawing, saws from 24 to 28 inches in diameter, burr mills, ensilage cutters, small threshers, large pumps for irrigating purposes, custom grinding, and for line shaft work where a number of light machines are to be run at the same time. This engine is of the right size to handle all machines usually found on the farm, and it will handle the light work as well and do it economically. It is fully guaranteed and is shipped on sixty days' trial. At our price the engine is complete, all ready to run, with gasoline tank in base, batteries, spark coil, wire, pliers, monkey wrench, oil can, one quart of oil and one box of grease. Also complete instruction book telling how to run and care for the engine.

HORSE POWER—Six.
TYPE—Four-cycle; water cooled.
BORE—5½ inches.
STROKE—10 inches.
SPEED—375 revolutions per minute.
CRANK SHAFT—2-inch, drop forged.
PULLEY—16 inches in diameter, 8-inch face.
SHIPPING WEIGHT—About 1,050 pounds.
FLOOR SPACE REQUIRED—31x56 inches.

We describe just how these gasoline engines are made on page 1183.

ht and Ten-Horse Power Economy Stationary Gasoline Engines

ur 8 and 10-Horse Power Economy Gasoline Engines are y duty engines for running heavy machines, such as large mills, feed grinders, running large saws, elevators, heavy line work, and in machine shops, etc. They are very powerful es, well made, thoroughly inspected and tested before being d, and we guarantee them to be equal to any 8 or 10-horse engines costing twice our price. They are shipped on sixty trial and we will replace at any time any parts that are tive. At our price the engines are complete, all ready to run, gasoline tank in base, dry batteries, spark coil, wire, pliers, key wrench, oil can, one quart of oil and one box of grease. complete instruction book telling how to run and care for the e.

RSE POWER—Eight and

ECONOMY WOOD SAWING OUTFITS

A gasoline engine has no equal for sawing wood. It will do more work with less trouble and expense than any other power. A wood sawing outfit will very soon pay for itself in sawing wood alone. You may also use the engine for stationary work, and as the engine is mounted on a truck you can haul it to your neighbor's and saw his wood, grind feed, etc. Some manufacturers sell a large sawing outfit, engine and saw all mounted on one truck, and ask a big price for it. But why pay a big price for a wood sawing outfit that can be used for the one purpose only? The outfits quoted herewith are our regular stationary engine, mounted on one-horse truck with wood saw frame and a 40-foot four-ply rubber belt. You can haul the engine from place to place; the saw frame and belt can be loaded on the truck. The outfits are very easily set up and will saw more wood and give better results than the highest priced portable wood sawing outfit made, and at one-half the price. For custom sawing and general farm work we would recommend our 6-horse power outfit, as this size will handle most any machinery used on the farm and will also take care of the light work as well. Our outfits are fully guaranteed and are sent on sixty days' trial.

PRICES FOR ECONOMY WOOD SAWING OUTFITS

Engine and Belt Shipped From Our Own Factory at Sparta, Mich., Saw Frame From Bradley, Ill.

No. 11F4516 **Four-Horse Power Engine, 24-Inch Saw With Frame and 40 Feet of 4-Inch Four-Ply Rubber Belting.** Shipping weight, about 1,500 pounds. Price..... **$129.**

No. 11F4517 **Six-Horse Power Engine, 28-Inch Saw With Frame, and 40 Feet of 6-Inch Four-Ply Rubber Belting.** Shipping weight, about 2,000 pounds. Price..... **164.**

NOTE—For friction clutch pulleys see opposite page.

Economy Hand Portable Engines

It is a great convenience to have an engine that you can pull about from place to place. You can use it in the barn to grind feed, cut fodder or shell corn; you can take it to the house to run the cream separator, washing machine and churn, or when the wind doesn't blow it will pump water. There are a dozen and one small chores about the farm where a hand portable gasoline engine will save you time and money. The outfits consist of the Economy Gasoline Engines as described on the opposite page. Our outfits are fully guaranteed and are shipped on sixty days' trial. The trucks are made for rough use; wide tire metal wheels, 14 inches in diameter, mounted on axles with wood channels well braced. These outfits are fully guaranteed and you cannot make a mistake in buying one, as they are the handiest outfits a man can have on the farm. If you have only light hand machinery to run, our No. 11F4535 2-Horse Power Outfit is what you want; if you have good size machines or want to run a number of small machines at a time, buy the 4-Horse Power Portable Outfit. If you are not sure just which engine to buy, write us just what you want to do and we will tell you what engine to get.

It is always a good plan to have plenty of power, as you never know when you will need it, and besides these portable engines may be taken from the trucks and used for inside work.

PRICES FOR ECONOMY HAND PORTABLE ENGINES

No. 11F4535 **Two-Horse Power Economy Engine on Hand Truck.** Shipping weight, about 650 pounds. Price.....**(Shipped From Our Own Factory at Sparta, Mich.)**..... **$52.**

No. 11F4536 **Four-Horse Power Economy Engine on Hand Truck.** Shipping weight, about 850 pounds. Price.....**(Shipped From Our Own Factory at Sparta, Mich.)**..... **85.**

NOTE—For friction clutch pulleys see prices on opposite page.

Economy Horse Portable Gasoline Engine

It is very inconvenient to move a stationary 6, 8 or 10-horse power engine from place to place, so we have fitted up horse portable outfits for convenience in transporting these larger horse power engines. They are generally used for sawing wood, running thresher, ensilage cutters, bean hullers, well drilling outfits, hoists, etc., and can be hauled from farm to farm for grinding, wood sawing, etc. The trucks are constructed of the best material to stand rough usage. Wide tire steel wheels are mounted on wood axles supporting large wood channels, which in turn are well braced to eliminate vibration. The trucks are guaranteed, and an outfit of this kind will pay for itself in a very short time. When not in use as a portable outfit the engine may be taken from the truck and mounted inside for line shaft work or running such machinery as you desire. For general farm work we would recommend our 6-Horse Power Portable Gasoline Engine. This size will handle most any machinery used on the farm and will also take care of the light work as well. The 6-Horse Power Outfit is furnished with shafts for one horse; the 8 and 10-Horse Power Outfits with tongue for two horses. **THE ENGINES USED ON THESE OUTFITS ARE OUR REGULAR STATIONARY ENGINES, AS DESCRIBED ON OPPOSITE PAGE.**

PRICES FOR ECONOMY HORSE PORTABLE ENGINES

No. 11F4537 **Six-Horse Power Engine on One-Horse Truck.** Shipping weight, about 1,625 pounds. Price.....**(Shipped From Our Own Factory at Sparta, Mich.)**..... **$134.**

No. 11F4538 **Eight-Horse Power Engine on Two-Horse Truck.** Shipping weight, about 2,025 pounds. Price.....**(Shipped From Our Own Factory at Sparta, Mich.)**..... **202.**

No. 11F4539 **Ten-Horse Power Engine on Two-Horse Truck.** Shipping weight, about 2,825 pounds. Price.....**(Shipped From Our Own Factory at Sparta, Mich.)**..... **279.**

ECONOMY PUMPING OUTFITS

A pumping outfit on the farm will more than pay for itself in one season in pumping water alone. Our 2-horse power outfit connected to an ordinary windmill force pump will pump about 4,000 gallons of water in ten hours on 2 gallons of gasoline. If you have an Economy you do not have to depend on the wind for your water, and it may be used for other purposes. It will run the cream separator, feed grinder, grindstone, washing machine, churn and any other machinery usually operated by hand. Every farmer is losing a great opportunity to save money by not having a pumping outfit. If you want an engine for pumping water and don't know just what size to buy, write us, giving the diameter of your pump cylinder, length of stroke, size of pipe, depth of well and how much water you want, and we will tell you what engine will do the work. The Economy Pumping Outfits at the prices we ask are for the regular Economy Engines, as described on opposite page, including pump jack geared 4 to 1, with tight and loose pulley, three strokes, 5, 7½ and 10. We also furnish an 11-foot 2-inch rubber belt, so that the outfit when shipped is complete, all ready to pump water.

PRICES FOR ECONOMY PUMPING OUTFITS

Shipped From Our Own Factory at Sparta, Mich.

No. 11F4550 **Two-Horse Power Pumping Outfit, 4x1-Inch Pulley.** Weight, 635 pounds. Price.... **$46.95**

Economy Gasoline Engine Is Standard, All Parts Are Interchangeable. Repairs Will Fit Perfectly n Be Secured on Short Notice and at a Small Cost. We Guarantee Satisfaction

CONSTRUCTION

nomy Engines are not built in a haphazard way to run for a o and then be replaced. They are constructed of the best an buy, and if properly taken care of should last a lifetime. of the engine is carefully inspected before it is put in place. perfectly and without any changes. Every part of the Econ- e is standard. **By standard we mean that every piece is like** piece of the same kind without even one-thousandth of an iation where that degree of accuracy is necessary. All parts angeable and may be replaced without any changes or the special tools. No mechanic is necessary; the ordinary tools the farm will do the work. This alone means a great saving d expense in replacing worn parts. A complete record is kept ngine, so that if you ever want any repairs we know just e you have and just what to send you. We have a special partment that looks after nothing but repair orders, so that s always made the next day after your order reaches us. If a particular hurry you may telegraph the order; we in turn aph the factory and the part will go out the same day. This n against long delays and will save loss of time on an import- **THE CRANK SHAFTS** of the Economy Engines are made of d steel, the same as used on all high grade automobiles. **THE** s used on the Economy Engines are die cast genuine babbitt. enuine because there are so many grades used by other manu- that will not give satisfactory service. All bearings are remov- may be replaced when worn out, and are so arranged that you p the wear. The main bearings are set on an angle of 45 ed are particularly long, which insures long life and even **THE CYLINDER** is cast of close grained gray iron, bored ed to exact size. It is separate from the base and water hopper adily be replaced. It is fitted with drain cock at the bottom e water out to prevent freezing, making the engine frostproof. **LINDER HEAD** is securely fastened to the cylinder with five ing a perfectly tight joint. The intake and exhaust valves are proper points and are of the proper size to give the best results. controlled by special tempered springs. The intake valve works ly; the exhaust valve mechanically. **THE PISTON AND** are made of close grained gray iron turned to size and then a perfect fit, giving the highest possible compression. The is all steel case hardened. **THE CONNECTING ROD** is of the e, made of malleable iron. The crank shaft and piston pin are die cast genuine babbitt, both of which may be removed and t small cost and with very little trouble. **THE FLY WHEELS** eavy, counterbalanced so as to carry a load at all speeds with ibration. Each wheel is turned and is securely fastened to the ft by key and bolts, making it impossible for the wheels to work loose, yet they are very easily removed. **THE GOVERNOR**, of the hit and miss type, is very sensitive and keeps the engine at a steady speed by cutting out the explosions when the speed tries to rise above the proper point, in this way saving the batteries and gasoline. The governor is controlled by a speed lever, so that the speed may be changed without stopping the engine. **THE CAM ROD** (the rod running along the side of cylinder) assists the governor in controlling the speed of the engine by opening and closing the exhaust valve at the proper time; it also controls the spark. When the engine runs beyond a certain speed the governor balls fly out and catch the cam rod, which opens the exhaust and shuts off the spark, thus saving fuel and batteries. **THE IGNITER**, of the make and break type, is adjustable so that spark may be changed when necessary. It is of special design, particularly adapted for the Economy Engine. It is simple and will need very little attention. **THE CARBURETOR** or mixing valve is controlled by the suction of the piston which draws in a charge of gasoline only when needed. This mixer is simple, economical and gives the best of results under all conditions. The only adjustment necessary is to regulate the supply of gasoline. No adjustment of the air is needed; the amount supplied is sufficient under all conditions to furnish just the right mixture. The supply of gasoline is controlled by small needle valve with numbered dial.

TESTING AND INSPECTION—Every Economy Gasoline Engine goes through such a rigid inspection before it is shipped, that it is almost impossible for any defective material to go out in a finished engine. Every part is examined carefully several times before the engine is assembled, and must fit properly and work perfectly. After the engine is put together it is again thoroughly inspected, and in the testing room it is run under a heavy brake load for several hours, so we are sure that it develops its full rated horse power and that it is in perfect running order.

THE EQUIPMENT—All Economy Engines are complete, ready to run, with six dry batteries and spark coil in a neat box with a switch on the outside. Attached to this are 6 feet of wire to connect the batteries to the engine. We also furnish one pair of combination pliers and forceps, two wrenches, one oil can, 1 quart of the best cylinder oil and one box of cup grease, also book of instructions, telling how to start, operate and care for the Economy Engine. This book also gives illustrations and prices of all repair parts.

PULLEYS—The sizes of pulleys furnished with the Economy Engines are given with the description of the engines. These sizes are standard and should not be changed unless absolutely necessary. If it is necessary that you have a pulley of different diameter or width in order to get more speed, add to the price of the engine 25 cents for each additional inch in diameter or width.

Department 11, Mechanical Engineers,
SEARS, ROEBUCK AND CO.
CHICAGO, ILL.

WE OWN THE FACTORY WHERE THE ECONOMY ENGINES ARE MADE.

Economy Gasoline Engines are built in our own factory, located at Sparta, Mich., from Grand Rapids. It is one of the largest gasoline engine factories in the in every respect. We have our own foundries and manufacture the nt to finish. The latest and most improved blast furnaces and the most are used in molding, insuring perfect castings of an even consistency, em durable and long lived. After the castings are cleaned and properly to the machine shop where they are shaped, bored, reamed or ground chines, every part to the exact same size, insuring each part fitting dies and jigs are used, making all parts standard and absolutely inter- m the machine shop the parts go to the assembling room, where the engines Every part must fit perfectly and without any changes. Here also the ghly inspected for any defects in material or workmanship. If any parts not perfect they are thrown out and the engine is reassembled. After together it goes to the testing room, where it is thoroughly tested and under a heavy brake load until it develops its full rated horse power the engine has gone through this most rigid inspection it goes to the paint shop to be painted, then to the shipping department, where it is crated and put in storage ready for shipment, insuring quick delivery. No engine travels over the same ground twice. It goes from one end of the factory to the other without a stop, and as we manufacture the engines in lots of one hundred at a time, the cost of manufacture is very low and we have figured our prices accordingly, taking the actual cost of material and labor, adding but our one small profit, and as all engines are shipped direct from the factory to our customers we do away with all handling expense, salesmen's or agents' expenses and commissions, which accounts for our being able to sell high grade engines at prices considerably lower than you pay elsewhere. We own and operate the Economy factory. All engines are manufactured to fill our orders. No sales are made direct from the factory. We built this factory and installed the latest most up to date machinery with the intention of manufacturing high grade gasoline engines at a low price and to manufacture them in such quantities that we could make immediate shipment and sell the engines at a reasonable price. Our factory has a capacity of from 50 to 75 engines a day and we can take care of all orders promptly, making shipment in a few days after the order is received.

Friction Clutch Pulleys

When running heavy machinery, line shafting, etc., it is advisable to use a Friction Clutch Pulley, which enables you to start the engine independent of the machinery. You may also start the machinery gradually, saving wear and tear on both machinery and engine. Should you want your engine fitted with a friction clutch pulley, add the price of the pulley to the price of the engine. We make no reduction for omission of cast iron pulleys, this having been taken into consideration in making prices on the clutch pulleys. These pulleys are sold with or for our engines only and are shipped from the factory.

NOTE—For line shafting, pulleys, etc., see page 1073.

WE MANUFACTURE PLUMBING GOO

YOU CAN NOW AFFORD THE LUXURIES OF MODERN PLUMBING no matter where your home is located. By manufacturing plumbing goods in our own factory we are able to sell you the best grade of modern plumbing at a great saving as compared with what you will pay elsewhere, because the plumbing business has been monopolized by a combine which maintains prices by agreement and reaps large profits. Our one profit principle effects an exceptional saving for you when applied to the plumbing goods business.

WE HANDLE STRICTLY "A" GRADE No. 1 PLUMBING GOODS, tested and inspected before shipping. Every article is sold under our binding guarantee as to quality. On receiving any plumbing goods from us that fail to please you, you may return them at our expense and we will return to you the price and any freight charges you paid. We could not afford to make this guarantee unless we were absolutely sure that our goods would please you.

WE HAVE MADE IT VERY SIMPLE to install plumbing in any building, old or new, and have solved the water supply problem for you, giving any resident of the most remote country district the same benefits and as great conveniences in the matter of water supply as the residents of cities. We have practically eliminated the necessity of using lead pipe and have practically made plumbing an iron pipe proposition throughout. About all you need to do when you order our plumbing with iron pipe connections is to locate the place for the goods in your building and then screw the parts together. Any ordinary or householder can do it with perfect success, and if you desire we will send you a complete working drawing when you place your order with us, if you send us a rough sketch of your house. This plan will show you where to place your where to run your stack, how to vent each fixture; in fact, this drawing will show where to place every fitting we send you and make the installation of your plumbing simple that practically no one will experience any trouble in installing these goods. If you want to get our prices and advice on putting in a water supply outfit that will give you even a higher water pressure than most cities have, and at a very small expense, page 1199 of this catalog.

SPECIAL PLUMBING GOODS CATALOG, FREE REQUEST, contains a larger assortment and a more complete line of goods than space will permit us to show in this catalog. OUR PERFECTION BATHROOM OUTFIT, $39

WITH SIPHON WASH DOWN CLOSET. A COMBINATION THAT IS STRICTLY HIGH GRADE AND ONE THAT HAS GIVEN OUR CUSTOMERS THE UTMOST SATISFACTION. WE HAVE SHIPPED THOUSANDS OF THESE OUTFITS AND HAVE YET TO HEAR FROM ANY DISAPPOINTED CUSTOMER. OUR PLUMBING GOODS ARE MADE UNDER OUR OWN SUPERVISION. WE KNOW THEIR MATERIAL AND CONSTRUCTION FROM START TO FINISH AND ARE THEREFORE IN A POSITION TO GUARANTEE THEM THROUGHOUT.

THE CLOSET furnished with this outfit is a low down pattern, is thoroughly sanitary, and one that will pass the most rigid inspection. The tank is made of golden oak, thoroughly seasoned and highly polished. It has a capacity of 6½ gallons, which is sufficient to cause a positive and powerful flush. It is lined with copper, all fittings and trimmings are made of heavy brass, and it is furnished with a rubber ball valve, which is one of the best valves on the market on account of its simplicity. The water is shut off by a rubber ball setting into the seat of the flush valve, and should it become necessary at any time to repair this valve, all that is necessary is to unscrew this rubber ball from the rod and screw in a new ball, so simple a child can do it easily. It is also furnished with a china push button at the front of the tank, which adds considerably to the appearance of the tank. The seat furnished with this outfit is a golden oak. Closet seat, which is highly polished, is furnished with cover. It is also furnished with offset nickel plated heavy brass hinges. The bowl furnished with this closet is a siphonic action bowl made of the highest grade English vitreous earthenware, and is the equal of any pottery on the market, regardless of price. We furnish this closet complete with tank, seat, bowl, supply pipes and nickel plated closet screws to fasten bowl to floor.

OUR GEM BATHROOM OUTFIT, $46.52

WITH SIPHON JET CLOSET,

OUR GEM BATHROOM OUTFIT is a strictly high grade bathroom outfit, and one that is in keeping with the furnishings of the finest homes. We have prepared this outfit in order that our customers may have an opportunity to equip their homes with an outfit equal to the best on the market regardless of price.

THE TUB furnished with this outfit is a 5-foot heavy roll rim, cast iron, porcelain white enameled bath tub with claw pattern feet, and is furnished complete with our No. 4½ brass nickel plated bath cock, nickel plated heavy brass supply pipes, and nickel plated brass connected waste and overflow.

THE LAVATORY furnished is an 18x 24-inch lavatory with a 10-inch back, made of high grade cast iron, heavily enameled by a special process which we guarantee will not flake, craze or peel off. It has a large apron, as shown in illustration, and is furnished complete with our anti-siphon trap, nickel plated air chamber supply pipes and nickel plated brass faucets.

THE CLOSET furnished in this outfit is a siphon jet bowl with a low down tank and seat. The tank is highly polished, fitted with heavy brass trimmings, and has a china indexed push button in front of tank, a slight touch of which releases the valve and causes a positive flush. It is furnished with a heavy brass nickel plated supply pipe from tank to floor. The seat is made of highly polished oak and has heavy brass nickel plated offset hinges. The bowl furnished with this closet is made of the very highest grade of English vitreous earthenware.

WE FEEL POSITIVE any person purchasing this outfit from us will be more than satisfied with the quality and appearance of the outfit, as it is impossible for us to do justice to it by mere description and illustration. The closet in this outfit is shipped from Chicago. Shipping weight, about 100 pounds. The bath tub and lavatory are shipped from our factory in Southeastern Wisconsin. Shipping weight, about 450 lbs.

Low Tank Combination With Siphon Jet Bowl Closet - - $15.75

No. 42F120 The low tank closet is by far the most popular closet now on the market. It does away with the long supply pipes and high tank. Has a 2-inch opening in bowl which insures a positive flush every time; is noiseless and neat in appearance. Can be placed in an out of the way place or under stairs where high tank will not go. The tank is made of solid oak, golden oak finish, is lined with heavy sheet copper, has copper float, brass valve, etc. The valve is our improved positive flush valve, and cannot get out of order. A slight pressure of the valve lever or button empties the tank completely. The seat and cover are made of oak, with heavy brass offset hinges, heavy nickel plated; supply pipe is ⅝ inch in diameter, nickel plated; furnished complete ready to set up with a heavy brass nickel plated connection from tank to bowl. The bowl is high grade vitreous English earthenware—siphon jet style. Shipping weight, about 115 pounds.
Price, complete, with plain earthenware bowl.....**$15.75**
If wanted with local vent add 25 cents to above price. We can furnish this style bowl only, without tank or seat, for $8.25.
No. 42F125 Quarter Sawed Oak Outfit, same as above, except the tank and seat are made of quarter sawed oak with piano polish. Price.....**$16.75**

Peerless Washout Water Closet With Loose Board Tank - - $11.60

The equal of closets that plumbers sell at $16.00 to $20.00.

No. 42F130 By far the best finished and most up to date closet on the market. It has a round cornered oak 5½-gallon siphon tank. Golden oak finish, with double oak attached seat, 1¾-inch nickel plated flush pipe and ½-inch nickel plated supply pipe, with No. 3 front washout, plain earthenware bowl and all fixtures are nickel plated. Tank is copper lined, has patent float cutoff, with chain and pull to flush closet, and with loose board back, which does away with iron brackets and makes a much neater job. It is made of the very best materials throughout and the workmanship and finish are perfect. Furnished complete, ready for use, no fitting or extras required. Shipping weight, about 90 pounds.
Price, with plain bowl.**$11.60**

If wanted with trap vent, add 25 cents to above price.

We can furnish this style bowl only, without tank or seat, for $4.35.

Peerless Siphon Jet Closet $16.73

No. 42F141 Furnished complete with 8-gallon high tank with loose board back which does away with unsightly brackets and makes a very neat job. It is lined with copper, and all fittings and valves are made of brass. The seat is made of oak highly polished and the tank and seat are golden oak finish and seat is fitted with nickel plated brass post hinges. The bowl is a siphon jet bowl. The flush and supply pipe are made of brass heavily nickel plated. This is one of the best outfits that money can buy. Furnished complete as shown in illustration. Shipping weight, 100 pounds.
Price, with plain bowl.**$16.73**

If wanted with local vent, add 25 cents to above price.

We can furnish this style bowl only, without tank, seat or supply pipes, for $8.25.

PORCELAIN WHITE ENAMELED IRONWARE

In buying Enameled Sinks, Lavatories, Tubs, Etc., from us remember you get first quality goods, no seconds, and any piece found imperfect in any way may be us at our expense. Our low prices may lead you to believe there is something wrong in the quality. All we ask is a trial order. There is no better ware made—c and finish considered—than the following line of enameled ware. It is made in one of the most modern and complete foundry and enameling plants. Only skilled employed who have had years of experience in enameling. Our prices are low because they are based on actual with only our one small profit added.

All the following Enameled Lavatories requiring brackets are furnished with our improved Acme Concealed hanger always insures a rigid, firm lavatory. A thin board can be nailed to studding and the hanger screwed It is not always possible to strike a studding when bracket is screwed to the wall.

This illustration shows our new concealed wall vent fitting. It makes a much neater job than the old style fitting, and has been adopted by us, and will be furnished with all lavatories and sinks shown on these pages.

Cast Sink Couplings.

No. 42F440 To connect sink to lead pipe. Weight, 4 ounces. Price 10c

No. 42F445 Same as above, to connect sink to iron pipe, 1¼ or 1½ inches. Weight, 8 ounces. Price 25c

Galvanized Range Boilers.

Tested to 200 Pounds Pressure and Guaranteed to Stand an 85-Pound Working Pressure. Guaranteed One Year.

Range boilers can only be used in homes where there is a constant water pressure, which can only be obtained in cities having water works or in homes equipped with our water supply outfits. Where you have such pressure, these tanks can be connected with lead or iron pipes to your cook stove or hot air furnace and hot water can be drawn from the faucets without any extra expense. Our boilers are made of a heavy gauge of galvanized iron fully riveted with galvanized rivets. But when ordinary or fire pressure is over 75 pounds we recommend our extra heavy boiler listed below. Furnished complete with stand, galvanized, inside tubes and extra heavy brass couplings.

	Gal.	Height, in.	Wt., lbs.	Price
No. 42F1081	30	60	72	$ 5.75
No. 42F1083	40	60	85	6.95
No. 42F1084	52	60	120	11.75

The above prices are for boilers fitted with brass couplings for lead pipe connections. If wanted for iron pipe connections add 20 cents to above prices.

Extra Heavy Range Boilers.

Tested to 300 Pounds and Guaranteed to Stand 150 Pounds Working Pressure. Guaranteed Three Years.

These boilers are much heavier and better boilers than the ones listed above, and should be used in cities having a pressure of over 75 pounds; they will outwear the Standard Boiler, and we recommend their use. Furnished complete with brass couplings at prices given below.

	Gallons	Weight, lbs.	Price
No. 42F1087	30	105	$ 8.10
No. 42F1088	40	124	10.25
No. 42F1089	52	170	13.00

The above prices are for boilers fitted for lead pipe connection; if wanted for iron pipe connection add 20 cents to above prices.

Prices on Copper Range Boilers quoted on application.

We Control the Making of These Goods and Guarantee the Material and Construction Throughout

Iron Body, Brass Screw, Trap Screw Ferrules.

No. 42F1450 The body is cast iron in regular pipe sizes, fitting the hub neatly and making a good wall to calk against. The projections on side prevent ferrule turning after being calked. The cover being of brass cannot unite with the iron, and the threads are thereby made proof against rust. It is the best ferrule made and moderate in cost.

Brass Straightway Double Gate Valves.

No. 42F5788 These standard valves have brass seats and rising stem, tested to 100 pounds steam pressure. In the construction of these valves the bearing of the wedge being central it acts uniformly on all parts of the disc, consequently it will force the disc to the seats and have an equal bearing on all parts. These valves are used either for steam or water where a full opening (same size of pipe) is required and will allow the water to be drained from pipe in cold weather.

We do not sell less than six glasses.

Standard Wire Hoisting Rope.

Almost universally used for hoisting purposes on account of its flexibility. Made of six strands, each of which is formed by twisting nineteen wires together, and a hemp core or center. Is very pliable, and will wind on moderate sized drums and pass over reasonably small sheaves without injury.

We now list two grades of wire rope, one made of Swedish iron, the other cast steel. The Swedish iron is the kind generally sold and will give good service, but where great strength is required, or where lives are at stake, as in mines, etc., we would recommend the cast steel as being best suited for the purpose.

When ordering wire rope for the first time give full particulars of the work, the size of drums, pulleys, curves, etc., and if rope ordered is not suitable, advice will be given.

No. 42F9060 Swedish Iron Rope.

Spring Gauge Proving Outfit.

No. 42F1750 For testing gas pipes. Complete as shown in illustration. Weight, 6 pounds.
Price, per set.....$6.75

Peerless Gas Water Heater.

$4.15

No. 42F1030 A moderate priced copper coil heater and one which we are sure will give good results. It has a coil of best seamless drawn copper tubing, which provides ample heating surface and possesses many advantages over cast iron devices, iron pipes, etc., being not only a better heat conductor, but reducing the number of joints to a minimum. It can be connected readily to any range boiler with iron pipe, as the unions furnished with iron pipe connections. Each heater is fitted with ground joint brass unions. The conical deflector forces the flame and heated air to circulate close to the coil, and prevents down draft. The jacket is lined with asbestos, which prevents the escape of heat into the surrounding air. It is 8 inches in diameter, 15 inches high, ¾-inch tube. Usually connected with 30 or 40-gallon boiler to supply hot water to sink, bathroom and lavatory. Weight, 25 pounds. Will heat enough water for a bath in ten minutes.
Price, with Russia iron jacket.....$4.15

Our New Model Nickel Plated Gasoline Heater, $8.20.

No. 42F217 Is made of 24-gauge galvanized iron incased in nickel plated white metal and is an ornament to any bathroom. It is 28 inches high and 12 inches in diameter and will hold 13¾ gallons of water. The copper coil and heat flues are placed at the bottom of the heater. The circulation is created by a ⅝-inch copper coil 6 inches in length, extending from receptacle up into the heater, which insures circulation and rapid heating qualities. The fire coming in contact with the bottom and the faucet so arranged that all the water drawn from the tank passes through the receptacle, enables one to get hot water almost instantly. Small quantities of water heated in two minutes, and will also heat the water ready for bathing in twenty minutes. Shipping weight, 40 pounds. Shipped from factory in Detroit, Mich.
Price $8.20

Two-Compartment Granitine Laundry Tub, $5.68.

Without High Back.

With wringer guards.

No. 42F735 Made of a composition of granite and cement in one piece, which makes it sanitary; no cracks or crevices for dirt to lodge in. It is the product of one of the oldest makers of this class of goods. Furnished with zinc rim, brass plugs, waste connection and painted iron legs and wringer guards. No faucets furnished at prices given below. For faucets see No. 42F755.

No.	Length	Width	Depth	Weight	Zinc Rim, Price

We can furnish the above with all connections threaded for iron pipe at 25 cents above prices quoted.

Hercules Fire Extinguisher.

Examined, Labeled and Approved Under the Direction of the National Board of Fire Underwriters.

This is a 3-gallon tipover machine, made of heavy cold rolled copper and is an article that should be in every home, store and factory as it has no equal for extinguishing fires. By having one of these extinguishers handy many fires that would otherwise spread and cause great damage would be overcome at their beginning. They are always ready to use. All that is necessary to place same in operation is to turn the extinguisher upside down and the chemical will immediately come from hose. Can be used repeatedly by recharging according to directions. Best machine ever sold at anywhere near the price we ask. Weight, 20 pounds.
No. 42F5526 Price.....$7.98

No. 42F6095 Price.....$1.90

$3.15 Armstrong Pattern No. 2 Adjustable Stock and Dies for Threading Pipe.

The best known pipe cutting tool on the market. They are made of highest grade material throughout, have tool steel cutters, are easily adjusted and are the most satisfactory pipe stock and dies ever constructed. More of them have been sold in the past fifteen years than any other make. The dies can be adjusted to the variations in the size of fittings, and by reason of their peculiar cutting edge can be worked with much less labor and accomplish the desired results in less time than with other dies. The dies have a double taper; that is, the taper at the entrance for the first few threads is greater in degree than the standard taper which forms a lead to the dies, causing them to start on the pipe without filing, even when there is a swell or burr, and requiring no pressure to start dies on the pipe. Cut five sizes, ¼ inch to 1 inch, right hand. Complete in hardwood box. Weight, 17 pounds.

No. 42F6014 Size No. 2. Price, per set.....$3.15
Extra pipe dies, each size, 2 pieces.....50

VERY FARMER HIS OWN PUMP MAN

ILLUSTRATE ON THIS AND THE FOLLOWING PAGES one of the most complete ...mps of all styles and sizes at prices (quality considered) lower than ever shown ...nufacturer or dealer. This line has been selected after a great deal of investigation ...and the claims we make for our pumps are not merely talk or empty boasts, but ...shown by actual tests. Our pump business has grown steadily, the result of our ...rule to ship only such pumps as we know will give our customers the best of satis- ...we show on these pages, for the convenience of our customers, complete pump outfits ...depth wells. The prices quoted include pump, piping, cylinders, cylinder rods, ...cut and threaded complete, so that all you have to do when you receive the pump ...the pipes together, lay a few boards over your well for a platform, nail or bolt ...to this platform, and the equipment is complete, ready to pump water.

...E OUTFITS ARE VERY SIMPLE TO INSTALL. You will have no difficulty what- ...putting in any of these outfits. We are so confident of this that we guarantee to accept back any of these outfits and return the price and any freight charges you paid if you find that you cannot put it in so that it will work perfectly.

We list two styles of pumps: Lift Pumps and Force Pumps. Lift Pumps lift the water to the spout from which the water flows. Force Pumps lift and force the water at the same time. If you want to force water to different places about your premises, order a Force Pump. Wherever water is to be lifted more than 30 feet it is necessary to have your cylinder extended, as water cannot be lifted more than 30 feet to the cylinder. For this work we make a charge of 5 cents per foot for cutting and threading the rod, etc. This charge does not include piping. You must order enough piping to reach from the pump into the water in your well.

We are always pleased to furnish estimates on complete Pump Outfits. Send us a diagram of your well, where you want to use the water, depth of well and whether you desire to lift or force water, and we will quote a price for the complete outfit. We furnish all this information free and it places you under no obligation to buy anything from us.

...KA ANTI-FREEZING LIFT PUMP

...E WITH GALVANIZED PIPE FOR ...DUG OR OPEN WELLS

$4.50

IN OUR EUREKA WINDMILL LIFT PUMP we offer you an outfit suitable for dug or open wells. The prices quoted below are for pumps fitted with iron cylinder, but where well is over 30 feet deep we recommend the use of our brass body cylinder. This is a heavy, substantial pump, and we guarantee it to give good satisfaction in wells up to 80 feet deep when the cylinder is lowered for deep wells as shown in illustration. This pump is intended for use in dug or open wells and is intended to lift and not to force water. For such a well we can guarantee this pump to be equal to any pump on the market, and we know that any one of our customers purchasing one of these outfits will be highly pleased with it. Do not hesitate to order this pump through fear you cannot set it in the well. We cut and thread the pipes and rods, and all you have to do is to screw the pipes and rods together, set it on your platform, and you are ready to pump water. We furnish this pump with a combination head and it can be used either to attach to a windmill or for pumping by hand. EUREKA ANTI-FREEZING DRIVE WELL OUTFIT

COMPLETE WITH GALVANIZED PIPES

$5.20

IN OUR EUREKA DRIVE WELL OUTFIT we offer our customers an outfit to be used in places where water is reached within 25 feet from the surface of the earth and in ground in which there is no rock. **WE FURNISH THIS OUTFIT in such a way that any person, whether or not he has ever installed a pump, can easily put it in with absolutely no chance for failure.** In order to install a drive well, all that is necessary to do is to dig a hole from 3 to 4 feet square and about 4 feet deep, so that the cylinder of the pump may be placed in same to avoid the pump freezing in winter time. After your hole is dug, screw the drive well point on to one of the pieces of pipe which we furnish, with a coupling, then screw the driving cap, which we furnish, on top of this pipe and drive this into the ground with a post maul. When the first length of pipe is driven down remove the cap, screw another piece of pipe on to the coupling you attach to the one already driven into the ground, and drive this into the ground. Repeat the operation as often as necessary until you have your pipe driven down into the water. Then screw the pipe on to the cylinder of the pump, place some manure around the cylinder of the pump in the hole which you have dug, to prevent cylinder from freezing, and you have your outfit ready for pumping. After you have your pump screwed together, all that is necessary for you to do is to lay three or four pieces of plank or board over the top of your well to answer the purpose of a platform.

THE PUMP furnished with this outfit is the same as the one furnished with our dug well outfits. We furnish this pump fitted with a combination top suitable for hand or windmill pumping, but should you prefer to buy this outfit for hand pumping, with a top such as shown in the small illustration, you can order it in this way and deduct 50 cents from prices quoted below.

WHILE THIS PUMP can be used for any depth well, providing you dig the hole to within 25 feet of the water, we do not recommend it for wells over 25 feet deep, nor in stony ground, but in places where the water is not more than 25 feet from the surface we can guarantee this outfit to give excellent satisfaction. All that is necessary to ascertain when you have struck water is to procure a strong cord, attach a small piece of iron or lead to the end of this string, and after you have driven each piece of pipe into the ground, just drop this string into the piping, and you can then readily see after pulling the string out as to whether or not you have struck water.

BEFORE ORDERING THIS PUMP, all you have to do is to ask your neighbor who now has a pump how deep he was compelled to dig or drive his well before he struck water, and you can order an outfit accordingly.

The following prices are for pump outfits complete with 1¼x30-inch sixty gauge cast head well point, 3x10-inch iron cylinder, 1¼-inch driving cap, and enough 1¼-inch galvanized pipe to complete wells for the depths specified below.

No. 42F5110 Pump and outfit complete with 1¼-inch pipe for 10-foot well. Weight, 96 pounds..... **$5.20**

No. 42F5111 Pump and outfit complete with 1¼-inch pipe for 15-foot well. Weight, 108 pounds..... **$5.70**

No. 42F5112 Pump and outfit complete with 1¼-inch pipe for 20-foot well. Weight, 120 pounds..... **$6.20**

No. 42F5113 Pump and outfit complete with 1¼-inch pipe for 25-foot well. Weight, 130 pounds..... **$6.70**

The above prices are for pumps furnished with iron cylinders. We recommend the use of brass body cylinders, which we furnish. If wanted, add $1.50 to the above prices.

TRIUMPH WINDMILL FORCE PUMP OUTFIT

COMPLETE WITH GALVANIZED PIPE

$10.15

WE PRESENT HEREWITH A PUMP OUTFIT which we believe will meet a growing demand in the pump line. These outfits are intended for use in wells of any depth up to 75 feet, where it is possible to put a cylinder down to within 10 feet of the water.

WE FURNISH THIS OUTFIT with such simple instructions that anyone whether he has ever installed a pump or not can easily put it in his well with absolutely no chance of failure. The pump is made heavy and strong, and is especially adapted for connecting it to windmills. There is a brass cock at the spout and a brass shut off cock at the back, as shown in the illustration. Buy enough 1-inch pipe to reach from pump to tank and connect it up, as we do not include this in prices given below. When you wish to pump water into an overhead tank or to any place higher than the pump, simply turn off the cock at the spout, and the water is forced through the back of pump and out through the back attachment to the place desired. This back attachment is made to connect to 1-inch pipe. When you desire to force water through the cock at the spout, turn off the shut off cock in the back attachment, and the water will go through the spout. The cock at the spout is threaded to fit ¾-inch hose, and by attaching a hose to it you have a powerful sprinkling pump.

THIS OUTFIT cannot be used in a well over 25 feet deep, unless you have an open or dug well, as the cylinder must be extended to within 10 feet of the surface of the water. Of course if your well is cased, and the casing is over 4½ inches in diameter so that it will admit the cylinder, which is about 4¼ inches over all, you could use this outfit, as the cylinder could be slipped down inside the casing.

REMEMBER, we cut and thread all the pipe and pump rod and furnish all connections, so that all you have to do is to connect it together and drop it in your well. The pump is furnished with a windmill head, but if you do not intend to use it in connection with a windmill, we can furnish it for hand use only, and if you wish it furnished this way you may deduct 50 cents from the prices quoted below. The prices given below are for complete outfits, and consist of pump, galvanized pipe, cylinder and rod, all cut and threaded to the proper length.

No. 42F5130 Pump and complete outfit with 1¼-inch pipe for 20-foot well. Weight, 125 pounds..... **$10.15**

No. 42F5131 Pump and complete outfit with 1¼-inch pipe for 30-foot well. Weight, 175 pounds..... **$12.15**

No. 42F5132 Pump and complete outfit with 1¼-inch pipe for 40-foot well. Weight, 210 pounds..... **$13.65**

No. 42F5133 Pump and complete outfit with 1¼-inch pipe for 50-foot well. Weight, 240 pounds..... **$15.15**

No. 42F5134 Pump and complete outfit with 1¼-inch pipe for 60-foot well. Weight, 270 pounds..... **$16.65**

No. 42F5135 Pump and complete outfit with 1¼-inch pipe for 75-foot well. Weight, 320 pounds..... **$18.90**

If wanted with brass body cylinder, add $1.50 to above prices.

EUREKA DOUBLE ACTING DRILLED WELL FORCE PUMP AND COMPLETE OUTFIT

$13.25

WE SHOW IN THIS ILLUSTRATION our Double Acting Deep Drilled Well Force Pump and Outfit as it appears when placed in a well. This is a very popular pump where it is necessary to bore or drill a well, and it is also used very extensively and with the best of satisfaction in open or dug wells in depths of from 75 to 150 or 200 feet. This is the outfit which is used in places where the strata of the earth is composed of hard substance, and where it is necessary to drill or bore to the water instead of digging a well. These pumps are made with a windmill head to be attached to windmills, and are made so that all parts below the platform will enter and pass into the well casing when used in drilled hole. To fit a drilled well with this pump it is not necessary to cut off the casing as in this style pump of other makes, and therefore the casing may be carried up close to the platform, thus keeping out surface water and other impurities.

IN ORDER TO INSTALL A DRILLED OR BORED WELL, we would recommend that you employ a well driller or borer in your local town to bore this hole for you, and also put in your casing, if you desire your well to be cased, and after this is done, all that is necessary for you to do in order to be insured of a perfect working pump is to refer to the table below, order the outfit for the depth well which you have, and we will ship this pump to you complete with piping and rods cut and threaded complete with all the necessary fittings which you will need to connect the pump, and all that will be necessary for you to do will be to screw the different pipes and rods together, which any boy can do, set it into your well, and you are ready for pumping. This pump, as you will see by the illustration, is furnished with two cylinders which make it a double acting pump. While we recommend this as the best pump for drilled or bored wells, it is one of the best outfits which we have or can furnish for deep open or dug wells or in a well where a large amount of water is required. We furnish this pump complete with a strainer at the bottom of pipe which prevents any dirt, sticks or sediment from getting into the valves of the pump, also with hose attachment for spout, as this is a force pump and can be used very satisfactorily for sprinkling purposes. We furnish this pump with a brass lined upper cylinder, and a brass lower cylinder, both of which are 2½x12 inches and will fit in 3-inch well casing.

No. 42F5120 Pump and complete outfit with 1¼-inch pipe for 30-foot well. Weight, 172 pounds..... **$13.25**

No. 42F5121 Pump and complete outfit with 1¼-inch pipe for 40-foot well. Weight, 200 pounds..... **$14.75**

No. 42F5122 Pump and complete outfit with 1¼-inch pipe for 50-foot well. Weight, 230 pounds..... **$16.25**

No. 42F5123 Pump and complete outfit with 1¼-inch pipe for 60-foot well. Weight, 260 pounds..... **$17.75**

No. 42F5124 Pump and complete outfit with 1¼-inch pipe for 75-foot well. Weight, 300 pounds..... **$19.95**

The above outfits are for wells specified in the above table, but should you desire to place one of these pumps in a well deeper than 75 feet, we make an additional charge of 15 cents per foot for each foot deeper than 75 feet. For example: If your well is 100 feet deep, an outfit for a 75-foot well would cost you $19.95, and you would add 25 feet at 15 cents per foot which would be $3.75, plus $19.95. Total for 100-foot well, $23.70.

...h Grade Gasoline Engines, $29.95 Up, Illustrated in Colors in This Book.

Digitized by Google

FI[illegible] 92c

This is strictly a high grade pump for wells 20 feet deep and less. Only the best quality of material enters into the construction of them. They are made with revolving cap so the handle can be placed on either side of the pump. They are also equipped with trip valves, so that by raising the handle when pumping the water runs out of the pump, which prevents it from freezing in winter time. Furnished in both brass lined and iron cylinder, and with and without strainer, but we recommend the brass lined with strainer for general purposes, as it will outwear several of the iron ones. The No. 42F5202 is the one mostly used. Can furnish for lead or iron pipe connection. Iron pipe connection is sent unless otherwise ordered. Illustration shows pump complete with strainer. Average weight, 25 pounds.

	Price, Without Strainer	Price, With Strainer
No. 42F5200 No. 1 Pump with 2½-inch iron cylinder	$0.92	$1.32
No. 42F5200 No. 1 Pump with 2½-inch brass lined cylinder	1.73	2.13
No. 42F5202 No. 2 Pump with 3-inch iron cylinder	1.08	1.48
No. 42F5202 No. 2 Pump with 3-inch brass lined cylinder	1.83	2.23
No. 42F5204 No. 4 Pump with 4-inch iron cylinder	1.42	1.82
No. 42F5204 No. 4 Pump with 4-inch brass lined cylinder	2.46	2.86

No. 1 and No. 2 pumps are tapped for 1¼-inch pipe. No. 4 is tapped for 1½-inch pipe. We recommend the use of pumps with strainers, as they not only strain the water automatically but also do away with the splashing of same when pumping.

OUR PERFECT CISTERN IRON FORCE PUMP - $4.62

Figure 30

In this illustration we show a pump which has all the good points of our Pitcher Spout Pump, together with a power to force water. These pumps are all tapped in the back, so that 1-inch pipe may be screwed into pump, and by turning the lever of cock at spout the water is stopped from going through spout and is forced through back of pump to a tank or reservoir. We furnish this pump in two styles. The Nos. 42F5214 and 42F5215 are furnished with a cock and spout, as shown in illustration, to which ¾-inch hose may be attached when it is desired to be used for sprinkling purposes. The Nos. 42F5221 and 42F5222 have a common round spout with which we furnish a shutoff clevis and a hose clevis instead of the cock at spout. We highly recommend these pumps where a small amount of water is wanted, but for a barnyard or outside pump we advise purchasing one of our heavy set length force pumps, such as our No. 42F5312, as shown on right of page. These cistern pumps cannot be used where the surface of the water in the well or cistern is more than 25 feet below the place where they are to be set. We recommend as a pump for general use our No. 42F5215, as it is brass lined, and with ordinary care will last almost indefinitely. All of these pumps are tapped in the base to admit 1¼-inch pipe, and we cannot furnish them to take pipe of any other size. For pipe see No. 42F5710, page 1198 of this catalog. Average weight of these pumps is 35 pounds.

No. 42F5214 3-inch iron body for 1¼-inch pipe. Price..... **$4.62**

No. 42F5215 3-inch brass lined body for 1¼-inch pipe. Price..... **5.31**

No. 42F5221 3-inch iron body for 1¼-inch pipe. Price..... **3.59**

No. 42F5222 3-inch brass lined body for 1¼-inch pipe. Price..... **4.35**

[illegible] ANTI-FREEZING IRON LIFT PUMP - $2.78

We show herewith a lift pump with 6-inch stroke, which is adapted for wells not over 30 feet deep. The pump has a revolving top, so that handle may be turned to any side while pumping. The 4-foot piece of pipe which connects the cylinder to pump screws into the pump at spout, thus creating an air space between pump and cylinder, which prevents water from freezing in cold weather. The cylinder is made of iron, truly bored and polished, 10 inches long and tapped to take 1¼-inch pipe. While this is an excellent pump and gives entire satisfaction for wells up to 30 feet in depth, we believe, for the small difference in cost, our customers will obtain a much better bargain by procuring our No. 42F5264 or No. 42F5266 pump. When ordering this pump remember we furnish 4 feet of pipe, as shown in illustration, to reach from platform to cylinder, so if your well is 25 feet deep you need only order 21 feet of pipe to complete your outfit. We list pipe on page 1198 of this catalog under Nos. 42F5710 and 42F5711. Average weight is 62 pounds.

No. 42F5256	Price
2½-inch cylinder for 1¼-inch pipe	$2.78
3-inch cylinder for 1¼-inch pipe	2.85
3½-inch cylinder for 1¼-inch pipe	3.26
4-inch cylinder for 1¼-inch pipe	3.74

TRIUMPH HAND ANTI-FREEZING IRON LIFT PUMP $3.34

We know that in this pump we have the best 6-inch stroke lift pump on the market. It has a heavy revolving cap which allows the handle to be swung to any side of the pump desired by the one pumping. This cap covers the top of the pump entirely except where the piston rod goes through, thereby preventing sticks, dirt or, in fact, anything from falling into the well or into the working parts of the pump. The piston rod is connected to the handle with an oscillating coupling, which makes the pump work easily and prevents cramping and binding of rod. We recommend this pump and guarantee it to give excellent satisfaction in wells up to 80 feet deep, but where it is to be used in wells over 30 feet deep the cylinder must be extended to within 10 feet of the water. We also advise using a brass body cylinder in place of the iron cylinder when used in wells over 30 feet deep, as they work easier and last longer, for which we charge $1.50 in addition to the prices quoted below. We charge 5 cents per foot for the rod and couplings which are needed to extend the cylinder, and all you need in addition to this is enough 1¼-inch pipe to reach to the bottom of well. The pump is furnished complete with 4 feet of pipe and rod and a 10-inch cylinder, either 3 or 3½ inches in diameter, at prices stated below. Our No. 42F5264 is the one most used, but in shallow wells where a large amount of water is desired our No. 42F5266 is better. For prices on pipe see Nos. 42F5710 and 42F5711 on page 1198 of this catalog. Average weight of these pumps is 70 pounds.

No. 42F5264 3-inch cylinder for 1¼-inch pipe. Price..... **$3.34**

No. 42F5266 3½-inch cylinder for 1¼-inch pipe. Price..... **3.68**

We give herewith an example showing how to order pipe, rod, etc., for a well 50 feet deep, so if your well is deeper all you have to do is to order more pipe and rod in proportion, and if it is not so deep order less.

EXAMPLE:	Price
No. 42F5264 1 pump with 3-inch cylinder	$3.34
No. 42F5711 46 feet 1¼-inch galvanized pipe at 8½ cents per foot	3.91
Special, 36 feet extending cylinder at 5 cents a foot	1.80
Total	$9.05

OUR IMPROVED EXTRA HEAVY LIFT PUMP FOR FEED YARDS AND HEAVY WORK $4.40

Figure 75

We show here our extra heavy 6-inch stroke hand lift pump, which is especially designed for stock and feeding yards where large quantities of water are needed. The distance from bottom of cylinder to flange on pump is 4 feet. The 1¼-inch set length is screwed into pump at spout, creating an air space between cylinder and pump, which prevents the water from freezing in the pump in cold weather. The pump is made throughout of heavy material. The cylinder is heavy and strong and capable of lifting large quantities of water. For wells up to and including 30 feet in depth, the cylinder need not be extended. All that is necessary to do is to order enough 1½-inch pipe to reach from cylinder to bottom of well. If well is over 30 feet deep order sufficient 1½-inch pipe to reach to the bottom, see page 1198, Nos. 42F5710 and 42F5711, for price; also allow for enough rod to extend cylinder to within 10 feet of the surface of the water at 5 cents per foot. See how to order pipe and rod in cases of this kind as explained under No. 42F5264. We furnish this pump in two sizes, with 3½ and 4-inch cylinder. The 3½-inch cylinder is the one most commonly used, but we recommend the 4-inch cylinder for use when a great quantity of water is required. We can furnish these pumps fitted with brass body cylinder at an extra cost over prices given below of $1.50 on the No. 42F5285 and $1.80 on the No. 42F5286. For pipe see page 1198, Nos. 42F5710 and 42F5711. Average weight, about 80 pounds.

No. 42F5285 3½-inch cylinder, fitted for 1½-inch pipe. Price..... **$4.40**

No. 42F5286 4-inch cylinder, fitted for 1½-inch pipe. Price..... **4.55**

TRIUMPH WINDMILL ANTI-FREEZING IRON LIFT PUMP $3.90

We show in this illustration a windmill pump with 6-inch stroke, which, when cylinder is extended into well, as explained under No. 42F5264 pump, will give excellent results in wells up to 100 feet deep. This is a pump we guarantee to be the equal of pumps sold for double the price by other concerns. We know that this pump has no superior at any price for the purpose for which we recommend it. The piston rod works through a double fulcrum, which guides and steadies the stroke of the pump. This pump has a closed top which prevents sticks and dirt, or, in fact, anything from falling into the working parts of the pump. Although this pump is especially designed to be operated by a windmill, it is also an easy working hand pump, and as the handle is furnished just as shown in the illustration, it is easily seen what a splendid combination it is. We furnish pump complete with a 4-foot set length and a 10-inch iron cylinder, but we advise our customers to order it with brass body cylinder, for which we make an extra charge of $1.50 over prices given below. It is necessary to have this cylinder extended when used in wells over 30 feet deep, as explained under No. 42F5264. Average weight is about 75 pounds.

No. 42F5276 3-inch cylinder for 1¼-inch pipe. Price..... **$3.90**

No. 42F5278 3½-inch cylinder for 1¼-inch pipe. Price..... **4.30**

We recommend the use of brass body or brass lined cylinders on all our pumps, as they are almost indestructible and will outwear several of the common iron kind.

TRIUMPH HEAVY HAND IRON FORCE PUMPS - $[illegible]

In this pump [illegible] customers a 6-inch [illegible] hand force pump [illegible] plete with a 10-inch [illegible] der and a 4-foot [illegible] of wrought iron [illegible] screwed into it [illegible] making an air space [illegible] vents water from [illegible] cold weather. [illegible] plain round one [illegible] a shutoff clevis [illegible] it, so that the [illegible] shut off at spout [illegible] through the back [illegible] to tank or other [illegible] premises. We also [illegible] clevis, so that [illegible] be attached to spout [illegible] ling purposes. We [illegible] with this pump a [illegible] which can be turned [illegible] by turning a lever [illegible] $1.00 in addition [illegible] below. The shutoff [illegible] threaded at spout, to which hose may be attached [illegible] washing buggies, etc. We furnish it with back [illegible] illustration No. 42F[illegible] sisting of nipples, pipe [illegible] shutoff cock, for $[illegible] pump will work successfully [illegible] 80 feet deep when cylinder is [illegible] ered to within 10 feet [illegible] The pump just as shown [illegible] tion is suitable for pumping [illegible] 30 feet deep or under, and all [illegible] addition to pump is enough [illegible] reach from cylinder to bottom [illegible] well is over 30 feet deep [illegible] tended and pipes as explained [illegible] 42F5264. Average weight about [illegible]

No. 42F5302 3-inch [illegible] for 1¼-inch pipe. Price....

No. 42F5303 3½-inch [illegible] for 1¼-inch pipe. Price....

TRIUMPH WINDMILL FORCE PUMP. $6.30

This pump is the same as our No. 42F5301 pump, except it is fitted with windmill head to attach to windmill. It can also be operated by hand if you desire to use it in this way. Average weight, 90 pounds.

No. 42F5310 2½x10-inch cylinder for 1¼-inch pipe. Price..... **$6.30**

No. 42F5312 3x10-inch cylinder for 1¼-inch pipe. Price..... **$6.35**

No. 42F5314 3½x10-inch cylinder for 1¼-inch pipe. Price..... **$7.40**

The above prices are for pumps only and do not include pipe, except the 4 feet which runs from pump to cylinder, or cock shown in illustration. We can furnish cock at spout, and back attachment at the same price as quoted under No. 42F5301. If your well is over 25 feet deep you must have your cylinder extended, as explained under No. 42F5264.

WINDMILL HEAD [illegible] ING DRILLED WELL PUMP WITH BRASS [illegible] CYLINDER AND BRASS LOWER CYLINDER - -

This pump is adapted [illegible] wells of small bore [illegible] equipped with wind [illegible] constructed so that [illegible] below the platform [illegible] pass into the [illegible] hole. To [illegible] well with [illegible] not necessary [illegible] casing, and [illegible] may be carried [illegible] platform, thus [illegible] face water and [illegible] It is equally [illegible] open or dug [illegible] strictly high [illegible] pump. The [illegible] brass lined, the [illegible] has brass body [illegible] with strainer [illegible] without addition [illegible] mill head permits [illegible] power. Owing [illegible] ing cylinder this [illegible] very easily by hand [illegible] used as a hand [illegible] well as windmill [illegible]

In ordering this pump for [illegible] the lower cylinder should [illegible] within 10 feet of the bottom [illegible] and you will please remember [illegible] not include pipe, but only [illegible] ment, as shown in illustration [illegible] pipe see Nos. 42F5710 and [illegible] 1198. Average weight, 12[illegible]

No. 42F5332 2½-inch [illegible] cylinder for 1¼-inch pipe. Price [illegible] a 3-inch cased well.

No. 42F5333 3-inch [illegible] der for 1¼-inch pipe. Price [illegible] 3½-inch cased well. Price [illegible]

No. 42F5334 3¼-inch [illegible] cylinder for 1¼-inch pipe. Price [illegible] a 4-inch cased well. Price [illegible]

If wanted with brass lined [illegible] place of all brass, deduct $[illegible]

ACME ROTARY POWER IRON FORCE PUMP - - - - $7.98

Figure 180

We show herewith our Acme Rotary Force Pump complete with tight and loose pulleys. It is a fine protection in case of fire, as it will force water 200 feet and it will throw a solid stream of water 30 feet. It is an excellent pump for factories, creameries or for any building where power can be had. It will give the best satisfaction for irrigating purposes. The driving shaft is made long enough to allow the use of a balance wheel with handle on the end of it, so that pump may be worked by hand in case engine should be out of order. The spout is threaded for iron pipe at the end and also at the top where it connects to pump. These pumps can be run at a speed of 200 revolutions per minute without injury, although we recommend running them at about 100 revolutions. A pump of this kind should not be placed more than 20 feet from the water to work successfully. If wanted with balance wheel and handle for hand power, allow $2.50 in addition to prices below. We guarantee these pumps to do just what we say they will do, but cannot advise their use for pumping acids or hot liquids. The second column of figures in the table gives the capacity per minute when pump is running at a speed of 100 revolutions. Pump comes complete, as illustrated, but without pipe or belting. For pipe see page 1198, Nos. 42F5710 and 42F5711. Weight, 75 to 150 pounds.

HEAVY WINDMILL PUMP STANDARD $3.11

This is a lift pump only and cannot be used for forcing water. If a force pump is wanted, order No. 42F5347 or No. 42F5351. This standard is very satisfactory if used in pumping water for stock or feed yards. It is much heavier than our common windmill pump and the spout is higher from the platform. The size pipe ordinarily used with it is 2 inches, but we can furnish it for 1½-inch or 1¼-inch pipe. Prices given below do not include pipe, cylinder or rod, which you must have to make a complete outfit. For pipe see No. 42F5710 and No. 42F5711, and for cylinders see Nos. 42F5528 to 42F5552. The rod is listed under No. 42F5630. The average weight of these pumps is 75 pounds.

No. 42F5349 6-in. stroke. Price.....**$3.11**

5350 10-in. stroke. Price. **3.57**

—If you desire an outfit for a, select the pump you want, either 349 or No. 42F5350, then include 40 feet of 2-inch pipe if you wish 2-inch, or 40 feet of 1½-inch pipe inch cylinder, or 40 feet of 1¼-inch any smaller size cylinder than 3½ to be used. Select the kind of nted and allow for extending the 0 feet, at 5 cents per foot, or $1.50, 30 on pipe see Nos. 42F5710 and on page 1198 of this catalog.

GROUND VALVE FORCE PUMP - $8.80

5353 10-in. stroke. Price. **9.30**

ACME IMPROVED IRON FORCE STANDARDS - - $3.67

No cylinder or pipe is furnished with this pump at prices given. It is equipped with a brass stuffing box and the piston rod works through a special bushing which prevents it from wearing out easily. There is a threaded outlet directly back of spout on the barrel of the pump into which 1-inch pipe may be screwed. This pipe may be run to a tank or reservoir and water forced through it to same by attaching the shutoff clevis which we furnish on the spout. This is a very much heavier standard than the ordinary pump is equipped with and is especially designed for deep wells. **Prices** for **standard alone and do not in- cylinder or rod, and it cannot be** ut **these parts.** For pipe see catalog and 42F5711; for cylinders see 42F5528 to 42F5552 and for pump used in extending cylinder see For an example as to how to ength of this kind we refer you to on this page. Average weight 80 pounds.

5351 10-inch stroke for Price.....**4.03**

If a back attachment is wanted, shown and described under No. $1.10 additional to prices given a shutoff cock at spout is de- $1.00 in addition to prices above.

PERFECT IMPROVED PURIFYING PUMP - $4.55

Simplest pump construction in the world for raising water and at the same time purifying it. It is adjustable to any well or cistern. It is of very durable construction and materials; operates with an endless chain made from the best of galvanized wire. We do not recommend them for use in wells or cisterns beyond 30 feet deep. For wells of greater depth we urge you to purchase one of our iron pumps as described on page 1196 and on this page. You will note by the illustration that buckets and chain run through a bearing which hangs in the water at the bottom of the well, and in ordering this pump you should order equipment which will reach within 2 feet of the bottom. This pump always furnishes the water from the bottom, as no water enters cups until after they have passed under the bearing at the bottom and begun the upward movement, when the air escapes and they are filled with the best and the coldest water. The pump comes complete with chain, cups, lower bearing, ready to be placed in wells of different depths, as indicated in price list below. Furnished with either steel or wood curb. We recommend the steel curb, as it will last much longer than the wood one, as there is nothing to rot, which any wood pump will do in time. Average weight, about 75 pounds.

		Wood Curb	Steel Curb
No. 42F5442	Price for 10-ft. well.	$4.55	$ 6.50
No. 42F5443	Price for 15-ft. well.	5.45	7.45

No. 42F5461	Price for 30 ft. well.	8.15	10.15

No. 42F5445 Extra Galvanized Buckets and Chain. Price, per ft. .09

INVINCIBLE RUBBER BUCKET PUMP - - - $2.40

These pumps are so well known that a lengthy description is unnecessary. We furnish them in two styles, the wood curb with wood tubing (the curb and tubing being made of the best selected stock for this purpose), and steel curb and steel tubing. The steel curb is made of 24-gauge galvanized sheet steel and is the one we recommend to our customers, as it will outwear a wood pump and is much stronger. The steel or wood curbs are nicely painted and are the equal of any pumps of this kind on the market at any price. Pumps are furnished complete for the depth wells specified below with galvanized chain, rubber buckets, etc. We do not recommend these pumps for wells over 20 feet deep. Average weight, 60 pounds. For wells of greater depth see our iron pumps listed on these pages.

WOOD FARM PUMPS - - - $2.54

Made from the best selected stock; thoroughly painted, striped and varnished and furnished with iron handle brackets and iron spouts. The plunger, which is the vital part of a suction pump, is of the very latest improved pattern. Our wood pumps are adapted for wells not more than 30 feet deep. If well is of greater depth, we recommend that you select one of our iron pumps as described on page 1196 and on this page. **To select a wood pump**—For wells 20 feet or less in depth, order 6-foot pump. For wells 20 to 25 feet deep, order 7-foot pump. For wells 25 to 30 feet deep, order 8-foot pump. Besides the pump, order enough tubing of size to match pump to reach from the bottom of pump to bottom of well. Tubing comes in lengths of 12 feet or less. When more than 12 feet of tubing will be required to reach to the bottom of the well order coupling for each joint to connect the tubing. It has a capacity of 60 gallons of water per minute. While this pump throws an ample supply of water, it operates very easily and women and children can work it with ease. Average weight of these pumps, about 55 pounds. Outside measure, 6x6 inches.

	Length	Price, Plain Pump	Price, with Porcelain Lined Cylinder
No. 42F5412	6 feet	$2.54	$3.25

Price, each.....25c

Iron pipe cannot be used with these pumps as they are not threaded to receive pipe.

DOUBLE ACTING IRON FORCE PUMP WITH BRASS LINED CYLINDER AND THREE-WAY COCK - $10.27

Figure 100

This is the best Double Acting Force Pump made, regardless of price. It has a windmill head and can be used with windmill or by hand. The spout may be revolved to any side of pump desired. The upper cylinder is made of heavy seamless brass tubing, the lower cylinder is made with brass valve seats. We furnish this pump with malleable iron hose attachment for spout, so hose may be run from pump for sprinkling purposes. There is a vertical three-way cock 3 feet below the platform, by means of which water may be forced underground to tanks, reservoirs, etc., by simply running 1-inch pipe from this cock to place desired. The shutoff rod of the three-way cock is operated by a rod that reaches above pump platform. The fact that this pump has two cylinders equalizes the strain and makes the pump work easily, doing away with all jars or jolts. The downward stroke of the handle causes only one-half of the water in the cylinder to discharge, the other half being discharged by the upward stroke, creating a steady flow of water from the spout. We guarantee this pump to give perfect satisfaction in wells up to 150 feet deep, but in wells more than 30 feet in depth the lower cylinder must be extended to within 10 feet of the water. We charge 5 cents per foot for the rod complete with couplings, which is used to extend cylinder, and all you need besides the rod is enough 1¼-inch pipe to reach to the bottom of well. For pipe see Nos. 42F5710 and 42F5711, page 1198. Nos. 42F5323 and 42F5324 are fitted for 1¼-inch pipe. No. 42F5325 is fitted for 1½-inch pipe. For further information in regard to ordering pumps with cylinder extended see example under No. 42F5264 on page 1196. Average weight of these pumps is 105 pounds.

OUR NEW ACME TANK PUMP - - - - $5.25

THIS STRAINER FREE.

This pump is made on entirely new principles, the cylinder being placed in a horizontal position, which gives great strength and simplicity. It is strictly a double acting pump, sucking water at each stroke of the piston. Cylinders 5 inches in diameter, with a 5-inch stroke. Openings are 2 inches in size for both suction and discharge, and has an extra connection for the discharge pipe, so that 1-inch hose may be used if desired, which is of great advantage for sprinkling or fire protecting purposes. The spout is attached to the top of the pump and is reversible and so arranged that the largest pail will fit under the spout, thus avoiding the use of lead hose when a pail of water is wanted. It has a capacity of two barrels per minute, and will force water 60 feet. It is equipped with brass valve seats, and we can guarantee it to be the equal of any pump of this style ever placed on the market. There are tank pumps on the market sold at lower prices than ours, but, quality considered, this is by far the cheapest pump to buy. Weight, about 90 pounds.

No. 42F5386 Price, complete, as shown in illustration. No hose.....**$5.25**

No. 42F5386½ 5-Inch Crimped Plunger Leathers for above pump.

Price, per foot.....39c

Big Six Double Acting Force Pump with Air Chamber and Adjustable Handle.

$8.10

Especially adapted for elevating water from cisterns to tanks in upper stories of residences. It is also largely used for cleaning and filling boilers, for fire protection, as a deck pump and for many other purposes. Sizes are fitted with all brass valves. Brass plugs are provided for draining water from cylinder to prevent freezing, and also for priming when necessary. The air chamber may be reversed so that discharge may be used on either side. The suction and discharge openings are always fitted for iron pipe unless otherwise ordered, but can be fitted for hose or lead pipe if specified in the order, without additional charge. Weight, about 65 pounds.

HYDRAULIC RAM, $4.80

The Acme Hydraulic Ram is used to elevate water to a high tank or reservoir or to force water a long distance from the source of supply. Set this pump below a spring or stream of water at a distance of from 25 to 50 feet. Place the ram 1 foot below the level of the spring for every 10 feet that you desire to elevate the water. Bear in mind that the ram only lifts about one-seventh of the water which runs into it, the balance of water runs out of the ram at the valve in the operation of lifting and is, of course, wasted. Determine by table shown below which ram you will need. Order enough pipe for your purpose, prices of which will be found under Nos. 42F5710 and 42F5711 below. All you have to do is to connect the supply or feed pipe to ram and place one end in the spring. Connect the discharge pipe to the other side of ram and run it to the tank into which you wish the water to empty. For further information we will send upon request a circular more fully describing ram.

Standard Wrought Steam, Gas and Water Pipe.

Our black and galvanized wrought steam, gas and water pipe is the very best grade of pipe we are able to secure. For carrying steam, gas or water it will give perfect satisfaction, as it is made in the best pipe mills in the country. It is free from imperfections of any nature and is guaranteed by us to be the very highest grade. Remember, we sell only new first class pipe. Do not compare our pipe with the second hand pipe sold by some concerns. **Prices given below are for pipe in random or regular stock lengths as they come from the mill.** This does not mean exact 16 or 20-foot lengths, but in lengths as they come from the mill. When pipe is ordered in this way one coupling is furnished free with each piece. Where you specify exact lengths we charge for the threads on both ends as per price list below, and we do not furnish couplings with the pipe cut into exact lengths.

Water Conductor.

No. 42F5665 This cast iron conductor hangs over and directly under the spout of the pump. The pipe is screwed in at lower outlet on side to conduct water to a tank or trough that may be some distance from the pump. **State size wanted.**
Price, 1¼ or 1½-inch pipe.....**27c**

Malleable Iron Pipe Fittings.

We handle only the best pipe fittings, guaranteed water and gastight. Each fitting tested before leaving our store.

About sizes—Remember that the size of iron pipe is inside measure and that fittings are for pipe of corresponding size. When ordering pipe fittings give us the size of the inside of your pipe and not the fitting you want to replace. We show below the comparative sizes of iron pipe.

Pipe size, inch	⅛	¼	⅜	½	¾

DRY-SOX SHOES FOR MEN. SEARSMADE. KEEP YOUR SOX DR

Digitized by Google

THE EVER READY PNEUMATIC WATER SUPPLY OUTFIT

YOUR OWN WATER WORKS.

A RELIABLE FIRE PROTECTION.

at Boon to Country Homes. Provides Running Water, Hot or Cold, for Your Kitchen or Bathroom or Anywhere on Your Premises. Protection Against Fire. Simple in Construction, Easy to Install, Easy to Operate, Low in Price.

Our customers, and especially those living in cities and towns not equipped with waterworks, will certainly appreciate the many comfort and convenience afforded by our Ever Ready Pneumatic Water Supply Outfit. In fact, these outfits give you a complete water system just as convenient and just as indispensable as the costliest system in a large city home. A few moments' pumping in the basement, or the brief turning on of power secures an abundant daily supply of pure, aerated water in the bathroom, at the kitchen sink, in fact, anywhere suggested by household convenience. The added comfort of hot water is secured by merely connecting our range boiler to the cook stove, the furnace or the hot water heating plant. The old stagnant, insanitary attic tank is done away with.

Another feature of these outfits worth your consideration is the protection from fire. When the system is installed you can have a continuous pressure of from 40 to 60 pounds in the pipes, sufficient to throw a stream of water from the ground over any ordinary building. On this page we show a few of the Ever Ready Pneumatic Water Supply Outfits carried regularly in stock. We also show a complete outfit suitable for an average family, where a reasonable amount of water taken from a 25-foot well or cistern will suffice.

Our Pneumatic Water Supply Outfit

$47.50

Our Pneumatic Water Supply Outfit brings you all the conveniences of a city water works system. Water in the kitchen, for the bathroom or anywhere in any of your buildings.

Our Pneumatic Water Supply Outfit, as shown in this illustration, is the system we recommend to our customers where the outfit is to be operated by hand, and a small quantity of water, not over 160 gallons a day, is required. The outfit consists of the following material, and is all ready to set up: One 30-inch by 6-foot vertical steel pneumatic tank, total capacity 220 gallons, working capacity 160 gallons. One special horizontal double acting force pump, with 3-inch brass lined cylinder and hydro-pneumatic cylinder attached. One 1-inch check valve. One water gauge complete. One pressure gauge. One ¾-inch stop and waste cock. One ½-inch hose bibb. Together with pipe and fittings, cut and threaded, as shown in illustration. Complete instructions and a working blue print accompany each system. The simplicity of the outfit is one of its strongest features. Anyone can install and operate it. The pump furnished with this system is a double acting brass lined horizontal force pump, having a 3-inch cylinder with a 5-inch stroke and an extra air cylinder attached. The body is made of the best grade iron and the cylinder is brass lined. The valve seats are ground to fit absolutely water and airtight. The valves have vulcanized rubber settings, and the pump plunger is made of the highest grade of iron, turned absolutely true, and fitted with leather cup washers. The check and gate valve, also all brass fittings furnished in the outfit, are made of the highest grade of cast brass, carefully machined, and are guaranteed to be standard make of the highest grade of manufacture. The tank is made of boiler plate, the shell being 3-16 inch and the heads 5-16 inch. The longitudinal seam is double riveted, and the two heads are single riveted, the rivets being set very close together. The tank is tested to stand an air and water pressure of 125 pounds, and is guaranteed to be absolutely airtight. With this system you can obtain a pressure of from 40 to 60 pounds when operated by hand, and from 75 to 80 pounds when pumping with power. From fifteen to twenty minutes' pumping will fill the tank two-thirds full, providing you with 150 to 160 gallons of water without the necessity of repumping.

No. 42F2044 Outfit as described above, complete with 30-inch by 6-foot tank. Shipping weight, about 660 pounds. Price..... **$47.50**

You will find our prices on all of these outfits remarkably low, due to the great number of outfits we handle (thus reducing factory cost to a minimum) and the fact that there is but one profit added to actual manufacturing cost.

In our special Catalogs on "Modern Plumbing" and "Modern Systems of Home Heating" a more comprehensive showing of these outfits is made, and a fuller description given. If you are interested in an up to date water supply system, kindly write us, and either or both of these catalogs will be mailed you absolutely free. We would also suggest that you send a rough sketch of your premises and give us the following information and we will make for you a special estimate indicating just what you need and exactly what it will cost: Distance of well from house. Location of tank. Number of members in family. Whether water is for domestic use only. Approximate amount of water needed daily. Whether source is a well, cistern or flowing spring. Depth and distance to surface of water. Whether you will use hand power, windmill or gasoline engine.

If we succeed in suggesting a system which meets your approval we shall be pleased. If we fail, you will have placed yourself under no obligation whatever to buy. In either event we make no charge for this special service.

Estimates furnished absolutely Free. You obligate yourself in no way by asking for them.

We take all the risk. If not entirely satisfied on receipt of your outfit, just send it back. We bear all expenses.

Outfit for Shallow Well or Cistern Using Hand Pump.

Shallow Well or Cistern Power Driven Outfit.

Power Driven Outfit for Deep Well.

FOR LIGHTING.

HERCULES GAS MACHINE

FOR COOKING.

Light Your Home Like a City Residence Without the Use of Lamps—Simple, Safe and Saving

Of course you are tired of lamps; everybody is, and also of the dingy, dirty smoky light that emanates from them. Previous to this time you were, of course, compelled to use them, nothing better was at hand, but with our **Hercules Gas Machine** we are glad to offer our customers relief from this nuisance. Think of what it means to own your own gas plant. Think of what it means to be able to strike a match at any hour of the night or day and illuminate your home, not with the dim of light you have been using, but with a clear 100-candle power light that will illuminate every nook and corner in the darkest rooms of your house.

IT IS A GEM FOR COOKING. It produces a hotter flame than city gas and at less expense. Think of the convenience when arising in the morning, instead of waiting for a fire to come up, to say nothing of the hauling of wood and coal and the emptying of ashes, to merely strike a match, touch it to the gas stove and the morning meal is being prepared.

The gas is made or generated by this machine by allowing the gasoline to pass from the storage tank through the small pipe on the side of the tank into the carburetor, the carburetor being equipped with a float valve which allows the gasoline to flow only as it is generated. The carburetor has also a perforated section between the air section and gasoline, causing the air from the blower to pass through the gasoline in minute bubbles before passing up into the pipes and throughout the house. The float valve in the carburetor

can be regulated to take care of a certain quantity of gasoline, and as the gas is used from the fixtures more gasoline flows into the carburetor to take the place of that used. Thus, it is readily seen, the flow of gasoline into the carburetor is regulated by the amount used at the different fixtures. The air pipe from blower is connected to the regulator to regulate the pressure of air entering into the carburetor, the air being forced up through the gasoline through the perforated partitions, causing the gasoline to generate, and forces it into gas chambers. It is then forced through the pipes to the fixtures.

This machine requires about 4 gallons of gasoline to manufacture 1,000 cubic feet of gas, making the cost about 90 cents a thousand. But for cooking purposes it will go much further than city gas, inasmuch as gasoline gas is about 20 per cent hotter than manufactured coal or water gas. We quote prices below for this machine, as shown in illustration, but if you contemplate placing this outfit in your home, kindly draw a rough sketch of your building, giving us the number and size of the various rooms you desire to light. Whether you desire to light with this outfit only or cook with it as well, we will be glad to furnish you a complete estimate as to what it will cost you for this machine complete, together with necessary piping to install it in your home. These estimates are free for the asking and place you under absolutely no obligation to us to purchase an outfit.

Increase Your Crops by Spraying Your Fruit and Vegetab

ORDER FROM THIS PAGE, OR WRITE FOR OUR SPRAY PUMP CATALOG

The value of sprayers in the extermination of deadly plant vermin and the prevention and cure of black rust, fungus growth and other diseases of plants, has been proven beyond doubt by investigation and experiments by government experts during the past few years. The results of their investigation, besides a vast amount of other information regarding plant diseases and pests and their destruction by spraying, are published in our "Spray Pump Catalog," a copy of which we shall be pleased to send you if you are at all interested in the subject of spraying. The ravages of disease and vermin had woefully decreased the yield, as well as destroyed the trees and plants themselves, before interest was aroused and scientific tests made which have developed the most practical methods of spraying and the best liquids to use. Proper and timely spraying will double the yield as well as improve the quality of fruit and vegetables, by producing a healthy, normal plant growth. It will also kill all vermin and even exterminate the eggs and larva before they reach a harmful stage, and has proven very successful in the prevention ... ment of disease.

On this page we illustrate and describe a few of the sprayers we handle, of which will be found perfectly satisfactory for the work intended. If you are ... ested in the subject of spraying, we advise you to write for our special Spray P... log, which contains a complete line of power and field sprayers, together with ... tions on spraying, when it should be done and what solution to use to exter... various insects, etc. The catalog is free for the asking, and will be found a ... of reference on the subject of spraying.

For a complete line of Power and Field Spraying Outfits, send for our Spray Catalog.

Acme High Grade Barrel Spraying and Whitewashing Pump

Without question the most serviceable and up to date pump of this type on the market today, regardless of price. The pump is equipped with two cylinders, the upper cylinder being made of brass, and the lower cylinder is brass lined. It is also equipped with brass plungers, brass check valves and brass valve seats. All working parts that come in contact with the liquids used are brass. The body of the pump is a large air chamber, and after the pump is under pressure it will discharge a steady spray, lasting two minutes or more with one or two strokes of the handle, thus making it a very easy pump to operate. On account of being equipped with two cylinders, this pump is double acting. On the upward stroke of the pump half of the solution in the piping is discharged, and on the downward stroke the other half is discharged, thus making a continuous spray, a point which should receive due consideration by the prospective purchaser of a pump. Each pump is fitted with a jet agitator. This is a general purpose pump and can be used for spraying, whitewashing, washing windows, buggies, extinguishing fires, sprinkling lawns, flower beds, etc.; in fact, in any place water is needed, this pump can be used to great advantage.

We furnish this pump with a shut off valve at the base, so that the spray can be shut off by simply turning the valve. **Compare the weights given with this pump with other pumps sold at lower prices by other concerns.**

No. 42F5513 Includes pump, jet agitator, suction pipe and brass strainer (no hose or nozzle). Weight, 69 pounds. Price.....$5.73

No. 42F5514 Includes pump and trimmings complete with one lead of ½-inch three-ply discharge hose, 5 feet long, and Vermorel nozzle. Weight, 70 pounds. Price.....$7.14

$9.35 ACME IMPROVED SPRAYER

For Whitewashing, Painting, General Purpose Spraying.

No. 42F5503 Simple in construction, mechanically perfect, the best all around sprayer ever put on the market. Has no equal for spraying all kinds of trees, plants, shrubs, vines, etc., and is of the greatest value for stock and poultry farms, nursery men and florists, fruit growers, cold storage plants, factories, packing houses, warehouses, in fact, any and every place which requires the application of disinfectants, insecticides, fungicides, whitewash or cold water paint. This machine produces the strongest power and when used with extension pipe the tallest trees can be reached. **The reservoir is made of heavy galvanized iron and holds 8 gallons of mixture.** The cover is reinforced and so designed that the **pump may be instantly removed, thus exposing all working parts. The pump is made entirely of heavy brass, except the handle parts.** There is an agitator which is operated by the handle and which keeps the solution thoroughly mixed about the suction opening. This pump is fitted with 8 feet of three-ply discharge hose, stop cock and two 4-foot lengths of extension pipe, with **latest pattern Vermorel nozzle.** Five extra inserts are furnished with each nozzle, and they can be replaced as often as necessary to keep the spray of uniform size. The machine loaded is **easily carried** from place to place, and has a decided advantage over sprayers that are mounted upon barrels or other large reservoirs. Weight, 45 pounds. Price.....$9.35

Spraying Pump, $1.98.

No. 42F5520 The construction of the pump requires the pressure on the handle to be all done on the down stroke, the pressure on the cylinder acting as a cushion, and partly forcing the handle up again, thus making it very easy of operation, requiring no foot rest nor other device to steady it. The hose can be detached at top of pump and a nozzle attached in its place, either for spraying, sprinkling or throwing a solid stream. It is also arranged so that a small stream is discharged with great force from the bottom of the pump into the bucket or barrel, serving to thoroughly agitate the mixture at all times when the pump is in use. For washing windows, buggies, etc., it is very useful. Weight, about 5 pounds. Price.....$1.98

Improved Spray and Force Pump, 70 Cents.

No. 42F5518 It is beyond question the most perfect and effective hand apparatus ever invented for throwing water. Every family needs some kind of a force sprinkler and pump. In simplicity of construction and ease of operation it has no equal. Always ready for use, and so light that it can be used easily and effectively by anyone. Made of bright tin coated with Egyptian lacquer. Weight, 2¼ pounds. Price, each.....$0.70

Per dozen..... 7.30

Wonder Sprayer.

The Little Wonder Sprayer is adapted for spraying all kinds of vegetable plants. It sprays a fine mist or coarse spray, which is accomplished by turning the little brass nozzle backward or forward. It is furnished with brass balls. Will spray up or down and takes the place of any kind of atomizer made. Is simple in construction, nothing to get out of order; furnished in either tin or galvanized iron. We know anyone purchasing this sprayer will be more than pleased with it. Capacity, 1 quart.

No. 42F5494 Tin. Price.....48c

No. 42F5495 Galvanized iron. Price.....60c

Acme Sprayer or Lightning Bug Exterminator.

The best low priced sprayer sold by anyone. It is made of IX tin or brass; piston rod is made of heavy steel rod, with a hardwood stuffing box. Cylinder is 1¾x15 inches. Weight, about 2 pounds. Capacity, 1½ pints.

No. 42F5490 Price, IX tin.29c

No. 42F5492 Price, brass tank with brass tube.....54c

Glass Reservoir Spr... With Agitator.

No. 42F5493 Has detachable glass reservoir, provided with ... spring leather plunger extra ... keeps the leather washer ... all times and will not ... wrinkle or dry up. Weight ... pounds. Capacity, 1 quart.

POWER SPRAYING OUTFITS

FOR A COMPLETE LINE OF POWER AND FIELD SPRAYING OUTFITS, SEND FOR OUR SPRAY PUMP CATALOG.

IRRIGATING OUTFITS

Send for Free Estimates.

If you are interested in an irrigating plant and will kindly write us, giving us information as to the depth of the well from which you intend to pump water, the amount of water you desire to pump per minute, whether you intend to use a windmill or a gasoline engine to pump the water, how much ground you intend to irrigate, the size of pipe you will need, whether your well is a dug or bored well, the size of casing, if any, in the well, we will be pleased to name you a price on a compelte outfit to suit your requirements. We know we can save you money on outfits for irrigating.

MARVEL SPRAY PUMP FIRE EXTINGUISHER

This is a combination spray pump and fire extinguisher, one which we know will give our customers splendid satisfaction as a general purpose sprayer. It is equipped with a heavy brass pump, and all valves, etc., that come in contact with materials used in spraying are brass, and therefore will not get out of order. This pump is furnished with two nozzles, one for fire extinguishing purposes or general purposes sprinkling, which will throw a stream from 40 to 50 feet, and also with a spraying nozzle for spraying purposes. The pump is made of galvanized iron, nicely painted, and has a capacity of 4½ gallons.

—Put a— Hercules Hot Water or Steam Heating System Your Hom

Heats Every Room to the Same Temperature, Avoids Dust, Ashes or Coal Ga Living Rooms, Saves Household Furnishings. A Great Saver of Time and La Easily Installed by Anybody in Any House. Running Water System Not Ne sary. Write for Hot Water and Steam Heating Catalog. Free on Req

So Little House Cleaning Necessary, Women Folks Have Plenty of Time for Other Work.

Hot water and steam heating plants stand first among modern improvements in hom comforts. They are the acknowledged ideal heating systems. We have saved you mon on your other supplies, let us save you money on a guaranteed heating system. Send us sketch of your home as explained below. We will quote you figures for a hot water steam heating plant complete, guaranteed to heat your home, at a surprisingly low price compared with what you thought such a plant would cost. Direct connection with one the largest manufacturers of heating materials and the application of money saving system to this line of merchandise enable us to make you large saving. Our prices are based on manufacturing cost with just one pro added, sweeping away all unnecessary expenses and profits of middlemen.

All Coal and Ashes Stay in Basement; No Dust or Dirt in Living Rooms.

Consider These Additional Advantages:

No carrying coal upstairs; unnecessary to remove ashes every morning; fire needs attention but twice daily — morning and evening; no dust, soot, ashes or coal gas in living rooms; great saving in carpets, rugs, curtains and other household articles; much less house cleaning; chances for colds and sickness greatly lessened, due to freedom from dampness and variation of temperature; may save you several hundred dollars in doctors' bills. If you have a running water system of any kind you can run a coil into the fire pot of the boiler, connect it with a range boiler or storage tank and have an abundant supply of hot water ready for use day or night.

A Hercules Heating System keeps your home at a summer temperatu while the thermometer registers from 30 to 40 degrees below zero, and ever room will be heated uniformly. If you prefer to sleep in cool rooms you ca close the radiator valve, thus securing the desired temperature. You ca regulate the plant to have any temperature desired in your rooms when y awake in the morning. No more dressing in cold rooms; you have perfe control of the heat, no matter what the condition of the weather, such conte as you cannot have with any other heating system. Regulation of the Her cules system is simple. Should the outdoor temperature be very low, it only necessary to open the draft damper wider and the temperature of th home will be quickly raised. We always figure sufficie reserve capacity to make it unnecessary to force the fir no matter how low the temperature may be. While th lowest temperature varies according to locality, even th is taken into consideration in figuring for each home.

Nice Warm Floors for Children to Play On.

The first cost of a Hercules Heating Plant is, course, a little higher than that of stoves, but the cost fuel and maintenance is less than that of the requir number of heating stoves to heat your home throughou this and the indirect saving in home furnishings ma it a much better paying investment than stoves. Th Hercules system may be installed in any buildin whether just being built or an old house, without a danger to the building. The boiler placed in the basement and the piping the different radiators is laid out to ge the best possible results. This keeps th floors and walls of your home warm.

Send us your sketch at once. **Don't wait.** If you have a blue print of your building, or a drawing from which the carpenter has worked, send it to us, as we will be able to figure the plant from that and it will then be unnecessary for you to make up another sketch. When we send you the estimate we will return your blue prints or architect's sketch by registered mail. We employ a force of heating engineers who have had years of experience in designing heating plants. We know that we can furnish you with a plant that will give better results than any you could buy elsewhere. When we receive your order our engineers will carefully go over your plans, taking into consideration everything that would affect the working of the plant and design the system to give you the best possible results. We make absolutely no charge for estimating on the cost of your heating plant or for designing the system when we receive your order. You will only be charged the latest catalog price of each item necessary for the complete plant, and as these prices represent the actual factory cost with but one very small profit added, you can readily see that the total cost of the heating plant will be very low. **Write us today.**

Much Less Danger of Catching Colds When Necessary to Get Up at Night.

No matter where you live, whethe you have running water or not, you ca install a Hercules system. Water ca be forced into it with a hand pump o you can fill it with a pail through th expansion tank; or if a steam heatin plant, you can pour the water into th boiler by removing one of the sma plugs at the top and using an ordinar funnel. When onc filled, it is not nec essary to add mo than 5 to 8 gallo a season.

Anybody ca install a Hercules Heating Plant in his home. Our simple instructions and working drawings make it very easy.

Makes the Bathroom Perfect in Healthfulness and Comfort.

SEARS, ROEBUCK & CO.

Certificate No.

Certificate of Guaranty

You take no chances as we assume all risk, and should everything not be entirely satisfactory on receipt of goods, they can be returned to us at our expense and we will return your purchase money, together with transportation charges both ways, as our guarantee signifies.

Hercules Boilers, $29.60

OUR HERCULES BOILERS

is superior to any other line of boilers, either round or sectional, that are on the market today. They are of the vertical sectional type and have all the advantages of the round boiler, such as compact fire pot and simplicity of construction, while they also have the superior advantages of the sectional boiler, such as long fire travel, increased heating surface and the correct proportions between the grate and the heating surface. The fire pot is deep and return flues ample, so it will do its work economically and with the least attention. It will carry coal enough to maintain perfect combustion for twelve hours with ordinary care and attention. For hot water heating this heater is superior to any on the market, as it has a perfect interior circulation. This is also especially advantageous for steam, as the steam is more easily generated and is quickly separated from the water, so the water is not carried up into the pipes with the steam. The heater is thoroughly tested before leaving our factory and is made up and shipped in two parts; base and grates in one and the section in the other, which makes it easy to erect. Its compact form enables it to be easily carried into a building.

The steam boiler is furnished complete with all steam trimmings, such as steam gauge, water gauge, damper regulator and safety valve. These are all necessary with a hot water boiler. Boilers are furnished complete with fitting tools, such as poker, hoe and flue brush. Write for our special Heating Catalog for complete information on steam and hot water boilers ranging from 125 to 5,000 square feet of heating surface.

COMFORT STEAM OR HOT WATER THREE-COLUMN RADIATORS.

Shipped from factory in Western Pennsylvania.

OUR RADIATORS are of the latest improved design, and the ornamentation cannot fail to be acceptable to any of our customers, as it is pleasing and harmonious. Our radiators are constructed to hold a pint of water to a foot of radiating surface. This enables us to have a wider space between the sections for the circulation of the air and enables the radiators to do more effective work in giving off heat, both by radiation and contact with the air.

THE CASTINGS are made of the finest grade of gray iron of uniform thickness, with corrugated heating surface and are free from all flaws and pinholes. The radiators are tested to 70 pounds pressure before leaving our factory. We can furnish radiators in any number of sections desired.

While we list below only three-column radiators, we can furnish one, two or three-column radiators, ranging in height from 20 to 45 inches; low six-column radiators from 13 to 26 inches; also dining room, wall and any kind of special radiator that you may desire.

For full information and prices see our special Heating Catalog.

When ordering be sure to state whether you want radiators for steam or hot water, also how they are to be tapped, otherwise tapping will be as follows.

STEAM RADITORS ARE TAPPED AS FOLLOWS UNLESS OTHERWISE SPECIFIED:

Up to 24 feet	1 -inch supply
24 feet to 50 feet	1¼-inch supply
50 feet to 100	1½-inch supply
Over 100 feet	2 -inch supply

HOT WATER RADIATORS ARE TAPPED AS FOLLOWS UNLESS OTHERWISE SPECIFIED:

Atlas Pit Stock and Wagon Scal

The Scale We Advise You to Buy
FULLY GUARANTEED

For the purpose of illustration we show beam box opening on platform side but for regular use the box is turned around with opening on side opposite platform. There is a space of 2 feet between beam box and edge of platform.

THE ATLAS PIT STOCK AND WAGON SCALE is the best high grade pit scale made adapted for farm and general commercial use. To set up a pit scale it is necessary to dig a pit and build a permanent foundation.

WE RECOMMEND this scale in preference to any pitless scale as our experience has proven that a pit scale such as this one will give you better satisfaction in every respect than you can get from a pitless scale of any make. By this we mean for a term of years' service and not the first setting up or few months' use. Although this scale is the best scale you can get, our price is much lower than on the pitless type, because we don't have to furnish special steel beams or frame. This also reduces the weight and consequently the freight charges.

WE GIVE YOU A TRIAL. Send us your order, enclosing the price, and we will ship you our Atlas Pit Stock and Wagon Scale with the distinct understanding that you may try it to assure yourself of its satisfactory qualities. If you are not satisfied you may send it back to our factory and we will return the price and any freight charges you may have paid on the scale.

WE FULLY GUARANTEE every Atlas Pit Stock and Wagon Scale, and should any part become broken through defective material or workmanship we will replace it free of charge.

THERE IS NO GREATER VALUE in the scale market than this Atlas scale. We ask you to compare the quality and price of our scale with the quality and price of other scales offered on the market and you will at once see that we can furnish a scale as good or better for less money than anyone else. If not, you may return our scale and we will cheerfully return your money and freight charges. We are so confident that this scale will satisfy you that we will gladly leave it to your own good judgment to make the comparison.

ALL OUR WAGON SCALES are light, but strong and durable. We use the best quality of steel and cast iron obtainable. The freight charges will be very small.

YOU BUY A SCALE TO WEIGH ACCURATELY, no matter what you buy. The [illegible] for you to decide are: Is this scale an accurate weigher? Is it constructed of material such as will make it last? Possibly you will doubt the good qualities because of its low price, but there can be no tion whatever on these points, as you terms that we guarantee our scales to be quality of material, strong and durable, weighing and accessible at all times. We you to take our word for it, but ask your order on our trial offer, permitting for yourself, guaranteeing to return you freight charges if you do not believe that best scale obtainable.

Showing detailed construction when scale is set on brick foundation. You can use stone, concrete or wood for a foundation. Our directions tell how.

THE BEST SCALE FOR DEALERS, grain elevators, etc. We office fixtures when so of the regular beam box without extra you desire more than 2 feet space between and the platform, write us for special exactly what distance you wish between the platform and the point where the beam hangs. We can save you money equipment. Beams ordinarily are graduated on one side only. We make an extra $1.75 for graduating both sides.

Construction of the Atlas Pit Stock and Wagon Scale

THE SCALE LEVERS are made of heavy T shaped steel bar; both long and short levers strongly trussed with heavy round steel rods, making the levers perfectly rigid under the most severe strain. The tension of the truss rods is adjustable by means of right and left hand nuts. Truss posts and short levers are connected into place and strongly riveted, and the lever heads which carry the pivots by which the levers are suspended, and the pivots upon which the platform bearings rest, are firmly secured to the ends of the levers.

THE CORNER HANGERS AND CONNECTIONS. Hangers are made of heavy round steel. The connections, consisting of links, pivot loops and pivots to which the head end of the scale levers are attached, suspend from the corners of the foundation by means of these hangers. Lever heads are made of heavy cast iron driven into place and secured with heavy rivets. The pivots connecting the corners upon which the platform rests are made of ¾-inch square tool steel, hardened and ground to knife edge; they are driven through the lever heads and levers, making a permanent connection. The corner pivot loops and the platform bearings are of ample strength and carefully hardened to eliminate friction and prevent wear.

OUR FULL CAPACITY THREE-BAR BRASS BEAM is furnished with these scales. There is no better or more convenient beam constructed for stock and wagon scales. Made of solid brass, finely polished, very attractive in appearance, and is easy to read and quick to weigh with. All parts in direct connection with the sensitive parts of weighing are well fitted and hardened, and the pivots are ground to knife edge so that they will act in the loops without any friction or wear. Beam is equipped with brass sliding poise weights and counterpoise weights for balancing platform or stock rack, and a balance ball weight to balance all variations which may occur through the accumulation of dirt, snow or ice on the platform.

THE BEAM BOX is large and roomy, measuring 58 inches high, 45 inches deep, and is finished with a molding cap with a lock and key and is painted with the best quality of lead and oil paint.

SIZE OF PLATFORM is 8 by 14 feet, which is standard in size, and length to weigh a wagon or bunch of cattle distribute its weight equally on all sides and corners, thus insuring accurate times.

THE LEVER AND THE BEAM ROD SHACKLES are made of [illegible] lever shackles and swing with perfect freedom so that there is no binding. All pivots, truss posts connections are made of tool steel and carefully hardened, tempered and ground, rest in hardened tool steel cups, which are welded into the shackle bars, making free working bearings. The steelyard rod which forms a connection between the beam shackle, and the shelf and equalizing lever, are made of round steel, one end being into the top of the bar of the stirrup, the other connected with the shelf lever.

THE SHELF LEVER is made of heavy wrought steel and suspended from and the beam box by an adjustable eye bolt, and connected the short leverage end of the scale beam by short steelyard rod at the other end and loops are hardened, which gives the parts accuracy in weighing and wearing.

PLAIN AND SIMPLE INSTRUCTIONS are sent with each scale, and have no trouble in erecting plans show every shape and measurement of all the timbers and lumber needed is no possible chance of erecting the scale wrong if you follow the instructions. is shipped knocked down from Southern Michigan, from which point you will have the freight. All parts are securely boxed and the beam box is crated. We do not timbers or planks with this scale.

$31.25 AND UP

OUR NEW CENTURY STANDARD GRADE PIT STOCK AND WAGON SCALE is constructed purposely to meet the requirements of those who want a medium price scale. There is no better medium price pit wagon scale made. It is equal to scales sold by jobbers and manufacturers for $45.00 to $55.00. It is well made in every particular, having good materials throughout its construction and sealed to United States standard weight. It is equipped with full capacity double bar solid brass beam, fitted with brass poise weights. These parts are polished and milled. You can depend on this scale for accuracy in weighing.

Catalog No.	Capacity	Size of Platform	Shipping Weight	Price
11F7083	3 tons	8 x 14 feet	525 pounds	$31.25
11F7084	4 tons	8 x 14 feet	545 pounds	32.50
11F7085	5 tons	8 x 14 feet	565 pounds	33.70

THE CONSTRUCTION of our New Century Pit Stock and Wagon Scale is similar to that of the Atlas, the difference being that it does not contain the excellent quality and the high grade workmanship, as before stated, but all parts relating to the accuracy of weighing are made of hardened steel, thus eliminating all friction and wear. THE BEAM BOX is well made, of full standard size, fitted with lock and key and finished with the best paint. THE PLATFORM is of standard 8x14-foot size and can be set on either wood or masonry foundation. It requires a very shallow pit, not to exceed 16 inches from the bottom of sills and 22 inches from the top of platform.

WE GUARANTEE THE NEW CENTURY PIT STOCK and Wagon Scale against breakage from defective material or workmanship, and should any part become broken we will replace it free of charge. Send us your order, enclose our price and we will ship you the New Century Pit Stock and Wagon Scale and permit you to try it. If it is not satisfactory you may return it to our factory and we will return your money and any freight charges you paid. The scale is shipped knocked down from our factory in Southern Michigan. All parts are securely boxed and crated. We enclose SIMPLE DIRECTIONS for erecting the scale and if carefully followed you will have no trouble whatever in setting it up. We do not include platforms, planks or sills with this scale.

No. 11F7145

DVICE. Our Atlas Pitless Wagon Scale is as good or better than any pitless scale on the market, regardless of price, and for all ordinary farm s well adapted for the work as any pitless scale made. We recommend the reference to the pitless scale in every instance. In all our scale experience that a pit scale will give better satisfaction as regards permanent accuracy The working parts do not have to be so crowded and the framework is er, which makes it less liable to get out of order, especially when subjected Any honest experienced scale man will verify this statement.

ARANTEE our pitless scales to be as accurate and to give you as good satisfaction as any pitless scale you can buy at any price, but interest we recommend the pit scale.

BE MISLED. The large majority of scale dealers recommend the pitless scale in preference to any other type because it kind on the market and is sold at a larger profit than the pit scale. Further, more steel or iron with the scale, which adds to their profit. Their argument of the extra steel furnished is considerably less than what it would cost to fit up the pit scale." This is not so. We will gladly furnish you a building the pitless and pit scales and you can then see for yourself just what difference the cost of setting up either style. The total cost in each instance will be and the pit scale will prove to be so much better in the long run that you to spend a little more in the first place.

RUTH. We have given you the above information for your benefit, not ours, and have based our statements from our many years of experience siness.

RATE. All our scales will weigh absolutely correct on all weights up to their full capacity. Each scale is tested and sealed to U. S. hts, the accuracy of which has been established by the U. S. government. t perfectly satisfied we will accept the return of the scale and return the price it, together with freight charges.

BEST QUALITY. We guarantee our wagon scales to be built of perfect material and to be assembled by expert workmen. Any part which breaks or gives out because of a defect in the material or workmanship will be replaced by us free of charge to you. This guarantee, together with our trial offer, makes it perfectly safe for you to place your order with us.

THIS SCALE IS PORTABLE. It can be easily taken down or set up, as there are but very few parts to adjust. This makes it possible for you to use the scale on one part of the farm one season and on another part of the farm another season, making it convenient to weigh your stock or produce, by locating the scales close to your stables or fields.

PROTECT YOURSELF. Everyone who buys or sells by weight should have an accurate scale on which to weigh everything they buy or sell. This will insure getting all that you pay for and protect you from giving more than you are being paid for. It is poor business policy to guess the weight of anything and you should safeguard your own interests by weighing on your own scales everything that is bought or sold by weight.

STOP AND THINK FOR A MOMENT. Can you afford to run the risk of being robbed of the well earned fruits of your labor and skill by carelessness of others? No business house or merchant would think of buying goods of any kind that are bought by weight without checking the correctness of the weight on their own scales. Ordinary common sense leads them to do this. Mistakes are possible and are liable to be of frequent occurrence and unless detected may cause you a serious financial loss. If a scale is necessary to the merchant or dealer, can you afford to be without one?

A WAGON SCALE WILL PAY FOR ITSELF the first year it is in use, by insuring full payment for everything you sell and by insuring full weight on everything you buy.

THIS DESCRIPTION OF THE ATLAS PITLESS WAGON SCALE. WE GUARANTEE THE ATLAS PITLESS WAGON SCALE.

DETAILED CONSTRUCTION. ALL STEEL AND IRON.
Direct Lever Connections. No Complicated Pipe or Rocker Levers Which Bind Easily and Give Inaccurate Weight.

LL STEEL LEVERS used in this scale are much than the common cast iron levers generally lever is made from a single piece of steel and the long levers are strongly heavy flat steel bar turned edgewise to greatest strength. The short levers are no truss is required. The lever heads, irons and the truss posts are strongly levers by bolts and rivets.

EARING PIVOTS for the levers are of square tool steel, tempered and hardened. The bearing edges are ground sharp, making a sensitable bearing point. This means our scale will remain accurate indefinitely, while soft dull points will soon wear and lose its sensitiveness.

EVER SHACKLES OR CONNECTIONS which connect the long and short levers are of steel. They and swing perfectly free, so that binding is impossible. The pivots in the truss posts, upon which the top bar of the shackles rests, and in the nose pieces levers which rest upon the lower bar of the shackles are cone shaped, tool steel, ground. These pivots rest in hardened cups in the shackle bars, making bearare exceedingly durable, simple and free of friction.

ORNER PIVOT LOOPS, by which the head ends of the levers are suspended from the corners of the scale frame, are very heavy and the bearings of these loops are carefully hardened, making a perfect friction- where the knife edge lever pivots have their bearings.

THE BEAM is made of the best quality brass, highly polished and accurately marked. The total capacity of the scale is shown on the beam, so no loose weights, which are liable to become stolen or lost, are required. The upper bar of the beam is graduated up to 2,000 pounds by 10-pound marks; the lower bar is graduated to 500 pounds by 2½-pound marks; the middle bar is graduated to 8,000 pounds by 500-pound notches. The beam is equipped with tempered tool steel pivots, accurately ground. The sliding poises are brass faced. Beam is furnished with balance ball and counterpoise so scale can be quickly balanced when necessary to overcome the weight of snow, ice, dirt, rain, etc., on the platform.

THE BEAM BOX is of selected lumber and is finished with best quality filler and oil paint. The box is provided with a good lock and key so that the beam cannot be tampered with or the scale used by outsiders.

THE FRAME of the scale is formed of two heavy channel irons for each end which are firmly connected by heavy pipe connections and a special bracket which gives great strength.

THE PLATFORM is supported by heavy steel I beams fitted with hardened bearing feet; 8x14 feet in size, and is but 10 inches above ground.

WE FURNISH EVERYTHING COMPLETE, except the lumber for platform, which can be bought at home for about what the freight would be if we furnished it.

ANYONE CAN SET UP OUR SCALES. We furnish complete simple directions so you can set up the scale yourself, even if you never before had experience in this line.

11F7145 Atlas Steel Pitless Wagon Scale. Capacity, 5 tons. Size of platform, 8 feet by 14 feet. Shipping weight, 1,000 pounds. Price..... **$57.90**

ERCULES PITLESS WAGON SCALE

$36.95

OUR 5-TON CAPACITY HERCULES PITLESS WAGON SCALE at $36.95 is equal to scales sold by others at from $55.00 to $60.00. This scale is suitable for ordinary farm use and will weigh accurately. It is a first class standard grade scale made of good materials, put together by expert workmen and is sealed to U. S. standard weights. It is furnished complete with nicely finished beam box and two-bar solid brass beam which requires no loose weights.

THE CONSTRUCTION of the Hercules Scale is the very best. The end sills are formed of two 3-inch by 12-inch planks which you must furnish. These sills are connected by heavy pipe connections and brackets similar to our Atlas scale. The levers are of heavy T shaped steel bars and the long levers are reinforced with trusses. The platform sill or stringer on beam box side is a heavy steel I beam. The platform stringer for the back of the scale is made of 6-inch by 8-inch timber which you must furnish. The corner loops which support the scale are made extra heavy and hang from the special brackets in each corner of the scale. The bearings and connections are very similar to the same parts in our Atlas scale, all bearings being on knife edge pivots made of tool steel and carefully hardened. This insures accurate and sensitive weighing qualities together with long life in all the wearing parts. The beam box is of full size, made of good material, well painted and is fitted with lock and key. The two-bar solid brass beam is accurately fitted with tool steel pivots. The upper bar is accurately marked to 1,000 pounds by 5-pound marks; the lower bar is accurately marked to 9,000 pounds by 500-pound notches, giving you the full capacity on the beams without the inconvenience of using loose weights which are liable to become lost, stolen or unsealed. The platform is full size measuring 8 feet wide by 14 feet long and is but 12 inches above ground.

WE FURNISH PLAIN AND COMPLETE INSTRUCTIONS for setting up this scale so that even though you have never done work of this kind you will be able to prepare a suitable foundation and put up the scale with but very little trouble.

WE GUARANTEE THE HERCULES PITLESS SCALE to be free from defects in material or workmanship. We will replace any parts which give out through defect in material or workmanship free of charge to you.

WE SHIP THE SCALE ON TRIAL and if you do not find it perfectly satisfactory you can return it to the factory at our expense and we will send back all of your money, together with the freight charges. Shipped from our factory in Southern Michigan.

ATLAS PLATFORM SCALES

THE ATLAS PLATFORM SCALE, as shown in the large illustration, is recommended to any customer wanting a high grade platform scale. At our price of $8.93 we are offering this Atlas Scale at about half what you would have to pay elsewhere for the same grade of scale. You can pay more money for a platform scale, but you can't buy a better one than this Atlas Scale. It is built in the different capacities at the different prices as quoted below. We can furnish you either the single or double beam scale. We recommend the double beam scale, as it is the best for all around use.

WE WILL ALLOW YOU TO TRY the Atlas Platform Scale. Order one and compare it with any other make of scale costing twice what you paid us for the Atlas Scale; if you find the other scale to be a better scale than our Atlas, if you are not satisfied, if you do not feel that we have furnished you a high grade scale at a very much lower price than you could possibly buy one for elsewhere, we would like to have you return it at our expense and we will immediately return the money sent us, together with the freight charges you may have paid.

THIS ATLAS PLATFORM SCALE is built in different capacities, with single or double bar beam, as quoted below, and of the best material obtainable for the purpose. We employ the best mechanics in building this scale; each and every scale is thoroughly tested and sealed to U. S. Standard weights. We can absolutely guarantee that this scale will weigh perfectly and accurately.

REMEMBER, we can sell you a platform scale at a lower price. In fact, you will find illustrated and described on this same page a platform scale as low in price as $6.29, and while at this price of $6.29 we are able to furnish you a much better scale than you could possibly secure elsewhere, nevertheless it is not such a scale as we would recommend you to buy. It is not a scale that will give the satisfaction and service that our Atlas Platform Scale will give. Remember that a scale must be absolutely perfect and absolutely accurate in weighing or it is of no value to the owner. If a scale is not absolutely perfect and absolutely right in every particular, the owner must guess at the weights, and if you want to guess you can guess without buying a scale.

WE FULLY GUARANTEE the material and construction of our Atlas Platform Scale to be absolutely perfect, and should any part become broken through defective material or workmanship, we will replace the broken part with a new one free of charge.

THESE SCALES are made with single and double beams. The single beam is shown in the main illustration and the double beam is shown separately. On the 600, 800 and 1,000-pound scales the beams are graduated on both sides by ¼-pound marks to 50 pounds, and on the larger sizes they are graduated on both sides by ½-pound marks to 100 pounds. The lower bar of the double beam is graduated the same as the upper bar. The beams are solid brass, milled and polished, and are fitted with square brass sliding poise weights, which are also milled and polished. The sliding poise weights of the double beam scales have knurled head brass set screws so that either bar may be used for tare weight. Each scale is provided with loose weights equal to the balance of the scale capacity and varying in size so that you can weigh anything from the smallest graduation on the beam to the full capacity of the scale.

THE CONSTRUCTION of the Atlas Platform Scales is the best that material and workmanship can produce. Castings are of best quality gray iron, the frames being extra heavy and mounted on wheels with heavy steel axles instead of the cast lugs used by so many scale manufacturers. The platform is extra large, as you will note by comparing our measurements with those of others, and is made very strong and with hardwood center. The platform is provided with check pins at front and back, and the bearing feet are faced with tool steel which is hardened. The levers are extra heavy and fitted with knife edge tool steel pivots, which are carefully ground and hardened, insuring sensitive action and long wearing qualities. The levers are suspended from the four corners of the platform with malleable iron corner loops, fitted with self adjusting chills. The pillars and pillar caps are made of select hard maple and are finished with two coats of Prussian blue lead paint, striped and varnished. The end of the long lever connects with a two-piece steelyard rod that hooks on to the outer loop of the pivot of the scale beam and is fitted with a hardened loop where it connects with the scale lever. All bearings are fitted with hardened tool steel pivots ground to a knife edge to eliminate friction and give accuracy in weighing. The beam is provided with a balance ball, suspended by a threaded rack, so that the scale can be perfectly balanced. The loose weights are sealed to U. S. Standard weights and are carried on the iron weight rack which forms the top of the pillar.

WE SEND PLAIN, SIMPLE DIRECTIONS for setting up the Atlas Platform Scale. This scale is shipped from our factory in Southern Michigan, from which point the purchaser pays the freight. All scales are shipped knocked down securely boxed. You will find that the freight is a small item compared with what we save you on these scales, and we assure you that in purchasing our Atlas Platform Scale you will receive wonderful value.

This is the scale for you to buy. There is no better scale on the market and our price means a big saving over what you ordinarily have to pay for a scale of inferior grade.

HARVARD PORTABLE PLATFORM SCALE

This scale, built in the 600 and 1,000-pound capacities as quoted below, is a remarkable scale value. It will weigh accurately and is carefully constructed and tested. We guarantee it against defective material and workmanship and will replace any part broken on this account. We advise you to invest a few dollars more and secure our Atlas Scale, a high grade scale that contains much better material, is better finished and will give far better service than this Harvard Scale. The few dollars difference in price between our Harvard Scale and our Atlas Scale allows us to invest just that much more in material, and for the few dollars more we can give you a very much higher grade scale than we can at the price at which we quote the Harvard. If you can possibly afford to invest a few dollars more than the price of our Harvard, we advise you by all means to do so and order one of our Atlas Scales, illustrated and described above. However, if you do not feel that you can do this and desire one of the best low priced scales, you cannot do better than to order this Harvard Scale, in either the 600 or 1,000-pound capacity.

REMEMBER, this Harvard Scale is without a doubt the best value for the money ever offered to our customers. It is equipped with a single polished steel beam, and each and every part that has a direct bearing on the sensitive points is made of hardened tool steel; the entire scale is well made and strong, and is mounted on wheels. The platform center and pillars are clear hardwood lumber. The scale is tested and sealed to U. S. Standard weights. We paint and finish it in a very neat, attractive and substantial manner. We pack it thoroughly for shipment and ship it direct from our factory in Southern Michigan.

Catalog No.	Capacity	Size of Platform	Shipping Weight	Price
11F7005	600 pounds	15x22 inches	135 pounds	$6.29
11F7006	1,000 pounds	16x24 inches	140 pounds	7.45

NEW CENTURY PORTABLE PLATFORM SCALE

The New Century Portable Platform Scale at $7.56 is a better scale than is usually offered by retail hardware stores at double our price. We build this scale to meet a small demand for a medium priced scale, and while we would advise anyone ordering a scale to invest a few dollars more and secure one of our Atlas Portable Platform Scales, as illustrated and described above, at the same time we can give you excellent value in this New Century Platform Scale, built in different capacities at prices quoted below.

$7

EACH AND EVERY NEW CENTURY SCALE is tested to U. S. Standard weights, fitted with a solid brass beam, with a sliding poise weight. The New Century Scale is a good scale for the money and will give satisfactory service. We cannot, however, furnish at the price asked for our New Century Scale as good an article as we furnish in our high grade Atlas Scale, illustrated and described above. Our Atlas is second to none. We could not make it better; it is a high grade scale throughout and is the most popular scale with our customers; however, there is a small demand for a scale like our New Century, and to meet this demand and supply our customers with their wants we offer you in this New Century the best value it is possible to give for the money.

WE GUARANTEE the New Century Scale against defective material or workmanship and should any piece or part break for such reason we will replace it free of charge. We will be glad to ship you one of the [illegible] and allow you to try it, weigh on it to prove its accuracy, compare it with other scales, and if you are [illegible]isfied that we have furnished you a much better scale than you could purchase elsewhere at even more [illegible] you are not satisfied that we have furnished you a satisfactory article and saved you money, you can r[illegible] our expense of freight charges both ways and we will immediately return your money.

THE CONSTRUCTION of our New Century Portable Platform Scale is similar to that of the Atlas [illegible] that the workmanship on the Atlas is a little finer, also the quality a[illegible] grade, but the grade of material and workmanship on the New Century is equal to that in scales [illegible] twice what we ask for this one. All parts that have a direct bearing on the accuracy of weighing are m[illegible] steel, ground and well hardened, so as to eliminate friction and give durability. The scales are eq[illegible] SINGLE SOLID BRASS BEAM and graduated in ¼ pounds up to 50 pounds. Each scale is provided [illegible] weights that are tested to U. S. Standard weights. The New Century Scale is very much like the At[illegible] as previously stated, is made a little lighter, and is a grade lower in quality and workmanship.

We furnish simple and plain instructions for setting up this New Century Scale. We ship it from [illegible] in Southern Michigan, securely packed so as to secure the lowest possible freight rate.

Catalog No.	Capacity	Size of Platform	Shipping Weight

SOLID COMFORT VEHICLES

51,770 VEHICLES BUILT IN THIS FACTORY IN 1910.

SATISFACTION GUARANTEED—WARRANTED AGAINST DEFECTS FOR LIFE OF VEHICLE

READ THIS GUARANTEE

Satisfaction is what we guarantee. The thirty days' trial we offer, and which is offered by practically all concerns selling vehicles by mail, is a fair test for the vehicle, but this trial answers only the purpose of giving you an opportunity to inspect the style and finish and easy riding qualities of the vehicle. It does not afford you the opportunity of finding out for yourself of what materials it is made, how long it will last and what service it will give you. It is possible for a vehicle to give entire satisfaction for thirty days and be unsatisfactory afterward, and for this reason we guarantee to give you satisfaction always.

If we do not give you a good vehicle we know you will not be satisfied, and such being the case you will probably buy any other merchandise you need from some other concern. Primarily we want you to be satisfied; we want to retain you as a regular customer, and it is our intention that every vehicle we ship out shall give such service and be of such value that you will remain a satisfied customer.

We intend to accomplish this end by guaranteeing to keep you satisfied with your vehicle. We do not limit our responsibility to thirty days, or to one, two or three years. We know that our vehicles are being made in the largest and best equipped vehicle factory in the world; we know that the materials and workmanship are carefully inspected and we believe no better vehicles are being built today than those being turned out of our factory at Evansville, Indiana. They are honest vehicles, built according to the most improved methods, and we believe in them. If you have one of our vehicles and something goes wrong, it will not be because we did not use every effort to make it right at the factory. In buying one of our vehicles you are contracting to get good merchandise, just as we describe it, and if at any time something does give out, then it is not your fault, but our fault and the fault of the factory. We honestly believe that, allowing for natural wear and tear, our vehicles will last as long and give just as good satisfaction as any vehicle made, regardless of price, and we will obligate ourselves to replace free of expense any part which gives out because of defect in material or workmanship, and to make good at any time during the natural lifetime of the vehicle anything not absolutely right.

If you buy a vehicle from us and decide within thirty days that you do not want to keep it you will have no trouble in returning it to us. We will make it easy for you and will give you back all your money and any freight charges you paid. If you have a complaint to offer at any time during the natural lifetime of the vehicle we will use our best effort to make a most liberal, honest and fair adjustment for you.

We want you to be satisfied and if you buy a vehicle from us we are going to use every effort within our power to see that you are satisfied. We do not believe that there is any other concern in the country that is willing to offer you a proposition of this kind.

Our method of selling direct to the consumer from the factory enables the purchaser of one of our vehicles to save all dealers' and jobbers' commissions, and our big vehicle factory enables us to practice all economies in turning out vehicles and to produce them at the lowest possible cost. We honestly believe we are selling vehicles $15.00 to $20.00 cheaper than the same grade of vehicles can be bought anywhere else, either from a dealer or from other concerns selling vehicles by mail. We have investigated the situation thoroughly and this is our conclusion.

We guarantee a saving of from $15.00 to $20.00 on any vehicle we list and we agree to keep you satisfied during the natural lifetime of the vehicle. Give us a trial and we will use our very best efforts to make you a satisfied customer.

This Guarantee Applies on All Vehicles We Sell, Including Business Wagons and Farm Wagons.

HOW WE MAKE THE PRICE

FIRST—By eliminating all dealers' and jobbers' profits, which ordinarily amount to at least $20.00 on a vehicle.

SECOND—We own and operate the largest vehicle factory in the world. This factory manufactures the vehicle complete. We do not assemble vehicles, that is, buy the parts from other concerns and put them together at our factory, but make the vehicle complete, including the body, wheels, seats and top, in our own factory. We save all the profits that are ordinarily paid to outside body, seat and wheel manufacturers. Because of the fact that we make everything ourselves and make 50,000 vehicles a year, **we are able to manufacture any vehicle at least $4.00 cheaper than any other factory in the United States.**

THIRD—We sell more vehicles from this catalog and our special Vehicle Catalog than are sold by any other concern selling vehicles by mail; **thus we are able and do figure a much smaller profit on each vehicle.** The advantage we enjoy, therefore, because of our enormous manufacturing facilities, our enormous sales, together with our method of selling direct from the manufacturer to the consumer, all come to you in the extremely low prices which we quote on these high grade vehicles.

We guarantee that you cannot procure the equal of our vehicles for less than $20.00 to $30.00 in advance of our price and, greatest of all, we guarantee to keep you satisfied. A high grade vehicle, big saving and satisfaction always. What more can you ask?

CENTER BEARING BODY LOOP.

We have used this style body loop on our vehicles for a great number of years with the greatest success. We wish you to note carefully the particular points we illustrate in this picture. By our construction the spring can be attached in the center, giving a perfect down pull from the center, which is much stronger than the old style weak construction shown in the picture below. Our construction gives a much easier action than the old style adjustment, is stronger and effects the perfect down pull all springs should have. There is no side pull, no twist nor strain in any weak places. You obtain the correct action and the efficiency of the spring is increased at least 50 per cent. This is one of the reasons why our Solid Comfort Vehicles are considered the easiest riding and lightest running vehicles made.

BRADLEY SHAFT COUPLERS.

Without a doubt the Bradley Shaft Couplers are the best shaft couplers made. You will find them on all high grade work. We furnish them on nearly all our vehicles without extra charge. Where they are not specified, we can furnish Bradley couplers in place of anti-rattlers for 60 cents extra.

W. S. SHULER'S PATENT ROLLER BEARING SPRING.

We can furnish this roller bearing spring in place of the regular end springs for 60 cents extra when so ordered, with any of our buggies or runabouts. This spring is easy riding and guaranteed to last as long as the buggy. Everybody knows what a Shuler Roller Bearing Spring is. If wanted be sure to specify when you order that you want "Shuler Patent Spring."

OUR LARGE FULL BEARING FIFTH WHEEL.

This illustration shows the fifth wheel we furnish with our Solid Comfort Vehicles. It is absolutely the strongest, most substantial and most graceful fifth wheel ever put on a buggy. It is noiseless and practically unbreakable. The king bolt is in the rear of the axle, which is a most desirable feature and which is found only on the highest grade vehicles made.

OUR ACME STORM SHIELD.

SHIPPED FROM CHICAGO OR FACTORY.

This storm shield is the best of its kind on the market and cannot be duplicated anywhere at our price. It is extremely popular with our trade and almost every customer who orders a buggy purchases one of these storm shields to be used with it. It will fit perfectly, is neat, and gives absolute protection from cold biting winds as well as rains and blizzards. It can be easily attached or detached without the use of tools. It is fitted with large celluloid window, permitting an unobstructed view of the road. It is made of good heavy rubber and can be attached or detached in less than a minute and folded so that it can be carried under the seat. We can furnish this storm shield on any of our top buggies for $1.95 extra. If you do not order a buggy at the same time, be sure to state width of dash and distance between bow sockets. **When you order be sure to give this catalog number.**

No. 11F21 Acme Storm Shield. Price.$1.95

DIAMOND GUARANTEED RUBBER TIRES.

SOLID RUBBER TIRE

CUSHION RUBBER TIRE

We are furnishing this year the Famous Diamond Solid Rubber Tires. The Diamond tire is recognized as being one of the best automobile tires, both in the solid and pneumatic styles. We consider it to be one of the very best rubber tires made, and place on it our strongest guarantee.

DIAMOND GUARANTEED RUBBER TIRES.

¾-inch solid rubber tires in place of steel tires. Price..	$10.80
⅞-inch solid rubber tires in place of steel tires. Price..	12.10
1-inch solid rubber tires in place of steel tires. Price..	15.20

GUARANTEED CUSHION RUBBER TIRES.

1-inch cushion rubber tires in place of steel tires. Price.	$15.20
1⅛-inch cushion rubber tires in place of steel tires. Price.	18.90

UNGUARANTEED SOLID RUBBER TIRES.

Some few of our customers desire to use a cheap tire, and for this reason we furnish an unguaranteed rubber tire at the prices quoted below. Our Diamond Guaranteed Rubber Tires will outwear three sets of unguaranteed tires.

⅞-inch unguaranteed tires	$ 9.15
1-inch unguaranteed tires	12.70

BEST POLE MADE.

We are particularly anxious that you note the ironing of this pole. It is the ironed pole made. You positively cannot obtain a pole as neat in appearance and as well ironed anywhere, regardless of the price you pay. We charge more for this high grade pole than other firms charge for a cheap grade. It is made of carefully selected stock. The whiffletrees and neckyoke are made of the same grade material. We furnish this pole complete with whiffletrees, neckyoke, stay straps, etc., exactly as shown in illustration, at an extra cost of $4.65. If desired in place of shafts the extra charge is $2.00.

TRIPLE BRACED SHAFTS.

The shafts we furnish are made of the very best material and by our method of ironing are without a doubt the strongest shafts on the market. They are triple braced as you will see in the illustration. An angle iron on the under side and a T iron on the upper side make an absolutely solid connection between the crossbar and shafts; it is just as though the crossbar and shafts were made of one piece. You will note the shaft eyes form a complete brace at the bend of the shaft, taking all strain from the bend which is a weak point in most shafts. Our shafts are so perfectly ironed, there is not a single weak point. All our shaft braces are made of Norway iron which, while strong, presents a very neat appearance. We paint and trim our shafts in the best possible manner, thus giving you a handsome strong pair of shafts.

STAPLE & HANFO[illegible] OPEN COIL SPRING CUSHION.

This illustration shows the [illegible] cushion used on our vehicles [illegible] scribed, which consists of a [illegible] frame fitted with Staple & Hanford silient Coil Springs so arranged [illegible] they cannot become displaced [illegible] ing the cushion to sink in [illegible] Our spring cushions are built [illegible] and are fitted with more springs [illegible] the majority of cushions built.

SCREWED RIM WHEELS.

This illustration shows you the advantage of screwed rim wheels such as are furnished on all our vehicles, as you will note in the descriptions under the vehicles. There is a screw on each side of the spoke which prevents the rim from splitting, which is a most desirable feature; screwed rim wheels will easily outlast any other kind.

CHANGES THAT CAN BE MADE.

No changes can be made on vehicles which we ship from our warehouses. [illegible] furnished only as described. We can, however, furnish the same styles of vehicles we have in the warehouses direct from the factory, with any of the changes quoted. Also can make these changes on any other vehicle listed in this catalog. When shipped is made from the factory you pay freight charges from Evansville, Ind.

RUBBER TIRES—See prices on this page.

Unless specified and allowances made in order for changes desired, the vehicles will be shipped as described under illustration.

HOW TO ORDER.

Just give the catalog number of vehicle and price. If any changes are desired, state them in full, being sure to send us a remittance to cover cost of any changes which are not made free of charge. Above you will see what changes we can make on any of our vehicles. Some, you observe, can be made at no extra charge, while for others we are obliged to make a small charge to cover the actual factory cost. Be sure to [illegible] this amount if you order the vehicle with any changes which are not free. We cannot cover all changes on this page, but under the illustration [illegible] each vehicle you will see any special changes that can be made.

Metal Twin Automobile Seat Runabo

This runabout is the latest and most up to date style for 1911. We are equipping it with our new design metal auto seat, the same kind used on the highest grade automobiles. In making these seats we use the same gauge and quality of sheet metal, and shape the seats under the same hydraulic presses, as are used in the manufacture of the high grade automobile seats. They will take a much better finish, will last longer and are in every way superior to the wood seats formerly furnished. They cannot open up at the corners, and we guarantee to replace any metal seat that wears out or is defective in any way. They are upholstered exactly the same as wood seats, and except for the extra fine finish and design they cannot be distinguished from wood seats. This is our highest grade runabout and is regularly furnished with wood spring bars and handsome patent leather wing dash.

Satisfaction Guaranteed Always. See Page 1207.

Most Popular Top Buggy Ever Built

SHIPPED FROM A CITY NEAR YOU

8,222 SOLD IN 1910

METAL TWIN AUTO SEAT BUGGY

ing the year 1910 we sold 8,222 of our Twin Auto Seat Buggies, making shipment direct from different cities throughout the country. This is more than has ever before been sold on one style top buggy by any vehicle concern.

IMMEDIATE SHIPMENT—FREIGHT CHARGES VERY SMALL

Our 1911 Metal Twin Auto Seat Buggy

Metal Twin Auto Seat Buggy, the Biggest Value Ever Offered by Any Vehicle Concern.

e the next two pages, 1214 to 1215, we illustrate and describe our 1911 Metal Twin Auto Seat Buggy, which is our 1911 design of the popular twin automobile seat buggy ever built. We carry these in stock in different cities throughout the country and can ship diately upon receipt of your order, so that you can be sure of get- the buggy within a very few days. No doubt you will find one these cities very close to you. This means that the freight charges be considerably less than they would be if shipment were made from the factory.

About the Price.

During the year 1910 we built and sold more of the Twin Auto Seat ries than we figured on building at the beginning of the year, con- ently we were able to make some saving in the cost of building This year we are building 15,000 of this one buggy alone, and been able to figure our costs on this basis. This means that we iving you bigger value than ever, because we have been able to additional savings in placing specifications for this immense num- of buggies.

The cost of raw materials entering into the construction of a top 17 has advanced almost 5 per cent since January 1, 1910. That 19 say we are paying about 5 per cent more for the raw mate- entering into the construction of our vehicles than we did one year Most concerns are paying a bigger increase, because they cannot in the quantities that we buy at our factory at Evansville, Ind. factory is the largest in the world, and as all materials are bought arge quantities, we can get better prices and thereby make you addi- l savings. We sold this buggy last year for $59.95. A 5 per cent ease on this price would be about $3.00. In addition to this $3.00 cost, we are spending at least $3.00 more for improvements on this 17, making a total increase in cost of about $6.00; but because of the we are able to make in placing specifications for 15,000 of this style top buggy, we are able to furnish it with all its improved tures, with the high grade metal seat, for only $61.75, and at that it represents the biggest buggy value ever offered by any concern, use the price is figured on the cost of building it in the biggest le factory in the world and on building more of this one style buggy was ever built of any one style in the history of the vehicle business. buggy of equal value from any other source would cost you at $85.00.

1911 Improvements.

METAL TWIN AUTOMOBILE SEAT—This is the biggest advance in le construction for the last fifteen years. The metal seat which we made of the same gauge sheet metal and is shaped and bent under same hydraulic presses as are the seats used on Packard, Pierce- and other high grade automobiles. Surely if a metal seat is able on one of these highest grade automobiles it must add to the rance and durability of a first class buggy. The metal seat which are using on this buggy is by far the handsomest design on the It is a much prettier seat than it is possible to make a wood and it is all shaped and bent under many tons weight in hydraulic Each seat has a solid wood frame, and before being painted metal is aluminized to prevent its rusting and to hold the paint. We thus able to get a much smoother finish and a higher gloss than it possible to get on the ordinary wood seat. In other respects, you not tell the seat from a wood seat, except by its very handsome and higher gloss finish, or by examining its construction. All are clinched, welded and brazed, and it is impossible for them come apart. You will never experience any trouble with one of metal seats opening at the corners or in any other place.

Our Guarantee on Our Metal Seat.

We will replace without charge and expense any metal seat on this which does not give entire satisfaction in every respect. We it to be far superior to the ordinary wood seat, and we back this with our strongest guarantee.

-INCH WROUGHT FIFTH WHEEL AND FULL WROUGHT GEAR his is one of our noted improvements for 1911, making this gear in every respect to the highest priced top buggies made.

-INCH FRENCH HEAD FRENCH POINT SPRINGS—These are best buggy springs manufactured, made of the best oil tempered They are 37 inches long, which makes them especially easy riding. are equal to the springs used on the highest priced top buggies superior to those used on any other buggy offered at the price top buggy.

IMPROVED TOP—Our top this year is 4 inches longer and has quarters, making it equal in size and design to tops furnished highest grade highest priced top buggies. It is of the skeleton obile style with automobile back stays, which are sure to be for 1911, and the same style and design which is being furnished tically all the highest grade top buggies this season.

WHEELS, BODY AND SHAFTS—We will continue to use this year gh grade second growth hickory wheels and shafts and reinforced of our own manufacture, which gave absolute satisfaction during son of 1910. All shafts are made of the best grade hickory.

UPHOLSTERING—We furnish all of these buggies upholstered in genuine leather, the same as used on all high grade automobiles. You never saw a good automobile which was not upholstered in leather. Why then should a buggy which receives just as hard usage and which is exposed to the weather be upholstered in any material which is not just as durable? There is nothing so good as leather for the upholstering of a top buggy, and it is for this reason we use leather in upholstering every one of these warehouse buggies.

PAINTING—We give you your choice of carmine red or jet black gear. Last year we sold practically as many black gear buggies as we did red. A few years ago 90 per cent of the buggies sold had red gears, but black gears are fast becoming very popular, as was evidenced by our 1910 sales.

RUBBER TIRES—We can furnish this buggy with either steel or rubber tires, making shipment direct from any of the warehouses listed on the following pages.

Buggies Built for Different Sections.

Our experience in shipping Solid Comfort Vehicles to all sections of the United States has enabled us to build these warehouse buggies with specifications best suited to the particular territory in which each city is situated. For instance, the buggies we carry in stock at Kansas City are built with 23-inch bodies, ⅞-inch wheels, arched axles and four-bow tops. Now, these buggies would not be suitable for the territory surrounding Fargo, N. Dak., or St. Paul, Minn. The buggies best suited for these sections must be built with 25-inch bodies, extra wide seats and wide wheels, consequently you will find the buggies we carry in stock are built with 25-inch bodies and 1-inch wheels. We conform to the popular demand in all sections of the United States by carrying the buggies in warehouses at the different cities to meet the demands of the buyers in the surrounding territory.

We have studied every section of the United States, and you can depend on getting the buggy exactly suited to the needs of your section and one which will conform to the local demands. If you order it from the warehouse near you, you can depend on getting a buggy which is strictly up to date and just as stylish as the highest priced top buggy in your section; you can also depend on getting a buggy which is made of thoroughly high grade materials throughout, and you can figure on saving anywhere from $15.00 to $30.00.

Dealers' Prices.

Dealers get from $85.00 to $110.00 for buggies similar to our No. 11F720 Metal Twin Auto Seat Buggy, illustrated and described on the next page. If you do not find this to be true after you receive your buggy, you can return it and get your money and freight charges back.

Our Guarantee.

We have exhausted every effort known to modern vehicle building in making this buggy the biggest value ever offered. We have met the popular demand by furnishing it with the high grade metal twin automobile seat and skeleton top, and are using only high grade materials throughout in its construction. We are building so many of this one buggy that we are able to make a big saving in cost and to sell it to you at a price which cannot possibly be approached by any other concern. We know this buggy is absolutely the best buggy ever built and sold for this price. It is the biggest vehicle value ever offered.

Don't Fail to Read Our Satisfaction Guarantee on Page 1207.

If you will refer to our Satisfaction Guarantee on the first page of the vehicle section of this catalog, you will note that we agree to allow you to use any of our vehicles thirty days and to return it within that time if you are dissatisfied in any way, getting back the price and any freight charges you paid. Furthermore, we guarantee to keep you satisfied always. Surely if we did not know these buggies would give good service, if we did not know the materials being used in their construction, if we did not know they are of a handsome design that would surely please you we could not afford to make any such offer as to allow you to return the buggy after using it thirty days, or to guarantee to keep you satisfied during the life of the vehicle. We do know what the vehicle is made of; in our opinion it is the handsomest design on the market today, and we know it is by far the biggest value.

Our Advice.

While we list in this catalog a complete line of all style top buggies, any one of which is big value at the price quoted, all made in our vehicle factory at Evansville, Ind., the largest in the world, and while each one of them is quoted at a price far below that quoted by any other concern on an equal grade of work, and you can make a big saving by ordering any one of these styles, it is entirely with your interests in view that we urge you to select this No. 11F720 Top Buggy, as it is absolutely the biggest buggy value ever offered by any concern. Eight thousand two hundred and twenty-two were sold during 1910, and 15,000 are being built this year, over twice as many as any concern ever built of any one style top buggy. If you are familiar with factory methods you know that placing specifications for 15,000 buggies and buying the materials for this immense number of vehicles, all of one kind and style, mean an immense saving in expense and cost. All this saving has been figured in the price which we quote on this buggy, consequently we are selling it for $61.75, where ordinarily we would have to get at least $68.00 for it. Any other concern selling vehicles by mail would have to get at least $73.00 for it, and no dealer can sell you this buggy for less than $85.00 to $110.00.

You Cannot Buy a Better Buggy No Matter What Price You Pay.

Last year we shipped 3,222 of our Twin Auto Seat Buggies from our warehouses in different parts of the country. More than was ever sold of any one style by any vehicle concern. It was the most satisfactory vehicle we ever built. This year, however, we have gone the limit and have put every improvement on this buggy which would go to make it equal to any top buggy made. Look through the specifications of improvements given above and read carefully the detail description given below. We have been in the vehicle business for fifteen years, we own and operate the largest vehicle factory in the world, and with all our experience we do not know how we could build this buggy better.

We are proud of this new 1911 Metal Auto Seat Buggy. It is the handsomest buggy we ever sold, and there is not a better appearing or better made buggy on the market at any price. We are only able to make the astoundingly low price of $61.75 shipped from any of the warehouses named because we are building 15,000 of this one buggy and beca are building it in a factory which last year turned out 52,000 w more than was ever turned out in a year by any vehicle concern world. The economies which can be practiced in buying materia manufacturing, when turning out buggies in such quantities, great that we can actually build a vehicle of equal grade, sty finish, at this factory, $5.00 cheaper than it can be built at an factory in the country. This saving comes to you in addition big saving we make you because of our method of doing b cutting out the dealers' and jobbers' profits, and accepting ours much smaller percentage of profit than any other manufacturer ing to accept. You cannot possibly get a buggy anywhere approaching this buggy in style, finish and materials for less $85.00 at the very lowest, and most dealers will have to charge to $110.00 for a buggy of the same grade.

GENERAL DESCRIPTION OF OUR 1911 METAL AUTO SEAT BUGGY.

Be sure to refer to the detail specifications of this buggy in the warehouse under the name of the city nearest you.

SEAT—Metal automobile seat, made of the same gauge metal and in the same manner as the high grade automobile seats used on Packard, Pierce-Arrow, and other high grade automobiles. Back and sides have sunken panels, as shown in the small illustration on opposite page. The metal seat takes a much finer finish than the wood seat and is superior to it in every respect. The handsomest and most durable seat ever used by any manufacturer on a top buggy; corners are clinched, clamped and brazed, making it impossible for them to open. We guarantee this seat to give absolute service and satisfaction in every respect or we will replace it without any charge whatever. This seat is especially comfortable, measuring full 32½ inches across top of cushion and 17 inches deep. You never saw an automobile with a narrow seat. An automobile is made for comfort, why not so with a buggy? We are giving you a wide comfortable seat on this buggy.

UPHOLSTERING—High grade extra quality genuine leather; open box spring cushion; back is padded and tufted over coil springs, making it very easy and comfortable; seat ends padded and lined; brass buttons.

BODY—Highest grade buggy body; guaranteed to be equal to the best bodies furnished on the highest priced top buggies; panels are made of selected poplar and are convex, giving the swell effect so much admired in high grade top buggies. We build these bodies ourselves and know exactly what material is used; we guarantee them to give absolute satisfaction, and will replace any one which gives out because of defective material or workmanship. The sills are made of hardwood stock with watershed bead; corner posts, bottom boards and seat house are of hardwood, glued and screwed; body panels are glued, screwed and plugged to frame; seat risers are concave; three-prong steps.

TOP—Auto style skeleton top, same design as is being used on all high grade automobiles. Entire top is covered with Chase automobile leather, which is a special fabric similar to genuine leather, extensively used in automobile tops; absolutely waterproof; wood bows are cloth covered and top reinforced by straps on inside, as shown in small illustration. Top is extra long, being 4 inches longer than we furnished last year; has extra deep quarters, copied from the highest priced Eastern top buggies; extension joints; our own design shifting rail, which permits top being taken off in less than a minute's time; three or four bows, with black enameled bow sockets, according to the warehouse from which shipment is made; special auto style back stays; brass rim oval back curtain light; four roll-up straps; brass curtain fasteners; reti waterproof side curtains with large celluloid side lights.

GEAR—15-16-inch long distance true arch axles with wide bearing, fitted with full length hickory axle caps, sanded, and clipped to axles with Diamond clips; full wrought 12-i wheels, with wood head block, the best possible to buy; 37-inch head French point oil tempered elliptic end springs, easiest rid best quality springs possible to buy, three-plate front and fo rear. (These springs are the same as those used on the highest top buggies; note that other buggies are furnished with 35-in 36-inch springs.) Springs are clipped to our celebrated center body loops, front and rear, guaranteed never to break. Double hickory reaches, ironed full length; heavy wrought iron braces; est and most substantial gear possible to manufacture.

WHEELS—Selected second growth hickory; our own manuf guaranteed to be equal to wheels used on the best grade buggi will replace, without expense to you, any wheel which gives does not give perfect service; ⅞-inch or 1-inch screwed rims ing to warehouse from which shipment is made; ⅞-inch rim 1x¼-inch oval edge tires; 1-inch rims have 1⅛x¼-inch oval ed projecting over felloe to protect it; tires bolted to rims between boxes are set true to rims by hydraulic pressure. Wheels 3 front and 43 inches rear high. All wheels guaranteed to tra run true.

SHAFTS—Highest grade selected second growth hickory; trimmed with round straps, patches on shafts and crossbar, and patent leather points. (Note, other buggies are furnished with or 30-inch patent leather points.) The 36-inch points extend the holdback strap and protect the paint and give the shafts fine appearance. Bradley quick shifting shaft couplers.

PAINTING—Body, black; gear, carmine red or black. Be sure state which you want. These buggies are painted in the best manner, and the paint is guaranteed in every respect. Our fi equal to that on the highest class top buggies.

TRACK—4 feet 8 inches narrow or 5 feet 2 inches wide, acco to the warehouse from which shipment is made. (See below.)

SUNDRIES—Braced padded patent leather wing dash with line rail; drill fiber boot; full length automobile rubber mat; large waterproof plaid back apron.

Net weight, about 360 pounds. Shipping weight, crated und inches, about 500 pounds.

Please note that we can furnish either carmine red or black either steel tires or rubber tires, and unless otherwise ordered w furnish steel tires and carmine red gear.

e Opposite Page for Description and Price.

HIGHEST GRADE

Our Metal Auto Seat is made of the same materials and in the same way as the metal seats used on the highest priced automobiles.

This metal seat is much superior in *appearance* and *finish* to any wood seat ever built and will last twice as long. We guarantee it for life and will replace free any unsatisfactory seat.

Rear view, showing the back of the handsome sunken panel metal auto seat. Note the length of the top.

Front view, with one side curtain on, showing large celluloid light in side curtain, also showing large beveled light in back curtain, with four roll-up straps. Please also note the handsome appearance of our center bearing body loops and compare this loop with the round loops used by other manufacturers.

Watson Farm Wagons

Standard Watson Wagons shipped from city near you and sold at prices less than jobbers' prices for equal grade wagons to dealers in these same cities. The wagons we keep in stock in the several cities listed below are built for use in the surrounding country. The specifications are standard. If you order one of these wagons from us you will get a wagon which is standard for your section; that is, has the correct height of wheels, correct width of tires, box, etc.

Guaranteed Equal to Schuttler, Bain, Studebaker, Turnbull, Birdsall or Any Other Recognized High Grade Wagon

GUARANTEE

We will replace at any time any part which gives out because of defective material or workmanship, and we furthermore guarantee to keep you always satisfied. See our satisfaction guarantee on page 1207.

SEE NEXT PAGE FOR DESCRIPTION OF WATSON WAGONS AND PRICES ON OTHER STYLES AND SIZES SHIPPED DIRECT FROM FACTORY.

Watson Farm Wagons

Shipped From a City Near You

IG SAVING IN FREIGHT CHARGES — DELIVERY IN A FEW DAYS

We have made arrangements whereby we now are able to ship farm wagons from different cities throughout the United States. As we ship all wagons in carload from the factory to these cities, we are able to make you a considerable saving in freight charges, and to make immediate shipment. The wagons we have in stock in different cities are built according to the prevailing specifications in the surrounding territory. For instance, the specifications of the wagon we keep in stock in Kansas City, agree with those listed by the Wagon Builders' National Association as being standard for Kansas City territory. The same applies to the specifications of the wagons in the other cities. If you order one of these wagons shipped from a city near you, you can be assured that you will get a wagon which will be standard for your territory and which will be the same specifications as other high grade wagons sold by your dealers. **Refer to the opposite page the exact specifications of the wagons in the different cities.** We cannot change these specifications and make shipment from the cities listed. If you want a wagon built with other specifications, it will be necessary for you to order it from this page and have shipment made direct from our factory in Kentucky (across the river from Evansville, Ind.), from which point you will pay the freight charges.

ABOUT THE PRICE.

We have thoroughly investigated the prices paid for other high grade wagons in the states and territories listed on the opposite page, and have found that the prices which we are asking are almost exactly the same as those paid the jobber by the dealer for standard grade wagons, with the same equipment. We can, therefore, guarantee you a saving of the dealers' profit and expense, and can give you a wagon which we guarantee to be equal to the Schuttler, Studebaker, Fish, Bain, Turnbull, or any other high grade wagon.

TATEMENT BY THE SUPERINTENDENT OF OUR FARM WAGON FACTORY.

"I am building a wagon just as good as a Schuttler, a Studebaker, a Bain, a Turnbull, a Birdsall, or any other high grade wagon. I buy the best materials that can be found and use the best automatic labor saving machinery. I have the highest class workmen that can be hired, and I turn out from this factory wagons that are second to none, regardless of name, make or price."

UR GUARANTEE AND THIRTY DAYS' TRIAL OFFER.

We will be very glad to accept your order for any wagon, any of the wagons to be shipped from the cities listed on the opposite page, or any of the wagons listed below, which we shall ship from our factory, and make shipment with the understanding that you can use the wagon thirty days, compare it with any Schuttler, Studebaker, Turnbull, Bain, Birdsall or other high grade wagons used in your section, and if at any time you are in any way dissatisfied or do not find the wagon is all that we claim for it, you can return it to us and get back the same price, together with the freight which you have paid.

Square Hound Drop Tongue Front Gear Used Regularly On All Wagons Unless Otherwise Ordered.

If you want a stiff tongue front gear on a wagon shipped from the factory, say so on the order and we will furnish it without extra charge.

CONSTRUCTION OF WATSON WAGONS.

WHEELS—Highest grade wheels, oak spokes and oak rims, thoroughly seasoned; best quality New England birch hubs. Tires are made of the best grade of steel and are of standard width and thickness, properly set according to the most modern methods. The tires are bored true to the rims and all boxings are set in red lead under hydraulic pressure. Rims are single riveted; tires are clipped and bolted to rims. Wheels dipped in boiling linseed oil before being ironed. The best materials that can be bought, the highest grade workmanship and the latest automatic machinery are used in building these wheels. We guarantee them to be equal to those furnished on any wagon. The tires never come loose and the hubs will not check or split.

AXLES—Second growth bone dry hickory, the best that money can buy. Each axle is turned in automatic machinery to fit the skeins which are used on it, making an exceptionally tight fit, preventing and insuring against moisture getting between the skein and axle. Watson steel skeins have a solid extension back of the collar, which keeps the grease from working out on the axle. All skeins have extra large bells and there is more room for the wood axle left inside the skeins than in any other skeins on the market. The skeins are made of the very best cast iron and plate steel. They are set in red lead under hydraulic pressure and are guaranteed not to come loose. They are level bearing so that the weight of the load is distributed the entire length of the skein. All axles are dipped in boiling linseed oil before being ironed.

GEAR—All gear woods, including reaches, bolsters and hounds, are made of thoroughly seasoned, bone dry, second growth oak, the best that money can buy. Every wood part is dipped in boiling linseed oil before being ironed. Only highest grade of steel and iron used in the ironing of the Watson gears. The quality of the material used and the ironing of these gears are ironed is the same as the other high grade standard wagons, and guaranteed by us to be the best. We furnish the square hound drop tongue front gear on all wagons unless otherwise specified. The square hound gear is superior to the bent wood hound, because it does not break as easily; and if it does become broken it can be repaired by any ordinary blacksmith, whereas, if a bent wood hound breaks, it is necessary to order a new one from the factory. Some sections of the country demand the stiff tongue, and for these sections we furnish the coach hound stiff tongue front gear without extra charge, if specified on the order (except when shipment is made from one of the warehouses. In the warehouses we keep only square hound drop tongue front gear wagons).

If you want a stiff tongue front gear on a wagon shipped from the factory, say so on the order and we will furnish it without extra charge.

BOX—Selected yellow pine floor, grooved and matched; genuine poplar sides, thoroughly air seasoned and guaranteed not to warp, check or split. Stake and strap plates on outside of box; double bottom over bolsters; bolster cleat foot board; box fastener on each side, and an anti-spreader chain. Box is guaranteed to be equal to any farm wagon box made.

PAINTING—Watson Wagons are painted in the best possible manner with priming lead, color, color varnish and finishing varnish. The design is as illustrated, the boxes being painted green, with black and red stripes. The gears are painted red with black stripes, all highly varnished. There is not a wagon on the market painted better than the Watson.

BRAND—The brand WATSON, in the form of a very handsome transfer, appears on the side of each wagon box. If, however, you do not want the name to appear on the box, please so state in your order and we will leave off the transfer.

MAKE THE COMPARISON.

We have made the comparison between our Watson Wagons and other high grade wagons, such as the Schuttler, Studebaker, Bain, Turnbull and Birdsall, and we want you to do the same. There is not a better equipped factory in the country for turning out high grade farm wagons than the factory in which our wagons are being made. We have gone through nearly all of the big farm wagon factories in the country, and we have yet to find a factory which has a better stock of well seasoned materials than the factory which is building wagons for us. After all, this is the important thing. A wagon built of unseasoned and green materials will not last and give good service regardless of how high class the workmanship is or how good it is made. We know the class of material that is being used in the Watson Farm Wagon; it is the best obtainable in the United States. It has been seasoning for three to five years, and we guarantee every piece of wood or lumber used in the construction of a Watson Wagon to be thoroughly seasoned and absolutely the highest quality. We back this up with our guarantee of satisfaction (see page 1). If any part of the wagon does not give service or satisfaction after you have used it one, two, three or any number of years; if the material proves that it is not the very best and that it is not seasoned thoroughly, we agree to adjust any complaint which you have to offer. The Watson Wagon is equal to any wagon made; we know it, we guarantee it and we stand back of this guarantee.

We want you to compare the Watson Wagon with any other wagon built. We are not afraid of this comparison; on the other hand, we welcome it. When you honestly know that you have a wagon just as good as any other wagon made, you are not afraid of a fair comparison.

We could build a farm wagon and sell it at a great deal lower price, but we cannot build a wagon like the Watson Wagon, equal to the Schuttler, the Studebaker, the Bain, the Turnbull and the Birdsall, and sell it any cheaper than we have listed in this catalog, without losing money. We know that we can make you a saving at the prices which we have quoted, and although our profit is very small, we are satisfied with it, because we know you will be pleased with the wagon and that it will be a big advertisement, not only for the sale of other wagons, but for any other goods which we sell.

HOW TO ORDER.

If you live near one of the cities listed on the opposite page and want shipment made from one of these cities, simply send your order to Sears, Roebuck and Co., Chicago, Ill., and state you want the catalog number given in the space underneath the name of the city, remit the price quoted in this space, and the wagon will be shipped at once from the warehouse in the city named.

If you live near the factory in Kentucky, or if you want a wagon built according to different specifications than those kept in stock in the different cities, make your selection from the list given below. Give us the catalog number, state what extras, if any, are wanted, and send us a remittance to cover the catalog price of the wagon, and for any extras you want. **Be sure to state the width of track,** that is, the distance between the wheels on the ground, **and what height of wheels you want.** Low wheels are 3 feet 4 inches front and 3 feet 8 inches rear; high wheels are 3 feet 8 inches front and 4 feet 4 inches rear. We advise you to find out what track and what height of wheels are used on other wagons in your section, and to order the same. Unless otherwise ordered, we always furnish the square hound drop tongue front gear, as wagon manufacturers have agreed to make this the standard front gear. We can, however, when specified on the order, furnish without extra charge, the bent wood round hound drop tongue or the coach hound stiff tongue front gear.

HIGH GRADE STORM BUGGY $65

We received so many orders and requests for storm buggies last year that we made connection with the manufacturers of the highest grade patented storm top built, and we are now furnishing one of our standard buggies equipped with this top at the remarkably low price of $69.95. At this price we guarantee the storm buggy to be equal to those sold by others for $90.00 to $120.00. These storm buggies find great favor with all who are compelled to be out in the cold and raw fall and winter weather. They are an absolute protection from the wind and cold. They are practically airtight, except for the admission of such air as is needed for ventilation, but when desired the front window and back curtain can be raised in a moment's time, transforming the storm buggy into a fine open top buggy.

Guaranteed Forever. See page 1207.

No. 11F724

DESCRIPTION.

SEAT—Regular buggy style, solid panel back; 30½ inches across top of cushion.

UPHOLSTERING—Moroccoline; open box spring cushion and spring back; seat ends padded and lined.

TOP—Hood and quarters, rubber duck; roof, heavy rubber covered sail duck, long English leather grain; weather flaps and rear curtain, rubber duck; door curtains, heavy rubber covered green back sail duck; French gelatine light, 12x20 inches, in each door curtain; panel below front window and panels below side windows, heavy rubber covered sail duck, hair grained; green cloth head lining; glass in front and side windows, clear No. AA first quality, double strength; doors on automatic rollers open instantly and are not in the way of the wheels. This top is of the most approved type and is made by the same manufacturers who furnish them for practically all of the high grade vehicle builders. The top we use is the best quality top made.

Top is easily removed, making open buggy.

Shows buggy with doors open.

Watson Convertible Wagon Box, $29

PATENTED

Watson Convertible Wagon Box as a grain tight wagon box.

For shoveling off corn. Can be let down even with box or stopped at any angle.

Comstock Patent Endgate for quickly unloading grain at elevator.

Watson Convertible Wagon Box ready for use as hay rack. Greater capacity than ordinary hay rack.

Watson Convertible Wagon Bed, adjusted for use as hog and stock rack. This is done by simply taking out every other board in the side of box, which is entirely adjustable, and can be changed from grain box to stock rack in only a few moments' time. Note the lowered endgate, which facilitates unloading of stock at the live stock chutes.

30 Days' Trial ::

GUARANTEED WITHOUT TIME LIMIT

Money and Freight Back If Not Satisfied

Watson Convertible Wagon Box as a hay rack, with extra 18-inch sides added.

Both sides lowered to first notch, increasing the capacity 20 per cent. Grain shields are furnished for the ends, making box absolutely grain tight and giving it as much capacity as a heavy grain tank wagon.

Watson Convertible Wagon Box with one side lowered, a great convenience in husking corn, loading wood, crates, potatoes, etc.

Watson Convertible Wagon Box with sides removed, making a flat bottom truck on which to haul baled hay, cotton bales, milk cans, etc.

Watson Convertible Wagon Box as a stock rack, with extra 18-inch sides added.

Eight Wagons in O

Sold at a price a little more than the pr one first class wagon box. Quickly conv to the following uses.

1—Grain Tight Box.
2—Hay Rack.
3—Stock Rack.
4—Shoveling Board Box.

ARNESS OF QUALITY The True Standard of Value Is QUALITY

This is the idea upon which our great harness business has been built. We build our harness T and figure the price AFTERWARD. We offer you quality we can guarantee. Our low naturally follow from our large sales and the fact that our prices are based on the actual of material at the tanneries and the cost of labor at the factory with our ONE profit added. system ABSOLUTELY GUARANTEES you the BIGGEST VALUE your money can buy.

PECIAL BRAND DUNDEE OAK LEATHER. We make it a point to be sure of the the leather in all our harness and saddles. The hides are selected with great who have spent their lives in judging hides. Our leather is made from the packers' steer hides which make plump, strong harness leather. The hides are the old fashioned way—bark tannage. They are thoroughly tanned, through and It takes five months to tan each side to insure strong, plump No. 1 harness leather. anted one of the best grades of harness leather on the market. There are no s better.

RIMMINGS. On our nickel trimmed harness we use solid nickel German silver hooks and terrets. The lines will not wear these terrets yellow the cheap composition nickel plated terrets. On our imitation rubber trimmed use genuine rubber hooks and terrets and the lines will not wear through to the first two or three weeks as they do in the cheap iron composition plated hooks While these better materials cost a little more, they add so much to the value ring quality of your harness that their use is a real saving. It is false economy cheaper materials.

ORKMANSHIP. Our harness goods represent the most skilled workmanship in the harness trade. The work of the leading and factories in the country is offered to you in this catalog. The harness we ill prove to you, upon your comparing it with any other harness you can buy at nywhere else, that it is the best made on the market. Our guarantee gives you rtunity to test and prove these statements.

OUR GUARANTEE. We guarantee, which means we agree to replace any part of a harness that gives out on account of the quality of the leather or workmanship. With proper care our harness will outwear any other harness made. If any part gives out because of a poor piece of leather or workmanship, we will replace the part free of charge if you return the defective part. The natural wear of a harness in everyday use will, of course, sooner or later wear out the breast straps, martingales, hame straps, bridles, lines or other parts, but that does not indicate poor quality. These parts cannot be made of material that will not wear out in time. We accept your order with the understanding and agreement that you may compare the harness or saddle you buy from us with the harness or saddle you can get from any other source, and if you do not find ours by far the greatest value, a better harness or saddle in every particular than you can get for the same price from anyone else, if it is not perfectly satisfactory and you decide you do not want to keep it, do not use the harness or saddle, but return it to us and we will cheerfully return to you the price and any transportation charges you paid.

TO HARNESS DEALERS, LIVERYMEN and everyone interested in harness and harness supplies. We invite you to compare our prices with what you have been paying for goods of equal quality elsewhere. We list many goods that you can buy from us at less money than you would pay jobbers or wholesalers. Look carefully over our complete line of blankets, fly nets, dusters, robes, saddlery hardware, etc. Nowhere else will you find as complete an assortment and nowhere else can you match our low prices. Remember, our standard of value is quality. If quality is sacrificed to make a low price, the goods are dear at any price.

EXTRAS. Russet hand parts on any harness over $10.00, 25 cents extra. Buckles on crupper on single harness, 15 cents extra; on double harness, 30 cents extra. Old style double bellyband on harness over $10.00, 25 cents extra.

$16.87 NICKEL "Longfellow" Single Strap Buggy Harness. $17.69 RUBBER $17.95 GERMAN SILVER

The biggest value that was ever offered for $16.87, $17.69 and $17.95.

BRIDLE—Boulevard style; ⅝-inch box loop cheeks with high grade boulevard patent leather blind; extended lap and loop stitched in front of the buckle; double and stitched front; ½-inch overcheck with nose band, to buckle in the overcheck bit. We furnish our heavy 1½-inch neck halter with this harness to hitch your horse. Open bridle, if wanted.

LINES—The best single strap driving lines we can make with 1-inch fronts, with spring billet to buckle in the bit and 1⅛-inch hand parts sewed on. All black harness leather lines or full russet leather lines.

BREAST COLLAR—Made of very heaviest Dundee oak harness leather, cut V shape so as not to choke the horse, smooth round edge finish. Traces are cut 6 feet 6 inches long, 1¼ inches wide, double and stitched at the back end, with three holes to hitch to the singletree, scalloped point stitched to the breast collar, with box loop lead up and single neck strap. The point on the trace is raised and stitched so that the point of the shaft does not wear on the stitching. The point of the trace is lapped on the breast collar about 10 inches, making traces and breast collar about 86 inches from center of breast collar to the end of trace.

BREECHING—1¾-inch single strap harness leather body, round edge finish, the best Dundee oak leather. Body is made up about 3 feet 5 inches long, 1¼-inch scalloped and raised layer stitched on, with ½-inch double and stitched breeching brace, ¾-inch box loop lead up and ¾-inch single strap; ⅞-inch side straps to wrap around the shafts. Turnback is scalloped and stitched with hip strap running through, heavy round crupper sewed on, or will give you a turnback with crupper to buckle on. We will give you your choice.

GIG SADDLE—We give you your choice between the Berlin Full Padded Patent Leather Saddle, or the Dresden Single Strap Gig Saddle with skirt and billet in one piece.

TRIMMINGS—With each number we state the kind of trimming, and style of saddle and bellyband. Kindly state your preference plainly in your order.

1.70 "Garrison" Double Farm Harness. $42.14

CH TRACES — 3½-INCH TRACES

This trace used in No. 10F47641.

The practical harness to buy in this style for teaming or farming work is No. 10F47631 at $41.70. Note, also, the heavy sizes, but the 1½-inch trace is the popular harness.

We will sell you the complete harness or any of the parts at the prices quoted in the table below. When ordering be sure to give the catalog number of the harness or parts you want and mention parts wanted when ordering only parts. The hip and back straps are spotted on one side.

NOTE THE CHANGES. The No. 10F47631 harness is made with 1½-inch traces and 1-inch breeching. The No. 10F47635 is made with 1¾-inch traces and 1-inch breeching. The No. 10F47637 is made with 3½-inch single strap traces running to the hames and 1-inch breeching. The No. 10F47639 is made with 1¾-inch traces, 1⅛-inch by 20-foot lines, 1¼-inch heavy breeching, 1¾-inch breast straps and martingales. The No. 10F47641 is made with 3½-inch single strap traces running to the hames, 1¼-inch breeching, 1¾-inch breast straps and martingales and 1⅛x20-foot lines.

Weight of harness, boxed for shipment, about 90 pounds.

If you want the harness without some of the parts, subtract the price of such part from the price of the harness, and this will tell you how much to send for the balance of the harness you want.

SADDLES

We guarantee to furnish you a better saddle for less money than you can possibly get elsewhere. Our saddles are strictly high class, thoroughly well made, guaranteed in every way and our prices are lower than the wholesalers' or jobbers', very much lower than the retail dealers' prices. Our line of stock saddles is especially adapted for Western and Southwestern trade and all parts of the United States where they use heavy stock saddles; they are the strongest and handsomest saddles it is possible to produce.

OUR STOCK SADDLE TREES

are guaranteed against breaking. If [illegible] should break in roping cattle or [illegible] work, you can send the saddle back to us and we will replace it with a new tree [illegible] any expense to you and pay the transportation charges both ways or we will send you [illegible] saddle. We know that the trees we use in our stock saddles are built to last and [illegible] amount of hard usage and we therefore positively guarantee them against breaking.

HUMANE FEED BAG

$1.25

Saves Its Cost in Thirty Days.

Stop Wasting Grain. Don't Smother Your Horse.

No. 10F5697 A bag that allows the horse to enjoy the same amount of feed every day. With the old style bag the horse is underfed because he wastes so much feed. Grain under your horse's feet means money thrown in the street. This bag costs no more than the ordinary bag, is easy to fill and impossible to spill. If you drop 5 cents a day through a hole in your pocket, you would soon get a new pocket. If your horse wastes 5 cents' worth of grain every day at a feed, in sixty days he has wasted twice the cost of the bag. Shipping weight, about 30 ounces. Price, each.....$1.25

Dundee Oak Williams' Special Made Two-Horse Lines. Three-Row Stitching in Each Lap.

$3.93 $4.17 $4.41 $4.64

These lines are made out of the very best selected Dundee oak line leather. The straps are cut extra heavy. The laps are sewed with heavy thread three-row stitching in each lap. Roller buckles and leather loops at billets, round center bar buckles will not catch in fly net. Positively the best team lines on the market. The weight of stock used in these lines and being made full length and not cut short as the ordinary lines are, make them the best lines you can buy. Made in two lengths only, 18 and 20 feet, 1 inch and 1⅛ inches wide and measuring full length, not 8 or 10 inches short as most all lines are. Remember, these are not the cheap light lines, but are extra heavy and the best that can be made.

Full Kip Leather Farm Collar or Light Weight Express Collar. Two sizes, 13½-inch draft and 14½-inch draft. Rim and shoulder is black leather with russet face; full thong sewed rim and shoulder; wear leathers on the side of the collar to prevent hame tug from wearing the collar. Made in sizes 17 to 22 inches. **Be sure to state size wanted.** Weight, about 5½ pounds.

No. 10F3421 13½-inch draft. Price, each..... **$2.43**
No. 10F3422 14½-inch draft. Price, each..... **2.67**

HOW TO MEASURE HORSE COLLARS: Take a rule and measure inside of collar from top to bottom on the rim or front of the collar and the inside measure will be the size you want. Measure around the heavy part of collar for size of draft. Our draft measurements are given on 20-inch size collars. Smaller sizes will not measure as much and larger sizes will measure more. **BE SURE TO STATE SIZE WANTED. Sweat Pads** should be one size larger than the collar. Lay the shoulder part of the collar in about 3 inches of water for 8 to 12 hours, then buckle on the horse and be sure the hames fit the collar well. Work the horse for half a day and the collar will never make the shoulders sore and will always fit the horse. If you want extra large collars, over 22 inches, order No. 10F3439 or No. 10F3443, as these are the only collars we make larger than 22 inches. We carry 23-inch and 24-inch of these two collars in stock.

No. 10F3423 This style collar has a large sale; used extensively throughout the Southwest. Collar is made with split rim and shoulder, and russet leather face. Known as the throatless collar, built up of solid leather without stuffing in the throat. Does not choke the horse. Thong sewed rim and shoulder, heavy collar pad. Made is sizes 17 to 22 inches. **State the size collar wanted.** Weight of collar, about 6 pounds. Draft, 13½ inches. Price, each..... **$1.96**

No. 10F3425 A Black Leather Concord Collar. We make this collar in one style, and is known as the genuine Concord Collar. Made with heavy rim and shoulder, a full black collar, thong sewed rim, and thong laced shoulder, with heavy buckle and billet on top sole leather collar pad. This style collar can be used on hacks, carryalls, buggies, farm, dray or coach harness. Sizes, 17 to 22 inches. Draft, 15 inches. **State size wanted.** Weight, about 6 pounds. Price, each..... **$2.90**

No. 10F3427 We make this collar out of a high grade Dundee oak collar leather, with solid rim and full harness leather shoulder, thong sewed rim and shoulder. The stuffing in the rim of this collar is long straw. The shoulder backed up with long straw, with curled hair face as shown in small illustration. Made in sizes from 17 to 22 inches. Draft, 15 inches. **Be sure to state size wanted.** Weight, about 6½ pounds. Price, each..... **$2.99**

No. 10F4863 Comb Guard Attachment for the Wizard Head, enabling the shearer to leave from ¼ to ¾ inch of wool on the sheep's back to protect it from the sun. Price..$1.00

THE TROPIC FOOT WARMER OR CARRIAGE HEATER

DIRECTIONS, OR HOW TO USE.

The dampers on each end regulate the draft. If both end dampers are open it will get very hot. If used in a buggy or wagon under a robe the dampers should be partly opened. When used in an automobile the large damper should be very nearly closed, especially if the draft in the automobile is sufficient for the small ventilators in the heater to furnish air enough for ventilation, and if it gets too hot close all the dampers or use only a half brick of coal. The dampers should be regulated so they will not allow the heater to get hot enough to burn robes or clothes. Burns without flame. No soot, no odor. Burns any kind of prepared coal. Best results can be obtained by using the Perfect Prepared Coal listed below. Size of heater, 14x8x5 inches. Weight, about 7 pounds.

No. 10F3753 Tropic Heater, carpet covered as described above.
Price $1.25

Perfect Prepared Coal, for above heater. Fully guaranteed to burn without smoke, odor, flame or soot, and can be extinguished and relighted at any time. Put up in boxes containing 1 dozen cakes each, size 7½x ... inches. Weight, about 7 pounds.
10F3760 Price, per box of 1 dozen cakes.....59c

Williams' Special Hand Braided Bars, Strings Braided in Bars.

The strings are braided in the bars so they will not slip and pull through the bars. The bars are hand braided, which makes them very strong, and they will lie down flat on the horse's back. The strings are close enough together to keep the flies off the horse's legs. Braided end bars on each end of the net. Braided breast plate with snap to snap around the horse's breast. This net has a 5-foot body with breast piece extra; fits the average size horse. This style of net with hand braided cotton bars has one of the largest sales of any team cord net on the market. Nets similar to this with strings not so long are generally sold for $5.00 to $7.00 per pair for two horses. The cords in this net are three-ply fish cord, very strong, well made, twisted string. The hand braided bars are black and gold color, with gold color strings. Weight, about 3 pounds.

Our Seventy-String Harvest Team Net.

Made with 9-foot cotton cord stripes and 5-foot solid leather bars. You buy this net with heavy solid leather bars as cheap as you can buy a net with pieced leather bars and short strings from your dealers. This net is worth 75 cents more than a pieced bar short string net for which you will have to pay from $1.75 to $2.00. The bars are double, with the cord strings placed between the bars and well fastened with wire staples. The top and bottom bars being solid throughout, not pieced, make it one of the best and strongest cord nets on the market. Weight, 4½ pounds.

UTOMOBILE, STEAMER AND CAMPING ROBES

AUTOMOBILE DRIVING ROBES

There is a big demand for these robes all over the country because they are light, warm and useful for so many different purposes. Automobilists do not consider their machines complete without one or two of these robes; and they also make ideal fall or spring robes for buggy driving. They are extensively used by the traveling public on railroad trains, steamers, wagons and for camping purposes as well as for couch covers; and in cases of sickness, for wrapping the patient up while out on the porch. We have a fine selection of patterns and qualities as illustrated. Same qualities sell for $6.00 to $18.00. Note our very low prices. We can save you money.

No. 10F13483 The Special Plush Lined Rubber Faced Storm Lap Robe. This lap robe is made of an extra quality of rubber facing and superfine plush back. Nothing better ever made in a storm lap robe. Size, 50x72 inches. Weight, about 6½ lbs. Price, each.....$3.45

$3.15 EXTRA HEAVY SINGLE PLUSH ROBE FOR BUGGY AND CARRIAGE USE.

If you want a nice single plush buggy robe try this special $3.15 robe.

SINGLE PLUSH—Extra heavy and full raised plush face. It is as heavy as a double plush robe would be if made in two pieces. This robe at $3.15 is the greatest bargain ever offered in a full raised plush single quality robe. A very thick plush robe.

PATTERN—Deer head, braided bound edge.

COLORINGS—Red and black and seal brown pattern on one side and plain black on the other side. You will note by the weight of the robe that it is a very heavy single plush robe.

SIZE—50x60 inches. Weight, about 5½ lbs.

No. 10F14513 Price, each.....$3.15

AUTOMOBILE ROBES

CONSIDER QUALITY AND PRICE

GREEN AND FANCY COLOR SINGLE AND DOUBLE PLUSH ROBES $1.40 TO $4.97.

Our line of fine single and double green plush robes includes all the best patterns, and all sizes, from $1.40 to $4.97.

Our Gray and Fancy Color Single Plush Buggy Robe. This robe is made of soft gray and colored plush stock, bound around edges. Size, 50x60 inches. Weight, about 3 pounds.

No. 10F13459 Price, gray $1.40
No. 10F13461 Price, fancy..... 1.60

No. 10F13464 The London Special Green Plush Carriage Robe. It is a regular size plush robe, 50x60 inches, and weighs about 5½ pounds. We use as good quality of plush in it as would be used in a fancy pattern robe that would sell for about $4.00. When we make this size in plain green and black plush we can sell it for a lower price than we can a fancy pattern robe of the same quality. It is the best double robe in plain green and black plush you can buy in this size and weight. Price, each.....$2.35

No. 10F13469 The Astoria Special Extra Heavy Double Green Plush Carriage Robe. The quality of plush used in it is as good as would be used in a $4.50 fancy pattern robe. Where a robe is made in one solid color, plain green and black, we can use the same quality of plush and make a larger robe for a great deal less money than we could a fancy pattern robe. This robe is plain green plush on one side and black on the other. A good quality of raised plush. Size of robe, 50x60 inches. Weight, about 6½ pounds. The best kind of robe for everyday use; always looks neat and clean. Price, each.....$2.75

No. 10F13472 The Bisbee Special Green and Black Double Plush Carriage Robe. It is an extra large size, 54x72 inches. The quality of plush in it is as good as you would get in a $5.00 fancy pattern robe. Where a robe is made in one color, plain green and black, we can use a higher quality of plush and sell at a lower price than we can a fancy pattern robe. The Bisbee is one of our new robes, fine soft raised plush on both sides. Remember, the size is extra large and just the kind of robe for livery stable use. Weight, about 7 pounds. Price, each $3.75

No. 10F13479 American Rubber Interlined Plush Robe. Plain green plush on one side and plain black plush on the other. The quality of plush used in this robe is the same grade that would be used in a $6.00 or $7.00 robe if made in fancy pattern. We can make robes in plain green cheaper than we can in fancy patterns. Interlined with rubber cloth, making it wind and water proof. All robes with rubber interlining are very warm and strong. Remember, the size of this robe is 54x72 inches, extra large. Weight, about 12 pounds. Price, each $4.97

WHY DO WE SELL SO MANY PLUSH ROBES? BECAUSE we give more Real Value, a Better Selection of Patterns, a Richer Quality of Plush, all for Less Money than any other store in the United States.

$5.75 HEAVY RUBBER CLOTH INTERLINED ROBES. $6.75

OUR AMERICAN BISON ROBE IS ONE OF THE BEST HEAVY ROBES YOU CAN BUY. YOUR CHOICE, BROWN OR BLACK.

We guarantee the robe to be wind, water and moth proof and to outwear any skin robe that you can buy and always be soft and pliable. If you get this robe wet from snow or rain it will dry quickly and not be hard like most of the cheap fur robes. There is no robe in the world that will compete with this robe for warmth and durability at any price. You will not make any mistake in buying this robe, because it is strong, warm and better than a fur robe.

MATERIAL—The material used in this high grade American Bison Robe is a fine long carded wool and hair mixed body, woven together with a heavy double warp back, making a very strong, solid body with long curly wool face. The back of the robe is made of a very heavy astrakhan cloth, curly face, woven with extra heavy cotton warp.

LINING—An interlining of heavy rubber cloth with double row stitching around the robe and with a double pinked felt border, black and red. This robe is stronger and warmer than a fur robe.

COLOR—Plain brown curly face, black astrakhan cloth lined, red and black pinked border or black curly face. State color desired.

$9.29 IMITATION BROWN CUB BEAR ROBE.

Our Imitation Brown Cub Bear Fur Robe. This robe is made of the very finest selection of Chinese and Japanese furs, and is known to a great many as a special wolverine robe. The hides are well selected and the hair is blended in the very best shades. The dyeing of the hair does not affect the quality of the hide, as it leaves it in its natural state as it is tanned. Lined with an extra quality of fine brown plush lining with double scalloped border to match lining. Made in two sizes. Shipping weight, 8 to 11½ pounds.

No. 10F14943 Size, about 54x66 inches, measuring border, extra large. Brown plush lined. Price.....$9.29

No. 10F14948 Size, about 60x70 inches, measuring border, double extra large. Brown plush lined. Price.....$10.65

$12.50 Automobile Fur Robe.

Similar in style to No. 10F14927. Selected black imitation cub bear fur, beaver cloth lined, interlined with burlap, double felt border, extra large size, 60x70 inches. Weight, about 12 pounds. Absolutely coldproof, windproof, and stormproof. We recommend this fur robe for automobiles or driving in cold weather.

No. 10F14932 Price, beaver cloth lined.....$12.50

$18.95 Genuine Black Galloway Fur Robe.

GALLOWAY FUR ROBES are made from whole hides taken from fine black Galloway cattle. The hides are selected at the season of the year when the hair on the animal is the thickest and longest. The improved process for tanning hides with the hair on makes the hide soft and pliable and very tough. The robe is in one piece except on the edge, where it is necessary to piece it to make it square. Plush lined with a felt border. Size, 60x70 inches. Weight, about 12 pounds.

SIZE—72 inches long and extra wide, about 6 pounds.
No. 1 OF 15538 Price, each.....

COMPARISON OF PRICE AND QUALITY OF HORSE BLANKETS.

It is a very easy matter to compare our prices with the prices on other horse blankets, but this does not tell you the quality of our blankets. Lined, burlap, or duck blankets are priced according to the quality of burlap or duck, and quality of lining used in the blankets. When you buy the blanket from us you get the highest quality burlap, a better quality duck, and a higher grade of lining than you would get were you to buy a blanket at the same price from any other dealer. Remember that the size, the weight, the quality of the duck or burlap, and the quality of the lining, the way the blanket is made up, determine the value of our blankets, and considering these superior qualities in our blankets make our prices astonishingly low. Our Guaranteed Blankets are better made, stronger and warmer than you can buy from anyone else at the same price.

ABERDEEN STABLE BLANKET.

MATERIAL—Heavy mangled Irish woven Burlap, imported. Plain burlap finished lining; woven blanket filling with strong warp.
TRIMMING — Two surcingles; adjustable fasteners; stayed to the second surcingle; shield and snap front, bound neck and front; reinforced neck and shoulder, hemmed edges, full quilted.
SIZE—76 inches long, deep body. A big bargain in a burlap stable blanket. Weight, about 6 pounds.
No. 1 OF 15543 Price, each...$1.50

"STAR POINTER" HEAVY BURLAP HORSE BLANKET.

MATERIAL—Heavy jute, closely woven, fancy stripe Irish burlap, linen finish; the strongest and heaviest closely woven burlap that is used in a stable blanket.
STYLE—Cut the shape of the horse's back, fits well over the neck and shoulders and over the hips.
TRIMMING—Two wide heavy surcingles, extra long stay to the second surcingle, hemmed and turned neck, with an extra piece of burlap over the shoulders and neck, extra reinforced under the buckle and billet, adding additional strength over the shoulders of the horse; English buckle and strap.
LINING—Woven gray mixed blanket lining; eight rows of quilting fastening the lining to the blanket; bound ends, hemmed edges.
SIZE—76 inches long. Weight, about 6½ pounds.
No. 1 OF 15547 Price, each $1.79

"GENNETTE WILKS" STABLE BLANKET.

MATERIAL—Made out of No. 8 heavy fawn colored canvas. This blanket is unlined, because the quality of the canvas is heavy enough and warm enough for a good strong stable blanket without lining.
TRIMMING—Made with a wide hemmed neck, two heavy surcingles and snap front. If you want the best, strongest and most durable stable blanket you ever bought, try this one.
SIZE—76 inches. Wt., about 5½ lbs.

IMPROVED APACHE SQUARE HORSE BLANKETS.

The material used in this blanket makes it equal if not superior to an all wool horse blanket. It has proven to be a stronger blanket and has given much better satisfaction than any other quality of material that we could use in this quality blanket. Particular attention has been given to the weaving of this blanket. The combination of body and border makes it one of the best horse blankets you can buy and our price is about one-half the price you would have to pay if made entirely of wool. Dark gray body with fancy combination colors through the body and wide heading. This blanket is entirely new and something different from any blanket we have ever listed. Made in two sizes.

No. 10F16418 Size, 84x90 inches. Weight, about 7 pounds. Price, each....$2.40

No. 10F16417 Size, 90x96 inches. Weight, about 9 pounds. Price, each....$2.80

"CHEROKEE PRINCE" HORSE BLANKETS.

A high grade well made Horse Blanket. The style, the quality of the material and the great value we give make this blanket one of the best values you can buy. It looks and has the feeling of a strictly all wool horse blanket and very few people can tell the difference between this and a strictly all wool blanket. This blanket is very popular and thousands are used. Made in one style, two sizes, two beautiful colored bodies: **Blue body** with fancy stripes and running heading and **red body** with beautiful stripes and shaded heading.

No. 10F16447 Red body. Size, 80x84 inches. Weight, about 6 pounds. Price, each.....$2.35

No. 10F16454 Blue body. Size, 84x90 inches. Weight, about 7 pounds. Price, each.....$2.69

"JERSEY LILY" SQUARE HORSE BLANKETS.

This is not an all wool blanket but the quality of the material, the way the blanket is made, the extra heavy double warp giving it double strength, make it just as good a blanket for everyday use as if it were made of all wool stock. This blanket is less than one-half the price of an all wool blanket and where you can get the wearing quality and appearance for one-half the price you save the money and get a blanket that answers all practical purposes. Made in two sizes and two colored patterns.

No. 10F16449 Wine colored body with rich deep heading of old gold, blue, lemon, black and white, with body stripes of the same colors. Size, 80x84 inches. Weight, about 6 pounds. Price, each.....$2.30

No. 10F16458 Fawn colored body with rich combination heading of seal brown, red, orange, green and black; body stripes of same color. Size, 84x90 inches. Weight about 7 pounds. Price, each.....$2.60
